perance union at once flung itself into the battle. They formed a Juan Cruz defense committee, composed of Mrs. H. H. Byrd, Mrs. Katherine B. Patterson, Miss Clara True, Miss Mary T. Bryan, and vowed Cruz should not hang. A public appeal for funds was sent out. The newspapers took up the matter. Mr. J. B. Crist, one of the most brilliant criminal lawyers in New Mexico, was employed to defend the young Indian.

The widespread interest in the defense of Cruz attracted the notice of Commissioner Robert G. Valentine, head of the Indian department, who was, as has been said, a stanch friend of Pussyfoot, and who had been away on sick leave. Valentine had once received a communication from Johnson when the sleuth was in prison upon some trumped-up charge or other, and had wired back:

"As you know, I am with you to the limit, in prison or out."

Mr. Valentine now interested himself in the matter by not only immediately reversing the order of Assistant Commissioner Abbott, but in sending Johnson instructions to do everything in his power to help the boy. Johnson had done that already. He had written to the defense committee to the following effect:

"Referring to our conversation of the other day in the matter of Jean Cruz, I must repeat that, under instructions from Assistant Commissioner Abbott, I cannot take part in his defense. This of course does not bar me from contributing personally to the fund raised for employment of counsel for his defense. I therefore, enclose my personal check for $50 toward the fund.

"The thing lies heavily upon my heart. For six month Juan gave splendid aid to my officers in suppressing the liquor traffic among the Pueblos, of whom he is one. And when our appropriation ran low this boy became one of a band of the finest Indians I ever saw to work for the rescue of their fellow-Indians, at their own expense.

"Cruz is one of the finest type of young Indian men I have ever known. Father Camillo Snex, his pastor, speaks in the highest terms of Juan; so do the merchants in the vicinity; so does my good friend Father Hoelterman, who knows every Indian in that valley, and who has lived with them, worked with them, prayed with them and fought with them for a dozen years."

On receipt of Commissioner Valentine's orders abrogating those of Assistant Commissioner Abbott, Johnson hurried to Santa Fe and took up the defense with all his might. Never was a defense more vigorously conducted. In the court room, beside Mr. Crist, for the defense, sat David U. Leahy of Las Cruces, the United States attorney who had been detailed, at Johnson's request, to assist him. Juan's young wife Dolorita, and his baby, Jose, were in a corner of the court room. Adjoining the judge's bench and opposite the jury was a delegation of ladies from Santa Fe, and a score of the most prominent women of northern New Mexico. On the front bench sat the veteran Francisco Naranjo, the president of the federation of 6,000 Pueblo Indians, and a veteran fighter and reformer on behalf of his people.

"We know it will all come right," said the Indian. "I know that Mr. Johnson will bring Juan back to me," said Dolorita, the wife of the accused boy. "It doesn't matter. The whole thing is in God's hands. I am merely doing his work," said Juan himself to a charitable woman, who, when the future looked very dark indeed, went to the cell in which he was confined and began talking to him in an endeavor to prepare him for the worst.

The lawyers for the defense talked all around the prosecution, and the decision, which occupied the [illegible]

Juan free—upon a technicality, true, but still free.

In Oklahoma Johnson had downed his enemies. In New Mexico they "got" him. Refused deputies, helpless to prosecute his work further, he laid down his office. "I refused to be chloroformed," he wrote, explaining his resignation, "but these men finally got me so bottled up that I could do but little except to mark time and draw my salary. I saw no other way to maintain my self-respect except to resign."

One of Johnson's most sensational exploits was his digging up some old, forgotten Indian treaties by virtue of which he drove the liquor traffic off the reservations in Minnesota, a one-man prohibition campaign which attracted wide notice to him. During his five years of service he became a national character. His courage, his initiative, his sense of humor, the strong humanity of the man, combined to make him an original and picturesque figure wherever he goes. This country cannot well spare such men from her public services while the greed for gain inspires the violation of its laws.

Innocent Bystanders.

Innocent bystanders probably work for a living like other honest people, but they spend lots of time hanging around street riots and gun fights. An innocent bystander will very often take two hours off at lunch time hunting up a fight or fire to hang around. Every innocent bystander knows that some day his turn will come and he is never able to kiss his wife and children good-bye as he marches away. Innocent bystanders are the real heroes of daily life and a day of the year should be set aside for their celebration. Schoolchildren should be made to march through the streets in parade escorting a barge whereon is depicted in tableau an innocent bystander's death by a stray brick. The boys in the fifth reader could do the riot scene with spirit. An innocent bystander not long ago, painfully though not seriously injured by a misdirected club, howled with hideous curses. Which shows that innocent bystanders are not always so innocent.—Detroit Journal.

Fires That Put Themselves Out.

There are numerous instances of record in which a fire has been the means of extinguishing itself. These examples of spontaneous incombustion are not infrequent, even apart from those cases in which it occurs through the agency of automatic sprinklers.

A fire in a church in Boston, caused by "spontaneous ignition" in a storeroom, melted the lead water pipes, and the water issuing from them extinguished the fire.

Not very long ago some waste left upon the top of a steam pump at Watertown, N. Y., blazed from "spontaneous ignition," and this in turn set fire to the lagging round the steam cylinders and the feed pipe, where it melted the soldered attachments of a continuous automatic oiler. The steam from the feed pipe was discharged through the small tubes leading to the oiler, and extinguished the fire.

Linseed Oil for Dying Trees.

A curious method of reviving languishing or dying trees was reported recently to the French Academy of Agriculture, after being tested successfully in experimental gardens at Autun, according to the April Popular Mechanics Magazine. The earth was first removed so as to lay bare the larger root branches, in which longitudinal slits were then cut and kept open by wedges. These cuts were well rubbed with linseed oil, and after a while numerous small roots appeared, forming a sort of fur, and the trees [illegible] life and vigor. [illegible] method was recommended [illegible]

Dr. F. H. Gambell, 'phone No. 140. Thief River Falls. Minn.

Dance at Ole Geving's Saturday eve. Everybody welcome.

Wm McKenzie of Erie was a business visitor in town Wednesday.

FOR SALE—The E½ ofS¼ Town of Reiner. John M. Anderson, owner.

C. O. Elg of Erie was a business visitor in Thief River Falls Friday.

M. O. Seavey traded off one of his Ford cars this week for an auto truck.

M. O. Seavey is enjoying a visit from his father.

Mrs. Pat Brick and her mother, Mrs. Dempsey, were Thief River Falls visitor Monday.

Lloyd Ferdinandson made a trip to Plummer Saturday with a horse for M. O. Seavey.

Ed Singer and Joe Stangl of Erie were business visitors in town Wednesday.

Steuart McLeod and Alfred Tvedt left Sunday to work on the state road which is being built east of here.

Mrs. Kusmak left for Lakefield, Minn., being called there by the sickness of her mother, Mrs. Gordon.

John and Martin Anderson of Erie were Goodridge visitors Wednesday afternoon.

C. J. Robertson of Sleepy Eye, Minn. arrived Tuesday evening for a visit at the McLeod home west of town.

Editor W. G. Hunt of the Sunbeam was transacting business in town Tuesday.

Dave Gustafson of Thief River Falls was transacting business in town Tuesday.

T. G. Reep of Thief River Falls was a business visitor in this vicinity Tuesday.

P. P and Will Korstad of High Landing were Goodridge visitors Wednesday afternoon.

Christ Wold of Kratka was in town Tuesday and Wednesday wiring the downstairs of the hotel for electric lights.

The Eastern Star Ladies Aid will hold their Auction Sale in the Dahlen district June 26th, 1917. District No. 1. Everybody welcome.

Rev. O. P. Stavaas will conduct services in the Synod church here Sunday afternoon at 3 p. m. Every one welcome.

ESTRAYED—From Ole O. Sunsdahl place, 9 head of young cattle, 4, 2 year old heifers, 1 red bull, 1 year old, other yearlings red and white spotted.

Several horses were killed during the thunder storm Sunday evening. C. O. Elg of Erie lost two and Jay Payne one.

Some one who must have been hard up for a few pianks stole some planks across the ditch between Mon Vaughan's and J. M. Johnson's farms, about a week ago.

Henry Arndt of High Landing left Saturday afternoon for Rochester, Minn., being called there by the death of his brother. He was accompanied by his daughter, Stella.

Work on the continuation of the state road which runs east from Thief River Falls for 20 miles is progressing nicely. L. Krohn who has the contract is doing a fine job and any township that figures on doing any road work would do well to follow the style of road being built by Mr. Krohn.

Martin Anderson has been busy putting up poles from Silverton north for the Adger Telephone Co. Mr. Anderson, who is agent for the American Electric Telephone Co. sold the company the material and phones. He left Wednesday for Thief River Falls to see if the construction material had arrived

D. J. Gavin of Mavie was a Goodridge visitor Tuesday evening.

George and Albert Schwandt of Mavie were visitors in town Wednesday.

Herb Johnson of Strandquist was shaking hands with old friends in town Sunday.

Herb Race left Thursday for Minneapolis where he will attend a summer course at the university.

City and Farm Property for sale. Goodridge Land Co. Call at the Farmers State BanK.

Rev. Fr. Noesen will conduct services in St. Ann's Catholic church here Tuesday June 26th.

John Anderson of Erie sold seven head of cattle to N. T. Jorgenson, Tuesday.

P. P. Palmer, C. H. Rossmon and ye Editor made an auto trip to Warren Friday to attend to business matters.

Alvin Rattke and Hugo Menzel were Saturday evening visitors in Thief River Falls.

Lee Babcock. the genial conductor on the electric line is all smiles these days as a baby girl arrived at his home Monday.

J. P. Jensen, Chester Tvedt and H. W. Smith took in the sights at Thief River Falls Saturday evening.

Prof. A. O. Halvorson left Sunday evening for the twin cities where he will attend a summer course at the university.

Mr. and Mrs. Even Rowberg, Mrs. L. K. Rowberg and Conard Rowberg arrived here Saturday by automobile from Hanley Falls, Minn. for a visit at the Chris Urdahl and Edwin Rowberg homes.

Mr. and Mrs. Carl Christianson and Mr. and Mr. and Mr. P. O. Tvedt autoed to Ada Saturday to visit with friends and relatives. They returned Monday.

Will sell or exchange for property in Thief River Falls the following land, Lot 4 in Section 30 and Lots 1, 2, 3 and NE¼ SW¼ in Sections 31-155-39.

H. O. Kjomme, Thief River Falls, Minnesota.

Mr. Mrs. Ole Kirkhe, Oscar Gran and Miss Mabel Johnson left Saturday via the auto route for Hawley, Minn., to visit with friends. They also visited Barnesville and Fergus Falls. They returned Tuesday.

Scrap Iron Wanted.

Until June 25th. I will pay 7.00 per ton as I have a contract with the Thief River Hide & Fur Co., which expires about that time.

C. H. Rossmon.

Stallion.

Will make the following stands with my fullblood Percheron stallion maximus 42170.

C. Elg, Erie, Monday
Edwin Hanson, Tuesday afternoon and Wednesday forenoon.
Ole A. Olsen, Reiner, Thursday
Reson and Yohn Livery barn, Saturday

Why not breed to a good horse and get a colt worth at least $25. to $50.00 more than a colt from a grade or scrub horse when of selling age.

S. Lysbakken.

Bids Wanted.

The Village Council of the Village of Goodridge will receive bids on Monday June 18th at 8 p. m., from tractor owners, for grading six blocks of road within the village.

The Council reserves the right to reject any or all bids.

Carl Christianson,
Village Recorder.

NOTICE.

Farmers are hereby requested to cut the weeds and brush and haul the stones away from the road and ditch side adjoining their land, within the town of Reiner, by Oct. 1st., 1917, otherwise the town will do the work and charge it against the land.

By order of Town Board
T. Morken, Clerk.

NOTICE.

Farmers are hereby requested to cut the weeds and brush and haul the stones away from the road and ditch side adjoining their land, within the town of Goodridge, by Oct. 1st, 1917, otherwise the town will do the work and charge it against the land.

By order of Town Board,
Nicoly Urdahl, Clerk.

First Game of Season

The Goodridge Baseball team played their first game of the season Sunday when they crossed bats with the St. Hilaire team on the home diamond, and met with defeat by a score of 10 to 3. Both sides played good ball with the exception of two innings. In the first inning St. Hilaire ran in three scores while Goodridge got nothing. No scores were made in the second inning but in the third Goodridge ran in one lone score. Neither side scored again until the ninth when the visitors ran in seven scores while Goodridge only got two.

Altho the locals put up a fairly good fight it was plainly seen that they were sadly in need of more practise especially in batting. Sunday's game might have resulted in a different score had the locals been a little heavier on the hit.

Goodridge will play St. Hilairs again at Thief River Falls on the Fourth of July.

Hoover Endorses Plan.

Herbert C. Hoover, of Washington' the man chosen by President Wilson to head the newly organized Food Administration Department, not only endorses the plan of turnin the Minnesota State Fair, Sept. 3 to 8, into a "Food Training Camp" in the voluntary service of the government, but intends to cooperate with the fair in making it a success, as soon as Congress vests him with the necessary authority.

"I am much impressed with the plan of turning the Minnesota State Fair into a "Food Training Camp," said Mr. Hoover, in an interview today." "Though hampered at the present time by the fact that Congress has not yet given my work an official status, I wish it to be known that I plan to get in touch with the leading fairs immediately after authority is given me and work out some definite cooperative plan."

The indorsement given the Food Training Camp movement of the Minnesota State Fair by Mr. Hoover assures active cooperation from the government. The fair management will take up the question of direct cooperation as soon as Congress has acted. It is believed that many definite arrangements for exhibits, demonstrations and lectures bearing upon the food conservation problem can be worked out.

Exhibitors are already beginning to plan exhibits with a "war" turn to them, since it has commenced to be generally known that the Minnesota State Fair is to exert every effort to assist the government in its food production and food conservation movement.

The Navy Department through Lieutenant Commander James D. Willson, recruiting officer for the Northwest, sent a second "Primer of Service" for the young men of the Northwest to read. It says:

Is the Navy Now on the fighting line?
Yes.
Has the Navy all the men it needs?
No.
Does the Navy need more men now?
Yes, thousands.
Where can I find out about the Navy?

Post Office Building.

Advantages In Using The Silo.

Silage furnishes an almost sure feed supply. There is no surer crop in Minnesota than corn.

The silo provides a means of keeping over, for summer use, feed of high quality.

Three and seven-tenths acres of corn put into the silo furnishes as much feed as 5-8 acres of similar corn cut and shocked.

A corn crop of 35 bushels to the acre will give about 7 tons of silage to the acre, with a gain of $11 an acre over husking from the standing stalks.

The silo increases the livestock carrying cafacity of the farm.

It provides storage for the whole corn plant when it is at its higest feeding value, and in handy form for both winter and summer feeding.

Silage stimulates and improves digestion during the dry-feeding period, and keeps cattle thrifty and fresh.

Encourage Sheep Raising.

In an effort to interest farmers in farmers in this territory in the raising of more sheep, not only because of the tremendous rise in the price of mutton but because of the pressing need for more wool to be used in the manufacture of blankets and clothing for our soldiers, the Minnesota State Fair, which is to be held Sept. 3 to 8, is offering liberal premiums to owners of pure-bred sheep of the leading breeds.

So much wool is to be required in the making of uniforms, socks, overcoats, blankets and other parts of the army equipment, despite the fact that the number of sheep in this country has steadily decreased since 1909, that it is feared a wool famine will result. Sheep production in many of the warring nations which have been supplying this country with wool has fallen off to such an extent that it is difficult to buy wool abroad. It was stated by a noted authority recently that sheep production in France decreased nearly forty per cent since the opening of the war.

Although it is generally known, census figures show that the averge sheep has increased in value over forty per cent in the last year. On January 1, 1916, the average value of a sheep in this country was $5.17. On January 1, 1917, the average value of a sheep had soared to $7.14. Sheep values are are still on the jump, and it is not known how far they will go. Live sheep are bringing from twelve to thirteen cents a pound, and wool of good quality is selling for fifty cents a pound.

As a food training camp in the voluntary service of the government, the Minnesota State Fair is attempting to assist in overcoming this crisis by inducing leading breeders of sheep to bring their finest animals for private sale to farmers in this territory. A special appeal has been issued to local breeders. Sheep specialists believe that sheep can be grown at a big profit in this part of the country, and every attempt will be made by the fair to induce local farmers to purchase breeding stock. The Department of Agriculture at Washington' mindful of the need for more sheep, approves of the action of the fair.

The Minnesota State Fair is offering $3,950 in premiums for sheep. The following breeds are recognized: Merino, Rambouillet, Southdown Shropshire, Oxford Down, Hampshire, Dorset, Liecester, Cheviot, Lincoln, Cotswold. Premiums offered for wool aggregate $200. A premium list may be obtained by addressing Thomas H. Canfield, Secretary State Fair Grounds St. Paul, Minn.

CORNFOR FODDER

SOWN JULY FIRST.

Fodder corn planted as late as July 1 will yield three tons or more of dry forage an acre.

Millet as a late-sown crop comes next to corn for a forage. To get the best quality of hay millet must be cut just as the heads began to appear. If left until fully headed out, the stalks are more woody and the formation of seed reduces its value for general livestock feeding.

Every farmer should provide for an abundance of rough feed. It will keep and if not used will sell readily.—C. P. Bull, University Farm.

MORE BEANS.

(National Crop Improvement Service.)

A farmer in Hubbard Co., Minn., planted twenty acres of beans from which he received 377 bushels, selling them in the field for $1,195. This is not the highest record.

The Michigan men and the Colorado men and, in fact, all states are turning to beans with a great deal of success.

There are three main principles to be observed in the control of weeds. They are: first, preventing the weeds from going to seed on the farm; second, preventing the weed seeds being brought to the farm, and third, in the case of perennials, starving out the underground parts by preventing them from making top growth.

VALUE OF STRAW.

(National Crop Improvement Service.)

Don't burn that straw stack. You might just as well burn up dollar bills. In addition to returning actual fertilizing elements to the soil, it adds a large quantity of immensely valuable humus, if carefully spread over the fields.

Summer Meetings To Be Big Events.

Thousands will attend the summer meetings of the Red River Valley Development Association and the Red River Valley Live Stock Breeders' Association at Red Lake Falls, Wednesday and Thursday, June 27 and 28. Every county in the Valley is planning to send large delegations to the meeting and a fine time is assured for all Automobiles will bring thousands of people if the weather is fair for the roads to Red Lake Falls are in excellent condition.

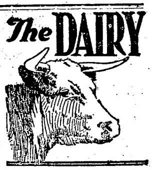
Pres. Louis W. Hill of the Great Northern; J. D. Clarkson, general manager of the Jefferson Highway, premier Norris of Manitoba, Ex-Mayor Waugh of Winnipeg, Commissioner Thos. Johnson of Winnipeg, Col. C. W. Ames of the Minnesota Public Safety Commission, Prof. C. W. Gay of the Minnesota Agricultural College, Prof. Wm. Dietrich of the Crookston Agricultural College, Mrs. Wm. Russell, president of the Ninth District Federation of Women's Clubs. Miss Josephine Berry of the University of Minnesota and many other noted speakers will be present.

The Red-Path Vawter Chautauqua will be held in Red Lake Falls on the same days and a high class entertainment is assured, at every performance. Music will be furnished by the Oklee and Plummer Bands, the Crookston Juvenile Band and the Liberty Girls Drum Corps of Crookston.

The local committees are bending every energy towards preparing for the big event and no stone will be left unturned to make the meetings the largest and most successful ever held in the Valley. Thursday a delegation from the Red Lake Falls Commercial Club visited the Pennington County Farmers' picnic at St. Hilaire and were promised a large delegation from that county. Saturday a big delegation visited the co-operative picnic at Oklee and another delegation to the Farmers' Clubs picnic at Argyle and were promised large crowds. And so from every town in the Valley with whom the local club has been in communication—all will send crowds to the meetings at Red Lake Falls.

The Commercial Club is making arrangements to provide rooms for all the visitors who attend and there will be no lack of accomodations. The members of the Reception Committee will wear red badges so they may be easily indentified. This committee is also a bureau of information and will give you any information you desire A free rest room for ladies will be established in the basement of the Court House and every provision made foa their entertainment.

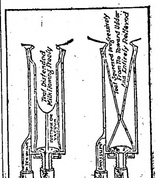
These will be the biggest meeting ever held by the associations and every booster for the Red River Valley should plan to attend. Make up your party now and be there for the fun. For further information write or telephone Sam E. Hunt, president of the Red Lake Falls Commercial Club.



GIVING AN UPWARD SQUEEZE

Illustration Given Herewith Shows How One of Standard Milk Machines Is Operated.

The drawing shown here illustrates how one of the standard milking machines draws the milk from the cow's teat. Any method of drawing the milk from the udder down through the teat also tends to draw blood from the veins of the udder down into the smaller veins of the teat. It is necessary that something shall keep massaging this blood back from the teat, so that it will continue in circulation. The comfortable upward squeeze does exactly this. This squeeze is adjustable, so that the operator, by turning a little lever, can give a heavier squeeze to a big-teated cow and a lighter squeeze to a small-teated cow. Thus each cow gets just the squeeze needed in her individual case—a feature that makes each cow give her maximum.



Teat Distended Milk Flowing Freely
Teat Squeezed Progressively from Tip Toward Udder and Entirely Relieved
SUCTION OR VACUUM
PRESSURE

Machine in Operation.

When the calf milks, its tongue has a squeezing action on the teat, the same as your tongue does if you place your finger in your mouth and suck it. This squeezing action of the calf's tongue keeps the blood in the teat in circulation. If the calf stopped squeezing, just sucked each swallow, it would slowly suck so much blood down into the veins of the teat that the teat would appear red and swollen.—Farmers Mail and Breeze.

Overlooked a Few.

MAY SOON LEAD IN SHIPBUILDING

United States to Surpass All Previous Records Made by Any Nation.

PROGRAM TO BE EXPANDED

One Thousand Wooden Ships of About 3,000 Tons Each Contracted For—May Use Lake Vessels for Deep Sea.

New York.—The first of the wooden fleet "to bridge the Atlantic" will probably be launched on the Passaic river at Newark, N. J., about August 1.

It will be followed by others at dozens of yards in different sections of the country, until the government program of 1,000 wooden vessels of about 3,000 tons each is completed. It is likely this program will be steadily expanded also if the war continues to rage.

In addition to the 3,000,000 tons of the government carrying fleet, more than 2,000,000 tons of steel or wooden merchant vessels are being built or have been contracted for to be built in American shipyards.

Should the present movement continue, the United States will soon be the leading shipbuilding nation of the world; indeed, it will surpass all previous records by any nation.

Including vessels built for American owners, foreign owners, undisclosed owners and builders' accounts, adapted for deep sea service, it is estimated that there are 644 in course of construction or contracted for, with an estimated tonnage of 2,394,131. These figures are exclusive of ships under construction for the navy department, oil and molasses tankers, vessels constructed for use on the Great Lakes, and those under 500 tons.

May Use Lake Vessels.

Of this amount of tonnage more than 300,000 tons already have been launched, about 70,000 tons are scheduled to be launched this spring, about 177,000 tons to be launched during the summer, about 210,000 tons launched next fall, more than 600,000 tons launched next winter and more than 900,000 tons launched and completed in 1918.

Of the vessels built for service on the Great Lakes, approximately 70,000 tons, a number of these could in an emergency be used for deep sea commerce.

One of the largest of the new plants will be built for the Baltimore Dry Dock and Shipbuilding company. The plans call for the construction of one of the largest shipbuilding and repair plants on the Atlantic coast. The company has an option on a site at Baltimore. The new plant will cost more than $2,000,000, and will furnish employment to 2,000 additional men.

On April 1 of this year there were in the United States 152 shipyards, marine engine, and boiler shops, and 238 repair plants, including dry docks and marine railways.

Some idea of what the shipbuilding capacity of Great Britain is may be gleaned from the fact that at the beginning of the war, exclusive of the plants in her colonies, she had 453 shipyards, marine engine and boiler shops, while her repair plants included 572 dry docks and marine railways.

Since the first of the year orders for new ships have swamped the builders. The Bethlehem Steel company in its various subsidiary yards is building more than 175 vessels.

In the case of the Hanlon Dry Dock and Shipbuilding company of Oakland, Cal., on January 1 its employees numbered 350. It has so many contracts for vessels now that it is enlarging its plant to such an extent that by June 1 it will have 2,500 men at work.

To Build 1,000 Ships.

On April 13, 35 shipbuilders called at the offices of the federal shipping board at Washington and signed contracts for a large number of the 1,000 wooden vessels of 3,000 tons each which the United States government, under the direction of Maj. Gen. George W. Goethals will have constructed.

There has been leased to the government and to the Foundation company a tract of 55 acres of land in the Newark Meadows, with a frontage of 1,650 feet on the Passaic river, for the location of an immense shipyard.

The Foundation company has received a large contract for the construction of the fleet of ships for the American merchant marine.

Under the company's contract the first vessels must be completed by August 1 of this year. After this date the company expects to turn out one ship every ten days. The second vessels should be finished by August 11, the third August 21 and so on, as the contract states, "as long as the war shall last."

[illegible]

[National Crop Improvement Service.]

A farmer who has devoted his lifetime to the study of feeding generally has more success through his common sense methods than any scientific analysis can supply. If such a feeder could have on hand all of the ingredients (most by-products of cereal manufacture), which according to the market at the time would be more economical, he could, through his experience, be very successful in mixing his feeds. But the difficulty with the average man is to maintain an economical ration from the products of his own farm.

He may be an expert, if he chooses to study out a new ration every time the market changes, but he generally prefers to let someone who makes a business of mixing feeds do it for him. No doubt the majority of users of mixed feeds begin to buy it because of a shortage of forage and grain crops on the farm.

If such a man will keep books he will find that as a usual thing the use of mixed stock feed is a mere matter of arithmetic whether he could buy the ingredients cheaper than he could buy them in a so-called "balanced" ration.

MUST TASTE GOOD.

[National Crop Improvement Service.]

A dairy ration must, of all things, be palatable so that a cow will eat it. It must be bulky and coarse so as to avoid indigestion and sickness. It must contain a variety of foods so that the cow will not tire of it or get off her feed. It must contain enough real protein—all protein is not alike. It must contain the right amounts and kinds of mineral substances necessary to life, health and milk secretion. It must be highly digestible. Many feeds are only about fifty to sixty per cent digestible and the work of excreting so much waste matter is costly in that it uses up the energy of the food to do it.

SUCCESSFUL FEEDING.

[National Crop Improvement Service.]

It is most significant and probably the best argument for mixed feeds when it is considered that a large number of the most prominent and skilled men in America have discarded their own mixed feeds and rations because they have found a satisfactory brand of feed which will make as much milk at less cost and no trouble and, above all, keeps cows in perfect health.

Many agricultural schools and experiment stations use and have used them for the same reason.

You can verify this by writing to any experiment station and they will give you the names of mixed brands which are best adapted to your purpose.

FIVE POUNDS OF MILK ON ONE POUND OF GRAIN.

[National Crop Improvement Service.]

C. H. Packard, of Delavan, Wisconsin, a progressive and practical dairyman, was not satisfied with his ration of home-grown feed. Although he mixed his ration with brains and it seemed to be theoretically correct, he thought he would try out his own mixture in comparison with a first class dairy feed. Much to his surprise he found that he could save about five lbs. of grain per cow per day and nearly 5 cents per cow. He figured his own grain at prices much below the wholesale market and bought his mixed feed at retail.

Also when his ration was figured according to Armsby or Energy method his mixed feed proved to be the right combination to make a balanced ration with his own farm roughage.

EXPENSIVE PASTURE.

[National Crop Improvement Service.]

When you stop to consider that an acre of pasture will feed a cow, but that that same acre will raise ten tons of silage during the time the cow is feeding on it, it would seem that a grass cafeteria would be the most expensive way to feed your stock.

MORE FEED, MORE MILK.

[National Crop Improvement Service.]

Cows of a decided dairy type will return the greatest profit when fed to their full capacity.—Nebraska Experiment Station.

[National Crop Improvement Service.]

Ordinarily, silage will correct the tendency to costiveness. When it is not sufficiently effective for this purpose, add enough old process oil meal to keep the droppings moderately soft, but not necessarily loose. Usually all that is needed is to increase the allowance of concentrates.

There are always two sides to every question. If the government insists on more bran in flour, bossy will have to turn to still more artificial bran.

Wheat bran is a dear feed. Barley and rye by-products are more economical.

Poverty holds a mortgage on the feeder who can see nothing but the price. Some feeds are as cheap at $50 as other at $25 per ton.

When you buy hay for cows it usually costs more than grain by-products, although it costs half as much per ton.

[National Crop Improvement Service.]

It is a fair assumption that any farmer who talks against mixed feeds does not know what a mixed feed ought to be. There is no danger of any man buying a fraudulent feed. The state laws are very stringent on this point and if any man has any doubt as to the value of a feed, all he has to do is to write his State Experiment Station and get the truth.

STARVATION IN GERMANY PROVEN

English Woman, Interned Until Recently, Tells of Conditions as She Saw Them.

HEALTH OF PEOPLE IMPAIRED

Impossible, She Says, for Germany to Hold Out Much Longer—Food Riots Are Becoming Worse and Worse.

London.—That it is impossible for Germany to hold out much longer is the considered opinion of the wife of an Englishman who for the whole period of the war up till now, has been interned at Ruhleben, and who herself within the last two or three weeks has been permitted by the German authorities to return to the land of her birth. Her knowledge of Germany is especially thorough, as she has resided there with her husband, who was associated with a commercial house, for nearly twenty years; and her account of the conditions of the country when she left last month is so balanced and restrained as to carry full conviction of its truth.

"The people," she said, "are starving, and yet most of them think that if they hold out they will be the victors. Only defeats on the battlefield will bring it home to them that their starving is no good, and then they will turn round upon their government.

"My husband and I, after so long a stay in Germany, were on the point of returning to England in September, 1914, when the war broke out in August, and then there was no chance to get away. We had to give up our pretty home and go into the interior of the country, whence he was taken to Ruhleben, where he has been ever since. For the first two years wives situated like myself were not allowed to see their husbands and it was not until June, 1916, that I met mine for the first time after his arrest. You can perhaps imagine the shock I got when I saw him again—thin and hollow-cheeked, as he had lost 45 pounds while in the camp. After that we were allowed to visit every three months for two hours, which was better than nothing at all, especially to me, as I had a brother also there and many others I knew.

Money Is Held Back.

"I held out, as long as I possibly could because then I could occasionally see my husband, and besides I had money, which, as soon as I came over the frontier, I had not. No one was allowed to take out of the country more than 200 marks, which should be worth $50; but when I crossed the change came to not much more than $25. Thanks to the help of friends, I am now being financed in a small way, but I am only too thankful for this, because things are so distressingly bad in Germany that I am much afraid we should be starving if we still were there. The food riots are becoming worse and worse, and every one knows the worst times are yet to come. These will be in May and June, until some of the new crops are available; but if they eat these as soon as they come out of the ground there will be none for the coming winter. And what then?

"That is why there were many Germans I knew who envied me for being able to leave the country, where things are going from bad to worse as the weeks pass on. Now, it seems, the bread rations have been made smaller, instead of larger as was promised to the people some months ago, and it is less than three and a half pounds a head per fortnight, and very poor stuff at that, it being made chiefly of swedes. The largest amount of meat allowed per head weekly is one-half pound, including bone, and for the last seven months we in —— did not see anything in the shape of pork, bacon, lard or any other fat. The fat problem, of course, is for the Germans the worst. All we saw in that way for the last seven or eight months was about three ounces of butter a head per week, and there were many towns that were allowed only half that weight and even less. You can get nothing unless you have plenty of money. Jam—dreadful stuff it is—costs 1.50 mark a pound and one can get only half a pound of that every fortnight—and the same with coffee.

"You can imagine that, with this slight amount of nourishment, the health of the people as a whole is giving way. Of course the rich can now and then get extras, such as a small fowl of from two and a half to three pounds for from $2.50 to $3, while at Christmas geese were bought at prices up to $50 and $75, and there were folks who were glad to have them even at that price. Foreign lard can now and again be had at $2.50 a pound, but there are very few who can buy that.

No More Sugar.

"All sweet shops were closing down when I left, as there was no more sugar to make sweetmeats, and chocolate and cocoa were not to be had the last three or four months. Milk was hardly to be had any more, and, in fact, there are many towns which have not seen a drop of milk for weeks and weeks, and when I came away last month it was publicly known that in April and May there would be hardly any meat or milk to be had and the shortage would be [illegible] one piece of toilet soap, costing about half a dollar, was allowed a month. Coals were very short when I left, and one could get only a hundredweight at a time and then fetch it oneself and wait two or three hours for it.

"Clothing was also giving out, and every article, from a handkerchief to a coat, was very scarce, while one could not get a new dress without giving up an old one in exchange. I have met many there who said, 'We cannot exist in this way and we must give in. Whoever says we can live on these rations has secret stocks to fall back upon'. That may be so, but I am sure the German people as a whole do not yet believe they will be starved into submission."

"DYNAMITE JOHNNY" O'BRIEN

It falls to the lot of few men to celebrate their eightieth birthday, much less when a man has led a life of adventure, has been mixed up in practically every revolution within the last sixty years in Central and South America, and has braved death hundreds of times.

But such is the lot of Capt. John (Dynamite Johnny) O'Brien, who recently celebrated the passing of his eightieth year at the Hotel McAlpin in New York. In honor of his birthday, President Menocal of Cuba ordered Victor Hugo Barranco, Cuban representative in New York to entertain the captain at an elaborate dinner.

"Dynamite Johnny" was the real thing in adventure, the dynamite and munition artist in more than one Honduran, Panamanian, Haytien and Cuban revolution. It was he who, in 1896, took a shipload of dynamite and munitions to General Garcia, the Cuban insurrecto. He accompanied the late General Funston on a Cuban expedition before Funston was identified with the United States army. Richard Harding Davis and O. Henry wrote scores of stories with "Dynamite Johnny" as the hero.

BELL FROM SPAIN UNEARTHED

It Was Brought to This Country From Europe About Two Hundred Years Ago.

Yuma, Ariz.—While digging a well on an irrigated farm near here an ancient copper bell, which is believed to have been brought over from Spain more than 200 years ago, was unearthed. The bell weighs about 200 pounds, and was found several feet beneath the surface. According to the tradition of aged Mexicans here the bell probably came from the old mission church Conception Immaculada, and around it at one time was quite a large settlement. The town and church were destroyed in the year 1781 by the Yuma Indians.

PLOWS UP BEAUTIFUL CITY LAWNS FOR CROPS

Venice, Cal.—Venice has sacrificed her municipal pride to combat high food prices. The city commissioners have ordered the beautiful lawn and gardens around the new city hall plowed up and planted to potatoes. In addition, all vacant property owned by the city is to be put under cultivation and Mayor Lewis has started a movement to have private individuals give their vacant land for garden purposes. The city of Venice will furnish the seed, high-school students will cultivate the gardens and the fire department will irrigate them free of charge.

War Kills Free Lunch.

Chicago.—Free lunch in Chicago saloons is no more.

Following the decision of loop barroom owners to charge five cents for sandwiches, saloon men in other sections of the city have fallen in line. War prices are given as the reason for departure from the time-honored custom.

DISEASE OF IRISH POTATOES

Scab, Most Common Trouble, Can Be Almost Eliminated by Soaking Seed in Formaldehyde.

One of the most common diseases of any field crop is the scab of the Irish potato. This disease can be almost eliminated by soaking the planting seed in formaldehyde, and planting in ground that is free from the disease. The formaldehyde may be obtained at any drug store. Mix one pint of the substance 40 per cent with 30 gallons water. Before cutting the potato and just before you are ready to plant soak them in this solution for one and one-half to two hours. Do not let potatoes come in contact with sacks which have contained diseased potatoes. All of the potatoes should be soaked immediately as the solution loses strength if allowed to stand several days. It is so little trouble to soak potatoes in this solution that it is utterly foolish to plant them without soaking.

FATTENING FEED FOR STEERS

Result of Experiment Conducted by Iowa State College—Increased Gains by Using Silage.

Silage has cheapened the fattening ration for steers. In an experiment conducted by the Iowa State college, one lot, receiving each per day 17 pounds shelled corn, 29 pounds silage, two pounds oil meal and one and a half pounds alfalfa, made gains at a cost of $9.57 while another lot receiving eight and a half pounds corn, 51 pounds silage, two pounds oil meal and one and a half pounds alfalfa, made gains at a cost of $7.67. The first lot averaged 2.94 pounds gain per day while the second lot averaged 3.04 pounds. Reducing the corn and increasing the ensilage increased the gains and cut down the cost of making the gains.

This Type Always in Demand.

CARE IN MAKING PROMISES

No Agreement Should Be Made That Can't Be Carried Out, As Keeping One's Word Is Important.

Keep your promises—so don't make any you can't fill.

Don't make any in conflict with agreements.

Neglecting the exact terms of a definite promise is often a very serious thing.

The keeping of promises in business transactions is the "sheet anchor" in the establishing of credit among one's business associates.

The world of business places great value on promises.

Not only in all business transactions but in every-day life, the keeping of promises should be looked after with care.

Whatever you do, keep your word, for the man who breaks his promises even in little things is sure to break them in more important ones.

It is a good plan when making a promise as to appointments to jot down in a memorandum book the man's name, so that no mistakes can be made.

It is a question of obligations that is not canceled until it is paid.

The man whose promise or word can be relied upon is the one whose influence is far-reaching in any community or in any business.

Keep your promises—so don't make any you can't fill.—New York Mail.

Island Classed as Battleship.

Ascension is a curious and out-of-the-way little island in the south Atlantic, about as far from any place else as it is possible for an island to get. Its nearest neighbor is St. Helena of Napoleonic fame, and that is 700 miles away. Ascension belongs to Great Britain and, for some inscrutable reason known to the powers of England, it is not carried on the lists of the colonial governments, but perhaps because of its importance as a naval station is governed by the admiralty. It is treated as part of the British fleet, and is the only piece of land on the globe that is carried on a roll of ships as part of the naval force of the nation. Instead of being garrisoned by the army, it is manned by the navy. It is classed as a battleship in the admiralty offices.

HOW "PUSSYFOOT" JOHNSON WIPED OUT THE MONTE CARLO OF NO MAN'S LAND

Independent Kingdom Set Up by Three Scoundrels on the Kansas-Indian Territory Border, Defies Authorities and Does Thriving Business Until Johnson Takes a Hold.

GIVES THE RUFFIANS THE "LAWYER'S ANSWER"

One of the most singular situations in the history of outlawry was that tackled by William Eugene Johnson in the summer of 1907. It was the case of the Monte Carlo of No Man's Land, as it was called, and called for an exhibition of grit, courage, and self-reliance that was not shown by any other persons interested in the affair.

By the middle of 1907 Johnson, big, bald, and six-feet-three, had pretty well cleaned up the bootleggers in Indian Territory. He had made himself a terror to those who were debauching the Indians with spirits and afterward plundering them. He had become something of a legend. Imagine a male Carrie Nation, armed not only with a hatchet and sledgehammer, but with a pair of mailed fists and all the resources of the United States Indian Department at his back. He had run up the price of spirits per pint from twenty-five cents to three dollars, and even then the trade was risky. He had herded hundreds to jail and several into the penitentiary. He had earned the undying enmity of the gamblers, and all the vicious members of the community. He had earned the sobriquet "Pussyfoot" throughout the West by reason of his cat-like pounces where he was least expected. Now he was to tackle the strangest situation that has ever arisen in the case of western outlawry.

To quote a comment which was made at the time: "Special Officer Johnson has the distinction of being the only man in the United States who ever arrested a bunch of nobodies for conducting a saloon and gambling resort nowhere, in violation of the laws of no one. But the fact is that the Monte Carlo of No Man's Land has been put out of business by the velvet-footed man with the soft voice and the mailed first."

Now for the explanation of the affair, which was to produce a crop of tragical deaths at a subsequent period.

Some years previously a man named Ernest Lewis was in charge of some logging work along the boundary between Kansas and the Indian Territory. A log drawn by six horses struck a stone boundary post and drew it ten feet and nine inches north of the surveyed line. Lewis thought that it would be a joke on Kansas to give the Territory some of Kansas's land. Accordingly he set up the post in its new position, and the removal remained undiscovered until after the occurrence of the episodes with which this story deals.

The apparent result of this prank was that there remained, in the middle of a road, a tract of land some three-quarters of a mile long and some twelve feet wide which did not belong either to the Indian Territory or to Kansas. Lewis was a "bad man," and most of his time was devoted to violations of the revenue and states' laws. Some years afterward he found himself released from jail, together with two boon companions named Mark Killion and Elijah Paradise, and began to cast round for the means of a livelihood. It was then that he happened to remember his prank in moving the boundry post. He hurried to the locality and found the stone still in its new position; and it was then that his fertile brain conceived the idea of setting up a gambling establishment upon this No Man's Land that he had created.

Since Kansas is a prohibition state, and the sale of liquor was forbidden in what was then Indian Territory, the three outlaws saw a fine opportunity of making a fortune in a quick and not illegitimate manner by selling whiskey on the tract of land over which they claimed dominion. There was no doubt that customers would flock from far and near on either side of the border. Accordingly, in the center of the road they built a house sixty feet long by ten feet wide, with a gambling den at one end and a saloon at the other, being financed in their enterprise by two men who preferred to take a share of the profits and to remain in the background.

This extraordinary road-house speedily became a flourishing center of crime. Drink was sold freely to whites, negroes and Indians alike, and riot, robbery and murder were enacted there. The authorities were quite helpless. They got as far as the boundary on either side, and then looked on helplessly, while "King" Lewis, as he was designated, did a roaring business under their noses.

Undoubtedly Lewis had hit upon a paying scheme. His kingdom produced a revenue, in proportion to its size, greater than that of any other kingdom on earth. Upon the wall a federal license to sell liquor was prominently displayed, and, armed with this weapon and not amenable, apparently, to the laws of either the Territory or Kansas, he seemed to stand well within his rights. At the station at Caney, Kansas, one mile away, stood long lines of conveyances waiting for the nobility who came on every train to pay their respects to his majesty. The highways were filled with men hurrying to court, and with others straggling back. Drunken men lay comfortably asleep in their tracks all along the roads. It needed a Napoleon to evolve a strategy strong enough to pull King Lewis from his throne.

The gambling outlay was the most complete in the West. Games that had passed from memory as the "lid" moved westward were resurrected from unhallowed graves. The roulette ball clicked its way round the wheel unceasingly, night and day. Meanwhile, on one side of the line stood Sheriff Paxton of Montgomery county, Kansas, with his retainers, and, on the other, Deputy Marshal Walker of the Territory. They looked at each other across their twelve feet of No Man's Land and licked their dry lips as they heard corks popping. If they did not, their henchmen did. They listened, and the roulette ball spun merrily, and the brazen dollars clicked. Nobody paid the least attention to the outcast minions of the law. Their only satisfaction lay in nabbing those who strayed within their own realms. An Indian, who had just managed to get rid of his pension money, would stumble out of the door, lose his steering powers, and cross into his territory. The deputy marshal would pounce on him. A Kansan, wobbling north, would fall into the yearning arms of Sheriff Paxton. But King Lewis continued on the land that he had seized upon. And, in the absence of any properly constituted authority, there seemed no reason why his kingdom should not endure forever.

During the height of the festivities a royal proclamation was issued declaring that the powers could not intervene, and even the presence of Mr. Taft, then secretary for war, in Oklahoma could not dampen the spirits of the populace nor dilute the potency of those that passed over the bar. The proclamation stated that only a special act of congress could put the kingdom out of business. However, Lewis had failed to take Generalissimo, Pussyfoot Johnson into consideration.

Now, when the news reached Johnson's ears, he was a good deal upset. He did not like these happenings. Was the man who had earned national fame as champion lid-clamper of the Indian Territory to be defied and have his work annulled by men who were ruining his reputation and debauching his Indian wards? Johnson cared no more for law than the others cared for law and order. But Johnson did care for order. And he meant to maintain it. Johnson is an Anglo-Saxon name, and Johnson responds to the old English instinct for good government. But Johnson has Indian blood in him also, and when Johnson goes on the warpath he never lets go of anything he catches—never.

Johnson accordingly reasoned like this: "If his majesty King Lewis and his cabinet can commit a felony nowhere, certainly I, too, have a right to commit a felony nowhere. But will it be a felony? If No Man's Land is in the United States and not on the high seas, then I, as a federal officer, have an undoubted right to institute proceedings."

Thus it happened that one night a dark-complexioned barrel of a man with a bald, shining head and a stubby moustache, followed by two armed deputies, wandered out from Indian Territory into the realm of his majesty. From end to end could be heard the rattling of the roulette ball, as it made its devious course round the wheel, and the dice clicking on the crap table. From another corner came the steady click, click of poker chips. In still another place there sat a pale, faultlessly dressed man running his long, slender fingers across the faro box. At the other end of the palace glasses were clinking, and nearby a colored man was thumping out "Just Because She Made Them Goo-Goo Eyes" upon a wheezy piano.

Accompanied by his deputy, Fred Keeler, Johnson ascended into the palace precincts, by the front door, without sending a herald or ambassador. There was no fanfare of bugles: Johnson simply entered. The front of the realm faced Indian Territory, the back Kansas. His majesty cast one look at the bald dome of the invading army, and made the quickest abdication of which there is record. He simply sprang for the back door and bolted for Kansas soil. He reached it, and, since his cares of state had left him no time to arrange an extradition treaty with Kansas, he was safe there from molestation, and, grinding his teeth, he watched the ruin of his kingdom.

If Johnson had entered the back door he would have had Lewis, for in Indian Territory he was supreme. However, he was not thinking very much about the king just then. Nor did he regard the courtiers and nobility at the bar and gaming tables, who made their exits in record time also, some seeking shelter in the Territory and others in Kansas. Johnson's principle design was to put Monte Carlo out of commission.

Johnson and Keeler made a grab for Killion and Elijah Paradise, and in a trice had them in irons.

"But you can't take us for this," wailed the prophet, as he tried to wriggle out of his handcuffs.

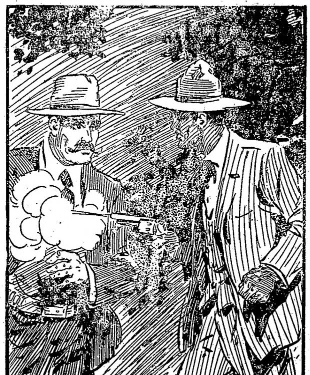
"That's what the lawyer told the man in jail," answered Pussyfoot.

Then, grasping a heavy bung starter, Johnson entered upon his favorite pastime. The roulette wheel went into splinters, the tables became a pile of debris, the cards were torn to shreds in Johnson's strong fingers, while he whistled "I'm the Man Who Broke the Bank at Monte Carlo." Having satisfied himself that the bank was broken beyond repair, Pussyfoot turned his attention to the liquid refreshments. The sacred prohibition soil of Kansas, and the equally uncontaminated soil of Indian Territory soon became a morass, through which a dozen rivers of tanglefoot and "Old Rye" wended their sluggish ways.

When everything was an irreparable ruin Johnson yoked his prisoners together, got them into the buggy which he had in waiting, and started for the town of Caney, whither Lewis had already fled.

Johnson had smashed the gambling tables, he had smashed the bottles, and he had hacked the bar a good deal. Johnson has a child-like impetus toward destruction; his set smile as he wielded his sledge-hammer was well known to many caricaturists. Johnson can smash a cast-steel safe that nothing else except gun-cotton could open. On this occasion he had performed one act of destruction which was to involve him in serious difficulty: he smashed the cash register.

It was a fine new cash register, and too shining and tempting for Johnson to resist. He did, indeed, [illegible] Elijah to open it and take [illegible] contents. But Elijah refus[illegible] soon strewed the bar with pieces of metal, incidentally obtaining a sum of several hundred dollars, which he counted and placed in his pocket, with a view to handing it over to the sheriff.



HE SHOT GARR FOUR TIMES.

Lewis had preceded Pussyfoot to Caney, and he at once went before a justice of the peace and obtained a warrant for Johnson's arrest, charging him with the malicious destruction of property, to which was subsequently added the charge of theft. He also alleged that Johnson had introduced intoxicants into Kansas—which was true enough, for the river of whiskey certainly reached Kansas soil. Besides, Johnson had samples of the stuff in his buggy, to be used as evidence. Consequently, hardly had the buggy entered Caney than Johnson found himself under arrest, and his prisoners were taken from him.

He demanded an immediate hearing, which could not be refused, and it took the judge only a few minutes to decide that there was no case against him, or, at least, that the matter was outside his jurisdiction, inasmuch as the raid had taken place beyond the jurisdiction of Kansas. This hoist the prisoners with their own petard, the joke being, of course, that the Monte Carlo had actually always been within the boundaries of the state of Kansas.

Johnson was set free. As has been said, he never lets go. Within three minutes of obtaining his freedom he once more had Elijah and Killion in his possession. He took them down to the railroad station, with the object of conveying them by train to Vinita, where the United States owns and operates a jail. But his arrest had delayed him too long; the last train to Vinita for the night was gone, and Johnson found that he would have to wait until morning for the next one. Accordingly he placed the two men in the lock-up and went to a hotel for the night.

One of the city marshals of Caney was a man named Garr, who happened to be a friend of Johnson's. He had a daughter, whose sweetheart was a night telephone operator. At night, when calls are few, gossip is apt to pass along the wires between the operators and their friends. The young fellow called up the girl, and, after a number of intimate remarks which have no bearing the story, informed her, in a casual way, that the prisoners had telephoned for a lawyer to hurry along and "play a habeas corpus stunt to get the criminals out of jail," as Johnson phrased it.

The daughter told her father, and Garr realized that Johnson was in the way of losing the results of his achievement. He rushed down to the hotel where Pussyfoot was staying and pulled him out of bed.

Johnson, informed what was happening, realized that, if the "habeas corpus stunt" could be pulled off, as was most likely, anything might develop, even an injunction restraining him from again interfering with the internal affairs of Lewis's kingdom. It would not take long to get the place into running order again. It was a perplexing position, and Johnson remembered what the lawyer said to the man in jail. Anyway, he was not taking any chances.

He dressed himself hurriedly and sent an urgent summons to his deputy Keeler. Then he telephoned for a rig. Half an hour later he had the rig, the deputies, and the prisoners. He placed one man by his side, handed over the other to Keeler, and, with the reins in one hand, his Colt automatic in the other, he drove all night through the darkness over the rutty Kansas roads until he reached Bartlesville at one o'clock in the morning, whence a train conveyed the four to Vinita. The outlaws were speedily lodged in prison.

"I don't want to have anything more to do with Kansas justice," said Pussyfoot, when he had pulled off his coup. "The next time they get me they'll hold me, and I can't forsake the Territory."

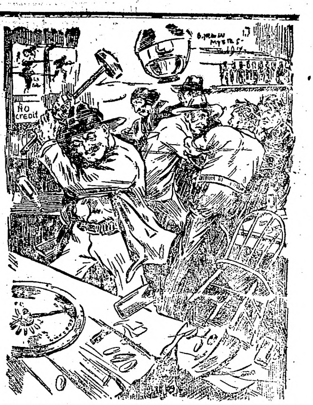
In order to ascertain who were the actual backers of King Lewis, Johnson held the money and the pistol which he had taken, so that they might make themselves known by replevining them. They replevined them, and proved to be two men named Hicks and Kelley.

"I knew my kingdom couldn't last," explained Lewis, as, comfortably provided with this world's goods, he strode, a free man, upon free Kansas soil. "My place of business was in Kansas all the time. Those fellows up there did not know it. They would come down there and look at my kingdom and watch me, but they were very careful not to come beyond what they thought was the boundary line, and molest me. I had them bluffed all right, but I knew it was only a question of time until they found that I was working them, and then they would have made trouble for me.

"I would have got away with the bluff, only the Territory officials thought it was their duty to come up and raid me. They had no authority there, because I was in Kansas But their raid started the Kansas authorities to asking questions, and I was afraid one of the fellows who worked for me when the stone was moved might remember and tell the story, and then I would be in trouble. There was no harm done, but I suppose I ought to go up there now and put the line marker back where it belongs."

However, Lewis was subsequently arrested, and the three men were sentenced to serve for short periods in prison.

The incident made Pussyfoot's reputation nation-wide. And humor [illegible] series of tragedies altogether out of proportion to the situation.



THE ROULETTE WHEEL WENT INTO SPLINTERS, THE TABLES BECAME A PILE OF DEBRIS.

The lesser actors could not avoid basking in the light of Johnson's reputation. In particular Garr was unable to abstain from letting it become known that it was he who had checkmated Killion and Paradise in their attempt to "play a habeas corpus stunt." The news reached Killion's ears. He brooded over it all the time that he was in prison, and, when he came out, he resolved to be revenged on Garr.

However, he did not take any immediate steps toward this end. Circumstances would have to be propitious. The "bad man" is always a coward unless crazed by drink. When Killion was crazed enough to be reckless, and Garr happened to be in the vicinity, there would be the conjunction of circumstances. That conjunction occurred.

Killion had a notorious record. He had run a gambling house in Caney for several years, had been many times in the county jail, and had been implicated in a number of shooting affrays, though mostly for the purpose of acquiring a reputation as a desperado than for killing. Soon after his release from the penitentiary he was arrested by Garr upon the streets of Caney for drunkenness, and was paroled by the judge. Killion was not quite drunk enough to screw himself up to the point of murder, but he threatened Garr.

"I'll get even with you for this," he snarled. "I haven't forgotten that trick you played me about Pussyfoot, either."

Garr did not reply, but took Killion to the police station.

A few days later Garr, while making his rounds, discovered that a poker game was in course of progress in a certain building, and, going in, took possession of the chips and other paraphernalia. He did not know at the time who was the owner of the place, but discovered subsequently that it was Killion. This act enraged Killion all the more, and he conceived the idea that Garr was his real enemy.

Killion drank all that afternoon and made threats that he was going to kill a marshal, but nobody took him very seriously. At ten that night, while Garr was having his supper in Ernhardt's saloon, Killion staggered up to the door and called him out. Garr went out and they were seen to walk a short distance together. Then Killion swung around.

"You've been hounding me, you liar, and now I'm going to get even," he cried, and whipping out a revolver, he shot Garr four times.

Garr returned the fire, but he was too badly wounded to take aim. He fell to the sidewalk, when Killion sprang upon the dying man and began pounding him savagely about the head with the butt of his revolver. He then took the marshal's club and star and threw them into the street. Garr died thirty minutes later, but lived long enough to make a statement to the effect that Killion had fired the first shot.

The death of Garr infuriated the town, for the dead man, who had been a carpenter by trade, bore a reputation as a quiet, peaceable citizen, and was universally popular. He left a widow and several children. Killion, who had escaped to his sister's house, was tracked there, and the house was surrounded by a mob, which threatened to blow it up with dynamite unless Killion surrendered. Killion gave himself up and was lodged in jail. There was much talk of lynching him, but no concerted action was taken

At the trial it developed that Killion's father had also been a murderer. The jury was out only ten minutes, and brought in a verdict of guilty of murder in the first degree after taking a single ballot. As capital punishment has been practically, though not theoretically abolished in Kansas, Killion was sent to the penitentiary for life.

That was the first death to arise out of the Monte Carlo raid. Others were to follow.

MIDDLE-AGED MEN SUPERIOR

They Have Training and Experience Impossible for Youth to Have Obtained.

What are the accumulations which ought to make fifty fitter to exercise authority than twenty-five? Book knowledge partly, but for the most part thoughts, a writer in Harper's says. By the time he is fifty a man who is to amount to anything should have come to a few large, seasoned convictions that are part of the fiber of his mind.

Convictions of that sort are not swiftly obtained out of books. Books may have to do with them, but they are acquisitions of the spirit, and though the rudiments of them may be come by in youth, they need to be tempered, tried out and adjusted to practice by years of thought, talk, observation, effort and experiment with life. Washington at twenty-five had in him the rudiments of the Washington that was to be, but had nearly twenty years of training before he took command of the Confederate armies, and he was first president at fifty-seven. Lincoln in early manhood groped his way through grievous distress and perplexities, but by the time he married, when he was thirty-three, he had come, it would seem, to a clear sense of the fundamental convictions that made him. Eighteen years more he thought and read and talked in courts and taverns, and pleaded on the stump the faith that was in him, and travailed variously, and then at fifty-one he was elected president. Pitt, prime minister at twenty-four because England was short handed and couldn't wait for him to get his growth, broke down in the middle of his job and died at forty-seven. Napoleon was first consul at thirty, had completed his activities at forty-six, and died at fifty-two. Alexander, at thirty-three had done everything that seemed to him desirable to do in the world at that time and departed out of it. Youth makes a greater figure in war than in anything else, but war is a comparatively simple business and can be learned young. In most matters men are lucky if they can take their time to learn and escape the prices and the heavy responsibilities of leadership until their thoughts are matured, their skill is fully practiced and their characters have been shaped and hardened in the forge of life.

Greeks Had No Standard.

The ancient Greeks had no standard, although they venerated the emblems on their shields as we our flag. The first flag used by the Greeks was decorated with a two-headed eagle and was used in the revolt against the Turks in 1461. In the revolution of 1769 a white flag with a blue cross was raised. In 1808, when Ali Pasha was ravaging Thessaly, John Stathans led a flotilla into Skiathos under a flag which was the same as that in use at the present day—blue with a white cross. The first flag of the great revolution was raised by Marco Botzaris, on October 25, 1820. It was white with an icon of St. George. On January 1, 1822, the national assembly in Epidaurus, at the foundation of the independence of Greece, defined the Greek flag as follows: On the land, nine horizontal stripes, a plain blue flag in four quarters, with a white cross in the middle, to be called the "land flag." On the sea, nine horizontal stripes, five blue and four white, with a blue square in the corner in four quarters, in which is a white cross. This is the flag known as the Greek flag today. The blue ground is very dark.

In Reduced Circumstances.

"The head clerk in this hotel seems to be a rather subdued young man."

"That's only a temporary manifestation. He got into a poker game and lost all his diamonds."

Nicoly Urdahl, Clerk.

The Navy Department today, through Lieutenant Commander James D. Willson, Navy Recruiting Officer for the Northwest, sent out a "Primer of service" urging the young men of the Northwest again to consider the needs and opportunities of the Navy before they enter national service. The primer reads.

Why will I do Uncle Sam the most good by joining the Navy? Because the Navy is the Nation's "First Line of Defense" and it needs men immediately to man its ships.

Whe will I do myself the most good by joining the Navy? Because the Navy offers you an opportunity to serve the Nation in the trade or profession in which you are best qualified.

Where can I investigate the Navy?

Goodridge 15 Grygla 1

The ball game played here Sunday between Goodridge and Grygla resulted in a win for locals by a score of 15 to 1. Grygla made their lone score in the first inning, and that on an error, after which they never saw home again. The locals were in good trim and played a fine game, being a little better on the stick than the Sunday previous, but they still need some more batting practise.

Goodridge expects to journey to St. Hilaire Sunday and try to bring home the bacon.

False Alarm.

Tuesday afternoon the fire bell rang calling the fire laddies to Resan & Yohn Livery barn. The fire department responded quickly to the alarm and was soon on their way to the scene of the fire with the chemical engines but before they got there they were told that it was all over. It was nothing more than that Howard Yohn was cleaning the cylinders in his Ford with kerosene and left the car running which caused a great smoke and every one who saw it thought the barn was on fire. Better clean it outside after this Howard! You may have a real fire some day and people may think that it is only you cleaning your Ford.

Drowns in an Old Well.

Margret, the twelve year old daughter of Mr. and Mrs. Andrew Yusko, living on the Linder place in the northeast quarter of Sec. 35, town of Goodridge, was drown Tuesday when she fell in an old well. The well was covered up with boards and dirt thrown on the top of them, and it is supposed that the unfortunate girl was playing around the farm and did not see the old well as no one could tell it was there, and as soon as she stepped on what she thought was solid ground the boards gave way and she fell thru to the bottom. Dr. Frolich and the coroner were up Wednesday and took the body to Thief River Falls.

Russia.

We Salute you in the name of the New Day.
You have arisen in your might.
You have overthrown your autocrats
You have struck off your chains.
You have moved nearer to Liberty and civilization.
You have taken a long step toward democracy.
You have taught us a lesson.

From the American Teacher.

Children And Matches Cause Of Many Fires Says Fire Marshal Hargadine.

Children with matches cause more misery, suffering and property loss than any other combination, is the opinion of Robert W. Hargadine, state fire marshall.

"Now that the schools are closed for the summer vacation, warning should be spread broadcast to parents and guardians, who are, in most cases to blame for fatalites arising from children playing with matches. The careless manner in which matches are kept in the household is a prolific source of trouble.

"The common parlor match, which can be ignited at the end with ease, is a constant source of danger. Sparks struck from it often fly many feet and are the cause of many large fires. As an example, I might mention a fire which occurred on May 22nd at Gary, Minnesota, and which destroyed 18 places of business, two dwellings, four ice houses and four barns. This fire was set by children playing with matches in a barn, and spread very rapidly destroying the entire business section of the village.

"If it is necessary to use parlor matches," says Mr. Hagardine, "they should be kept in metal or stone receptacle, and out of the reach of children."

"The safest type of match is the 'strike on the box' match. It throws some sparks, but on the whole is less dangerous than the protected tip match.

"And it must be remembered, danger from the match is not confined to property alone. Many match fires have occurred in Minnesota recently which have resulted in serious injury and loss of life."

Wilson Approves Air Program.

Washington, D. C. — Approval has been given the council of national defense's aircraft bill by President Wilson and it will be introduced in congress early next week. It will provide an initial appropriation of $600,000,000 and the program calls for construction within a year of between 25,000 and 30,000 airplanes.

Train Hits Auto; Five Dead.

Terre Haute, Ind.—Timothy Wrenn, well known local labor leader, and four children were killed near here when their automobile was struck by a Big Four passenger train. Two of the children were Wrenn's daughters and the others were relatives.

Esplee News.

Mr. and Mrs. A. Shores were down to the Torgerson store last week.

Mabel Speten was down to H. Svenpladsen's place last Wednesday where Mrs. Svenpladsen is making her a dress.

Andrew H. Speten has been doing some fencing this week.

LIBERTY LOAN TOTAL OVER THREE BILLIONS

Washington, D. C. — Liberty loan subscriptions totaled $3,035,226,850, an oversubscription of nearly 52 per cent.

The final tabulation was officially announced, showing that more than 4,000,000 persons bought bonds.

Ninety-three per cent of subscriptions, or those of 3,960,000 persons, were for sums varying from $50 to $10,000 and twenty-one subscribers applied for allotments of $5,000,000 each or more.

The New York federal reserve district led the list with subscriptions totaling $1,186,788,400, or more than three times the amount subscribed in the next district, Chicago, $357,195,950. The other districts sent subscriptions as follows:

Boston, $332,447,600; Cleveland, $286,148,700; Philadelphia, $232,309,250; San Francisco, $175,623,900; Richmond, $109,737,100; Kansas City, $91,758,850; St. Louis, $86,134,700; Minneapolis, $70,255,500; Atlanta, $57,878,550; Dallas, $48,948,350.

Mrs. Rinehart

A Remarkably Successful and Versatile Writer and Novelist

Successful women novelists are by no means unusual but there are few writers among the fair sex who have displayed the versatility in their work that has Mrs. Mary Roberts Rinehart.

One of the things that Mrs. Rinehart takes particular pride in is the fact that she is the adopted daughter of the Black Feet tribe of Indians, graced by the name of Pi-ta-mak-an or "Running Eagle." While on a vacation in the northwest two years ago, following her return from Europe, Mrs. Rinehart met the chiefs of the tribe, who conferred the usual honor upon her because of her bravery in visiting the battle front.

Mrs. Rinehart's stories are in great demand by the editors of the best magazines of the country. Among her greatest successes are "K," "The Man in Lower Ten," and "The Circular Staircase." "The Girl Who Had No God" is one of her latest and best stories and it is with great pleasure that we announce its publication in serial form in this paper.

BILL TO CONTROL FOOD IS PASSED

House Inserts Drastic Prohibition Amendments.

PRESIDENT HAS BROAD POWERS

Use of Grains in Manufacture of Alcohol or Alcoholic Beverages Forbidden for Duration of War.

Washington, D. C. — The administration food control bill, giving the president broad authority to control the distribution of food, feed and fuel for war purposes and appropriating $152,500,000 for its enforcement and administration, was passed by the house after farreaching prohibition provisions had been written into it.

The vote was 365 to 5, Representatives McLemore, Slayden and Young of Texas, Democrats, and Weeker of Missouri and Ward of New York, Republicans, voting in the negative.

Prohibition provisions adopted would prevent use of foodstuffs for manufacture of alcoholic beverages and would give the president authority to take over for war purposes all liquor now on hand. The bill now goes to the senate, where it probably will be substituted early this week for a similar measure already under consideration. Leaders hope to get the measure to conference by July 1.

Several Important Changes.

The most important changes made by the house outside the prohibition section were limiting the control powers of the president to articles specifically mentioned by the bill and subjecting voluntary aids in control work to the penal provision. The text of the Barkley amendment follows:

"No person shall use any food, food materials or feeds in the production of alcohol or of alcoholic beverages, except for government, industrial, scientific or sacramental purposes. Any person who willfully violates this section shall, upon conviction thereof, be punished by a fine of not exceeding $5,000 or by imprisonment for not more than two years or both."

There was a hot debate over the prohibition features. Wets and drys accused each other of unfairness.

An amendment was adopted providing that all persons employed in administration of the food law, except those serving without compensation, shall be appointed under civil service law.

President Can Seize Liquors.

After several hours of parliamentary sparring the prohibition element got the upper hand and forced adoption of amendments forbidding use of any foodstuffs during the war for making intoxicants and giving the president authority to take over in his discretion all stocks of distilled liquors.

The amendment designed to cut off manufacture of liquors was adopted, 132 to 114. It was submitted by Representative Barkley of Kentucky, Democrat, and would provide that no food, food material or feed, could be used during the war for the manufacture of alcohol or alcoholic beverages except for governmental, industrial, scientific, medicinal or sacramental purposes.

On the amendment authorizing government use of distilled spirits there was no roll call and only a few scattering nays were heard on the viva voce vote. Originally proposed by Representative Webb of North Carolina it was accepted by Chairman Lever of the agriculture committee and was adopted on his motion.

FIX PRICES ON ALL STEEL

Suggestion Made by Head of Government Shipping Board.

Washington, D. C. — The federal trade commission will be asked soon by President Denman of the emergency fleet corporation to fix a uniform price for steel and steel products for all industries throughout the country.

The commission will be asked to name a fair price which will afford the producers a fair profit not only on steel but on pig iron, iron ore and every other material entering into the manufacture of steel.

With the government obtaining its steel for the proposed fleet of ocean going vessels at a comparatively low price, it is feared that, unless some restrictive action be taken, the price of steel and iron to other industries will attain unheard of levels within a short time.

Confesses to Slaying Girl.

Bologna, Italy.—Alfredo Cocchi has confessed to the Italian authorities that he had murdered Ruth Cruger in New York.

BRITISH MOVING SLOWLY ON LENS

Steadily Hemming in Center of Great Coal Deposits.

ATTACK AT VARIOUS POINTS

Raiding Parties Carry Out Many Successful Operations Against Germans on Western Front.

London. — Gradually the English forces in France are hemming in the town of Lens, the center of great coal deposits, and from which prior to the war more than 5,000,000 tons of coal were exported annually.

Successful raids Sunday night by the British gave them 400 yards of trenches in the woods at the western outskirts of the city, while Monday's operations brought them further along both banks of the Souchez river on a front of about a mile and a half southwest of the town.

The British troops are harassing the Germans at various points along the front in Belgium and France with nightly raiding parties, which have been successful in killing numerous Germans and taking others prisoner.

Sunday witnessed the destruction of five German airplanes in battles in the air and another by anti-aircraft guns, while five others were sent to earth out of control. The British, however, lost five machines.

Mighty artillery duels between the French and Germans still are in progress on several sectors between Soissons and Rheims. Apparently the Germans have ceased their infantry operations, as the latest French official communication makes no mention of fresh thrusts by the crown prince.

The fighting along the Russian front again has extended into the Carpathians around Kirlibaba, on the Bukowina frontier. In Galicia, between the Zlota Lipa and Narayucka rivers and along the upper Stripa, the fighting between the Austro-Germans and Russians is described by Berlin as "lively."

REGISTRATION FOR DRAFT IS 9,569,382

Washington, D. C. — Official war registration returns, with Niagara county, N. Y., and three Wyoming precincts missing, show a total enrollment of 9,569,382, or approximately 96 per cent of the census bureau's estimate. The apparent shortage is more than offset by the number of men in the army and navy who were not required to register.

Of the registrants reported, 7,347,794 are white citizens, 953,889 colored, 1,239,865 unnaturalized foreigners from countries other than Germany, 111,823 unnaturalized Germans, including those who have taken out their first naturalization papers, and 6,001 Indians.

The abnormal shifting of population since the census of 1910 caused the census bureau to overestimate or fall short of its figures in several states, but as the excess in some states served to compensate for the discrepancies in others the general total was not materially affected.

PROSECUTION IS THROUGH

Defense in Dunn Murder Case Sets Up General Denial.

St. Paul.—The fate of Frank J. Dunn, on trial here on the charge of hiring gunmen to murder his wife, has gone into the hands of the defense.

D. W. Lawler, Dunn's chief counsel, made a short, brilliant appeal to the jury, in which he set up a general denial of Dunn's connection with the murder of his wife.

By the first witness for the defense Mr. Lawler began laying a foundation for the offering of testimony to the jury concerning Dunn's reputation as that of a good citizen, amiable and peaceful in disposition and truthful.

MAY CONSCRIPT DOCTORS

Army Is Short Seventeen Thousand. Medical Census Suggested.

Washington, D. C.—Congress may be asked to pass a law for conscription of doctors for the army.

The volunteer system of obtaining physicians has failed.

The medical corps is short 17,000.

A proposal is for drafting physicians selectively on a basis of federal classification by a special medical census.

NO FAVORITISM IN DRAFT

Selective Service Act Is Specific and Allows No Latitude to Registration Officials.

Washington.—A statement has been issued from the office of the provost marshal general of the United States army as follows:

The attention of the war department has been called to the fact that fear exists in some parts of the country that some members of the county and city registration boards may be influenced by personal considerations to discriminate between young men who are liable for service, and to make friendship or some other consideration a moving factor in the selection of soldiers for the new army.

There is no ground for such a fear. The law is specific and allows no latitude to the officials either in the matter of registration or in the later matter of exemption from service. In fact, the law is self-executing. Every man within the age limits fixed by the selective-service act must register, and the penalty of the law for evasion of registration will fall, not only on the man who fails to appear, but on any member of a registration board who may be shown to be in collusion with the person who attempts to escape his duty.

Further than this, the registration boards never will act as exemption boards except in certain specific cases as where a young man who has registered shall claim to be employed in a federal, state or local office, and thereby does come within the exemption clause of the statute. In a case like this the facts must be entered officially and attested.

The law provides the penalty of imprisonment with no alternative of a fine for any official or any registered man who shall make a false return or connive at such a practice. The safeguards against favoritism or evasion are ample.

The response to the government's appeal for volunteer service has been so prompt and general in its distribution that it is assured that in virtually all the districts there will be officials whose sole moving purpose is the patriotic one of seeing to it that the duties of the office are performed in strict accordance with the requirements of the law.

So far as the other reasons for exemptions under the law are concerned, exemptions for men engaged in pursuits in which their work is more valuable at home than in the service, the authority will lie with a board of higher jurisdiction. Those who fear that discriminations will be made on grounds of personal friendship or on other grounds may be assured that every precaution will be taken to make it certain that the registration will be conducted with exact justice and that the democracy of the law will dwell in its spirit as in its letter.

SPECIALIST WINS SUCCESS

Miss Helen Hammond improves each fleeting moment, and when she is not entertaining or participating in various works in which she is interested, she is busy devising new designs and decorations, for she is one of New York's most gifted and exclusive decorators, her prize exhibition and glory being the incomparably beautiful tea garden on the roof of one of the leading New York hotels.

The talented lady touches with her magic mind everything—grand halls, reception rooms, galleries, rooms and most of all most distinctive furniture.

Value of Reading.

Read! I cannot too strongly recommend good reading. Six hours each week of serious reading is not much, but it may mean the difference between a $20,000-a-year executive and a $25 clerk. Read! Learn to think with—and against the deep thinkers of the world.—William Maxwell in Collier's.

The Millennium Will Come:

When rulers have learned to sacrifice personal ambition for the lives and happiness of their subjects.

When the rich cease to extort from the community the necessaries of life.

When patriotism inspires the maker of laws and the subject of laws.

When the strong help the weak.

When every one's motto is, "Do unto others as you would have others do unto you."

When history ceases to repeat itself. —Life.

1,000 KILLED OR INJURED

Terrific Explosion in Austrian Munitions Factory.

Amsterdam, Holland.—More than 1,000 persons were killed or injured or are missing in consequence of an explosion in munitions factories at Bloeweg, according to an announcement made in the lower house of the Austrian parliament by the minister of defense, as forwarded in a dispatch from Vienna.

Former Queen Sophie, now in Switzerland with the other members of the Greek royal party, soon will visit Emperor William, her brother, at German headquarters, according to an announcement in the Dusseldorf newspapers.

DRAFT DRAWINGS AT WASHINGTON

Washington, D. C.—Detailed regulations for drafting the new national army now awaiting President Wilson's approval, contain provision for every step in the great undertaking except the actual method of the draft itself.

No official announcement has been made and official confirmation is being withheld, but it has been stated and generally is accepted here as true that the federal government itself will do the drafting, probably here in Washington, so there will be no opportunity for local favorites, political or otherwise.

Then the question of exemptions will come up and this will go before the local boards. If a man is exempted the man bearing the number which was drawn next in order will take his place and so on.

In this way all those available for service out of the 10,000,000 who registered will be made ready for the country's call and from them the first increment of 625,000 will be assembled. The others will be called as the need develops as the war goes on.

RED CROSS FUND IS OVERSUBSCRIBED.

Washington, D. C.— Tabulation at Red Cross headquarters showed $100,313,000 in reported pledges, of which $35,993,000 was from New York city and $64,320,000 from the remainder of the country. Later reports are expected to show $5,000,000 more.

IN LOVE WITH PHYSICIAN

Teacher Kills Doctor's Wife and Fatally Wounds Herself.

Waukesha, Wis.—Miss Grace Lusk high school teacher of this city, shot and killed Mrs. David Roberts, wife of Dr. Roberts, and then for more than an hour held at bay the city police and Mrs. Roberts' husband, after which she turned the revolver on herself, inflicting probably mortal wounds.

The shooting took place at the home of Miss Bianca Mills, where Miss Lusk roomed. The two women, both of them prominent in society and woman's club circles, were alone in the house.

Miss Lusk was infatuated with Dr. Roberts, it is said. Before she shot herself she said "she loved him, wanted him and wanted him now."

ONE KILLED; DOZEN INJURED

Machine Guns Used Against Sinn Feiners at Cork.

Cork, Ireland.—Machine guns were used on the Sinn Feiners in the disturbances here. They were brought into action after the police with clubs had failed to restore order. The soldiers cordoned various points while the police chased the rioters to side streets. After having borne much more stoning the police ordered that guns be fired on the disturbers.

One rioter was killed and another severely wounded, while a dozen were treated in hospitals for bayonet and other wounds.

For the Oppressed

That was the creed of old Hilary Kingston, chief of the cunning band that robbed the rich to give to the poor, to incite seditions and to arm the rebellious.

Hilary was, seemingly, a respectable member of society, living in a handsome home on the hill with his servants and his beautiful daughter who was reared in lawlessness and taught from childhood the righteousness of her father's tenets.

But when old Kingston was accidentally killed and Elinor succeeded as chief of the band, changes came into the life of the girl.

You will find it worth your while to read the new serial to be printed in this paper—

"The GIRL WHO HAD NO GOD"

by MARY ROBERTS RINEHART

AUTHOR OF "K," "THE MAN IN LOWER TEN," ETC.

COPYRIGHT—
MARY ROBERTS RINEHART

CHAPTER I.

Hilary Kingston had been shot.

Old Hilary had been a familiar figure in the village of Woffingham for years. The eccentricity of his gray derby hat, his beetling gray brows, his always fresh gray gloves, his erect, rather heavy old figure, singled him out from the mass of commuters that thronged the city trains. The gray derby was a part of old Hilary. Except on those rare occasions when he attended service at Saint Jude's he was never seen without it.

He lived on the hill above the village, with his daughter—had lived there for ten years. The hall was beautiful, but old Hilary received no visitors, returned no advances. Visitors thought this curious. The villagers, prosperous business men with smart wives, shrugged their shoulders. The man's house was his own. If he found that he could do without the town, the town could get along without him.

There was no mystery about the hall, and little curiosity. Cars going to the country club passed under the brick wall of its Italian garden. Their occupants sometimes caught a glimpse of Elinor Kingston there, reading in a rose arbor, wandering among her peonies and iris in the spring, or cutting sprays of phlox in midsummer.

The men thought her rather lovely; the women, odd, with her blond hair and dark eyes. The assistant rector of Saint Jude's, newly come to the village, met her face to face on one of his long country walks, a month or so before old Hilary's death, and could not forget her.

He led the conversation to her that night at a dinner.

"An exquisite face," he described her, "but sad, almost tragically sad."

"Blond?" The lady on his right was a Mrs. Bryant. In honor of the new assistant rector, who came of fine family and was a distinct acquisition to the village, she wore the Bryant pear-shaped pearl. She spoke rather curtly. "I should not call her exquisite—but you probably met Elinor Kingston. Her sadness is a pose, I believe; she has everything she wants."

The assistant rector was young, but very wise. So he spoke no more of Elinor until the women had left the table. Then he ventured again.

"Don't join the army of those of us who worship from afar," advised the youth who had moved up beside him. "She's the loveliest thing in this part of the country. But, except our sainted rector, no one ever gets to put a foot on the place. It's exclusiveness to the nth power, and then some. There's a lot of talk, of course, or used to be. Old Kingston brings his servants from New York, and except an elderly housekeeper, none of them speak English. They used to say around here that he was a refugee, but that's all rot. He's a stingy old dotard, afraid some handsome youth like myself will captivate the girl. That's all there is to it."

The assistant rector, whose name was Ward, smiled perfunctorily. Instead of the gleaming table, spread with flowers and candles, with the gay colors of cordials and liqueurs, he was seeing a girl standing at the turn of a country road and gazing down into the valley and the distant village with somber eyes. . . .

Faith, hope and charity, and the greatest of these is faith. Faith in ourselves, faith in those around us, and that sublimest faith of all which trusts in something beyond. To all men is given such faith at the beginning of life, and some keep it to the end. But here and there is one who has lost it, who cannot turn his eyes up and say "Lord, Lord." Old Hilary had not kept the faith.

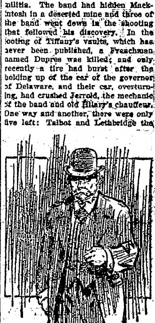
Years ago he had not been evil. He had gone from philosophy into unbelief, that route which all must travel. But, unlike the many, he had not come back.

He had started with socialism, but socialism must be founded on the Christ, and him he scorned. So from socialism he had drifted to anarchy. To rob the rich and give to the poor, at first. Later on, to rob the rich, to incite seditions, to arm the rebellious—oh, it was comprehensive enough, vastly wicked with that most terrible lawlessness of all, that believes itself law.

To pit his wits against the world and win—that had been old Hilary's creed. "For the oppressed" had been at first the slogan of the band he gathered around him. "Against the oppressor" it became later on. Vastly different the two. Most of human charity and kindliness lay crushed down and trampled underfoot during old Hilary's progress from Christ to Antichrist. . .

The band had been gathered with much care. Respectability, order, decorum—these spelled safety to old Hilary's astute mind. Most of them were younger sons of English landed families, with a sprinkling of other nationalities. Young Huff was an Australian, for instance, the son of a wealthy sheep-owner. Boroday the Russian—implicated in the bomb-throwing that destroyed the minister of war—was a nobleman. Old Hilary had got him out of Siberia during those early days when he righted what, to his crooked mind, were wrongs.

There were twelve in the band at the beginning, and for five years there were no changes. Then came the kidnapping and holding for ransom of Mackintosh the banker in Iowa, and the unexpected calling out of the state militia. The band had hidden Mackintosh in a deserted mine and three of the band went down in the shooting that followed his discovery. In the looting of Tiffany's vaults, which has never been published, a Frenchman named Dupres was killed; and only recently a tire had burst after the holding up of the car of the governor of Delaware, and their car, overturning, had crushed Jerrold, the mechanic of the band and old Hilary's chauffeur. One way and another, there were only five left: Talbot and Lethbridge the Englishmen, Boroday, Huff and old Hilary himself. And old Hilary's hour was almost come.



To Pit His Wits Against the World and Win—That Had Been Old Hilary's Creed.

Old Hilary lived well, as he might. His foreign servants were artists. He liked good food, good wines, good books. He even had a few pictures—from the leading galleries of Europe. He hung them in the house at Woffingham, with a cynical smile.

"Safest place in the world," he said to old Henriette, who protested. "The village has never even heard of them!"

And so in this atmosphere with which he surrounded himself, of fine living and wrong thinking, of atheism raised almost to religion, of no law and no Christ, old Hilary had brought up his daughter. He had been proud of her in his way; absolutely selfish, too. She had had no other companion. He taught her his unbelief, pointing out the churchgoers, as they drove together on Sunday mornings, as slaves to a myth. Also, he taught her to hate a lie, and to give alms. Early in her life their drives together had been punctured with questions.

"But if my mother is dead, where is she?" asked Elinor on one of them.

Old Hilary had eyed her from under eyebrows that were already gray.

"She lives in the memories of those that knew and loved her."

"But I never knew her. Then for me she doesn't live! But Mademoiselle—" she checked herself. Suspicion had been dawning in old Hilary's eyes.

"Death is the end," he said tersely, and quoted Darwin and Haeckel to her. But at the end of the drive he interviewed Mademoiselle, and sent her flying to her chamber, where from under the carpet beneath her bureau, she got her rosary and wept over it.

Elinor was twenty the year her father died, a slender girl, fond of flowers, rather a dreamer. Well educated, too. Old Hilary had seen to that; she knew Malato, Haeckel, Bakunin; spoke French and Spanish—Hilary had spent much time in Central America helping the insurgents; it was he who financed the insurrection in northern Mexico—and wrote fluently the form of shorthand that her father had devised as a means of communication between the leader of the band. A keen-eyed, wistful-mouthed slip of a girl, shut off in the great house on the hill above Woffingham; living her life of big theories and small duties, calloused to robbery and violent deeds, and viewing wistfully from her windows the little children in the road below.

CHAPTER II.

Once a year the association closed its books. During all of the June before old Hilary's sudden deat: Elinor had been busy arranging figures, collecting data in the cryptic shorthand she knew. Then, on the first of July, Hilary gave his annual dinner.

The band, from twelve, was down to five. Boroday, the Russian, glancing around the table, shrugged his shoulders. It was the chance of the game they played, and percentages would be larger. Nevertheless there was a weight of depression over them all.

Elinor was at her father's right, simply dressed. The dinners were always a trial to her. She was palpitatingly anxious that the papers before old Hilary be in order and accurate. They were her work. The deeper significance of the meeting she was not so much ignorant of as profoundly indifferent to. If her father did a thing, it took on order, became a law.

There were present Talbot and Lethbridge, the Englishmen; Boroday, whose rescue from Siberia had made him old Hilary's henchman; and young Huff. Huff was the mechanician. He had been trained in the Bleriot works; airplanes to wireless, automobiles to automatic pistols, he knew them—all makes, all grades. If old Hilary was the brains, Huff was the hands of the band.

He sat beside Elinor, and watched her with worshiping eyes. Perhaps it was as well that old Hilary was intent on his food and on the business in hand.

The routine of the annual dinner seldom varied. Five of them then, that last dinner around the table, in evening clothes, well set up, spare, three of them young, all temperate, honorable about women—as polished, as harmless in appearance, as death-dealing, as the gleaming projectile of a twelve-inch gun!

First old Hilary went over the books. It might have been the board meeting of some respectable bank. He stood at his end of the table, and the light from the chandelier fell full on him.

"I have to report, gentlemen," he would say, "a fairly successful year." This is where it differed from a bank. The association had had no bad years. "While our expenses have been heavy, returns have been correspondingly so." And so on, careful lines of figures, outlays and returns, to the end. For old Hilary was secretary and treasurer as well as president.

This time, when he had reached the end of what was to be his last report, he paused and cleared his throat.

"Unfortunately, that is not all, gentlemen. 'Nothing can we call our own but death.' And it is my sad duty to report, this last year, the loss of three of our number. A calamitous year, gentlemen."

He might have been a trustee, lamenting the loss of valued supporters to a hospital!

Afterward, in the library, with Elinor embroidering by the fire, they cashed in. They dealt only in cash. Securities were dangerous. Once or twice Boroday had successfully negotiated with a fence in Paris, but always under old Hilary's protest.

The routine never varied. Elinor unlocked the door to a winding staircase, which led to a basement room where the steel vault stood in its cement walls. The five went down, returning shortly with the cash-boxes. The money was divided on the library table. It went by percentages. Hilary drew 20 that last year, each of the others 10—a total of 60 per cent. The 40 per cent remaining was divided, or sent as a whole, according to the sense of the meeting. Berlin got it all one year, for instance, to Boroday's disgust. Russia generally received a large proportion. The Chinese revolution; the defense of Berkhardt, who killed Ecker the pork-packer; a shipment of guns and ammunition to Central America—thus it went.

Although they preferred only money, now and then the loot included jewels. By common consent, such gems, stripped of their settings, were put aside for Elinor. They meant nothing to her. Had anyone told her that for several years her share had been greater in actual value than all the money that had fallen to her father she would not have believed it. . . .

Four days or so after the annual meeting, the rector of Saint Jude's was always asked to dinner. And although the reverend gentleman would under normal circumstances have been fishing in Canada, he never went until this function was over. For old Hilary, detesting his creed, respected the man. A certain percentage, then, of old Hilary's share went over the library table, after the dinner, to the rector.

"Use it where it will do the most good," he would say.

"The church organ—"

"Not a cent to the church organ. Buy the youngsters a playground, or—build a lying-in ward in the hospital."

Elinor's mother had died in childbirth.

The last check had been unusually generous. The rector, who had been smoking one of old Hilary's choice cigars, put it down and faced his host resolutely. It took courage.

"Mr. Kingston," he said, "the church needs men like you. Why be a Christian in the spirit and—avoid the letter?"

"Tut." Old Hilary rose and looked down at him. "I am like all gamblers. This annual check to your poor is the sop I throw to luck. That's all, sir."

And his tone closed the discussion. The word "gambler" worried the rector. He thought over it on his way down the hill to the rectory. But his poor were very poor. He cashed the check the next day. . . .

Elinor was in the library that sunny August day when they brought old Hilary to her. She had never seen death before, except on the streets of Mexico, and for a good many years he had been all she had—since her last governess, in fact, had been discovered secreting the rosary and had been word-scourged from the house in tears. She fainted, and wrinkled Henriette laid her on a couch.

Boroday, the Russian, had brought the body home, and now he stood, looking down at Elinor and stroking his English-cut beard.

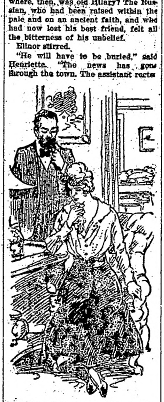
"He expected it, Henriette," he said. "He thought it would have come sooner, in the Parker matter. I wonder—"

He glanced through the open door to the billiard room, where old Hilary's body lay on the table. He was minded, was Boroday, to wonder many things—whether, after all, old Hilary's dauntless spirit had gone out like a lamp, or if—

This white and carven thing in the next room, with stiffening hands and the gray derby at its feet, surely there was no mystery about it. This was not old Hilary; that was all. But where, then, was old Hilary? The Russian, who had been raised within the pale and on an ancient faith, and who had now lost his best friend, felt all the bitterness of his unbelief.

Elinor stirred.

"He will have to be buried," said Henriette. "The news has gone through the town. The assistant rector of the church has telephoned, and is on his way here now. What am I to do?"



"Let Them Bury Him as They Will," Said Boroday.

"Let them bury him as they will," said Boroday. "What does it matter! He would himself have seen the humor of it."

Hilary Kingston had been shot during the daylight robbery of the Agrarian bank messenger. He was shot as an innocent bystander, and was referred to by the press as philanthropist and martyr. So much for years of caution and the annual gift to Saint Jude's.

As a matter of fact, the Agrarian affair was calamitous in several ways. It bore too close a resemblance to a St. Louis matter of several years back, in which Boroday had come under suspicion.

On a Tuesday morning, the cash being more than the bank cared to have about, two hundred and ten thousand dollars was sent to the clearing house. Two clerks from the bank accompanied the messenger, who went by taxicab.

There are two direct routes to the clearing house: one along one of the great avenues, the other through the newspaper district. Here, at ten-thirty in the morning, things are rather quiet, and except for vans delivering rolls of paper, there is little traffic.

The taxicab went by this latter route. Opposite the Record office, where the presses stood, silent monsters waiting to leap, old Hilary Kingston was standing, kidgloved and wearing the gray derby hat he affected. As the taxicab bore down toward him he hailed it.

"Taxi!" he called.

The taxicab slowed down. Old Hilary, seeing it occupied, waved it off with his stick. But it had come to a full stop. There was an alleyway beside the Record building, and now three men ran out from there, and thrust revolvers through the open windows of the cab. After that it was hot work. Marshall of the bank went back with a bullet through his lung. The bank messenger fired pointblank, and missed his target; but old Hilary, gray derby and all, went down where he stood, twenty feet away. The uninjured clerk had an automatic gun, and swept a circle with it over the bag which lay at his feet. There was no getting inside that ring of death. The bandits retreated, firing as they ran, and climbed into an automobile up the street. When the reporters in the Record office wakened to the fact that there was a story under their windows, the street was clear. Only old Hilary lay dead on the pavement, with a bullet in his head.

The chauffeur of the taxicab drove madly to the hospital with Marshall, who was dying, and then to police quarters where he gave himself up. He was released, of course. His name was Walter Huff. He was shown to be a new man, but sober and industrious, one of the best drivers in the employ of the taxicab company. It was also shown that Hilary Kingston had hailed him: Huff explained his stopping. Mr. Kingston was a regular patron; he had meant to tell him that in five minutes he would come back and pick him up.

Huff was under surveillance for three days. His conduct was impeccable.

ABOUT THE STATE

News of Especial Interest to Minnesota Readers.

GATHERED FROM ALL SECTIONS

Happenings of the Week Briefly Told for the Convenience of the Busy Reader.

Mrs. Pheba McMillan, pioneer charity worker in Minneapolis, is dead in that city, aged seventy-seven.

John J. O'Brien, a resident of Minnesota for fifty years, is dead at St. Paul, aged seventy-four years.

Mrs. M. M. Wicks, aged eighty-three, a resident of Minneapolis for more than forty years, is dead.

Dr. D. W. Horning, for thirty years a resident and medical practitioner in Minneapolis, is dead, aged sixty.

Sunday movies are barred in Fairmont as the result of a special election called to decide the question.

Theodore T. Simon, forty-five years old, Spanish war veteran who saw service in the Philippines, is dead at Duluth.

Henry L. Moore of Minneapolis has donated $100,000 to Dartmouth college for the foundation of two lectureships for alumni.

M. W. Brewster, a Wells attorney, was appointed by Attorney General Smith as special attorney general of the state fair management.

John S. Johnson of Minneapolis was elected president of the Minnesota Elks at the closing session of the annual convention at Winona.

Julius Weidner of St. Paul, a foreman for L. W. Baumeister & Co., St. Paul contractors, died of heart disease at Red Lake Falls while swimming.

One man and two horses were electrocuted in Minneapolis and considerable property damage was done in the Twin Cities by a violent electrical storm.

Former United States Senator Moses E. Clapp in the future will make his home on an estate adjoining Mount Vernon, the home of George Washington.

Alex Honigschmidt, sixty-six years old, said to be the first man to establish a butcher shop in Minneapolis on the west side of the Mississippi river, is dead.

Dr. H. C. Holman of St. Paul, thirty-four years old, was electrocuted in a bathtub. While bathing he grasped a wire leading to an electric flatiron near the tub.

Henry C. Taylor, eighty-six years old, a resident of St. Paul for many years, was accidentally asphyxiated by illuminating gas at the home of his son-in-law in that city.

Fire of an undetermined origin destroyed the Kasson school house, causing a loss of $60,000. The Rochester fire department was asked for help and assisted in checking the flames.

Knute Nelson, fifty-four years old, a carpenter, is dead at St. Paul from injuries received when he fell fifteen feet from a ladder while trimming a tree in front of his home in St. Paul.

Martin Byland of Minneapolis was killed when an automobile he was driving overturned near Clear Springs, the running board of the machine falling across his throat and strangling him.

F. H. Ellis, well known Minneapolis business man, was killed when he fell from a third story window in the West hotel to the sidewalk. It is believed he walked out of the window while asleep.

Chris Johnsen of Fergus Falls has resigned as a creamery inspector in the state dairy and food commission to enter the federal service as inspector of butter renovating factories in Chicago.

Removal of Victor S. Knutson, superintendent of Todd county schools, is asked in a complaint charging malfeasance and nonfeasance of office filed with Governor Burnquist by Todd county commissioners.

Purchase of a building at Hibbing to be used by the state bureau of mines is announced by State Auditor Preus. The purchase was authorized by the last legislature. A complete laboratory for testing iron ore will be installed.

August Hay, for thirty years a meat dealer of Excelsior, Lake Minnetonka, and one of the best known men in the village, shot and killed himself in the rear room of his shop. He was sixty years of age and friends are unable to explain his action.

Henry Wolfer of St. Paul, former warden of the Stillwater prison, has been named by Governor Burnquist to represent the state at a war conference at Washington July 2 and 3, at which war-time employment for convicts will be discussed.

Laura Woodcock, eleven years old, daughter of a prominent farmer living near Dover, was found dead in a tank of water. It is believed the girl was injured by a fall into the tank as there was not enough water to drown her if she kneeled or stood up.

Henry S. Goff, educator, author, poet, soldier and pioneer of the Northwest, is dead at his home in Minneapolis, aged seventy-five. After the Civil war Mr. Goff served as county superintendent of schools of Blue Earth county and later was an instructor in the state university.

ELIZABETH G. FLYNN.

I. W. W. Agitator Placed Under Arrest at Duluth.

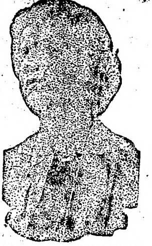

Photo by American Press Association.

Under authority given them by a measure passed by the city council [illegible] unpatriotic demonstrations by professional agitators the Duluth police arrested Elizabeth Gurley Flynn of New York city and later raided I. W. W. headquarters, took nine men and a women into custody and closed the headquarters.

Acting under a law passed at the last session of the legislature authorizing an increase in the insurance on public institutions the state board of control has placed $900,000 on the state prison at Stillwater.

A. C. Gooding of Rochester, former state treasurer, has been elected president of the Minnesota Bankers' association. Resolutions were adopted pledging the fullest co-operation of the association in assisting the government in any future bond issue.

James A. Kerr, employed as an engineer at the government high dam near Fort Snelling, is dead from injuries received when he fell from the lock wall at the dam. Mr. Kerr was seventy-nine years of age had had been a resident of Minneapolis for more than half a century.

Isabelle Palbitski, nineteen years of age, escaped death in a remarkable manner in a severe electrical storm at Winona when lightning struck the bed in which she was sleeping and demolished it. Not until after the bed fell to the floor in a heap of splintered wood did the girl awaken.

The question of voting St. Louis county dry will be submitted to the voters Sept. 10 under the county option law, according to plans which took shape at Duluth when a temporary dry county committee was completed and State Senator Richard Jones of Duluth as engaged to manage the campaign.

Charles E. Lamberton, transfer man and garage owner and well known in Southern Minnesota, was shot and killed at Redwood Falls. William Rosendahl, an automobile agent, is under arrest. Friendship of long standing between the men ended recently when they became competitors in the automobile business.

The state public safety commission has taken measures to suppress or control I. W. W. meetings in Northern Minnesota where syndicalism in interference with military enlistment is declared to have been advocated. Every mayor and police chief in that part of the state received warning that he will be expected to enforce the 1917 laws covering these offenses.

Dr. Eugen Friedmann, German chemist, now in the Hennepin county jail, will be interned as an alien enemy for the period of the war, or until President Wilson decides that his detention is no longer necessary. The order to intern was given by United States Attorney General Gregory. Alleged disloyal statements and actions reported by acquaintances caused his detention.

A suit to test the powers of the state public safety commission in regulating the sale of liquor in the state has been filed in United States district court at Minneapolis by Ernest F. Cary, acting as counsel for Phil Cook, saloon proprietor. The complaint charges that the state legislature violated the constitution of the United States when it delegated legislative powers to the commission.

County Attorney O'Brien won a signal victory for the state in the trial at St. Paul of Frank J. Dunn, charged with hiring the Redenbaugh gunmen to murder his wife, when the court ruled that he might introduce hearsay testimony and acts and conversations of co-conspirators before proving the fact of a conspiracy. Redenbaugh then pointed out Dunn as the man he was told was paying the money for the murder of Mrs. Dunn.

Brewery officials of Duluth, called into conference by Sheriff Meining, have pledged their support to the requirements of order No. 8, issued by the state public safety commission regulating the sale and disposition of liquor in Minnesota during the war. Only one case of beer a week to a home will be sold or shipped by Duluth breweries and clubs and [illegible] previously have obtained larger consignments, will be strictly shut out.

FOR SALE—The E½ of S½ Town of Rainet. John M. Anderson, owner.

Farm For Rent—inquire at the G. N. Depot, Thief River Falls, Minn. tf.

Quite a number from this vicinity went to Thief River Falls Wednesday to attend the Yankee Robinson circus.

The Pennington County Fair will be held at Thief River Falls Wednesday, Thursday and Friday August 1st, 2nd and 3rd. It is the object of the Fair Association to make this the best fair that has ever been given in this section.

Harry Korchal and Sam Joynt ar here Wednesday via the auto route from Ivanhoe, Minn. to look over the country and attend to business matters.

Lutheran services Sunday July 22nd at Germantown 10 a. m. and at Esplee at 3 P. M.

O. C. Schultz, pastor.

Rev Walonta will conduct English services in the old school house next Sunday morning at 11 o'clock. Everybody welcome.

The electric car is being overhauled this week and a regular locomotive with one passenger coach attached is making the trip these days.

Chester Tvedt is taking a week's lay off from his duties at the Goodridge State Bank. He left Tuesday for Ada where he will visit relatives and friends.

We received a post card yesterday from Rev O. C. Schultz, who is spending a vacation at Cedar Rapids, Iowa, in which he said that the corn in that section was a little late, but the other crops were in excellent condition and that barley was ready to cut.

Bennie Johnson is helping out at the depot during the absence of R. H. McDonald who is taking a vacation.

P. P. Palmer, H. A. Halvorson and Carl Christianson were business visitors in Thief River Falls Tuesday.

There will be a dance in Ole Gevings barn Saturday evening. Everybody invited to attend.

A. C. Tvedt went to Thief River Falls Monday to attend a meeting of the tri county sanitorium committee.

A large crowd from Goodridge attended the dance at W. L. Jones last Saturday evening. All report that they had an enjoyable time.

J. P Jensen, Alvin Rattke and ye editor were Thief River Falls visitors Saturday evening.

Hugo and Herbert Menzel left Sunday evening for Iowa to attend to matters of business. Victor McLeod took them as far as Thief River Falls with his Ford.

R. H. McDonald is taking a couple of weeks lay off from his depot agent duties. He left Tuesday evening for Bruce, Wis., to visit with relatives and friends.

City and Farm Property for sale. Goodridge Land Co. Call at the Farmers State Bank.

Will sell or exchange for property in Thief River Falls the following land, Lot 4 in Section 30 and Lots 1, 2, 3 and NE¼ SW¼ in Sections 31-155-39.

H. O. Kjomme, Thief River Falls, Minnesota.

NOTICE.

Farmers are hereby requested to cut the weeds and brush and haul the stones away from the road and ditch side adjoining their land, within the town of Reiner, by Oct. 1st., 1917, otherwise the town will do the work and charge it against the land.

By order of Town Board
T. Morken, Clerk

NOTICE.

Farmers are hereby requested to cut the weeds and brush and haul the stones away from the road and ditch side adjoining their land, within the town of Goodridge, by Oct. 1st, 1917, otherwise the town will do tse work and charge it against the land.

By order of Town Board,
Nicoly Urdahl, Clerk.

The German Lutheran Congregation at Thief River Falls will celebrate its annual Missionfestival next Sunday, July 15th, with a German service in the forenoon at 10:30 and an English service at 2:30 p. m. Many Lutherans in our vicinity are planning to attend.

A BIT OF AMERICAN HISTORY

"We have met the enemy and they are ours." That means something! Who said it? Commodore Oliver H. Perry in his message to General Harrison, after the great Naval victory on Lake Erie. It meant that the United States Navy, always ready to defend and protect the Nation, and that means YOU and YOUR PROPERTY, had again scored a home run for the United States There are many Perrys in this Great Northwest and Uncle Sam is now looking for them to offer a chance to MAKE HISTORY. Wake up, Mr. American, and answer the call. Volunteer for service on torpedo boats' submarines and dreadnoughts, and do your duty. Your grandchildren will be glad to be your grandchildren when they read the history of the future, if you do. The Navy Recruiting Station is at 304 Marquette Avenue, Minneapolis, with branches at:

St. Paul, Minn., Commercial Building Duluth, Minn., St. Cloud, Minn. Brainerd, Minn., Grand Forks, N. Dak, Fargo, N. Dak., Minot N. Dak., Bismarck, N. Dak.

Men most needed are Machinists, Electricians, Carpenters, Firemen and apprentices.

NOTICE.

Notice is hereby given, that the board of education of the district No. 1 at Goodridge will receive sealed bids up to July 21st at One o'clock P. M., for the removal of the furnaces and connections thereof, (Furnaces and Material to remain the property of the district,) and for the installing of a steam heating plant and ventilation system (gravity or mechanical,) and for the finishing of the upper story of the School house, according to planes specifications on file with the Clerk, bids must be made reparatly for each item and must be accompanied by a certified check to the amount of ten per cent of the bid, made payable to the Clerk.

The Board reserves the right to reject any and all bids.

Nick Bundhund, Clerk.
Goodridge, Minn.

Goodridge Lad In France.

J. P. Ferdinandson, received word this week to the effect that his son John, who joined the U. S. Marines a little better than a year ago, is now with the fighting forces in France. He also received a card which is hung up in the window of the lumber office of Winton-Nichols on which is printed, "A man from this house is fighting with the U. S. Marines in France." John is the only boy from Goodridge who has enlisted.

Defeated Again.

The Goodridge base ball nine, accompanied by a bunch of rooters, journeyed to Grygla Sunday afternoon where they met with defeat at the hands of the Grygla team by a score of 8 to 11. The game was fairly close all the way thru as the both teams are evenly matched, but after the smoke of the battle had cleared away and the conflict ended the Grygla boys were the winners by three scores. Who Goodridge will play next Sunday is not known for sure but between now and then arrangements may be made whereby we will have a game on the home diamond.

NOTICE.

The Goodridge Norweigian Congregation will hold a special business meeting in the old schoolhouse in Goodridge, Tuesday July 17th, at 1 o'clock P. M. Every member is urged to be present. Important business.

Card Of Thanks.

We wish to extend our heartfelt thanks to our neighbors and friends who assisted us, and for sympathy shown us during the illness and death of our beloved doughter Ruth.

Mr. and Mrs. C. O Wallin and family.

Nothing To It.

The report that has been circulating thru the country that Goodridge is under quarantine for scarlet fever is a false alarm. This report must have been started by some one who must have a grudge against Goodridge and was trying to scare people into not coming here. There were two or three light cases and these were put under quaraontine but the report that the whole town is under quarantine is absolutely false. We wish to state here that the quarantine on the families where the fever was has been lifted and there is no need of any one in this community being afraid to come to Goodridge as there is no danger of them catching the fever and there never was.

To Bridge River At Highlanding.

At a meeting of the county commissioners held in Thief River Falls Tuesday, an appropriation of $15,000 was made for the purpose of bridging the Red Lake River at High Landing. All the commissioners were favorable to the proposition.

This bridge will greatly benefit this section as many people living on the other side of the river have no way to cross the river save by the ferry which has been used at this point for many years, and many people do not like the idea of crossing the river with this combersome contrivance.

Work will commence as soon as possible.

Gets A Ducking.

C. L. Hanson, president of the First National Bank in Thief River Falls, received a ducking in the Red Lake River last Saturday afternoon at High Landing. As far as we have been able to learn, Mr. Hanson was going to cross the river with his car on the ferry and ran down the bank, and when he got onto the ferry the car kept going and the result was that both Mr. Hanson and the car got a ducking. Sunday the car was pulled out of the river and it appeared none the worse for its bath.

The Fourth Of July Game.

The following is a piece copied from the writeup about the Fourth of July celebration at Thief River Falls, which was published in the News-Press. It shows that they were well pleased with the ball game, played between Goodridge and St. Hilaire.

After dinner the principal attractions were staged at the fair grounds, where the baseball game between the St. Hilaire and Goodridge teams and the automobile races took place. Interest in the ball game was at fever heat all the way through and each team was backed by a large delegation of boosters from its home town. Rivalry between these aggregations has been very keen for some time and the outcome of yesterday's game decided the championship for the season. After nine innings of baseball that would have delighted the heart of the most ardent fan, St. Hilaire scored the winning run and clinched the honors of the day. The score was 4 to 5, and both victors and vanquished are entitled to much credit for the excellent showing made. For small villages with only a limited amount of material to choose from St. Hilaire and Goodridge undoubtedly have baseball teams as good as can be found in the state. And the bunch of rooters accompanying the boys when they go away from home to play ball indicates that they are one and inseparable to the last trench in the matter of defending the honor of the old home town from the onslaught of the enemy. It was a good exhibition and Thief River Falls has no reason to be sorry for choosing these two teams to take part in the Fourth of July games.

ATTACKS PRESS IN GREETING EDITORS

Minneapolis, Minn.—Mayor Thomas Van Lear startled the National Editorial association when in his address of welcome he attacked the press in general terms for submitting to "the business men's thumscrew in the editorial office."

In numerous instances, he declared, it has been shown that through advertisers "big business was able to dictate what newspapers should and should not print."

"Minneapolis will show us many strange and unusual things, I am sure," said President Tomlinson, when Mayor Van Lear had finished, "but not the least of these is her Socialist mayor."

GUARDSMEN FOR FEDERAL SERVICE

President Calls State Troops for Duty in France.

WILL BE DRAFTED AUG. 5

President Signifies Militia Bodies Will Correspond to Similar Organizations in Federal Army.

Washington, D. C.—The last step necessary to make the entire national guard available for duty in France was taken by President Wilson with the issuance of a proclamation drafting the state troops into the army of the United States Aug. 5.

The guard of New York, Pennsylvania, Ohio, West Virginia, Michigan, Wisconsin, Minnesota, Iowa, North and South Dakota and Nebraska will be called into the federal service Sunday and sent to concentration camps in the South, although the draft will not apply formally to them until Aug. 5.

To make certain the purpose of the national defense act is carried out, the proclamation also specifically declares the men drafted to be discharged from the old militia status on that date.

In that way restraint on use of militia outside the country is avoided and the way paved for sending the regiments to the European front.

Prior to the application of the draft regiments in the Northern and Eastern section of the country are called into the federal service as national guardsmen, in two increments, to be mobilized Sunday and July 25.

Many units already are federalized and presumably they will be mobilized with the other troops from their states. The guard from the other states will be mobilized on Sunday of the draft.

The arrangement is necessary to provide for movement of the regiments South to their concentration camps without congestion and to the same end the division of states into these increments was revised from the original schedule.

The operative date of the draft was delayed until Aug. 5, so that all regiments can be taken into the army simultaneously.

Fourteen camp sites for the sixteen tactical divisions into which the guard will be organized for war purposes have been selected and the militia bureau is preparing the railway routing of the troops to the camps.

GENERAL BRUSILOFF.

Russian Commander and His Progress to Lemberg.

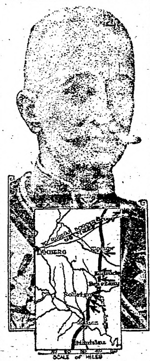

Photo by American Press Association.

Lemberg, capital of Galicia, is the goal of the new Russian offensive. Brusiloff's men have already taken Rohatyn and Brzezany, a strongly defended town on the road to the capital.

RUSSIANS CAPTURE MORE VILLAGES

London.—Changing suddenly their principal attack to the west and north of Stanislau, about eighteen miles south of Halicz on the Lemberg-Czenowitz railway, the Russians have taken Jeseupol, eight miles south of Halicz on the River Dniester, and four villages between the railway line and the Lemnica river, ten miles to the west.

A further advance of the Russians toward the Siwak river, thirty miles west of Halicz, would make most perilous the retention of the Austro-Germans of their present line from Zlochoff to Halicz and would compel, at least, the evacuation of Halicz, key to Lemberg.

Again the French have thrown back German efforts to reach the line of the Chemin-des-Dames. The German crown prince has been reckless in his expenditure of men, but all to no avail, as the French still hold the important positions south of Laon.

FATAL EXPLOSION AT MARE ISLAND YARD

Vallejo, Cal.—A terrific explosion, origin as yet unannounced, destroyed the black powder storehouse of the Mare Island navy yard.

The blast was heard as far away as Sacramento, where buildings were rocked and dishes shaken from shelves. It was also felt in Oakland, Alameda and Berkeley.

A searching investigation to determine the cause of the explosion has been started.

The dead are: Allen F. MacKenzie, chief gunner, his wife and two daughters, Dorothy, twelve years old, and Mildred, eight; George Staton, a gardener employed by Mackenzie, and N. C. Damsteadt, a civilian employe.

The wounded include noncommissioned officers, enlisted men of the navy and civilian laborers. Commandant George refused to issue a statement as to the probable cause of the explosion.

Fifteen Large Ships Sunk.

London.—The usual weekly shipping summary issued here shows that fifteen British merchant ships of more than 1,600 tons were sunk and five vessels of less than that tonnage.

WILSON DECREES EXPORT CONTROL

Washington, D. C.—Government control of American exports, authorized in a provision of the espionage act, was ordered put into operation on July 15 by President Wilson with the issuance of a proclamation requiring the licensing of shipments to all countries of the most important commodities.

In a statement accompanying the proclamation the president declared the government's policy will be, first, to give consideration to American needs; next, to meet as far as possible the requirement of the allies, and lastly, to supply the neutral countries wherever practicable.

It is made clear that every effort will be made to see that no supplies reach the central powers.

The commodities put under control are coal, coke, fuel, oil, kerosene and gasoline, including bunkers, food grains, flour and meal, fodder and feeds, meats and fats, pig iron, steel billets, ship plates and structural shapes, scrap iron and scrap steel, ferro manganese fertilizers, arms, ammunition and explosives.

PRESENCE IS UNDESIRABLE

Former German Officials Here Warned to Leave.

Washington, D. C.—All Germans who were formerly connected either with the German embassy or any one of the many consulates in America have been requested to leave the United States. Notification that their presence in America is undesirable has been sent to them by the state department.

The Germans, who principally are clerks or servants, were not told that they were suspected of being spies. The inference that their loyalty to the kaiser might make it difficult for them to remain in this country without attempting to send information of a military character to their government was made clear.

Amsterdam, Holland.—Discussion in the German reichstag at Berlin of the first reading of a bill providing for a credit of 15,000,000,000 marks ($3,750,000,000 at par) is reported in a Berlin telegram.

Count von Rodern, secretary of the imperial treasury, stated the monthly expenditure from February to May was 3,000,000,000 marks ($750,000,000 at par).

The latest war loan totaled 12,120,000,000 marks ($2,280,000,000 at par).

Positively Your Last Chance

to buy a Ford Car at the old price. We are taking orders now subject to an advance and contract can be cancelled in case a raise before delivery but Cars must be delivered before August 1st, so don't be amongst those that will be sorry that they did not order and at that remember the cars are limited that an agency can get.

Call me up and I will come and see you.

KARL KORSTAD
High Landing, Minn.

Order at once and you may get in on the old price.

The report that has been circulating thru the country that Goodridge is under quarantine for scarlet fever is a false alarm. This report must have been started by some one who must have a grudge against Goodridge and was trying to scare people into not coming here. There were two or three light cases and these were put under quarantine but the report that the whole town is under quarantine is absolutely false. We wish to state here that the quarantine on the families where the fever was has been lifted and there is no need of any one in this community being afraid to come to Goodridge as there is no danger of them catching the fever and there never was.

To Bridge River At Highlanding.

At a meeting of the county commissioners held in Thief River Falls Tuesday, an appropriation of $15,000 was made for the purpose of bridging the Red Lake River at High Landing. All the commissioners were favorable to the proposition.

This bridge will greatly benefit this section as many people living on the other side of the river have no way to cross the river save by the ferry which has been used at this point for many years, and many people do not like the idea of crossing the river with this combersome contrivance.

Work will commence as soon as possible.

Gets A Ducking.

C. L. Hanson, president of the First National Bank in Thief River Falls, received a ducking in the Red Lake River last Saturday afternoon at High Landing. As far as we have been able to learn, Mr. Hanson was going to cross the river with his car on the ferry and ran down the bank, and when he got onto the ferry the car kept going and the result was that both Mr. Hanson and the car got a ducking. Sunday the car was pulled out of the river and it appeared none the worse for its bath.

The Fourth Of July Game.

The following is a piece copied from the writeup about the Fourth of July celebration at Thief River Falls, which was published in the News-Press. It shows that they were well pleased with the ball game, played between Goodridge and St. Hilaire.

After dinner the principal attractions were staged at the fair grounds, where the baseball game between the St. Hilaire and Goodridge teams and the automobile races took place. Interest in the ball game was at fever heat all the way through and each team was backed by a large delegation of boosters from its home town. Rivalry between these aggregations has been very keen for some time and the outcome of yesterday's game decided the championship for the season. After nine innings of baseball that would have delighted the heart of the most ardent fan, St. Hilaire scored the winning run and clinched the honors of the day. The score was 4 to 5, and both victors and vanquished are entitled to much credit for the excellent showing made, small villages with only a limited amount of material to choose from St. Hilaire and Goodridge undoubtedly have baseball teams as good as can be found in the state. And the bunch of rooterr accompanying the boys when they go away from home to play ball indicates that they are one and inseparable to the last trench in the matter of defending the honor of the old home town from the onslaught of the enemy. It was a good exhibition and Thief River Falls has no reason to be sorry for choosing these two teams to take part in the Fourth of July games.

ATTACKS PRESS IN GREETING EDITORS

Minneapolis, Minn.—Mayor Thomas Van Lear startled the National Editorial association when in his address of welcome he attacked the press in general terms for submitting to "the business men's thumscrew in the editorial office."

In numerous instances, he declared, it has been shown that through advertisers "big business was able to dictate what newspapers should and should not print."

"Minneapolis will show us many strange and unusual things, I am sure," said President Tomlinson when Mayor Van Lear had finished, "but not the least of these is her Socialist mayor."

GUARDSMEN FOR FEDERAL SERVICE

President Calls State Troops for Duty in France.

WILL BE DRAFTED AUG. 5

President Signifies Militia Bodies Will Correspond to Similar Organizations in Federal Army.

Washington, D. C.—The last step necessary to make the entire national guard available for duty in France was taken by President Wilson with the issuance of a proclamation drafting the state troops into the army of the United States Aug. 5.

The guard of New York, Pennsylvania, Ohio, West Virginia, Michigan, Wisconsin, Minnesota, Iowa, North and South Dakota and Nebraska will be called into the federal service Sunday and sent to concentration camps in the South, although the draft will not apply formally to them until Aug. 5.

To make certain the purpose of the national defense act is carried out, the proclamation also specifically declares the men drafted to be discharged from the old militia status on that date.

In that way restraint on use of militia outside the country is avoided and the way paved for sending the regiments to the European front.

Prior to the application of the draft regiments in the Northern and Eastern section of the country are called into the federal service as national guardsmen, in two increments, to be mobilized Sunday and July 25.

Many units already are federalized and presumably they will be mobilized with the other troops from their states. The guard from the other states will be mobilized on the day of the draft.

The arrangement is necessary to provide for movement of the regiments South to their concentration camps without congestion and to the same end the division of states into these increments was revised from the original schedule.

The operative date of the draft was delayed until Aug. 5, so that all regiments can be taken into the army simultaneously.

Fourteen camp sites for the sixteen tactical divisions into which the guard will be organized for war purposes have been selected and the militia bureau is preparing the railway routing of the troops to the camps.

GENERAL BRUSILOFF.

Russian Commander and His Progress to Lemberg.

LEMBERG
SCALE OF MILES

Photo by American Press Association.

Lemberg, capital of Galicia, is the goal of the new Russian offensive. Brusiloff's men have already taken Rohatyn and Brzezany, a strongly defended town on the road to the capital.

RUSSIANS CAPTURE MORE VILLAGES

London.—Changing suddenly their principal attack to the west and north of Stanislau, about eighteen miles south of Malicz on the Lemberg-Czenowitz railway, the Russians have taken Jeseupol, eight miles south of Halicz on the River Dniester, and four villages between the railway line and the Lemnica river, ten miles to the west.

A further advance of the Russians toward the Siwak river, thirty miles west of Halicz, would make most perilous the retention of the Austro-Germans of their present line from Zlochoff to Halicz and would compel, at least, the evacuation of Halicz, key to Lemberg.

Again the French have thrown back German efforts to reach the line of the Chemin-des-Dames. The German crown prince has been reckless in his expenditure of men, but all to no avail, as the French still hold the important positions south of Laon.

FATAL EXPLOSION AT MARE ISLAND YARD

Vallejo, Cal.—A terrific explosion, origin as yet unannounced, destroyed the black powder storehouse of the Mare Island navy yard.

The blast was heard as far away as Sacramento, where buildings were rocked and dishes shaken from shelves. It was also felt in Oakland, Alameda and Berkeley.

A searching investigation to determine the cause of the explosion has been started.

The dead are: Allen F. Mackenzie, chief gunner, his wife and two daughters, Dorothy, twelve years old, and Mildred, eight; George Staton, a gardener employed by Mackenzie, and N. C. Damsteadt, a civilian employe.

The wounded include noncommissioned officers, enlisted men of the navy and civilian laborers. Commandant George refused to issue a statement as to the probable cause of the explosion.

Fifteen Large Ships Sunk.

London. — The usual weekly shipping summary issued here shows that fifteen British merchant ships of more than 1,600 tons were sunk and five vessels of less than that tonnage.

WILSON DECREES EXPORT CONTROL

Washington, D. C. — Government control of American exports, authorized in a provision of the espionage act, was ordered put into operation on July 15 by President Wilson with the issuance of a proclamation requiring the licensing of shipments to all countries of the most important commodities.

In a statement accompanying the proclamation the president declared the government's policy will be, first, to give consideration to American needs; next, to meet as far as possible the requirement of the allies, and, lastly, to supply the neutral countries wherever practicable.

It is made clear that every effort will be made to see that no supplies reach the central powers.

The commodities put under control are coal, coke, fuel, oil, kerosene and gasoline, including bunkers, food grains, flour and meal, fodder and feeds, meats and fats, pig iron, steel billets, ship plates and structural shapes, scrap iron and scrap steel, ferro manganese fertilizers, arms, ammunition and explosives.

PRESENCE IS UNDESIRABLE

Former German Officials Here Warned to Leave.

Washington, D. C. — All Germans who were formerly connected either with the German embassy or any one of the many consulates in America have been requested to leave the United States. Notification that their presence in America is undesirable has been sent to them by the state department.

The Germans, who principally are clerks or servants, were not told that they were suspected of being spies. The inference that their loyalty to the kaiser might make it difficult for them to remain in this country without attempting to send information of a military character to their government was made clear.

Amsterdam, Holland.—Discussion in the German reichstag at Berlin of the first reading of a bill providing for a credit of 15,000,000,000 marks ($3,750,000,000 at par) is reported in a Berlin telegram.

Count von Rodern, secretary of the imperial treasury, stated the monthly expenditure from February to May was 3,000,000,000 marks ($750,000,000 at par).

The latest war loan totaled 13,120,000,000 marks ($2,280,000,000 at par).

Positively Your Last Chance

to buy a Ford Car at the old price. We are taking orders now subject to an advance and contract can be cancelled in case a raise before delivery but Cars must be delivered before August 1st, so don't be amongst those that will be sorry that they did not order and at that remember the cars are limited that an agency can get.

Call me up and I will come and see you.

Subscription rate $1.00 per year.
Foreign rate $1.50 per year.

Tuesday, July 24, has been designated as the annual visiting and inspection day at the Northwest Experiment station, Crookston. On that day the various experiments being conducted there will be viewed in company with the station experts and members of the Agricultural College faculty of St. Paul. Profs. Andrew Boss, F. J. Alway and H. H. Kildee are expected to come. All will give addresses and point out the progress being made in the tests under trail at Crookston. Women visitors will be especially interested in the garden and orchard. For their benefit, also, Miss Josephine T. Berry and Mrs. T. R. Sewall of the Home Economics departments at St. Paul and Crookston, will give food conservation talks and demonstrations. All interested are invited to come. Make this a Red River valley Community gathering. Coffee and lemonade will be furnished those who bring picnic lunches. There is ample room on the agricultural school campus to accommodate a large crowd.

The crops will be far enough advanced so the effects of the various treatments of soil and cultivation, and the differences between the various varieties of crops will be plainly seen. Superintendent Selvig and the Experiment Station corps cordially invite all to come. Kindly notify him that you are coming and spread the news of this event to your neighbors and friends.

TORPEDO SINKS U. S. SHIP

Four of Crew Drowned, but Armed Naval Guard Is Saved.

Washington, D. C. — The American steamship Orleans of the Oriental Navigation company has been torpedoed and sunk by a submarine. Four of the crew were drowned but all members of the armed naval guard were saved. The state department, announcing the sinking, withheld the place and the time of the attack.

Are You Going To Get Eggs Next Winter?

The time to decide that question is now. If you don't get them don't blame the hens. They'll lay if you give them half a chance. But they can't lay in a cold drafty shed---it takes all you feed them to keep them warm.

Give them a good, warm, wind-tight house. It won't take them long to pay you back for it. It doesn't take very many dozen eggs these days to pay for a chicken house. It's a real investment. Come in and see us. Our service costs you nothing.

REAR ADMIRAL GLEAVES.

His Ships Safeguarded Pershing's Men at Sea.

Photo by American Press Association.

"The happiest day of my life was when we of the American navy were welcomed in the French harbor where our soldiers disembarked," said Admiral Gleaves, commanding the American squadron which convoyed General Pershing's troops, in a statement to the French press. "Never have cooperation and co-ordination been so imperative, nor so complete, between the two arms of defense of the nation as at this moment."

121 SLACKERS ARE SENTENCED TO JAIL

Freeport, Ill. — The opponents of military service who defied the federal registration law here last month were meted heavy punishment and scathing rebukes here by Judge Kenesaw Mountain Landis in United States district court.

Of 121 men arrested in Rockford in the anti-draft disturbances there, 117 were sentenced to serve one year and a day in the Chicago house of correction, two escaped with thirty-day sentences, one with sixty days, and another with ninety days.

Judge Landis interrupted the hearing of the cases several times to express biting denunciation of the men who refused to obey the nation's laws in time of peril.

CHINESE EMPEROR QUITS

Hsuan Tung Abdicates When Imperial Army Is Defeated.

London.—The reported abdication of Hsuan Tung, the youthful emperor, who was placed on the throne of China only a week ago by General Chang Hsun, it is indicated by press dispatches from Peking, followed the defeat of the imperialistic forces at Langfang and the desertion of many of Chang Hsun's soldiers.

It appears that General Chang Hsun, depressed by the failure of his attempt to restore the monarchy, tendered his resignation to the emperor, who thereupon issued an edict announcing his abdication.

The Girl Who Had No God

By
Mary Roberts Rinehart

Author of "K," "The Man in Lower Ten," etc.

(Copyright—Mary Roberts Rinehart)

SYNOPSIS.

CHAPTER I—Old Hilary Kingston, starting with Socialism, drifts into anarchy, and gathers round him in the hall above the village of Wolfingham a band of accomplished desperadoes who rob the rich, incite seditions and arm the rebellious. His motherless daughter, Elinor, is raised to fine living and wrong thinking, to no law and no Christ.

CHAPTER II—In an attack on the Agrarian bank messenger, old Hilary is killed, but is not suspected of complicity. Boroday brings the body home to the hall.

CHAPTER III—Ward, assistant rector of St. Jude's, makes a call of condolence on Elinor, who consents to have her father buried from St. Jude's in the odor of sanctity. The chief of police recognizes Boroday and is suspicious.

CHAPTER IV—After the funeral the band meet at the hall and agree to go on as before, Elinor acting in her father's stead. Huff asks Elinor to marry him and she consents, though she does not love him. Boroday is arrested and threatened.

CHAPTER V.

Boroday had used his day's freedom to warn the band and to make plans for regaining his freedom. Of money he had none. What he had made under old Hilary's leadership had gone back to Russia, dollar for dollar. He had financed part of the Kiev defense of the Jews, had saved Prince Ovarsky from Siberia. There were other things.

Money would save Boroday. And there was practically no money.

By unanimous consent they kept the news of his arrest from Elinor.

It was Talbot who planned the country club coup. The Russian was in jail then, on a trumped-up charge. Old Hilary dead and Boroday in jail—there was no one to advise caution.

"Boroday ill!" Elinor exclaimed. They were accounting for his absence from her Saturday-night dinner. "Why, then he should be here, where he can be cared for."

"We told him that." Lethbridge was always readiest with his tongue. "But he's not sick enough to need much, and he's deucedly disagreeable when he's laid up."

Elinor was a little hurt.

In the arbor, after dinner, they planned the robbery. Where old Hilary would have taken a month to think and plan, they took minutes. There was a ball at the club that night, the last of the waning country-club season. The entrance to the grounds was a mile from the clubhouse—two iron gates standing open between pillars, and dense shrubbery all about. Talbot would wreck his car there, driving into one of the gates. That would require each departing car to slow down, probably to stop.

The arrangement was that Talbot walk up to the club, and establish an alibi and his innocence by telephoning to a city garage for help. The rest was left to Huff and Lethbridge. A quarter of a mile away across the golf links, they would have a car in which to make their getaway.

Lethbridge was only lukewarm.

"We'll get a lot of jewelry," he objected. "What we need is money."

But Talbot was sure the loot would include money.

It was rather cleverly planned. From the vault Huff brought up a fine chain studded with spikes. Stretched across the road outside the entrance, it meant that every car passing over it would limp along on flat tires. It meant time to the bandits.

Huff and Lethbridge, who had left their car in a thicket over the hill, went first. Talbot followed soon, in his gray car.

"Good luck, boys," said Elinor in echo of her father, from her garden, and went back into the house to watch the clock. At one, or a little sooner—the summer dances were early ones—she was to be in her garden again. The loot would be thrown over the wall.

She was there much earlier, hands cold, lips shaking with nervousness. Always old Hilary had done these things. She was profoundly frightened.

Ward, walking rapidly home from the club, saw her there, a little after midnight. There was a young moon, and at first he thought he must be mistaken. Then, when he was sure of her, he ran up the shallow steps. The gladness that was over him rang out in his deep voice.

"So now I have your secret," he said gaily. "Like all the other fairies, you are only to be seen in the moonlight!"

"In the daylight," said Elinor, trying to smile, "I frequent the woodlands, and miss my most agreeable visitor—my only visitor." She corrected herself.

Her hand was ice in his.

"You are cold!"

"Really, no."

There was a minute's pause. They had no common ground between them. Ward, who dreamed of her eyes, and took long walks up the hill in the mere hope of seeing her in her garden, found himself dumb, now that he stood before her. He had meant to be most impersonal, to run in, say a cheery good night to her and be off. But face to face, with the dark house looming over them, he plunged into the thing nearest his heart.

"Are you still so—alone?"

"There are the servants."

"I—I think of you often. One of my windows faces this way, and I can see a light burning very late."

"I read at night. I do not sleep well. But you—you are up late, also."

"Ah!" He bent a little toward her in his eagerness. "You know that? You know my window?"

"Yes. I watch it very often."

It was well for Walter Huff, crouched in the shrubbery at the country club, eyes glittering, automatic revolver in hand, that he did not hear the thrill in Ward's voice that night in Elinor's garden, or her soft reply.

Many things cried for utterance in Ward; his pitiful sense of the girl's loneliness, a yearning desire to comfort her, to be near her—even more that magic night, a mad longing to hold out his arms and coax her into them, as one might coax some shy creature of the woods.

But Elinor was suddenly aloof and distant again. At any time now a car would come wildly down the hill, and toss at her feet its defiance of law and ownership. What had she and this man before her in common? The thrill was in his voice now, but how quickly it would turn to loathing when he knew! She put out her cold hand, and he took it.

"I am going in now. Good night, and thank you for stopping.

Ward found himself dismissed, and, rather dazed, went down the steps to the road. But one thing he carried with him down the hill that night:

"I watch your window very often."

The reverend Mr. Ward left his light on all of that night, so fearful was he that she might look for it, and not find it.

And while it burned, under the very shadow of Saint Jude's once more the vault in the basement room at the hall swung open to Elinor's practiced fingers.

The village rang with the news of the outrage the next day. No one had been hurt, but jewels of large value had been taken.

To Huff and the others, the raid had been practically a failure. There had been less than a thousand dollars in money—not enough to begin negotiations for Boroday's freedom. It began to look as though the dangerous business of selling some of Elinor's jewels would have to be resorted to. Lethbridge was willing to undertake it, trying London first and then Paris.

Elinor offered all the diamonds. If she must keep a part, she would keep the pearls. Talbot sorted out the stones to be sold, but left them with her for safety. She had never cared for her jewels. They were not half so lovely as her flowers—and she parted from them without a pang. [illegible] there was one pink pear-shaped pearl that had come in the night before, that she would have rather liked to wear.

On Monday afternoon Ward called on Elinor. The memory of that short meeting in the garden had been with him ever since. There was a new light in his eyes, but she greeted him demurely, although she flushed with pleasure.

"Not in a woodland, for once," she said. "And all my fairylike attributes faded in the daylight!"

"Isn't it rather rash?" he asked gravely—"this risking the daylight?"

"I am here because I hoped you would come to see me." It was Ward's turn to flush.

"You said you were lonely, I thought—"

"I am alone, but not as lonely as you think. There is plenty to do. I have my garden, and I make up little bouquets for the school children. You should see how they love them. Some days I have a dozen clamoring in the road under the arbor."

Ward was charmed. He had a quick vision of Elinor, eyes dancing and soft hair blowing, bending out of her arbor window and dropping her quaint sweet williams and marguerites, mignonette and garden roses, down to the children.

She led the way to the terrace, where Henriette was setting the tea-table.

"Nevertheless," Ward said suddenly, "I am not at all sure I like your living here alone. It doesn't seem safe."

"Safe?"

"Perhaps I am unwise to alarm you. But this outrage at the country club—"

"Ah!" said Elinor, and bent toward him.

"There is no longer any question that a band of desperadoes is terrorizing the county; an organized band of considerable intelligence. They get their information from the inside. This last outrage shows it. No one is safe."

"And this country club affair?" asked Elinor, watching Ward intently.

"An audacious piece of work. Half the women in this vicinity suffered. Most of them are my parishioners."

"Ah!" breathed Elinor, "I am sorry."

Ward shrugged his shoulders ruefully. "It means, I dare say, that the poor of the parish will get less than ever this year. Mrs. Bryant, for instance, who has always been generous, lost a pearl necklace and a wonderful pear-shaped pink pearl."

"Is she—a wealthy woman?"

"Very, I believe."

"Then is it such a terrible thing for her to lose the pearl? Perhaps these bandits, as you call them, think they could use these things better than the people who owned them."

Ward smiled. "I daresay we all think we could use the other fellow's possessions better than he does."

Elinor persisted, frowning a little.

"Things are so terribly mixed up," she said. "If you could know the things that I know"—Ward looked faintly amused—"the people who are fighting for a principle, and have nothing to fight with, fighting for one sometimes! A good half of the world, you know, just struggles along, and the other half is so smug, so satisfied, it's—it's horrible."

Mr. Ward stared at her.

"How in the world do you come by such thoughts?" he demanded.

"I've never known anything else; I was brought up on the injustice of things. You have your poor here in the parish, but you see I was brought up with the poor of all the world. I am afraid I'm always for the under dog."

Rather startled was Rev. Mr. Ward that summer afternoon on the terrace at the Hall, startled and puzzled.

"Down in our hearts," he said, "perhaps we are all of us for the under dog. But how does that excuse my bandits?"

"This Mrs. Bryant—how much do you suppose you are going to lose for your poor by her loss?"

"Not so much, but enough. She had promised a lot of things. She called up this morning to say that it was all off." He started to say that all bets were off, but decided that it was unclerical and changed it. "But I didn't come here to worry you about myself or the parish. I think you should not be here alone."

Elinor looked down over the village.

"Then perhaps, after all, it would be better if I married at once."

"Ah! You are to be married?"

"Now that my father is gone," said Elinor wistfully, "it seems the best thing. And—I should like children. I have no friends, except perhaps you."

Ward strove to keep his voice steady, and matter-of-fact.

"Marriage is so serious—so vital a thing." He was trying to be calm and judicial. But his voice sounded far off; his heart pounded in his ears. "To marry because one is alone, or needs friends—is a flimsy foundation to build on."

Once again Elinor surprised him.

"There have been few really great passions in the world," she said. "I could almost count them on my fingers. The rest of us seem to get along without."

"Perhaps there are more than we hear about. Every now and then, in my work, I come across something so much greater than I had expected, self-sacrifice, love, charity, as to justify my faith in mankind."

"Your faith!" Elinor said softly. "That is what I envy you—your faith. Not only your faith in your kind, but—the other sort."

Faith, hope and charity—and the greatest of these is faith. Alas for old Hilary, who had not kept his!

"I had a governess once who had that sort of faith; it was a great comfort to her. But I sit here on my hill-side, and it seems to me that spread out at my feet is all the injustice and cruelty and hatred in the world. And your God allows it all. My father tried to believe—tried hard, but he said that when he asked for bread they gave him a stone."

"Do you know who said that?"

"My father," said Elinor.

Rather surprised, he let it go at that.

CHAPTER VI.

So great had the urgency of Boroday's position become that the band met at the hall on Thursday of the week after the country-club affair. Lethbridge was to get his instructions; Talbot wished to discuss his prospect.

After dinner, the night being warm, they had their coffee on the terrace.

A summer storm had come up. All at once a flash threatened Saint Jude's.

Huff leaped to his feet.

"I've got it!" he said. "What is it they call the big building back of the church?"

None of the men knew. It was, as a matter of fact, the parish house. Lethbridge, however, knew its function.

"Fine prospect—that!" he drawled. "That's where the Sunday school is held, and where they keep the plated knives and forks for the church suppers."

"It's a darned fine building," said Huff. "What would they do if it burned down?"

They were too unfamiliar with church affairs to hazard a guess. Elinor, who had been sitting silent, suddenly voiced an objection to Huff's unspoken plan.

"There must be some other way," she said. "The children—they have sewing classes and entertainments for the children there. It's the parish house."

"If lightning struck the parish house tonight—" Huff said quite eagerly. "This is Thursday. By Sunday morning they would be taking up a whacking big collection to rebuild it."

The idea had taken hold of his imagination. Even the suggestion that a large part of the offertory might be in checks mattered not. But Elinor was obdurate.

"You can do it some place else," she said. "Not here. They struggled very hard to build the church and they need money now. Mr. Ward told me—"

Huff turned on her jealously.

"Ward—that's the preacher chap?"

"He is the assistant rector," Elinor replied with dignity.

"He's been coming here, then?"

"Twice. Once when father died, and once to warn me against all of you." Not that she had forgotten that few minutes in the garden, under the moon; but that had been an accident—hardly a call.

Talbot chuckled. But Huff was thinking hard. Elinor had been different lately, a little softer. Ward represented all that the men Elinor knew were not—law to their violence, order to their disorder. There was almost a snarl in his voice.

"He'd better stay down in his valley with his old women," he said, "and leave you alone. You don't need him."

"I'm not so sure of that," Elinor replied quietly, and left him staring.

Huff burned the parish house the next night. He did it himself, without the assistance of the band. Into it he put not only the devilish ingenuity of long experience, but his new hatred of Ward.

Church property is always easy of access. It was the work of five minutes to crawl through a basement window and of half an hour to make his preparations.

He looked at his watch when he had finished. It was just midnight. In two hours, or before the fire began, he would be back in the city, establishing his alibi.

The fire-whistles in the village wakened Elinor at something after three o'clock. All of her room was filled with the red glare of the burning parish house. Old Henriette knocked at her door.

"The church is burning down in the valley," she called. "It's a grand sight."

Elinor was throwing on her clothing. She must see Ward. She would sell her pearls. She would build a new parish house. She said this over and over to herself as she struggled down the hill.

A new parish house, better than the old, with plenty of room for the children to play in! At least it was night, and the children safe in their beds; thank God for that! She was too disturbed to notice that she had thanked the God in whom she did not believe.

The fire had gained too much headway to be checked. All the efforts of the volunteer department and the small engine were directed toward saving the church. For a time it seemed as if Saint Jude's must go.

Elinor watched the destruction. It seemed as though a band had fastened itself around her chest. Then she saw Ward. He was on the ridge-pole of the church roof with a hatchet. The ridge-pole was burning slowly. She could see him chopping.

From that time she never took her eyes away from him. Other men were there. She did not see them. She saw only Ward battling on the ridge-pole, and high above on the steeple the sturdy cross of his faith.

Once the men on the street below turned the full force of the hose on him. She saw him reel, saw him recover himself by a miracle.

The fire glare died into the dawn. Saint Jude's was saved. Behind it in its park the charred skeleton of the parish house showed how thoroughly young Huff had done his work. Not until Ward had descended safely to the street did Elinor relax.

Ward found her sitting in one of the chairs along the pavement, her hair still in its long braid, her feet thrust into slippers, her eyes red from long staring.

The fire engine was being dragged away. The crowd had dispersed.

Ward, blackened and depressed, was surveying the ruins with a heavy heart. He turned and saw the girl.

Just at first he was not sure of her. He was always seeing her, mentally. Then he went toward her, his hand out.

"You see," he said, "what an hour may bring forth!" And then, "You reckless child, here in slippers!"

"I saw you on the roof," said Elinor, barely able to articulate. "Once I thought you had fallen."

"They nearly got me. It's rather sad, isn't it?" He stood, bareheaded in the cool dawn, and surveyed the ruin.

People meet great crises simply.

She tried to find some word of sympathy to say, but what was there, poor child? She knew the true inwardness of that disastrous night. So, with pathetic eyes, she turned away.

"I'll go home now," she said. "I saw the glare—I—" Quite suddenly her lips trembled. "I should like to help you with the new building."

"Fine!" said Ward heartily. "We'll get to that before long."

"If you had fallen—"

He was not listening. It came to her then how far apart they were. To her his falling would have been an end of all things; to him, it would have meant the beginning of a useful eternity.

"If you wait a little, I'll run around and get my car and take you up."

She sat down again, obediently. She was glad to be with him a little longer.

Until recently, the work of the band had always seemed a vague abstraction. Now one of its results lay before her. And there were other things fresh in her mind—old Hilary, dead of his revolt against law, and lying in state before an altar erected to a God he had not recognized. And Ward, watching her windows and thinking her the embodiment of what a woman should be.

Over her bitterness rose a hot wave of anger against Walter Huff. She had forbidden this thing and he had done it.

TO BE CONTINUED

FEED ROUGHAGE TO DRY COWS

Profitable, However, to Feed Sufficient Grain to Have Them in Good Physical Condition.

Dry cows can be maintained on hay and silage or roots. It is profitable however, to feed cows a sufficient amount of grain during the dry period to have them in good physical condition at calving time.

Cows should be dry for six to eight weeks prior to calving. It does not pay to have them dry for a longer period.

ABOUT THE STATE

News of Especial Interest to Minnesota Readers.

GATHERED FROM ALL SECTIONS

Happenings of the Week Briefly Told for the Convenience of the Busy Reader.

Dennis Mangan, eighty-five years old, hanged himself at his home in St. Paul. He was despondent over ill health.

The monthly report of the state hospital for the insane at Rochester shows that 1,385 patients are now being cared for there.

Authority for the tri-state flood control agreement between Minnesota, North and South Dakota is given in the rivers and harbors bill.

Joseph Lowey of Rochester, four years old, was drowned while attempting to recover a ball which had fallen into a barrel partly filled with water.

The Federal Loan bank of St. Paul has made loans totaling $417,600, according to figures on the first quarter year of operation of the institution.

John Ditter, aged thirty-seven, contractor and builder at Hamel, was killed in that village when his horses ran away and threw him out of a wagon.

William Rahn, who for twenty years has been widely known in Minneapolis's musical circles as a violinist, was drowned while bathing in Beebe lake, Wright county.

James F. Bell of Minneapolis has been appointed chairman of a provisional national committee to mobilize the milling industry to help win the war for the United States.

James F. Wallace, ousted from his seat in the Minneapolis city council by the courts for violating the state corrupt practices law, was returned to office at a special election.

Lloyd and George Munz, fourteen and sixteen years old, brothers, were drowned in Lake Francis, near Janesville, when a wave capsized the boat from which they were fishing.

Tearing down an American flag and crushing it under his heel, while uttering vile epithets, almost cost Victor Salmi his life at Kinney. When rescued by the police he was badly disfigured.

Schroeder, a fishing village on the north shore of Lake Superior, in Cook county, is in the throes of a smallpox epidemic. Twelve entire families are stricken and the infection has been carried into practically every home.

Margaret Groff, nineteen years old, and Mrs. Bessie Frisk, aged twenty, both of Minneapolis, were sentenced to ninety days each in the workhouse by Municipal Judge Smith of Minneapolis for wearing soldiers' uniforms.

Minnesota may lead the entire United States in the reduction of fire loss through Fourth of July celebrations this year, only a few fires and one or two minor accidents having been reported to State Fire Marshal Hatgadine.

Alfred Caufield's third attempt at suicide within a year was successful. He shot himself through the heart at his home in Ironton, using a double barreled rifle. Attempts to kill himself by hanging and drowning were frustrated.

John M. Brooks, a farmer residing near Blooming Prairie, was instantly killed when a heavy car owned and driven by his son-in-law, John Schutt, slid off a high grade and turned turtle. Other passengers in the car were badly bruised.

Mayor Thomas Van Lear of Minneapolis startled the National Editorial association when, in his address of welcome, he attacked the press in general terms for submitting to "the business men's thumbscrew in the editorial office."

J. J. Lomen, sixty-one years old, for many years active in Minnesota politics, is dead at St. Paul after an illness of six years. He had been assistant secretary of state for three terms and chief clerk in the secretary of state's office for many years.

Work on a second state and federal highway from the Twin Cities to Duluth is to be pushed forward at once as a result of a conference between the delegation from Anoka, Isanti, Kanabec and Pine counties with C. M. Babcock, state highway commissioner.

With noted men of the country as lecturers and an extensive exhibition of food products the Minnesota state fair, Sept. 3 to 8, will be a model for other food training camps to be conducted at state fairs as a part of the government's food conservation program.

Miss Belle M. Comstock and Miss Adelia Swanson, who lost their lives in the Christopher Columbus disaster at Milwaukee, were teachers in the Rochester (Minn.) public schools. They were at Chicago attending teachers' summer school at the Chicago university.

A resolution providing for the appointment of a committee to make a sweeping investigation throughout Minnesota into the high cost of living, the alleged practice of speculators in storing immense quantities of commodities to await higher prices and the railroad car situation with regard to the coal supply was adopted by the state public safety commission.

RAY P. SPEER.

Minnesotan May Be Named as Aide to Food Director.

Ray P. Speer of St. Paul, publicity man for the Minnesota state fair, probably will be selected by the American Association of Fairs and Expositions to serve at Washington as an aide to Herbert C. Hoover, food administrator.

Frank Sebley, said to be a wealthy farmer, was arrested at Osseo on a charge of [illegible] insulting remarks about the American flag. J. E. Smith, a member of the Hennepin county public safety commission, made the arrest and placed Sebley in the Hennepin county jail.

Judge John C. Nethaway of Stillwater, former assistant attorney general of Minnesota and Democratic politician, is dead at [illegible]. He was sixty-seven years old. Mr. Nethaway was appointed to a judgeship in the Thirteenth district by Governor Burnquist more than a year ago.

Mrs. [illegible], a Winona [illegible], is in a [illegible] condition as a result of being attacked by a large swarm of bees. [illegible] was hiving the bees when they suddenly turned [illegible] rescued her after she had [illegible]. She is expected to [illegible].

A deal involving [illegible] Great Northern [illegible] has been closed with the [illegible] company of Cleveland. The deal involves the [illegible] mines which are [illegible] by the Great Northern ore trustees. About [illegible] tons of iron ore is involved.

Doctors William J. and Charles H. Mayo, world famous surgeons of Rochester, will go to France soon to work in war hospitals, they announced in replying to the University of Minnesota board of regents their new plan for the administration of the $1,500,000 Mayo foundation for the university.

Nearly 100 delegates to the annual meeting of the National Editorial association at Minneapolis participated at Red Wing in the [illegible] of a bronze tablet to [illegible] H. B. Herbert of Chicago, former editor of the Red Wing Republican, founder of the national organization of newspaper editors and its first president.

Mrs. Carrie Larson of Minneapolis was shot and killed by her husband, Olaf Larson, at their home in the Mill City. After the shooting Larson cut his throat and wrists with a jackknife and died shortly afterward at the City hospital. Five children survive, the youngest being nineteen. Mrs. Larson was suing for a divorce.

Five hundred men, led by Mayor E. E. Webber of Chisholm and Mayor Victor L. Power of Hibbing, searched the woods north of Chisholm for seven-year-old Olga Paliz, who was lost several days previously while picking berries. She was found severely bitten by insects and mosquitoes and suffering greatly from exposure.

Official announcement is made that Major William H. Hart of St. Paul, for several years in charge of accounting payrolls in Adjutant General Fred B. Wood's office, will resign shortly. Sergeant Harry Radcliff, connected with the regular army for more than seven years and former Minneapolis license inspector, will be Major Hart's successor.

The accounts of Adjutant General Fred B. Wood of Minnesota have been audited by the treasury department at Washington and approved. This means that the treasury department will open an account with Captain Harry [illegible] Brady, property and disbursing officer of the Minnesota national guard, and that the state will get all funds held up since March 1.

Frank Connors, Indian agent, is in a hospital at Cloquet, seriously injured, and J. F. O'Neil, railroad station agent at Carlton, is held by the authorities as the result of a shooting at Sawyer. It is said Connors was watching a resort at Sawyer for evidence of illegal sales of liquor to Indians when he became involved in an argument with O'Neil and a companion.

John Halloran, 103 years old, who lived on the same Minnesota homestead for sixty-two years, is dead at St. Thomas, Scott county. Mr. Halloran was born in County Cork, Ireland, in 1814 and came to the United States in 1830. He was married in Ohio in 185[illegible] and at [illegible] removed to Minnesota, working for a time as engineer on a steamboat on the Minnesota river.

Applicant must bring ink, pen and pencil. Renewals will be taken at this time. A state fee of 50 cents is charged on enrollment.

De Kaiser's Prayer.

Mine Gott will you be mine partner?
You don't know who I am?
I am the German Kaiser,
De Kaiser Will-I-Yam.

You know I whip dem Belgians
Und mitt bullets filled Russia full
Und I'll whip France and Italy
Und blew up Johnny Bull.

Now all dem oder nations
I don't give a damn,
If you'll just be mine partner,
Und whip that Uncle Sam.

You know I got them submarines
All Europe know dot well.
But Edison got a patent now
Vot blows dem all to hell.

Now Gott if you do this
Then you I,ll always love
Und I'll be emperor of earth
Und you be emperor above.

But Gott if you refuse me dis
To morrow night at eleven
I'll call my Zepplins out
Und declare war on Heaven.

I wouldn't ask dis from you
But it can be plainly seen,
Dot when Edison pushes dot button
I got no submarine.—Cando Herald.

NOTICE.

M., for the removal of the furnaces and connections thereof, (Furnaces and Material to remain the property of the district,) and for the installing of a steam heating plant and ventilation system (gravity or mechanical,) and for the finishing of the upper story of the School house, according to planes specifications on file with the Clerk, bids must be made seperatly for each item and must be accompanied by a certified check to the amount of ten per cent of the bid, made payable to the Clerk.

The Board reserves the right to reject any and all bids.

Nick Bundlund, Clerk.
Goodridge, Minn.

Government Crop Report For July

A summary of the July crop report for the state of Minnesota and for the United States, as compiled by the Bureau of Crop Estimates issued Monday by the U. S. Department of Agriculture, is as follows:

CORN

State: July 1 forecast, 61,400,000 bushels; production last year (Dec. estimate), 84,420,000 bushels.

United States: July 1 forecast, 3,120,000,000 bushels: production last year (Dec. estimate) 2,583, 241,000.

WINTER WHEAT

State: July 1 forecast, 1,210,000 bushels; production last year (Dec. estimate), 910,000 bushels.

United States: July 1 forecast 402,000,000 bushels; production last year Dec. Estimate), 481, 744, 000 bushels.

SPRING WHEAT

State: July 1 forecast, 53,300,000 bushels; last years production (Dec. estimate), 26,645,000 bushels.

United States: July 1 forecast 276,000,000 bushels; production last year (Dec. estimate), 158,142,000 bushels.

OATS

State: July 1 forecast, 181, 400,000 bushels; last years production (Dec. estimate), 88,112,000 bushels.

United States: July 1 forecast, 1,450,000,000 busheis; production last year (Dec. estimate), 1,251,992,000 bushels.

RYE

State: July 1 forecast, 6,120,000 bushels; production last year (Dec estimate), 5,025,000 bushels.

United States: July 1 forecast, 56,100,000 bushels; production last year (Dec. estimate), 47,383,000 bushels.

BARLEY

State: July 1 forecast, 35,900,000 bushels; production last year (Dec estimate), 26,125,000 bushels.

United States: July 1 forecast, 214,000,000 bushels; production last year (Dec. estimate), 180,927,000 bushels.

FLAXSEED

State: July 1 forecast, 2,770,000 bushels; production last year (Dec estimate), 2,338,000 bushels.

United State: July 1 forecast, 17,000,000 bushels; production last year (Dec. estimate), 15,459,000 bushels

POTATOES

State: July 1 forecast, 34,500,000 bushels; production last year (Dec. estimate), 16,800,000 bushels.

United States: July 1 forecast, 452,000,000 bushels; production last year, (Dec. estimate), 285,437,000 bushels.

ALL HAY

State: July 1 forecast, 5,770,000 tons; production last year (Dec. estimate), 6,284,000 tons.

United States: July 1 forecast 103,000,000 tons; production last year (Dec estimate), 109, 786, 000 tons.

PCICES

The first price given below is the average on July 1 this year, and the second, the average on July 1 last year.

State: Wheat, 205 and 93 cents per bushel. Corn, 152 and 74. Oats 64 and 36. Potatoes, 226 and 72. Hay, $9.00 and $8.40 per ton. Eggs, 28 and 19 cents per dozen.

United States: Wheat, 220.1 and 93.0 cents per bushel. Corn, 164.6 and 75.4 cents. Oats, 68.9 and 40 4 cents. Potatoes, 247.9 and 102.3 cents. Hay $14.56 and $12 08 per ton. Cotton, 24.7 and 12.5 cents per pound. Eggs, 28.3 and 19.7 cents per dozen.

Auto Tour to Winnipeg.

The touring committee of the Thief River Falls auto club has decided that the first tour of the club will be to Winnipeg on July 27, 28 and 29, leaving that city at half past seven sharp Friday morning of next week. All owners of autos who wish to make the trip whether members of the auto club or not should either write or call any of the special committee who have the matter in charge at Thief River Falls. Those on the committee are Geo. Johnson, C. L. Hanson and Scott Laird It is desired to have as many cars as possible make the trip. The return trip will be made on Sunday July 29. Dinner will be had at Hallock both going and returning. Remember to let the committee know not later than Tuesday evening of next week.

Scott Laird, Secy.

Biggest Month In Creamery History.

Practically $1,000 worth of butter for every working day during the month of June was the output of the Thief River Falls Co-operative creamery, according to the report just submitted by Secretary Hanson. The exact total was $24,003.24, which is about $8,000 more than has been turned out in any similar period in the history of the institution. The amount of butter churned was 62,738 pounds.

The receipts at the creamery show a satisfactory increase every week. Not only does this indicate a constantly growing number of cows in the territory served by the plant, but it also shows that the cattle owners are getting out of the habit of making their own butter and employing the more satisfactory and profitable method of taking the product of their herds to the creamery. Buttermaker Hazelrud states the tests prove that the section is steadily working towards a better class of cattle. The showing is one of which he and the officers are justly proud.

The new creamery at Hazel is reported as getting along in excellent shape. Buttermaker Bullman states that the output for the last week in June was 2,980 pounds, or an average of about 500 pounds per day. The receipts at the plant for the same period were 9,025 pounds.—T. R. F. Times.

SENATE VOTES TO KILL WHISKY

Effort to Include Wine and Beer Meets Defeat.

HOUSE EXPECTED TO AGREE

Big Dry Victory Comes After Hard Fight When Amendment Is Approved by Vote of 45 to 37.

Washington, D. C. — The whisky business will be wiped out thirty days after the Lever food control bill becomes a law through these provisions in the final agreement reached on prohibition in the senate:

First—The president is authorized to take over for government use all distilled spirits held in bond.

Second—The manufacture of distilled spirits from foodstuffs is prohibited.

Third—The importation of distilled spirits is prohibited. This means that the only whisky, brandy, gin and rum and other distilled liquors which can be sold after that date will be those in stock, in saloons.

By a vote of 45 to 37, the senate refused to make the nation bone dry by including wine and beer with distilled liquors. The proposal to give President Wilson control over beer and wine-making was defeated, 35 to 46.

The big dry victory of the day was the adoption of the amendment by Senator Smoot of Utah, authorizing the president to take over all distilled spirits in bond and providing compensation of cost plus a 10 per cent profit to the owners.

Differs From House Bill.

The difference between the prohibition section passed by the house and the one agreed to by the senate is that the former prohibits the making of any kind of intoxicating liquors from foodstuffs, but does not prohibit the importation, while the latter deals only with distilled spirits, but provides absolute prohibition.

The question likely will go to conference as it now stands with a strong probability that the house will yield to the changes made by the senate.

The senate provision would limit consumption to stocks in retailers' hands or withdrawn before the law goes into effect. Stocks of distilled beverages in bond are estimated at between 200,000,000 and 300,000,000 gallons and the annual normal consumption at 120,000,000 gallons.

To purchase this enormous quantity of liquor, or what is left of it after withdrawals in anticipation of the legislation, it is estimated the government will have to spend from $300,000,000 to $1,000,000,000.

The probable loss in federal revenues is placed at from $260,000,000 to $400,000,000, although this, as well as the cost of purchase, would depend entirely on how much liquor was withdrawn tax-paid before the [illegible] [illegible]

PARTIES AGREE ON RESOLUTION

Radicals and Socialists Oppose Annexation.

GERMAN GENERALS HELPLESS

Von Hindenburg and Von Ludendorff Unable to Convince Reichstag of Eventual Success.

Copenhagen. — Asserting that the reichstag "labors for peace and mutual understanding and lasting reconciliation among the nations" and "forced acquisitions of territory and political, economic violations are incompatible with such a peace," a resolution agreed to by the majority block of the center Radicals and Socialists will be introduced when the reichstag reassembles, according to the Berliner Tageblatt.

The resolution was agreed to despite the presence in Berlin of Field Marshal von Hindenburg and General von Ludendorf, who were summoned from the front to sidetrack the proposal by giving encouraging reports of the military situation and to inspire the reichstag with a belief in the possibilities of obtaining that "German peace worthy of the sacrifices made," to which Von Hindenburg committed himself in his published replies to memorials of Pan-German organizations.

The peace resolution cites that the German people stand on the assurance of the speech from the throne, Aug. 4, 1914, which said Germany is driven by no lust of conquest.

It further declares that the freedom of the seas must be assured and that only an economic peace can prepare the ground for the friendly association of the peoples.

The resolution also proposes to put the reichstag on record for the creation of international jurisdiction organizations.

The conclusion, however, contains a threat that, so long as the enemy governments refuse to accept such a peace and so long as they threaten Germany and her allies with conquest, the German people will stand together as one man and fight until the rights of themselves and allies to life and development are secured.

ALLIES MAKE GAINS ON TWO FRONTS

London. — Once again the Austro-German allies have suffered reverses in the loss to the Russians of a part of Lodziany, in the Lomnica river region of Galicia; in the Russian repulse of an attack northeast of Kalusz and in the Champagne region of France, where the French drove them from positions they had recaptured, inflicting heavy casualties on them.

Not alone have the Russians in their drive in Galicia made considerable gains of terrain, but their captures of men, guns and material have been enormous.

From July 1 to 13, according to a Russian official communication, 36,431 officers and men of the Teutonic armies have been made prisoner and ninety-three heavy and light guns twenty-eight trench mortars, 403 machine guns and ninety-one guns of other descriptions have been taken.

GREECE TO JOIN THE ALLIES

Severs Relations With All Four Central Powers.

Washington, D. C. — Uncertainty as to Greece's status in the world war was cleared away with the receipt of official information that the Greek government not only has severed relations with all four of the central powers, but is actually in a state of war with them.

Information has reached the state department that the Greek minister in Paris has notified the French government Greece considers herself a full belligerent and will act accordingly.

Decrease in U-Boat Victims.

London. — As an additional proof of the effectiveness of British measures against U-boat warfare is the report of the admiralty issued here showing fourteen vessels of more than 1,600 tons were sunk last week and three under that tonnage were victims of mines or submarines. Seven fishing vessels were lost.

PRESIDENT URGES PASSAGE OF BILL

Gives Support to Original Food Measure in Senate.

GORE SUBSTITUTE OPPOSED

Executive Said to Have Expressed Dissatisfaction With Smoot Liquor Amendment.

Washington, D. C. — President Wilson has come to the support of the administration food control bill as originally submitted to congress.

In response to a request from senate leaders for assistance in solving the difficulties standing in the way of action there, the president sent to Democratic Leader Martin a personal letter, recommending the general purposes of the general bill for government control of foods, feeds and fuels only.

He wrote that he believed unnecessary the extension of government control of steel, iron, copper, cotton, wool, leather and other products.

The substitute bill drawn by Senator Gore is opposed by the president as an emasculation of the administration legislation. He wrote that he considered prompt final disposition of the legislation imperative.

The president's letter, which was not made public, is understood not to have discussed prohibition in any form. On reliable authority, however, it is said that in his conference with the senate leaders the president expressed disagreement with the Smoot amendment adopted by the senate last week, directing purchase by the government of all stocks of distilled beverages in bond at cost, plus 10 per cent.

On receipt of the president's letter administration leaders prepared to obtain action along the lines suggested. Senators Lodge, Smoot and other Republican leaders were called into conference and a meeting of the Democratic steering committee was arranged.

Food Administrator Hoover conferred with Senator Chamberlain, in charge of the bill, and added his opposition to the Gore substitute as nullifying the government's control plans.

UNCLE SAM CARES FOR EXILED I. W. W.

Columbus, N. M. — Closely guarded by forces of United States cavalry from Douglas, Ariz., the special freight train carrying the 1,200 deported strikers and others from Hermanas, N. M., arrived here. The deported men were placed in a detention camp here pending further instructions from the federal government.

W. B. Cleary, a Bisbee attorney and labor advocate, who was among those deported, in a statement reviewing the deportation, said that many of the men wished to return to Bisbee where they own property and had wives and families. A census of the exiles showed that 312 had registration cards under the selective draft law and that 142 were owners of Liberty bonds. Mr. Cleary said that besides strikers and members of the I. W. W. the exiles included small business men and other residents of Bisbee who were suspected of sympathizing with the strikers.

ASK $2,000,000,000 FOR BIG ARTILLERY

Washington, D. C. — A great artillery program for the war against Germany will be provided for in the coming $3,000,000,000 general deficiency appropriation bill.

Of the total approximately $2,000,000,000 is to be asked to provide for big guns, ammunition and equipment for use in addition to those to be drafted this summer.

Among other plans intended to be provided for in the big deficiency bill, the draft of which already is being prepared by the committee experts with some of the lesser essentials already in, will be the financing of private plants to make war munitions for which between $9,000,000 and $10,000,000 is to be asked.

STORM OF PROTEST MADE

Many Cities Object to Draft Population Estimates.

Washington, D. C.—Storms of protests are gathering in every section of the country against the census bureau's "paper population" estimates in apportioning the draft toll of men.

The war department is being bombarded with telegrams from indignant cities demanding their population estimates be revised or corrected.

Other cities content themselves with terming the figures "outrageous."

Secretary for India Resigns.

London.—Official announcement of the resignation of J. Austen Chamberlain, secretary for India, was made here. This is the first fruit of the Mesopotamia commission's report and lent a dramatic touch to the debate on that report in parliament.

American Steamer Kansan Sunk.

Washington, D. C.—State department dispatches announcing the destruction of the American steamer Kansan by a German submarine said that four members of the crew were missing.

SPECTACULAR AIR FIGHT OVER LONDON

London.—In the biggest German airplane raid on London in the history of the war, thirty-seven civilians were killed and 141 were injured, four raiders were brought down and material damage was done to the business section of the city, evidently the goal of the raiders.

The raid was the most spectacular and daring yet undertaken by the Germans. The British aerial patrol accepted the challenge of the invaders and a great battle in the sky followed the thunder of the anti-aircraft guns and the pop-pop of machine gun fire. One raider fell prey to an army airplane at the mouth of the Thames and three were brought down by British naval flyers forty miles out at sea.

London.—Flinging down hundreds of tons of high explosive bombs on German interior cities in a swift succession of reprisal raids, an allied warplane armeda has carried vengeance home to the foe, even bombarding the heart of Germany's munition system, the Krupp factories at Essen, Field Marshal Sir Douglas Haig announced.

WHY SHORTHORN IS FAVORED

Beef Must Come Along With Milk is Claim—Dairy Cattle Breeders Have Good Argument.

One reason why the milking Shorthorn is being called to the attention of corn-belt farmers who must come inevitably to dairying, is that the corn belt is committed to beef and cannot easily give up to dairying exclusively. The farmer who takes a dairy bull calf to market and gets $3 or $4 for it is likely to feel cheated, because he will remember the beef calf that grew into a likely steer and brought a good profit.

Of course, the dairy cattle breeders have their arguments—and good ones.

Shorthorns on Kansas Farm.

But the fact remains that the farmer, generally speaking, will be hard to wean away from the beef type. The Shorthorn's reputation as a leading beef animal will appeal to the farmer, for he still can have his beef along with his milk.

This argument may apply to other dual purpose cattle, perhaps, but it is especially good with a beef animal that can perform well in the dairy.

FEED COWS BEFORE CALVING

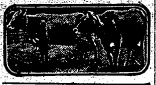
Practical Dairymen Agree That Preparation Has Much to Do With the Amount of Milk.

(By H. H. KILDEE, University Farm, St. Paul, Minn.)

The proper time to begin feeding a dairy cow is six or eight weeks before calving, and practical dairymen agree that this preparation has more to do with the amount of milk and butterfat which a cow produces during the lactation period than does the feeding during any other period.

For cows calving during the summer or early fall most dairymen like to have a small pasture away from the herd but with an abundance of grass, and, in addition, they like to feed a suitable grain mixture. Corn silage, with clover or alfalfa hay and a limited grain ration of three parts ground oats, two parts of bran and one part of oilmeal is especially good for cows calving during winter or early spring. After calving the cows should be brought slowly up to full feed and thereby steadily to a higher production.

DAIRY



PARTICULAR CARE FOR MILK

Flavors in Dairy Products May Be Prevented by Keeping Cows From Eating Weeds.

Don't let your dairy products taste of weeds or grass, if you can avoid it. Because butterfat absorbs flavors, particular care should be taken in handling milk, cream and butter, according to N. E. Olson, instructor in dairy husbandry in the Kansas State Agricultural college.

"The principal flavors derived from feeds are the weedy flavors," said Mr. Olson. "In the spring creameries have trouble with the wild onion flavor. This is something that the farmer cannot prevent, and is caused by early pasturing.

"Another common flavor is the half-grass flavor, produced from green feed in the early spring. It can be tasted in milk, cream, and also in ice cream. It is found in practically all dairy products in the spring."

The method of preventing these flavors is keeping the cows from eating weeds, pointed out Mr. Olson. Weedy patches in pastures should be fenced off so that the cows cannot get to them. Other flavors are produced through the feeding of alfalfa and silage. If silage is fed, it is advisable to feed it after milking rather than before.

MILK FEVER IS BOTHERSOME

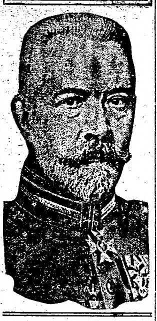
Danger Among Cows Appears Greatest in Late Summer—Keep Animal in Barn and Feed Hay.

Milk fever is a rather serious trouble with good cows, as it is said that none but well-bred, heavy-producing cows have it. It seems to be more prevalent among grass-fed cows.

The danger of milk fever among cows seems to be greatest in late summer or early fall, notably June, July, August and September. The recommendation is to put the cow in the barn and feed dry hay about a week before she comes fresh. Three or four days before calving the cow is given a dose of salts with a little ginger. Another dose is also given five or six hours after the calf is born. A bucket of warm water should be given the cow two or three times a day. She should not be allowed to have cold water for some time.

BETHMANN-HOLLWEG.

German Chancellor's Resignation Is Accepted by Kaiser.



BETHMANN-HOLLWEG QUITS HIS POSITION

London.—Kaiser Wilhelm has accepted the resignation of the German imperial chancellor, Theobald von Bethmann-Hollweg, and has appointed in his place Dr. Georg Michaelis, food controller, under secretary of finance for Prussia, and a privy counsellor.

An official German wireless dispatch with this information was announced by the British admiralty here.

No further details were given. Official confirmation was had earlier that the Prussian minister of war, General von Stein, had resigned and that his retirement had been approved by the kaiser.

The resignations of all the Prussian cabinet were formally tendered the kaiser several days ago, when the German political situation became acute. The emperor delayed acceptance of several of these, but delayed dispatches from Berlin mentioned that neither Minister of the Interior Helfferich nor Minister of Instruction Solz of the Prussian ministry had attended recent meetings of that body, indicating their imperial master had dropped them from his official list of counsellors.

HAD SOME TROOPS ON BOARD

British Transport Sunk; Eleven Persons Missing.

London.—The large British transport Armadale has been sunk by a submarine, it is officially announced. The statement reads:

"The British transport Armadale, with a small number of troops on board, was torpedoed and sunk by an enemy submarine in the Atlantic. Six soldiers, one passenger and four of the crew are missing and it is presumed were drowned."

EACH NUMBER DRAWN AFFECTS 4,000 MEN

Washington, D. C.—Drawing of lots for the selective draft not only will determine what men are to be called to the colors in the first war army, but will show in what order the others registered will be liable for service when later armies are organized.

A plan of drawing will be followed under which a definite place in the waiting lists will be given every one of the millions who registered.

Those standing at the head of the list in each country or city district will be called first before the examination boards and then the obligation will pass on down the line as long as men are needed.

This does not mean that a separate name or number will be drawn for every one of the country's 9,800,000 registrants. In fact, every number, under the theory of the plan, will represent more than 4,000 men, one for each of the registration districts.

MUST HAVE FEDERAL O. K.

Railroads Warned Against Carrying Certain Commodities.

Washington, D. C.—An embargo, effective immediately, against all shipments intended for export of commodities named in President Wilson's recent export proclamation, except when bill of lading is presented with a federal license number furnished or authorized by the export council at Washington, was ordered by the American Railway Association's commission on car service.

Provides for 22,000 Airplanes.

Washington, D. C.—The war department bill appropriating $640,000,000 for construction of 22,000 airplanes was passed by the house without a roll call.

Are You Going To Get Eggs Next Winter?
The time to decide that question is now. If you don't get them don't blame the hens. They'll lay if you give them half a chance. But they can't lay in a cold drafty shed—it takes all you feed them to keep them warm.
Give them a good, warm, wind-tight house. It won't take them long to pay you back for it. It doesn't take very many dozen eggs these days to pay for a chicken house. It's a real investment. Come in and see us. Our service costs you nothing.

JOHN D. RYAN.

Copper Magnate to Direct Red Cross Medical Work.

Photo by American Press Association.

Henry P. Davison, chairman of the Red Cross war council, has recruited another big business man to the cause. He is John D. Ryan, president of the Anaconda Copper company, who, in addition to his big tasks in that capacity, will be director general of military relief for the Red Cross.

PRESIDENT WARNS AGAINST EXTORTION

Washington, D. C. — President Wilson has appealed to the country's business interests to put aside every selfish consideration and to give their aid to the nation as freely as those who go out to offer their lives on the battle field.

In a statement addressed to the coal operators and manufacturers he gave assurances that just prices will be paid by the government and the public during the war, but warned that no attempt to extort unusual profits will be tolerated.

"Your patriotism," the appeal said, "is of the same self-denying stuff as the patriotism of the men dead and maimed on the fields of France, or it is no patriotism at all. Let us never speak, then, of profits and patriotism in the same sentence.

"I shall expect every man who is not a slacker to be at my side throughout this great enterprise. In it no man can win honor who thinks of himself."

MAN, WIFE AND SON SLAIN

Fourth Member of Auto Party Is Under Suspicion.

Johnstown, Pa.—Edward Humphries, a prominent coal operator, his wife and his son, Edward Humphries, Jr., were shot to death on a country road near here.

The Humphries family was a part of an automobile party with George C. Thompkins, Jr., of Philadelphia. Thompkins took the bodies of Mrs. Humphries and the son to Carrolltown, Pa., and told officers that the party was held up by masked men.

A coroner's jury was called to investigate the murder and ordered Thompkins held.

The Girl Who Had No God

By
Mary Roberts Rinehart

Author of "K," "The Man in Lower Ten," etc.

(Copyright—Mary Roberts Rinehart)

SYNOPSIS.

CHAPTER I—Old Hilary Kingston, starting with Socialism, drifts into anarchy, and gathers round him in the hall above the village of Woffingham a band of accomplished desperadoes who rob the rich, incite seditions and arm the rebellious. His motherless daughter, Elinor, is raised to fine living and wrong thinking, to no law and no Christ.

CHAPTER II—In an attack on the Agrarian bank messenger, old Hilary is killed, but is not suspected of complicity. Boroday brings the body home to the hall.

CHAPTER III—Ward, assistant rector of St. Jude's, makes a call of condolence on Elinor, who consents to have her father buried from St. Jude's in the odor of sanctity. The chief of police recognizes Boroday and is suspicious.

CHAPTER IV—After the funeral the band meet at the hall and agree to go on as before, Elinor acting in her father's stead. Huff asks Elinor to marry him and she consents, though she does not love him. Boroday is arrested and threatened.

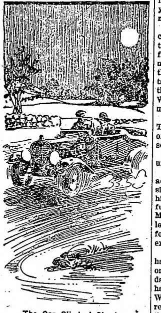
CHAPTER V—Boroday in jail, Talbot plans a raid on the Country club. The friendship between Ward and Elinor ripens to something deeper. She envies him his faith.

CHAPTER VI—Huff burns St. Jude's parish house. Elinor offers to help rebuild it and is angry with Huff.

CHAPTER VII.

Ward brought her a cup of coffee and stood by with satisfaction while she drank it. In his eyes there was a mixture of depression and joy. The parish house was gone, and this girl before him was to marry another man. But they would build another parish house, and who knew—

He drove her up the hill in his small car. At the top of a rise he stopped



The Car Climbed Slowly.

the car and looked back. The night's devastation showed clearly, a black wound in the smiling heart of the valley.

Elinor watched him.

"It means a great deal to you, doesn't it?"

"It's rather a facer— Of course we will build again, but there are things that could not be replaced. That isn't what troubles me. The fact is, I am afraid I'm responsible.

"I was there last night, alone. I have a bad habit, when I have a mental problem to worry out, of walking up and down a room and lighting one cigarette after another. I am reckless with matches."

Then perhaps, after all, Walter had not done it!

The car climbed slowly. Ward kept his eyes straight ahead. Elinor cast little shy glances at his profile.

"You said you had something to worry out?"

He drew a long breath.

"I have had an offer to go to New York to a big church. It's rather a wonderful opportunity."

Elinor made no sign except to clutch her hands as they lay ungloved in her lap.

"Then you will be leaving—us?"

"No," he said. "I shall not be leaving you."

"You like it here?"

"Very much." He turned and looked down at her. It was unwise. He realized that at once. So frail she looked, so softly, tenderly feminine! And because he knew that, after the night, he had not yet got control over himself, the merest hand-clasp as she got out of the machine was all he dared. But at the top of the steps Elinor turned.

"You will never know just how sorry I am," she said, and went through her garden to the house.

From that Friday morning until the evening of the following day Elinor was quite alone.

Hour after hour she spent pacing the [illegible] the valley

On Friday night, unable to sleep, she threw a negligee over her shoulders and went down to her garden. The village slept quietly, but there was a light in Ward's small window near the church. She remained on the terrace until the light was extinguished.

At dinner that Saturday Boroday's empty place cast a gloom over the meal. Walter Huff came a little late. Under the ease of his greeting there was a touch of uneasiness as he met Elinor's eyes. When the servants left the room, Talbot leaned forward to Walter.

"Now tell us about it," he said.

Huff was frankly triumphant, but he still avoided Elinor's eyes.

"It's working out exactly as I knew it would," he explained. "Having once had a parish house they cannot do without it. The vestry carried only about a third enough insurance. And there's another point in our favor—the rector's away. He's got rheumatism. They are going to take up an additional purse to send him to Baden-Baden."

"When?"

"Tomorrow morning. And tomorrow being Sunday, the assistant rector, Elinor's friend, will have it in charge until Monday morning."

"I shall warn him," said Elinor suddenly.

There was silence for a moment. Talbot smiled. Lethbridge looked astounded. Huff, bending forward with his arms out before him on the table, confronted Elinor squarely.

"That's it, is it?" he said.

"I asked you not to do—what you have done. The children used it all the time. They played basketball there. Besides, my wish should mean something to you."

Huff shrugged his shoulders.

"If I had burned a tenement full of people—"

"A man was nearly killed. He was on the ridge-pole of the church and they turned the full strength of the water on him. I saw it. I—almost fainted."

"You saw it."

"I was there," said Elinor quietly.

Huff rose angrily.

"You were there! And who was it who almost fell off the roof? Your parson, I suppose."

Talbot silenced the boy. It was Lethbridge who took up the argument. He understood her position and sympathized, he said. The fire was a mistake. But now that it was done—He spoke of Boroday's critical condition, of their safety that depended on his, and finding her attitude to be unyielding, took refuge in her father's memory.

"If anything comes out, it will all come out," he reminded her. "It seems to me, Elinor, that you owe it to your father not to interfere. This isn't a new plan. Four or five years ago when the parish house was first built we talked it over here. And it isn't as though we mean to hurt this fellow Ward. It will be three to one; he'll make no resistance."

"Yes," she said. "Three to one. That is the way we fight. Oh, I'm one of you, I know that—but it sickens me, sometimes."

The men were astounded, frankly uncomfortable.

The conference got nowhere. Elinor acknowledged their duty to the Russian, offered all her jewels, in fact, for his defense. But she stubbornly refused to countenance the attack on Mr. Ward. Huff lapsed into sullen silence, his eyes on her. The other men found every argument met by silence, except for one passionate outburst.

"He is my friend," she cried. "I have never had any friends, except once, years ago, a girl. It was Boroday then who used my friendship for her. It was the Rutherford matter. Walter would not remember, but the rest of you—I tell you, I won't do this thing."

Talbot tried a new method. "It's a wealthy congregation," he explained. "It is not much for them, and it's safety for us. If we let Boroday go up, and he thinks what he will about us, he can make it bad for all of us."

Elinor turned on him.

"I don't care a rap for the congregation. Do you think he will let that money go without a struggle? The moment it goes into the offertory it ceases to be money and becomes a divine trust to him. He'll fight and—someone will be killed."

It dawned even on Talbot after a time that her solicitude was for none of them. When he realized it, at last, he sat back with folded arms and frowning brows. Here was mockery, for sure; old Hilary's daughter, reared on pure violence, and in love with a parson!—old Hilary's daughter and successor, defying the band in its hour of need, and quoting a divine trust, in extenuation!

In view of her attitude, there seemed to be nothing to do.

"We'll give it up, of course," said Lethbridge, after a pause.

There had never been any drinking in old Hilary's house. Only abstainers were ever taken into the band. But it was the custom of the two older men to remain at the table over their cigars, giving Walter and Elinor a half-hour together. That night, when Elinor rose from the table, Huff, although he rose with the others, made no move to follow her. She looked back from the doorway, a slim, almost childish figure with beseeching eyes.

"You must all try to think kindly of me," she said wistfully. "I care for you as much as I ever did. You are all I have, you three. It is only that I—have been thinking."

For the first time since the organization of the band, there was quarreling that night in old Hilary's paneled library. At the end of an hour Walter

Huff flung out of the door, white with fury. He stumbled through the garden toward the garage, muttering as he went. In the rose alley he met Elinor.

"I was waiting for you," she said simply.

Huff stood before her, and the anger left his face.

"You're the one thing in all the world I felt sure of." His voice was heavy with despair.

"I've been thinking about Boroday—"

"Elinor, how far have things gone between you and this man at St. Jude's?"

She recoiled.

"I hardly know him."

"You think about him."

She looked down into the valley.

"I think of the things he stands for. It just seems to me that, when a man like that, not a dreamer at all, but human and—and keen, when he believes all that he does—"

"It was Ward on the ridge-pole, the one who nearly fell?"

"Yes."

"And you were frightened?"

"It made me sick. I—"

Quite suddenly he crushed her to him. It was as if he meant to drive away this barrier between them by sheer force of his love for her. But, although she held up her face for his kiss, he released her as suddenly, without it.

"You're crazy about him," he said thickly. "I'm not blind. I'll get him for this!"

CHAPTER VIII.

Saturday evening it was the custom of the Bryants to entertain the rector at dinner.

Now, in his absence, it was the assistant rector who dined in the paneled Jacobean dining room of the Bryant house, swallowing much unctuous dictation as to church policy with his dinner.

Not that Ward was mild. But he had an easy way of listening to the advice of his various influential parishioners and then going ahead and doing as he liked. In nonessentials he always yielded. To him the church was so much bigger than its ritual.

That evening Mrs. Bryant had taken up the question of women in the choir.

"Frankly, Mr. Ward," she said, ignoring her fish, "I do not approve of it. It's the feminist movement, I tell you. Before long they'll want to be on the vestry."

Ward glanced up, half smiling. The pear-shaped pearl, which usually hung at his hostess' withered throat, was, naturally, not there. From the pearl to the parish house, from the parish house to Elinor—thus in two leaps of Ward's mind he was far from the subject in hand.

"As president of the Chancel society," said Mrs. Bryant, "as honorary president of the Woman's guild, I protest against women in the choir."

Back to the choir with a jump came Ward's errant mind.

"I wonder," Ward reflected, "whether a matter of tradition and custom will prevent women from singing in the heavenly choir!"

Mrs. Bryant stabbed at her fish. But she had not finished. There were many things about Saint Jude's that did not please her. The burial of old Hilary Kingston had been one. She seized on that.

"A non-communicant," she snapped. "An infidel, an atheist! The daughter is living alone up there at this minute. It isn't respectable. It's a bad example to the girls in the village. The house is full of men all the time."

"That must be a mistake."

"It is quite true. Servants talk, you know. What can you expect? Raised out of the church, with no belief, and, of course, no moral instruction."

Ward bent forward over the table.

"That is a very serious statement, Mrs. Bryant." His eyes were like steel. "Of course you are not basing it merely on what you hear from servants?"

Mrs. Bryant flushed, a purplish spot in the center of each sagging cheek.

"I do not gossip with the servants," she said, shortly. "It is common talk. And there are other things. Machines come and go from the house at queer hours of the night. The girl spends a great deal of money. Where does she get it? Where, for that matter, did old Hilary Kingston get it?"

Thus challenged, Ward had nothing to say.

After dinner he left early, but he did not go home. He went up the hill. As he strode on, he remembered many things. The girl was without the sheet-anchor of any belief, adrift and alone, and he had made no attempt to help her unbelief. Although it was after ten, the house was still lighted downstairs, and he went without hesitation into the garden.

Thus it happened that he saw Elinor in Huff's arms, saw him thrust her violently from him, and rush away across the flower-beds, leaving her there alone.

Ward remained in the shadows. To save his life he could not have spoken to Elinor then. Under his constrained exterior he was in the thrall of the fiercest jealousy. This little fair-haired girl, to whom his God was no God, had taken a powerful hold on him.

Elinor, who slept little that night, saw the light in his window until it faded into the dawn.

Elinor went to the early communion the following day. The church was dark. There were hardly two dozen people scattered over the building. She sat far back and was heavily veiled. When the congregation knelt, she

[illegible] an old woman in the next pew gave her the prayer book open at the service. On her knees then went Elinor and listened to Ward's fine voice echoing through the empty building.

The morning was warm and the windows open. The odor of burned wood from the parish house crept in.

"Thou shalt not steal," Ward read from the Decalogue, and the people said:

"Lord have mercy upon us and incline our hearts to keep this law."

"Thou shalt not steal."

In the palm of her left glove Elinor had the Bryant pear-shaped pearl.

Ward had not seen her. He went through the service reverently, with an impressiveness of voice and bearing that showed how real it was to him. And in his voice, reading, exhorting, commanding, there were tender notes that caught Elinor's breath in her throat.

When the service was over, she rose from her knees and dropped the Bryant pearl into the alms-box by the door. The congregation, small and scattered, was still kneeling. The doorway and the alms-box were in twilight.

Drawing down her veil, she went quickly out into the sunshine.

At the eleven o'clock service Ward announced the burning of the parish building.

"It is not my intention to make an appeal," he said simply. "The parish house was built to fill a great need; that need still exists. If our church is to be an element in the daily lives of the people of this town, we must have a meeting place for them. For the worship of our God, the church building is sufficient, but if religion is to you the thing it is to me, the broader religion of universal brotherhood, the church building is not enough.

"Thou shalt love thy neighbor as thyself."

Seventy-eight thousand dollars was taken up in the collection at Saint Jude's that morning. Over fifty thousand was in checks, the rest was in cash.

Walter Huff, sitting alone in the back of the church, had watched Ward intently through the service.

Unlike Elinor, Huff had been raised in a Presbyterian household. He had come to jeer, to watch with his thief's eyes the offertory piling into the silver plates. But the service told on him. Somewhere down in his violent young heart there crept a sense of shame. It was only when he looked at Ward that his eyes hardened.

This man who had come between him and his girl—this white-handed, surpliced, prayer-reading priest, who in a dozen words could compel the people before him to lay a fortune at his feet—Huff ground his teeth together. But something of unwilling admiration was mixed with his scorn. This was no mean adversary, this Ward; a man, every inch of him. He would beat him out if he had to kill him to do it.

Huff stayed in church after the service. He accosted Mr. Bryant, one of the vestrymen, as the congregation filed out.

"I don't like to ask you to talk business on Sunday," he said, "but I think it's going to be mighty inconvenient until you get the new building."

"Horrible," said the vestryman. "No fire is ever convenient, but this—"

Huff drew a business card from his pocket.

"I thought perhaps you might be willing to talk about a temporary building," he said. "We specialize in things like that. Wood, you know, and weather-proof, but inexpensive."

The last word caught Mr. Bryant's ear.

"Seems to me," Huff went on, "the choir boys need a place to dress in. You couldn't ask them to put on their surplices at home and walk over here."

"We had thought of a tent," Mr. Bryant said uncertainly. "But if you care to look around—"

"Never mind about me," said Huff largely. "I'll just glance over the place myself. You'd better attend to that fortune you took up in the collection this morning."

"The assistant rector has taken charge of that," Mr. Bryant observed, and after that for half an hour he and Huff talked board floors, tar-paper roofs and electric installation in the temporary headquarters.

Huff made careful notes in his pocket notebook. They included the length and breadth of a temporary building, the residence of the assistant rector, a stove in the temporary structure for cold days, the amount of collection, and the time at which evening service was over on Sunday night.

TO BE CONTINUED

GOOD SLOGAN FOR DAIRYMAN

Corn Silage and Other Roughage Have Value That Cannot Be Overestimated—Have Purebreds.

High-priced dairy feeds of last winter should teach the dairy farmers two things, according to the animal husbandmen at Cornell. The first is that good corn silage and other roughage have a value that cannot be overestimated; the second is that there is a greater need for good cows than ever before. This is no time to be feeding poor producers, and the man who has purebreds is getting double value for his feed. The dairyman's slogan for next year should be purebreds, a silo, and clover or alfalfa hay.

ABOUT THE STATE

News of Especial Interest to Minnesota Readers.

GATHERED FROM ALL SECTIONS

Happenings of the Week Briefly Told for the Convenience of the Busy Reader.

Philip Abbott, seventy-seven years old, a veteran of the Civil war and former St. Paul business man, is dead.

Joe Savino, seven years old, was trampled and killed by a runaway team in a vacant lot in which he was playing at St. Paul.

Captain William W. Bishop, eighty-one years old, a veteran of the Civil war and for thirty-three years a resident of St. Paul, is dead.

W. B. Sands of Minneapolis was elected president of the Minnesota Letter Carriers' association at the annual convention at Stillwater.

Mrs. Rebecca Forder, seventy-one years old, one of the early pioneers of Thief River Falls, is dead. She came to Minnesota fifty years ago.

Henry A. Flint, for many years a resident of Minneapolis, is dead. He was seventy-five years of age and had been prominent in Masonic circles for fifty years.

Matthew G. Norton, eighty-six years old, pioneer lumberman of Winona and president emeritus of Hamline university, St. Paul, is dead at his home in Pasadena, Cal.

Judge Frank C. Brooks, one of the most prominent members of the Minneapolis bar, is dead, aged sixty-four. Judge Brooks was on the Hennepin county district bench from 1898 to 1909.

Dr. W. J. Parker, a veterinarian at Grand Meadows, was found dead under his overturned automobile about eight miles east of Austin. He was alone in the car when the accident occurred.

Mrs. Samuel Haight, formerly Miss Zoa Fuller of Rochester, this state, and well known in Minnesota club circles, is the first woman to hold a seat in the parliament of the province of Saskatchewan.

A. L. Riley, fifty-nine years old, millionaire railroad contractor and mine owner, is dead at St. Cloud. For a number of years Mr. Riley was associated with Guthrie & Co., St. Paul railroad contractors.

Mrs. D. Dario, fifty years old, walked into the Mississippi river at St. Paul, knelt in the water and drowned herself. She is said to have shown symptoms of mental derangement for some time.

A resolution demanding that the bureau of indian affairs be abolished and charging that officials at the head of the bureau are incompetent was adopted at the council of Minnesota Chippewas at Bemidji.

Norman Burleson was drowned while swimming in Channel lake near Albert Lea. About six weeks ago a daughter was killed when struck by a train as she was going to meet her father returning from work.

One hundred and forty Moorhead normal school girls are knitting socks for soldiers. Daily knitting classes are maintained and the girls are making rapid progress in the early stages of their knitting lessons.

One hundred and thirteen indictments were returned by the federal grand jury at Duluth against men who failed to register June 5 and are now held in the St. Louis county jail or have been released on bond.

William Bennett, sixty years old, a wealthy farm operator of Galesville, Wis., shot and killed himself while seated in a rocking chair at a hotel in Winona. Despondency because of ill health is given as the cause.

The Farmers State bank of Holt, with a capital stock of $10,000, has been closed by order of F. E. Pearson, state superintendent of banks. An examiner has been placed in charge and the assets will be liquidated.

Governor Burnquist has appointed J. N. Searles of Stillwater as judge of the Nineteenth judicial district. He succeeds Judge J. C. Nethaway, who died recently. Mr. Searles is an attorney and a veteran of the Civil war.

L. D. Cushman and Mrs. Victor Tereau were killed when the motorcycle on which they were riding was struck by an automobile at St. Paul. The driver of the auto is held by the police on the charge of reckless driving.

Wholesale shipments of beer and other liquors from Minneapolis, St. Paul and Duluth to blind pigs in the vicinity of Puposky and Nebish, Beltrami county, have been seized by authorities and are being held in the jail at Bemidji.

Two contracts for approximately 200,000 pairs of shoes have been awarded by the war department to Foote, Schulze & Co. and C. Gotzian & Co., St. Paul. The two contracts involve about $1,000,000. The shoes are to be ready for delivery Feb. 15.

The applications for clemency of Walter J. Smith, former state treasurer, and Robert C. Pickit, former state investment clerk, now serving indeterminate sentences in state prison for misappropriation of state funds, have been denied by the state pardon board.

H. C. HOTALING.

Minnesota Editor Elected President of the National Association.

Herbert C. Hotaling of Mapleton, Minn., was elected president of the National Editorial association at its closing business session at Minneapolis. His election was unanimous and was moved by Lee Rountree of Texas, a former president of the association.

Andrew Piechowiz jumped off the Thirty-second avenue bridge at Minneapolis and was drowned.

Seven persons are believed to have lost their lives when the excursion steamer Muskegon overturned on Big Stone lake, near Ortonville, during a heavy storm. Two of the nine persons known to have been on the boat were rescued.

S. O. Simons of Albert Lea was elected commander of the Minnesota encampment of the Spanish-American War Veterans at the closing session of their annual encampment at Waseca. Dora Brandt of St. Paul was made head of the women's auxiliary.

Fred C. Smith, a waiter known to Minneapolis cafe patrons for many years, hanged himself at Garfield, this state, because of despondency over business matters. Smith had started a restaurant at Garfield following loss of his position in Minneapolis with the closing of the cabarets.

E. P. Bertrand, eighty years old, who reached St. Paul in 1856 and was a friend of Jamse J. Hill and also is a close friend of Archbishop Ireland, was best man at the wedding of his son, L. J. Bertrand, and Miss Anna Schueller at Sleepy Eye. More than 1,500 persons attended the ceremony.

Doctors William J. and Charles H. Mayo, world famous surgeons of Rochester, will go to France soon to work in war hospitals, they announced in outlining to the University of Minnesota board of regents their new plan for the administration of the $1,500,000 Mayo foundation for the university.

Estimates revised by the census department since complete reports on the selective draft registration June 5 have been received give Minnesota a population of 3,377,938. With the population of the United States estimated at 103,465,300 Minnesota's quota for the national army of 625,000 and including reserves will be 14,375.

The contract to build the St. Paul Union depot and the accompanying terminal yards, an improvement necessitating a total estimated expenditure of $11,000,000, was awarded by the executive committee of the Union Depot company to Morris, Shepard & Dougherty, railroad contractors, and the George J. Grant Construction company of St. Paul.

Pursuant to a resolution passed by the state public safety commission recently Governor Burnquist has appointed as a commission to investigate food and fuel prices in Minnesota Colonel Charles March of Litchfield, member of the commission, George W. Lawson, secretary of the State Federation of Labor, and W. S. Moscrip, a farmer of Lake Elmo.

A wireless telegraph outfit was seized at the home of former Governor John Lind at Minneapolis by a United States navy detachment headed by Lieutenant Marc Frazer, U. S. N. Lieutenant Frazier explained that the seizure was made only after members of the Lind household had failed to heed repeated requests that it be dismantled.

Citizens from Martin and Faribault counties appeared before the state public safety commission and urged the closing of the saloons in Ceylon, Welcome and Triumph. It is alleged that these saloons, which are the only ones in Minnesota near the Iowa line, are demoralizing the whole countryside and that the roads are made unsafe by the drunken automobile drivers going home from these towns.

Two men and two women were drowned in the St. Louis river near Morgan Park hospital in efforts to rescue a girl. She was saved by a boatman after the others sank. The dead are Miss Ray Niemi, twenty years old; Miss Tena McLean, twenty-one; Arthur Herry, fifty, superintendent of [illegible] at the Minnesota Steel company's plant, and Melvin Olsen, twenty-eight, assistant auditor of the steel plant.

By order of Town Board
T. Morken, Clerk.

Star News.

The crops will come much short of expectations if the weatherman don't give us rain soon.

Mr. and Mrs. Knut Sunsdahl visited at the home of Mr. Sunsdahl's parents north of Erie Sunday.

Iver Iverson is visiting friends at his former home near Roland.

Jessie Anderson and Toyland brothers were pleasant callers at "Camp Sub Urban" Sunday afternoon.

The farmers are making hay while the sun is scorching.

Mr. and Mrs. Knut Danielson and daughters, Rose and Nana were out on a pleasure trip to Red Lake river Sunday.

Mr. and Mrs. Dahle and Mr. and Mrs. Hovland who have been visiting relatives in Star for some time were out for a joy ride Sunday afternoon, accompanied by Misses Bessie Bjorneraa and Christine Syverson. Incidently, "Herjus the Hobo" tried to steal a ride with the party but to the merriment of the tourists he was last seen in the act of turning summersets right after being pushed off from the car platform.

A number of young people of this vicinity atteneed the dance at the Race farmstead in Riener township Saturday evening. A large crowd and an unusually good time is reported.

Bemidji Mill Burns.

No. 1 mill of the Crookston Lumber Company at Bemidji burned shortly after eleven o'clock last Saturday evening. The general impression seems to be that the fire was set by incendiaries as it is said to have started in several different places at once. The Bemidji folks are rather wrought up over it and forty one I. W. W. members were loaded on a west bound train Wednesday and sent out of town. The loss is estimated at $250,000.00. The mill was considered as the second largest in the United States. C. L. Isted, formerly office manager here, is in charge of the mills there for the Shevlin Companies.

A large number of other former residents were employed at this mill. The company stated that the mill will be rebuilt as soon as possible and meanwhile the crews will be kept at other work.—Spooner Nothern News.

Silo Tours.

Silo tours are being planned in various parts of the Red River Valley. The purpose in mind is to encourage building more silos. There is no question about the efficiency of the silo as ensilage furnishes almost twice as much feed per acre as does corn not put in the silo. Silage fed cows produce more milk than cows fed fodder from the same acreage. Silage also will decrease the cost of grains in the beef cattle feeding lot. Silo building should be promoted this year because it makes more profits and more grain to feed the armies that are fighting for human freedom. Local businessmen and farmers should set aside half a day for a silo tour, in visiting the different kinds of silos and discussing their advantages.

C. G. Selvig, Superintendent
N. W. Experiment Station.

Beltrami Dry Court Decides.

Throwing out the votes of fifty-two Indians under a ruling that as living on a reservation and having received no government land allotments they are not legal voters in Minnesota, the Minnesota Supreme Court Friday held that Beltrami county is dry under county option, contrary to the previous announcement.

The opinion, which effects a large increase in Minnesota dry territory is regarded as important also for its bearing on politics in Northern Minnesota where the Indian vote frequently is the deciding factor in elections.

The election contest was begun by Jens J. Opsahl, a dry leader, after the county convassing board made a return that the county was wet by nineteen majority in the county option election of August 14, 1916. The county responded, and Frank E. Johnson of Baudette intervened in the action. District Judge C. E. Stanton sustained the finding of the canvassing board and Opahl appealed. The supreme court in the opinion Friday reverses the decision of the lower court.

The exhaustive opinion is given over mainly to a discussion of the recognized principal that Indians are not permitted a voice in the making of laws to which they are not amenable. Indians may become naturalized by adopting civilized customs, but those who have no land allotments and remain on reservations are to be regarded as tribal members rather than citizens.

It is indicated further that because an Indian cannot legally buy intoxicating liquor he should not be allowed to vote at county option elections.

Judge Andrew Holt wrote the opinion. Chief Justice Calvin L. Brown did not sit in the case, probably because his son, M. J. Brown, a Bemidji attorney was council for the drys.

May Enlist Yet.

Any one of the 10,000,000 young men listed for the selected may enlist in the army, navy or marine corps before notification is received to report to the local boards for physical examination. On this point the war department has issued the following statement, conferring previous military operations: "Any registered person is entitled to enlist voluntarily until he has been called in the draft army, by the local board. Notice of the call by the local board is mailed to each person and each such notice contains a direction for him to appear for physical examination. After the receipt of the notice from the local board a registered person ceases to be eligible for voluntary enlistment.

Stacking Station For Flax Straw.

Daniel Shaw this week received a communication from the Northern Insulating company officials, stating that this concern stands ready to put in stacking stations for flax straw wherever 100 tons of the material is available. They would be glad to place these stations at as many points as possible and will later ship in the presses for the purpose of bailing the product.

It is also announced that the Union Fibre company of Winona, will soon send a man into the field with a view to locating a tow mill here. This matter has been in charge of the Commercial club for some time and several concerns have indicated a willingness to put in a mill at this point providing the flax acreage was sufficient to warrant the proceeding. This has now been assured and the Union company will be the first to send an expert for the purpose of making the necessary arrangements with the flax growers. It looks as if this straw will become a product of great importance to this section in a very short time.—T. R. F. Times.

Wanted To Organize Canning Clubs.

Teachers of cooking and household econmics living in Northwestern Minnesota are wanted to help organize canning clubs, conduct canning demonstrations, carry on "Community Kitchens", and teach the war-bread Recipes. If those who read this notice in the Eleven Towns, will communicate with your county chairman Mrs. Chas. Halgrin, Thief River Falls the work of food conservation will be materially promoted. Do this now. Our large surplus of vegetables must be conserved or much will be wasted.

VAGIRAVUDH OF SIAM.

Young King Whose Nation Has Just Joined the Allies.

Photo by American Press Association.

King Vagiravudh has considerable name, but it should not be supposed that Siam, as the fifteenth nation to join against the kaiser, is without some striking power. She has seized nine German interned ships and her small but efficient navy can patrol the Gulf of Siam, relieving a few allied vessels.

RETREAT OF RUSSIANS SEEMS TO BE HALTED

London.—Apparently the turn in the tide of retreat by the Russians in East Galicia is beginning.

On several sectors the loyal troops now are facing the Austro-Germans and offering resistance as best they can with their depleted forces.

Although their stands as yet have been unsuccessful they show the spirit of loyalty still is alive in many of the men and that it is not their purpose to surrender further terrain without a contest.

One of the main attempts of the Russians to hold back the enemy has been on the heights east of the River Zbrocz, which flows along the border between Galicia and Russia, but they have been compelled by overwhelming numbers to cede ground to the Austro-Germans who crossed the stream.

There has been a considerable falling off in the intensity of the British artillery fire on the Flanders front, due, according to Berlin, to the "paralyzing influence of our offensive activity."

PERISH IN FOREST FIRES

Eight Bodies Recovered So Far in British Columbia.

Fernie, B. C.—Eight men are known to have perished and several are missing in a fire that swept the Spruce River valley, fifteen miles northeast of here.

Millions of feet of logs, the logging railroad and the camp building, together with equipment, horses and supplies, are a total loss. Ten fatalities is the lowest estimate.

ELEVEN VOTES AGAINST IT

Senate Passes Rivers and Harbors Appropriation Bill.

Washington, D. C.—Carrying an appropriation of $27,954,000 the annual rivers and harbors bill was passed by the senate, 50 to 11.

Amendments adopted include one permitting Minnesota and North and South Dakota to enter into agreements to drain and reclaim lands and control floods along the Red and Minnesota rivers.

IF THEY RETURN TO FIGHT

German Army Deserters Are Promised Immunity.

Washington, D. C.—Deserters from the German army living in foreign countries are being invited to return without punishment and with fair hope of pardon if they remain faithful to the kaiser during the rest of the war.

British Cruiser Is Sunk.

London.—The large British cruiser Ariadne, of 11,000 tons, has been torpedoed and sunk, according to an official statement issued by the British admiralty.

CONGRESS MUST PROVIDE MEANS

War Cost for Year Is Placed at $10,735,807,000.

NEW REVENUE IS NECESSARY

Taxation or Issuance of Securities Is Contemplated to Secure Seven Billion Dollars.

Washington, D. C.—Estimating the cost of the war for the coming year at $10,735,807,000, exclusive of loans to the allies, the administration informed congress new revenues totaling $7,000,000,000 must be raised from taxation or issuance of securities.

If advancement of credit to the allies is continued at the present rate the year's total of war expenditures will pass $15,000,000,000 and the amount of additional revenue required will increase accordingly.

How congress will meet the enormous new revenue requirements remains to be determined, but there is a distinct sentiment in favor of offsetting most of the expenditures by bond issues.

Many leaders on both sides of the Capitol predicted that not more than $2,000,000,000 of the $7,000,000,000 asked will be raised by taxation and that the remainder might be met partly by bond sales and partly by issuance of treasury certificates of indebtedness.

Army Supplies Are Expensive.

Equipment and stores for the national army, particularly artillery, will require the lion's share of appropriations under the administration estimates.

Of the year's total of $10,735,807,000 the war department alone expects to spend $7,364,240,000, or $5,319,000,000 more than has been appropriated thus far for its expenses during the year.

The navy expects to spend $1,200,000,000, of which $288,000,000 remains to be appropriated. The shipping board, whose shipbuilding projects place it third on the list, expects to spend $799,000,000, of which $350,000,000 remains to be appropriated.

These figures cover the cost of the war from July 1 last to June 30 next.

Estimated receipts for the year were placed by Secretary McAdoo, in transmitting the estimates to the house ways and means and senate finance committees, at $1,333,500,000.

This estimate of receipts did not include revenues to be raised under the pending war tax bill, estimated by administration leaders in congress at $1,670,670,000.

WEEKLY TOLL OF VESSELS LARGER

London.—Twenty-one British vessels of more than 1,600 tons each and three of less than 1,600 tons each were sunk last week by mines or submarines, according to the weekly admiralty report on shipping losses. One fishing vessel also was sunk. The admiralty's statement also reports:

"Arrivals, 2,791; sailings, 2,791.

"British merchant vessels unsuccessfully attacked, including three previously, fifteen."

The announcement of the British admiralty shows an increase of seven vessels of more than 1,600 tons sent to the bottom, as compared with the report of the previous week, when fourteen were sunk.

In the smaller category the loss is one less than that given in the report of the previous week, while there was a falling off by seven in number of fishing vessels sunk.

AL PALZER DIES OF WOUNDS

Pugilist Shot by Father Expires in Hospital.

Perham, Minn.—Al Palzer, thirty-two years old, heavyweight boxer, is dead at a hospital in this city from the effects of wounds received when he was shot in the abdomen by his father, Henry Palzer, aged fifty.

Palzer was shot by his father when the latter came home intoxicated and attacked his wife. Al rushed downstairs in his nightclothes to assist his mother, whom the father shot once in each arm. The father then turned the gun on his son, shooting him once in the arm and once in the abdomen. Palzer ran a mile and half with the bullets in his body to get medical aid.

FOURTH YEAR OF WORLD WAR ON

Situation Changes Greatly During Last Twelve Months.

MORE COUNTRIES IN CONFLICT

Entry of United States and Other Nations Into Struggle Main Event of the Past Year.

London.—The third year of the world war closes with the fortunes of conflict favoring the entente except for uncertainty as to the outcome of the Russian situation.

The central powers sustained momentous setbacks, both military and political, during the twelve months.

On the Western front in Europe the Teutons find themselves on the defensive at the advent of the fourth year. They fight on lines newly established after forced retirement from terrain which they had won in earlier days at a tremendous sacrifice.

Meanwhile new enemy powers, notably the United States, have been drawn in by the central empires and progress toward the achievement of the ultimate aim of the entente and its allies has been furthered by political disturbance which will remain memorable in the history of all times.

Chief among these are the fall of two crowned heads—Nicholas of Russia and Constantine of Greece. In Russia autocracy has given way to democracy. In Greece a kingdom remains, but not a pro-Teutonic one, entente pressure having won supremacy in that part of the Balkans.

Portugal and Roumania threw in their fortunes with the entente shortly after the third year began. The United States entered in April, followed by Cuba and Liberia. Panama pledged the United States her aid in defending the Panama canal. Costa Rica put her naval bases at our disposal. China, Bolivia, Guatemala and Brazil severed diplomatic relations with Germany. Uruguay expressed sympathy for the United States. Late in July Siam entered the war against the central powers.

An estimate made two months before the end of the third year—voiced by Arthur Henderson of the British war council—placed the number of men killed at 7,000,000 since August, 1914. French general headquarters recently estimated 1,500,000 Germans had been killed up to March 1. Mr. Henderson estimated the total casualties at more than 45,000,000.

MORE U. S. TROOPS LANDED IN EUROPE

A European Port.—Another American contingent has arrived safely and disembarked.

The American troops arrived by the same steamer whereon Kermit Roosevelt, his wife and child traveled.

When tenders went alongside the vessel the men were in high spirits and frequently shouted: "Are we down hearted?" which was answered with a roaring "No!" given with great enthusiasm.

Representatives of the general staff watched the disembarkation. There was no civic demonstration. Only a few spectators knew of the landing. These cheered and the troops cheered back. The men entrained quickly and left for their new quarters. A signal company remained at the port for some hours and these were the only representatives of the contingent which the public saw.

TEXAS GOVERNOR INDICTED

Answers Charge by Announcing Candidacy for Re-election.

Austin, Tex.—Governor James A. Ferguson was indicted by the Travis county grand jury on nine counts, seven charging misapplication of public funds, one diversion of public funds and one embezzlement.

Governor Ferguson answered the charges by announcing himself as a candidate for governor of Texas for a third term.

Politician Kills Himself.

Hannibal, Mo.—Disappointment at his failure to be reappointed state inspector is believed by politicians here the cause of the suicide of J. A. Knott, aged fifty-eight, a prominent Missouri Democratic politician

INTEREST INCREASES IN FOOD CAMP

President Wilson And Food Administrator Hoover Back Movement To Utilize State Fairs And Expositions As Food Training Camps—People To Be Taught To Produce And Conserve.

The Food Training Camp to be conducted in connection with the Minnesota State Fair, Sept. 3 to 8, is expected to prove one of the strongest cards in the government's food conservation campaign in this section of the country.

The food training camp movement is gathering force every day; public interest is becoming aroused; practically every organization in this state taking part in the food conservation work is co-operating to make the camp a success; the government has endorsed and is now helping to direct the movement and the exhibitors at the fair are offering to do their share in making it a success.

Practically every department at the fair will take a part in the work of food training. Virtually all of the exhibitors will, in their displays, lay emphasis upon the necessity of conserving our food supplies. Lecturers and demonstrators will be on hand to explain the food problems which now confront the American people, the plan being, not only to impress upon all visitors to the fair the necessity of making an economical use of food, but to show specific ways in which every man, woman and child may do a share.

Government Enthusiastic.

The government, particularly, is enthusiastic over the possibilities the food training camp offers for teaching food efficiency. Not only Mr. Hoover, food administrator, but President Wilson, himself, and the Department of Agriculture have endorsed the camp. It is the plan of the government to make the most of the opportunities offered by sending out lecturers and demonstrators to speak at the fair, and by arranging a series of exhibits by the different government departments, including the Army, Navy, Agricultural and Mr. Hoover's food department.

The government sees in the food training camp, for one thing, the possibility of reaching, in a result-getting manner, the men and women of the rural districts and from the farm. This has been one of the government's big problems in its food conservation campaign.

The people of the cities it is not so difficult to reach because of the many clubs and other organizations which already exist and which have taken up the food conservation work. As a large part of the attendance at the Minnesota State Fair comes from the rural districts, the food training camp, the government believes, offers a good opportunity to reach them with a direct appeal.

For, it is necessary that they be reached if the fruits and other food products, grown in abundance, are to be saved and prevented from going to waste.

The livestock exhibits and the exhibits and demonstrations to be put on by the dairy department of the University Farm are other departments in which valuable food efficiency work will be done. The directors of the fair are urging a greater production of meat by working for large exhibits of livestock so that the farmer may study the different types and breeds and decide as to which is best for the purpose.

To Develop Herds.

Much of the effort of the University Farm will be directed to the development of more efficient dairy herds and to the utilization of all possible dairy products. Much milk, especially skim milk, goes to waste in this state every year, and the dairy exhibits will point out the way to make use of all this food which is now being wasted.

In order to make the food training camp the greatest possible success in order that both the government and the people may derive the maximum benefit from it, the Minnesota State Fair directors are endeavoring to make the exposition a record breaker in all departments this year.

As one way of encouraging attendance, plans have been outlined for materially increasing the exhibits, and a greater variety of amusement and entertainment features have been secured.

Auto races, aviation, vaudeville, and a number of big spectacles, including the "War of the Nations," a gigantic display in which the famous British tanks and the other great forces of modern warfare are seen in action, are some of the entertainment features.

Opening Announcement

International Tailoring Co's Display Of

Fall Fabrics

and Models for Men's Made-to-Measure Tailoring

are here awaiting the inspection of those discerning Clothes buyers who appreciate the importance of Fabric-Quality, Style, Smartnes and Price economy.

The ELEVEN TOWNS
H. W. Smith, Editor & Publishe

Entered at the Post Office at Goodridge, Minn. as second-class mail.

A number of young men in this vicinity have received notice that they must appear before the local draft board at Thief River Falls for examination on Monday August 6th.

THE DAIRY

PLAN FOR CONVENIENT BARN

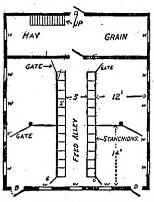
No Better Way to Keep Young Animals Than to Provide Pens In Which They Can Run Loose.

(By C. C. HAYDEN, Ohio Experiment Station.)

There is no better way to keep calves or yearlings than to provide pens in which they can run loose in small groups. Mangers and stanchions should be provided along one side of the pens, in which the calves can be fastened while eating.

The accompanying sketch shows a simple yet convenient plan. The dimensions are 30 by 40 feet. A space 10 feet wide is taken across one end to be used as a feed room. The remainder is divided into four pens, two on either side, each 12 by 14 feet. A feed alley 5 feet wide runs through the manger with six stanchions to a pen.

The stanchions as shown are two feet apart which is sufficient for even a yearling if fastened only while eating. The width of the manger, the spacing of the stanchions and height of the stanchions can be varied in different pens to suit sizes of calves.



Convenient Barn Plan.

The partitions between the pens should be about four feet high and a gate provided so that both pens can be thrown together. Gates can be placed at each end of the mangers, giving easy access to all pens from the feed alley. The stanchions, partitions and gates may be made of 1 by 4-inch stuff.

Ventilation should be provided the same as in any dairy barn.

FEED DAIRY COWS ROUGHAGE

Should Be Given to Limit of Animal's Capacity—Soy Bean Hay Is Classed With Alfalfa.

"Roughage should be fed to the limit of the dairy cow's capacity," says Prof. C. C. Hayden of the Ohio experiment station. "Relatively, the roughages, like hay and corn and stover, are much cheaper than grains and hay is of unusually good quality. Roughage, of course, should not be fed exclusively, as such feeding might lead to compaction and death even in dry cows and heifers. Some grain is needed in every dairy ration."

This dairy specialist also declares: "Choice alfalfa hay at $20 a ton is cheaper than bran at $30. Our experiments show that soy bean hay is in the same class as alfalfa, and clover is third. With corn at $1 a bushel, clover hay should be worth about $20 a ton, or $5 more than it is now quoted."

Timothy hay is recommended for milking cows only in small quantities to replace such grains as corn and hominy. Leguminous roughages have proved far superior in numerous experiments to timothy for cows in milk.

SILO OF GREAT IMPORTANCE

Huge Receptacle Means Saving of From 8 to 10 Cents in Cost of Producing Butterfat.

Practical dairymen who are silo users say that the silo on the farm means a saving of from eight to ten cents a pound in the cost of producing butterfat. Beef feeders say that ensilage saves from $1 to $1.50 per hundred pounds in producing beef.

Feeding experiments bear out these statements. On this basis ensilage under normal conditions is worth $4 a ton. With an increase of 50 per cent in feed prices it is worth $6 per ton.

Reports from farmers show an average cost of $2.75 a ton for corn ensilage, including all factors incident to its production. The inadvisability of doing without a silo seems to be more important than the question of whether to build one.

SYNOPSIS.

CHAPTER I—Old Hilary Kingston, starting with Socialism, drifts into anarchy, and gathers round him in the hall above the village of Woffingham a band of accomplished desperadoes who rob the rich, incite seditions and arm the rebellious. His motherless daughter, Elinor, is raised to fine living and wrong thinking, to no law and no Christ.

CHAPTER II—In an attack on the Agrarian bank messenger, old Hilary is killed, but is not suspected of complicity. Boroday brings the body home to the hall.

CHAPTER III—Ward, assistant rector of St. Jude's, makes a call of condolence on Elinor, who consents to have her father buried from St. Jude's in the odor of sanctity. The chief of police recognizes Boroday and is suspicious.

CHAPTER IV—After the funeral the band meet at the hall and agree to go on as before, Elinor acting in her father's stead. Huff asks Elinor to marry him and she consents, though she does not love him. Boroday is arrested and threatened.

CHAPTER V—Boroday in jail. Talbot plans a raid on the Country club. The friendship between Ward and Elinor ripens to something deeper. She envies him his faith.

CHAPTER VI—Huff burns St. Jude's parish house. Elinor offers to help rebuild it and is angry with Huff.

CHAPTER VII—Huff plans to rob Ward of the money collected to rebuild the parish house. Elinor objects and Huff is jealous.

CHAPTER VIII—Mrs. Bryant, who has lost a valuable pear-shaped pearl in the Country club robbery, tries to poison Ward's mind against Elinor; $78,000 is subscribed toward the rebuilding of the parish house. Elinor drops the Bryant pearl into the almsbox near the church door.

CHAPTER IX—Talbot tells Elinor that the chief of police demands of Boroday the Bryant pearl as the price of his freedom. By anonymous letter they advise the chief where to find it. Elinor tries to dissuade Huff from robbing Ward of the church money, but only makes Huff more jealous.

CHAPTER X—Elinor calls Ward to her and in despair tells him that she is head of a band of thieves and warns him of the plot to rob him. As Ward is on his way home from the hall Huff shoots him down.

"I've done it all very badly," he said. "I seem to wander all about and not get anywhere. You see it's all so real to me—"

Elinor had leaned back with closed eyes.

"It is all very terrible to me," she replied. "This God of vengeance—"

"This God of tenderness and mercy," Ward supplemented. "Don't you see what it all means? How terrible this life would be if this were all! Our little lives, full of jealousies and hatreds and crimes: I bringing that box, over there on the table, up here with me tonight, because I dare not trust it to my fellow men; I who could not sleep last night for thinking of you, who are all that is good and sweet and tender, up here alone in this great house, with God knows what danger lurking about."

Elinor had reached her limit. The band of her self-control snapped. She could not hold him much longer, and before he went he must know.

"When I sent for you," she said, "I had two reasons. I wanted to see you. Please!" As he took a step toward her. "And I wanted to save you from something that I know of."

Something in her thinly drawn voice was familiar.

"I see," Ward said slowly. "It was you who telephoned me and then rang off."

"When you say that I am good and tender," Elinor went on, "you shame me. I am all that is bad and wicked. Everything. You were to have been robbed tonight. I brought you here under false pretense."

Ward was as white as she. His figure straightened.

"Then all the time that I have been telling you—"

"I did not hear. I was watching the time."

Personal fear Ward had none. He did not even follow Elinor's eyes as they glanced once more at the clock. Mrs. Bryant's venomous insinuations came back to him, all the village talk of the girl's strange rearing. Fearful thoughts flashed into his mind, to be dismissed, shaken off doggedly.

"I shall never believe anything that you do not tell me yourself. But it is only fair to me that now at last there be frankness between us."

"There are others," Elinor said, with dry lips.

"Your father?"

"He is dead. I cannot talk of him. This much I can tell you. The parish house was burned deliberately; it was planned and carefully carried out."

"And you knew?"

"I had forbidden it."

"You had forbidden it?"

He went to her and caught her by the shoulders, forcing her to look up into his face.

"You? Then all this time that you have seen what you must have seen in my eyes, you have been—"

"—At the head of a band of thieves," Elinor said slowly.

Ward released her, and turning took a slow survey of the room.

"Then I suppose this is a trap?" he said.

"[illegible] not a trap." Her voice was dead. "I opposed this—this plan from the start. That is the reason one of the men—of my friends—suspected that I—"

"Go on. What did he suspect?"

"That I—but that doesn't matter. He burned the parish house and planned all this. Tonight he meant to get the money from you, and I—was desperate. I could think of no other way."

Ward's faith in her was slow to die. He took a step toward her, his hands out, then dropped them at his sides.

"Then—the night the parish house burned, when I came down in the dawn and found you sitting there"—he clenched his hands—"all the time you knew. You knew! And I had thought—"

He went to the table and, opening the box, slipped the notes and money it contained into his pocket. Then he buttoned his coat about him. Elinor watched him stonily.

"You are going back down the hill?"

"I am going home." He did not even look at her.

"If you would only go some place else," she said pitifully. "To the club, or to Mrs. Bryant's. Please believe me. Whatever I am, and I have told you the worst, I am trying to think of you tonight, not of myself."

"I am going back to my house," said the assistant rector of Saint Jude's. He got as far as the door on to the terrace, and there he turned. It was as if he dared not look at her, as if he meant to carry away with him some tenderer memory than of this white-lipped, guilty woman before him.

"If I seem hard," he said unsteadily, "it is because I am suffering. You are quite safe, of course. I shall not go to the police." Had he cared less he would have been more merciful.

Old Henriette watched his figure as he went down the garden steps and into the road.

"Strange things in this house!" she mumbled, shaking her head. "Preachers coming and going at all hours, and Elinor in a church this morning. Strange things, Hilary Kingston, since you went away."

She shuffled along the terrace and into the house, her thin black shawl drawn about her shoulders. In the library Elinor lay face down on the floor. Old Henriette bent over her.

"My lamb, my pet," she soothed her. "He's a fine man, but there are many others. And when one is young and lovely—"

Since Elinor made no response but only moaned, old Henriette rose from her knees and shuffled out of the room, but cautiously, as she passed, she took from a table drawer old Hilary's revolver and carried it out under her shawl.

She was very wise, was wrinkled Henriette, and she knew the Kingston blood.

Ward came down the road rapidly. There was a faint moon. One part of his mind had ceased to work; his higher faculties were dormant with misery, with the anesthesia that comes for a time after great grief or shock. Physically he was entirely alert; his keen eyes searched each clump of shrubbery before he reached it. Not that he feared attack for himself; his cup of life was bitter to his taste that night, but he carried a trust in his pockets, that he would deliver.

Huff was waiting at the foot of the Kingston place, crouched behind a wall. If the boy had been jealous before, he was maddened now. Ward had been with Elinor. Huff, coming up the hill had heard his short good-night to Henriette in the garden, had heard him come down the hill. There were only two explanations. Either the man was in love with her and had gone up that night of his own volition, or Elinor had sent for him. One was as bad as the other.

Ward did not have a chance. As he came abreast of the wall, the boy fired and he pitched forward on his face. With the re-echoing of the shot among the hills, Huff's madness died away. Murder was not his game; violent and sudden death perhaps, but never, before, a shot from behind. Had the wealth of a city been in Ward's pockets, he could not have touched it.

He thrust his revolver into his pocket, and breaking away through the shrubbery commenced a swift but noiseless ascent of the hill.

The assistant rector of Saint Jude's lay on his face in the road, with the morning offering of his congregation safe in his pockets.

CHAPTER XI.

The chief sent for Boroday early the next morning.

"You've turned the trick all right," he said, grimly smiling.

Boroday, as immaculate as ever, settled his tie.

"Yes?"

"Sit down," said the chief. "Now that you know you're going, I suppose you're not in any particular hurry."

Boroday ran his hand over his silky beard.

"I should like to get to a barber."

"There is no great hurry, now," said the chief, when Boroday was comfortably settled and smoking one of his eternal Russian cigarettes, "I wish you would tell me why you disposed of that pearl the way you did. It wasn't quite up to our agreement, you know. It was to be given to me and I was to return it. Instead of that I had to make a wild-goose chase out into the country."

"Ah!" said Boroday, "into the country!"

The chief, who was accustomed to reading faces, watched Boroday closely. But if there was a tightening about the Russian's eyes it was very faint.

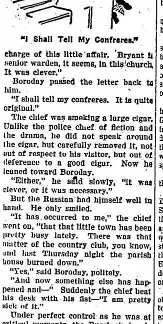
"You know blamed well," said the chief peevishly, "just where I had to go to get that thing. And you know blamed well also that on Sunday afternoon I always play poker. It was—well, inconsiderate, to say the least."

Boroday smiled.

"I am exceedingly sorry that you were put to any trouble about it," he said. "But as you may understand, I have not yet seen my—friends, and of course—"

He shrugged his shoulders. The chief was skeptical of his ignorance, nevertheless. He humored what he chose to consider Boroday's whim. First he gave him the note which he had received by special delivery the day before. Quick as he was, the Russian could not quite conceal his astonishment.

"In the alms box!" said the chief. "Somebody with a sense of humor had charge of this little affair. Bryant is senior warden, it seems, in this church. It was clever."



"I Shall Tell My Confreres."

Boroday passed the letter back to him.

"I shall tell my confreres. It is quite original."

The chief was smoking a large cigar. Unlike the police chief of fiction and the drama, he did not speak around the cigar, but carefully removed it, not out of respect to his visitor, but out of deference to a good cigar. Now he leaned toward Boroday.

"Either," he said slowly, "it was clever, or it was necessary."

But the Russian had himself well in hand. He only smiled.

"It has occurred to me," the chief went on, "that that little town has been pretty busy lately. There was that matter of the country club, you know, and last Thursday night the parish house burned down."

"Yes," said Boroday, politely.

"And now something else has happened and—" Suddenly the chief beat his desk with his fist—"I am pretty sick of it."

Under perfect control as he was at critical moments, the Russian's hands had a way of twitching. So now he flicked the ash from his cigarette and was politely interested.

"What happened last night?" he inquired.

"I think you know. If you don't, I'll tell you. Yesterday morning a tremendous collection was taken up at the church of Saint Jude's to build a new parish house in place of the one that burned down. The rector has been away; the assistant rector took charge of the money."

"I see."

"Of course you see. What I would like to know is why you fellows—"

Boroday spread out his hands in his foreign way.

"I fear you give me great credit. I do not deserve it."

"—Why you fellows," the chief went on resolutely, "waited to do this job until the rector, who is old and infirm, had gone away and left a husky young assistant in his place. And that isn't all I want to know."

"In any way that I can assist you—"

"What the devil do you mean," yelled the chief, "by shooting a man down and then going away and leaving the money in his pockets? It's—it's crude—it's wasteful!"

The Russian's fingers twitched in spite of him. The chief saw it and smiled under his heavy mustache.

"Do you mean that somebody shot this—er—assistant you speak of? That is rather sad. Was there—much money?"

"Seventy-eight thousand dollars," said the chief, and put his cigar back in his mouth. "There is a story behind it, Boroday, and it's that story I am going to get. I'm warning you because you've played pretty square with me. I needed that pearl in my business."

Boroday rose.

"All right, chief," he said. "I am sorry about young Ward. I hope he wasn't killed."

"He wasn't killed," replied the chief. "And I haven't said his name was Ward. If you haven't had your breakfast yet, we might breakfast together. I overslept and haven't had time for anything."

* * * * * * *

Ward came back to consciousness in the great four-poster bedstead in which old Hilary Kingston had lain in state. He felt very little pain and no curiosity at all as to his surroundings, only an overwhelming lassitude and weariness of life. Something—something that mattered very much had gone out of existence. He could not remember what it was.

There was a uniformed nurse by the bed. He had a curious antipathy to asking her anything. He had made a promise of secrecy to someone—about what?

Toward evening he had managed to evolve out of his reviving consciousness some faint memory of what had happened to him. He remembered that he was walking down a hill and that he had fallen forward. For quite a half-hour, late in the afternoon, he struggled to remember why he had gone down the hill.

Then he got it. He had been up at the hall to see Elinor. It was Elinor who had gone out of his life. Elinor! Elinor!

He slept very little during the night, and as his fever rose, he called the nurse "Elinor," and begged her frantically to tell him that something was not true.

"Of course it is not true," said the nurse, who was accustomed to being called various things.

"You did not mean it at all?" He eyed her wistfully. The nurse was large and plain, with a wide, flat face. "You, with the eyes of a saint," said poor Ward, "to try to tell me that you are wicked. I see that it is impossible. I think I can sleep now."

The nurse put her hand, which was large and ill-shaped but very light and tender, on his head. And so he went to sleep.

When he was quite settled, the nurse went out into the hall where Elinor was sitting on a straight chair. She had sat there almost all of the time since Ward was carried up the night before.

"He is sound asleep," she said smilingly. "He thinks I am someone named 'Elinor,' and he calls me that. As my own name is Sarah, it's rather pleasant."

Ward had been shot on Sunday night. By the following Wednesday he was out of danger.

On that same Wednesday the rector of Saint Jude's brought himself and his rheumatism back to his parish.

For three days Elinor had hardly slept or eaten. Never once had she been in Ward's room, but always, day and night, she was just outside. When on that Wednesday evening the doctor said Ward would live, she went down once more into her garden.

Many times during those three days had Elinor tried to pray to Ward's God and found herself voiceless and inarticulate. But now, out of the depth of her great relief, came welling the first prayer of her life. She stood waist-deep among her phlox and larkspur.

"I thank thee," she said. "I thank thee." . . .

Nothing had been heard of Huff. The assault on the assistant rector of Saint Jude's had been of a line with the other mysterious happenings around the village. The little town was hag-ridden with fear. Extra constables had been sworn in, and from the hall, during her long night vigils, Elinor had seen many lighted windows, where there had been but the one.

The problem of her future began to obsess her. It was plainly impossible to stay on here—not that she feared exposure; she was quite past fear—but the thought of going on with her life was intolerable. To meet Ward, to see again the scorn and loathing in his eyes, more than all, to continue to deserve them—those were the things that to Elinor seemed worse than death itself.

All the philosophy that old Hilary had taught her failed her now. The revolt of the individual against laws made for the masses—what had it brought her but isolation and grief? Of what use was revolt? All must go through the mills of the gods. She knew that now. There were no exceptions. And something else she had learned: that if one is to live through great crises one must have a higher power to turn to for help. She had felt it vaguely at the time of her father's death. Sitting outside Ward's door she had known it. Every breath had been a prayer to something, she knew not what, to save him.

"I thank thee," she said again.

The phlox and larkspur quivered about her as if under the touch of a gentle hand.

Boroday had been free for three days, but beyond a telephone message announcing his release she had heard nothing of him. Over the wire he had advised extreme caution. She judged from that that things were not going well.

She knew that Huff's reckless crime would demand a scapegoat. There

PARIS PARLEY VOTES TO CONTINUE WAR

Paris.—The allied powers concluded their conference here after announcing a decision to continue the war until the object for which they are fighting is attained.

Their declaration, which was made unanimously before separating, reads:

"The allied powers, more closely united than ever for the defense of the people's rights, particularly in the Balkan peninsula, are resolved not to lay down arms until they have attained the end which in their eyes dominates all others—to render impossible a return of the criminal aggression such as that whereof the central empires bear the responsibility."

There was unanimous agreements on all decisions reached during the meetings. The ministers of departments affected will meet in London to draw up the executive measures.

ABOUT THE STATE

News of Especial Interest to Minnesota Readers.

GATHERED FROM ALL SECTIONS

Happenings of the Week Briefly Told for the Convenience of the Busy Reader.

Fire at Fort Ripley caused damage of $22,000.

Roy Postier, twenty-six years old, was killed in a collision of automobiles at Minneapolis.

Eben F. Thompson, aged sixty-seven, for years a member of the Minneapolis bar, is dead.

Governor Burnquist has announced the reappointment of Carlos Avery as state game and fish commissioner.

Isaac A. Barnes, sixty-five years old, for more than thirty years a practicing attorney of Minneapolis, is dead.

Charles H. Conner, for twenty-five years a resident of Minneapolis and a prominent member of the Elks, is dead.

Willis Baker, well known pioneer real estate man and resident of Minneapolis for fifty-seven years, is dead, aged eighty-six.

Patrick Larkin, aged thirty-eight, a Brainerd automobile liveryman, was drowned in Gull lake in sight of his wife and seven children.

H. B. Harrison, forty-three years old, is dead at Red Wing of tetanus contracted on July 4 when a toy cannon exploded, shattering his hand.

A. M. Opsahl of Brainerd, now state oil inspector, is slated to succeed John E. Kienitz of Cambridge as deputy state immigration commissioner.

After his mother warned him to stay away from the river, Clifford Maness of St. Cloud, thirteen years old, went in bathing and was drowned.

Former State Representative Asher Murray of Wadena has been elected to succeed Andrew D. Stephens of Crookston on the state board of immigration.

Jess Dunning, secretary of the Industrial workers of the World at Bemidji, was bound over to the grand jury charged with displaying sabotage literature.

Cordenio A. Severance, widely known lawyer and member of the law firm of Davis, Severance & Olds of St. Paul, will head a Red Cross mission to Serbia.

Lloyd Coon, twelve years old, died in a Barnesville hospital of injuries received when he jumped from a passenger train and hit a switch, severing a leg and an arm.

Gilbert Stone, twenty-five years old, a private in L company, First Minnesota infantry, was fatally injured when struck by a train while guarding the Westminster street bridge at St. Paul.

James Wood, teamster, forty-five years old, employed by the South St. Paul Stock Yards company, was thrown from his wagon and instantly killed when his team became frightened and ran away.

The state of Minnesota has $9,947,000 in cash in its treasury, the largest cash balance in the history of the state. State Treasurer Rines predicts that new high records may be established during August.

A large number of slackers convicted in federal court at Duluth for failure to register on June 5 were sentenced by Federal Judge Page Morris to terms varying from thirty days to a year in jail.

Justin A. McCarthy, a steward in a Winona club, shot and probably fatally wounded his wife, shot at another woman and attempted to kill himself. McCarthy is thought to have been crazed by the heat.

Ella Hanson, who was with William Fugniato, a Japanese, when he fell from a rowboat on Lake Harriet, at Minneapolis, and was drowned, committed suicide the following day in her room at a Mill City hotel.

Dr. Arthur Boucher, formerly a dentist of Ely, this state, was killed on the battle line in France while taking part in a charge on German lines. Dr. Boucher was thirty years of age and was born and reared in Waseca.

Mrs. Lida McGill Boynton, forty-three years old, only daughter of former Governor Andrew R. McGill, is dead at the McGill home at St. Paul just four months after the death of her husband, Wilbur D. Boynton of Meadville, Pa.

Ernest Koch, fifty years old, president of the St. Paul Bricklayers' union, is dead as the result of injuries sustained when he fell three stories down an elevator shaft at the Exchange annex at South St. Paul, now under construction.

R. F. Hart, thirty-five years old, superintendent of the Hoak Elevator company of Minneapolis, and C. H. Showers, forty years old, also of Minneapolis, were instantly killed when their auto was struck by a fast freight train at Walford, Ia.

L. H. Slocum, former county auditor of Koochiching county, who was removed from office because of alleged irregularities, pleaded guilty to an indictment charging him with issuing fraudulent warrants for $1,200 in connection with the building of state highways. He was fined $2,000 and the other indictments quashed.

AL PALZER.

Prizefighter Dies From Bullet Wounds Inflicted by Father.

Photo by American Press Association.

Al Palzer, aged thirty-two, heavyweight prizefighter, was shot and fatally wounded by his father at the family home at Pine Lake, near Perham. He died about thirty-six hours later at a hospital in Perham. The father returned home intoxicated, it is said, and quarreled with his wife, shooting her through both arms. Al was in bed, but on hearing the shots ran down stairs and the father turned the rifle on him, shooting him through the abdomen.

Louis Lagone, aged thirty-nine, and his son, George Lagone, aged twenty-one, visited the regular army recruiting station at Minneapolis and both men enlisted. The Lagones are of French-Canadian stock, but both are native Americans.

The village of Kimball, Stearns county, is entitled to the Red Cross banner not only for that county and the state, but for the United States. Its population according to the census of 1910 was 312. It has sent in 376 Red Cross memberships.

Perry M. Endsley, aged sixty-seven, for thirty-five years prominently identified with the business life of Minneapolis, is dead. Since 1884 Mr. Endsley had been head of the Minneapolis Savings and Loan association, which now has assets of $2,500,000.

W. A. McKerrow, now connected with University Farm, St. Paul, has declined the appointment of state dairy and food commissioner tendered him by Governor Burnquist. He explained that the salary is not commensurate with the responsibilities of the office.

More than 150 citizens of Bemidji, armed with clubs, visited the I. W. W. headquarters in that city and warned the thirty members assembled there to leave town on the next train. The command was not obeyed promptly, so the men were escorted to the depot and placed on a westbound train.

James Sorensen, superintendent of the state experimental creamery at Albert Lea since 1911, will succeed J. J. Farrell of Carver as state dairy and food commissioner. Mr. Sorensen was also appointed state oil inspector and hotel inspector without salary, under the plan to consolidate those departments.

W. S. Moscrip, Lake Elmo dairyman and stock breeder, has declined appointment as state dairy and food commissioner to succeed J. J. Farrell of Carver. At a conference with Governor Burnquist Mr. Moscrip said that he could not take the time from his own business to discharge the duties of the office.

Organization of another infantry regiment of national guardsmen, to be known as the Fourth Minnesota infantry, was ordered by Governor Burnquist. The regiment will be composed of five companies at present, one from St. Paul, two from Minneapolis and two from St. Louis county, including the iron range.

Coal is being stacked up along the railroad tracks between Crookston and Fargo. At certain places along the Great Northern railroad spurs have been built and coal cars are being unloaded. Thousands of tons of coal have been piled on the ground as a precaution against a car shortage during the coming winter.

Mayor A. P. Pierce of Red Wing was drowned in the St. Croix river at South Stillwater when he fell overboard from the steamer Minnesota, on which, with a party of friends, he was returning from a visit to Stillwater. Mr. Pierce was a pioneer resident of Red Wing and had been mayor of that city for nineteen years.

The twelve largest hotels in Minneapolis will go on a basis of two meatless days a week. This action was decided upon at a meeting of the Minneapolis Hotel and Cafe Proprietors' association, at which the campaign for national food economy, the present cost of food and the necessity for waste elimination were discussed.

Kenneth Nelson, twelve years old, climbed to the top of a bridge across the Zumbro river at Rochester to capture two young pigeons and touched a high tension wire. Policemen and firemen strove vainly to rescue the boy. Finally the current was shut off after he had suffered two badly burned legs. Both pigeons, which he held in his hands all the time, were electrocuted.

I have funds on hand to take up all outstanding orders on School district No. 228 153, Pennington and Marshall Counties.

Andrew O. Feragen, Treas.

Mrs. Leon Babcock and family of Thief River Falls returned to their home Thursday morning after spending a few days visiting at the Bundhund home here.

Herb Race returned Friday from Minneapolis where he has been taking a summer course at the university. He left again Tuesday for Gemmel, Minn., where he will have charge of the school at that place.

There will be a Base-ball dance in the Goodridge Hall Saturday evening August 25th. Good music will be furnished by an orchestra from Thief River Falls. Everybody come and have a good time.

Mr. and Mrs. John Stenvick of Reiner went to Thief River Falls Saturday with their little son who had the misfortune to have his left leg broken when he was run into by a bicycle a week ago Sunday. As far as we know the little lad is getting along nicely.

German services at Esplee next Sunday at 10 A. M., at Germantown at 8 P. M.

English services at the Erie Lutheran church Sunday Aug. 26 at 11 o'clock A. M.

Otto C. Schultz, Pastor.

Farm For Rent—Inquire at the G. N. Depot, Thief River Falls, Minn. tf.

NOTICE.

Farmers are hereby requested to cut the weeds and brush and haul the stones away from the road and ditch side adjoining their land, within the town of Goodridge, by Oct. 1st, 1917, otherwise the town will do the work and charge it against the land.

By order of Town Board,
Nicoly Urdahl, Clerk.

NOTICE.

Farmers are hereby requested to cut the weeds and brush and haul the stones away from the road and ditch side adjoining their land, within the town of Reiner, by Oct. 1st., 1917, otherwise the town will do the work and charge it against the land.

By order of Town Board
T. Morken, Clerk.

WILL BUILD CATHOLIC CHURCH AT MAVIE.

A Contract was let Saturday to Jim Hruby of Mavie for the building of a Catholic church at Mavie. The building is to be the same size as the one here and will be built on the same plan.

RED CROSS ORGANIZE BRANCH CHAPTER HERE.

Wednesday evening at the school house here a branch of the Thief River Falls Red Cross Chapter was organized here with eleven charter members.

Mrs. Daniel Shaw, Mrs. C. R. Charest, Mrs. H. A. Pratt, Geo. Johnson and Scott Laird of Thief River Falls were up here to help organize. All of the above mentioned gave very nice talks on the history of the Red Cross, methods of raising money for the Red Cross and the purpose of such an organization that will not be found wanting.

The following temporary officers were appointed by the nominating committee A. O. Halvorson, Pres., H. B. Rockne, Treas. and H. W. Smith, Sec.

PRIZES FOR PATRIOTIC POSTERS.

The Women's Auxiliary of the State Safety Commission offers a prize of $15.00 for the best patriotic poster made by a pupil in the public schools of Minnesota, and $5.00 for a second prize.

The successful posters and any others that shall deserve honorable mention, will be exhibited at the Minnesota State Fair.

The following are the conditions:

(I)—Only one poster shall be sent in from each county, that one being chosen by the chairman of the Women's Auxiliary of the county from among those submitted to her.

(II)—Posters shall not be over 2 feet by 3 feet in size. They may be in color or in black and white.

(III)—Posters should emphazize the idea of patriotism rather than war. They may represent Columbia or Columbia welcoming many Nations, or Columbia's resources, or any phase of patriotic ideal the maker pleases.

(IIII)—The Posters submitted must be in the hands of the county chairman, Mrs. H. A. Pratt, Thief River Falls, Minn. by August 24th.

BRIDGE CONTRACT LET; BONDS SOLD.

The construction of the bridge across the Red Lake river at Highlanding was on Saturday let to the Minneapolis bridge company for $15,800. Two other propositions were presented, one from the Minneapolis Steel and Machinery company for $16,189, and the other from the Illinois Steel bridge company for $15,850. Work on the structure will probably be begun at once as the specifications call for completion by Dec. 1 of this year.

The $15,000 road and bridge bonds were awarded to Wells, Dickey & Co., of Minneapolis, their bid being for six per cent and accrued interest; no extra charge for attorney service or blank bonds. An exactly similar offer was made by the Minnesota Loan and Trust company, but a charge of $200 was added to cover cost of attorney's services and the necessary blank bonds.

The same concern also purchased the $30,000 issue of drainage bonds offered by the county on the same terms.

INTEREST IN CONVENTION.

With the large acreage in certain localities in this part of the state adapted to the grazing of sheep there will be more or less interest, no doubt, in the Great Lakes Wool convention to be held in Chicago on Aug. 21 and 22. The purpose of the meeting is to bring together the growers of sheep in the west and owners of land in Wisconsin, Michigan and Minnesota that is suitable for grazing.

To assist anyone who would like to secure sheep for grazing in this section, the Duluth Commercial club has written Sec. Laird asking that interested parties write to the agricultural committee of the Duluth club.

WILL ARRIVE SATURDAY.

We have received word this week to the effect that the parties from North Dakota, who we stated in last weeks paper would put in a hay bailer here, will arrive here Saturday with their machinery and will commence work right away. It is their intention to bail all the loose hay they can secure in this vicinity and when the supply is exhausted here they will probably move their outfit a little farther east.

Star News.

The Erie farmers are thankful for that nice little shower of rain Sunday.

Elling Ramsey visited at the home of his wife's parents Mr. and Mrs. Rensla near Rhoda Sunday.

Fred Ellertson is staying at the home of his father after a few weeks vacation at his former home in Pope county.

Sakarias Hole was in Gully on business last Wednesday.

Halvor Severson was a business visitor in Goodridge one day last week.

Mr. and Mrs. H. O. Tommerdahl and children were pleasant callers at the home of Mr. and Mrs. Knut Danielson Sunday.

Olof Sunsdahl is home after an absence of a few months during which he has been employed at Big Falls and Cass Lake.

GOOD ADVICE FROM THORPE.

The following article is copied from the Norman County Herald and is good advice to the farmers in this section.

1918 and 1919 will be ideal seasons for winter wheat and rye. So get busy and have your lands plowed in August and sow as early as possible. At the same time seed to timothy if you wish to raise timothy for hay or seed. Agents for these unsightly non-resident lands should insist they be plowed at once and sowed to winter grain in place of being allowed to lay growing up to sow and Canada thistlds kinghead and wild oats, a menace to every resident land holder adjoining them. When the war ends wheat and rye will be in greatest demand for the starving people of Europe and the world. Put the plows a going if you have to set over the shocks. Stack your grain if you cannot thresh early. Our land must be plowed thoroughly and early in the fall if you would destroy the foul weeds which now are making inroads on our beautiful Red River Valley lands. Late plowing in the fall and late seeding in the spring is a failure here bringing only loss to owner and tenant. You never will again see opportunities like this for tillers of the soil, cash wheat in Minneapolis market yesterday, 1 Northern, $3.00, 3 Yellow corn $5 25, barley choice, $1.46, rye 1.90, oats 74, flax $3.45 per bushel; hogs top $16 00, cattle per hundred heavy receipts, strong and higher. Timothy replowed hay $16 to $18 per ton; rye, oats and wheat straw $8 50 to $11 per ton, St. Paul. Stack your straw, cut everything in shape of grass or roughage that will make feed. The demand for No 1 and 2 hay and straw will come this year from the west, east, north and south and the army. Let the auto rest for the next 60 days and work early and late to sow this magnificent crop and prepare for the 1918 crop. Don't sell your milch cows, heifer or heifer calves. You will find all the warring nations coming to our shores when the war ends for this kind of stock and prices will be higher than ever.

Garrett L. Thorpe.

Ball game Sunday on the home diamond, Goodridge and Grygla will play the rubber, each team having won a game apiece this season.

CHARLES STELZLE.

He Heads $1,000,000 Drive to Make Wet States Dry.

Photo by American Press Association.

"The action of the senate regarding national prohibition has made it seem wise to release our plans earlier than we had intended," said Charles Stelzle, manager of the "strengthen America" campaign. "For the past several months we have been shaping up machinery, the purpose of which is to secure 10,000 deputies in 3,500 cities and towns to push a national $1,000,000 advertising campaign against the liquor traffic."

SEVENTEEN DEAD IN TROLLEY COLLISION

North Branford, Conn.—Seventeen persons were instantly killed and more than twenty injured, some probably fatally, when two trolley cars on the Shore Line Electric railway crashed head on at high speed near here.

Both cars were of heavy construction and the force of the impact locked them together in a mass of twisted iron, steel and splintered wood.

Both cars were well filled with passengers. Most of the dead were women.

The accident occurred on a short stretch of straight single track.

CROWDER ISSUES ORDERS

Boards Must Reduce Exemptions for Dependency.

Washington, D. C.—Wholesale claims for exemption from the army draft, reported from many sections, caused Provost Marshal General Crowder to telegraph governors directing that local boards "reduce discharges for dependency to a far more restricted class and to very necessitous and clearly defined circumstances."

In some districts as high as 80 per cent of the registrants called for examination are filing claims for discharge on the grounds of dependent relatives.

REGULAR ARMY IS FILLED

Now Has 300,000 Men, but Recruiting Will Go On.

Washington, D. C.—The regular army is now at its full war strength, 300,000.

There will be no letup in recruiting, the war department expecting more volunteers for the reserve.

SCHOONER LOST IN STORM

Twelve Persons Perish When Vessel Is Destroyed.

Kingston Ont.—Twelve of the fourteen persons on board the schooner George W. Marsh when the schooner was destroyed in a gale on Lake Erie were lost.

NEW VESSELS ARE ORDERED

Contracts Let for Ships Aggregating $100,000,000.

Washington, D. C.—Huge shipping contracts aggregating 775,000 tons and an outlay of $100,000,000 were approved by the shipping board. The tonnage will include eighty-eight wooden vessels and sixty steel ships.

Taft Is Gaining Rapidly.

Clay Center, Kan.—Former President Taft continues his rapid improvement from an attack of intestinal indigestion.

KAISER'S CABLE TO WILSON MADE PUBLIC

Washington, D. C.—The state department made public a copy of the telegram sent by the German emperor to President Wilson in August, 1914, in which the kaiser said the "neutrality of Belgium had to be violated by Germany on strategical grounds."

The telegram, in the kaiser's own handwriting, was transmitted to the president through Ambassador Gerard. It came to light through the publication of Mr. Gerard's memoirs.

The state department's action comes as a counter to the German denial that such a telegram exists.

The whole affair evidently has created the greatest consternation in Berlin. The Norddeutsche Allegemain Zeitung, semi-official organ of the German government, was quoted in a Berlin dispatch as denying the existence of such a telegram.

A dispatch from Copenhagen quotes the Cologne Gazette as saying the German government soon will issue an explanation of the telegram.

The state department's action came without comment. The message was given out as it was received by cable.

GALE HITS FISHING FLEET

Nineteen Men Perish and Eight Others Missing.

Boston, Mass.—Nineteen Portuguese fishermen of Provincetown were drowned when the dories in which they were fishing off Cape Cod were swamped by a gale that came up suddenly late Friday afternoon.

The men were from the fishing schooners Mary C. Santos and the Natalie J. Nelson, which have just arrived here.

Eight Gloucester fishermen, comprising the crews of the small fishing schooners Daniela and Alice Stetson, also are believed to have been lost in the gale.

Several fishing schooners reported narrow escapes for their crews.

LUMBER STRIKE CONTINUES

Effort to Reopen Mills in Far Northwest Fails.

Seattle, Wash.—A final conference between the Washington state council of defense, representatives of the labor and neutral committee representing the general public in an effort to settle labor differences and reopen the lumber mills, ended in failure. Dr. Henry Suzzallo, chairman of the council of defense, announced that the council's efforts to bring the factions together had been dropped.

FIVE AMERICANS ARE LOST

Steamer City of Athens Hits Mine and Goes to Bottom.

Washington, D. C.—Five American passengers were lost when the American steamer City of Athens struck a mine and went down near Cape Town, South Africa, Aug. 10, according to state department dispatches. Ten other passengers and four of the crew also were lost, the dispatches say.

TO KEEP DOWN COAL PRICES

Trade Commission Issues Warning to Fuel Dealers.

Washington, D. C.—Coal dealers who increase their price for anthracite coal more than 10 cents a ton before Sept. 1 will be considered by the federal trade commission as openly declaring a policy of profiteering.

TO TAKE EFFECT ON SEPTEMBER 1

Drastic Plans for Control of Nation's Wheat Crop.

MAY BUY ENTIRE PRODUCT

Unchangeable Price Will Be Fixed and This Will Help Maintain Stable Prices for Flour and Bread.

Washington, D. C.—Drastic plans for the control of wheat, flour and bread have been announced by Food Commissioner H. C. Hoover. The main features of the farreaching program follows:

An unlimited amount of wheat, the entire crop, if necessary, to be purchased by the government in order to maintain a fair price.

A definite, unchangeable price to be fixed for the 1917 wheat crop by a committee headed by President Garfield of Williams college.

A stabilized price of wheat to lead to the holding of stable prices for flour and bread.

Licensing of all elevators and mills with more than 100 barrels daily capacity as a means of eliminating speculation.

No wheat to be stored more than thirty days without permission is one of the general conditions under which elevator licenses shall be admitted.

In the next few days further statements, disclosing Mr. Hoover's intentions with respect to other commodities, are expected.

Become Effective Sept. 1.

Regulations relating to the licensing of elevators and mills become effective Sept. 1. Conditions of the license will be that only reasonable and customary charges shall be made for warehouse service, that no wheat shall be stored for more than thirty days without the approval of the food administration and that certain information as to receipts and shipments shall be supplied regularly.

Farmers' and co-operative elevators are excepted by the food bill.

In substitution for what is termed the "broken down market machinery," the food administration will open agencies for the purchase of all wheat at the principal terminals, carrying on its transactions with the usual dealers.

Grain exchanges have been asked to suspend all quotations on wheat futures. Persons, whether or not engaged in the trade, holding wheat contracts larger than enough for ordinary business will be prosecuted and are advised to liquidate their contracts at once.

Mr. Hoover's next step will be to stabilize prices on canned goods, meats and other foodstuffs.

WILL CARE FOR GERMANS

American Red Cross to Aid Enemy Wounded.

Washington, D. C.—A statement that the American Red Cross will not neglect German wounded or prisoners and will welcome co-operation from Americans of German origin was authorized by Chairman Davison of the Red Cross war council.

WOMEN AND CHILDREN IMPORTANT

Extra Efforts To Be Made To Have Exhibits At State Fair Bigger And Better Than Ever—Style Show To Eclipse Anything Yet Held—Children's Contests To Interest Many.

Women and children will take a most important part in the Minnesota State Fair, which is to be held September 3 to 8 and which, this year, is to be conducted as a Food Training Camp in the voluntary service of the government.

For years past the women and children have done their share to make the Minnesota State Fair the success it has been, but this year, possibly due to war conditions, they will be called upon, as has everybody else, to put forth extra efforts to make conditions as near normal as possible.

Because of a shortage of materials for the manufacture of high grade clothing it has become necessary for manufacturers to turn their attention to other materials besides pure woolens and other fabrics, which, before the war, were easily obtainable.

Big Style Show.

For some time past the women who will have charge of the exhibits in the women's department have been busily engaged planning the affairs and, while definite plans have not been announced as yet it is certain that among other things to be seen in the women's building will be a style show, which will eclipse anything of the kind yet attempted at the Minnesota State Fair. Living models will be used to display the very latest styles.

Plain sewing will be given special attention this year. This feature is particularly important because the war has brought about conditions that have necessitated doing away with frills and fancy things and has replaced them with the simpler and plainer wearables.

Demonstrations will be held along the line of how to do plain sewing and how to utilize different materials which will come into more common use as time goes on.

Boys' and Girls' Camps.

In the children's department there will be many features of interest. Among these will be the camp for farm boys and also one for girls.

Winners in last year's contests for farm boys in raising pigs, corn and potatoes will contest for honors at the fair. They will make up the farm boys' camp and during the week will live right on the fair grounds. Great rivalry is said to exist this year and it is expected the judges will have more difficulty in selecting the winners than for some time.

The girls, who will contest in breadmaking and canning, will also have their share of attention. These girls have already been selected in the various counties, where they have won prizes and this year, with government officials present, they will doubtless outdo themselves to produce the best possible results. The girls will be quartered at the State Agricultural School near the Fair Grounds.

Besides these contests there will also be the annual spelling contest open to both boys and girls, by which the champion speller of the state will be determined. This contest, too, has always attracted lots of attention and this year will be no exception.

ABOUT THE STATE

News of Especial Interest to Minnesota Readers.

GATHERED FROM ALL SECTIONS

Happenings of the Week Briefly Told for the Convenience of the Busy Reader.

Postal savings in Minneapolis have touched the highest mark on record—$500,400.

Mrs. Catherine Coffers, aged eighty-seven, a resident of St. Paul since 1856, is dead.

Iver Tollefson, member of the Minneapolis police force for twenty-eight years, is dead.

The Northern Rendering company's plant at New Brighton has been destroyed by fire.

Charles Edridche of Minneapolis, seventy-three years of age, ended his life by shooting.

T. F. Guinney, for twenty-five years prominent in Democratic politics in Minneapolis, is dead.

Erick Sundkvist, prominent St. Paul furrier, is dead. He was sixty-four years of age and a native of Sweden.

Burglars broke into the Daylight store at New Prague and escaped with $2,500 worth of silks, jewelry and clothing.

Nearly 200,000 acres of school and other state lands in Northern Minnesota will be offered at public auction in October and November.

Mrs. Cotton Mather, prominent in Methodist church circles and well known for her writings on farm subjects, is dead at her home in Minneapolis.

Louis Yant, aged twenty-three, a fireman employed by the Northern Pacific railroad, was run down and instantly killed in the company's yards at Minneapolis.

S. L. Hanson, manufacturer of barn equipment of Albert Lea, was sentenced at St. Paul to ten days in the workhouse after pleading guilty to a charge of reckless driving.

George F. Schrieber of Mankato has been elected president of the Minnesota Engineers' association, in convention at St. Paul. Duluth was chosen for the convention of 1918.

There were 152 deaths in Minnesota from cerebro-spinal meningitis from Jan. 1 to Aug. 6, according to a report submitted to the United States public helth service at Washington.

Cash premiums to be offered at the Minnesota state fair, Sept. 3 to 8, will aggregate $93,455, including the purses offered the automobile drivers who will compete in the auto races.

Julius Pleth of Plummer was found dead in a stateroom on a Soo train near Thief River Falls. Mr. Pleth was fifty years of age and was engaged in the real estate business.

Mr. and Mrs. Frank Swither were found dead from gas poisoning in their apartments at Minneapolis. Both were fully dressed when discovered, the husband sitting upright in a chair.

Joe Popp, employed in the beef killing department of the Swift packing plant at South St. Paul, dropped dead shortly after asking permission to quit work because he was not feeling well.

A dispatch from Vienna announces the engagement of Archduchess Hedwig of Tuscany to Count Bernhard zu Stolberg-Stolberg, born in Mankato, this state, where his father resided a long time.

There are 180,400 automobiles registered in Minnesota, according to Secretary of State Schmahl. Of the total number registered, Mr. Schmahl said, 61 per cent, or 110,044, are of the popular small variety.

Rev. C. A. Cressy, seventy-four years old, a Methodist minister for fifty years, who had served in many cities and towns of Minnesota, including Le Sueur, Minneapolis, Stillwater and St. Paul Park, is dead at his home in Newport.

Mrs. I. E. Burgan, prominent in state Women's Christian Temperance union circles and who inaugurated the first missionary work among the logging camps of Northern Minnesota in the early eighties, is dead at her home in Minneapolis.

The state bureau of investments, created by the last legislature, has set aside a revolving fund of $100,000 to finance improvements on vacant state land. Applications for loans for new school buildings were received from several localities.

Minnesota is a Northwest leader in crop production this year, says a report compiled by John H. Rich, reserve agent of the Federal Reserve bank, which deals with crop damage in parts of North Dakota, South Dakota and Montana.

Rev. John K. Nygaard of Minneapolis, his bride and Sister Caroline Thompson, a Norwegian Lutheran deaconess, were among nineteen persons drowned when the steamship City of Athens struck a mine near Capetown, South Africa, Aug. 10.

Edwin D. Haskell of Minneapolis, son of the late Mrs. Olga von W. Haskell, who gave so much of her time to Serbian relief work prior to her death Jan. 10, has been selected as secretary of the American Red Cross mission which C. A. Severance of St. Paul is to take to Serbia.

Gus H. Beaulieu, sixty-five years of age, agent of the Chippewas and editor of the Tomahawk of White Earth, died of heart disease two miles from the spot where he was born, near Crow Wing, as he and his family were going to Cass Lake to fish.

Thomas L. Vought, who while a resident of Madelia, this state, led the posse which captured Bob, Frank and Cole Younger, members of the Jessie James gang of bandits, after the famous Northfield bank robbery in 1876, is dead at La Crosse, Wis., at the age of eighty-five years.

Austrian miners employed at the Gilbert properties at Virginia have walked out, saying they would not produce metal "to kill their countrymen." Four hundred and fifty men are involved. Sheriff Meining says that German propaganda work evidently is behind the "sympathetic" walkout.

J. O. Bentall, Socialist candidate for governor of Minnesota in the last primaries, was arrested on his farm near Litchfield by agents of the department of justice charged with "wrongfully attempting to cause insubordination, mutiny and refusal of duty in the military forces of the country."

Wild rice, a valuable food which is as nourishing as cultivated rice and can be had for the harvesting, is going to waste in the marshes of Northern Minnesota, according to State Forester W. T. Cox. The only people using it are a few Indians and the epicures who frequent big hotels or cafes and order it with their game.

Minnesota prosperity is indicated by state bank deposits of $226,007,780 and assets of $260,867,866, according to the summary of statements made under the call of July 25. The increase in deposits is $32,026,030 and that of assets $36,152,664, compared with totals of June 30, 1916. The number of state banks increased to 1,081 from 994.

State Forester W. T. Fox, who is recruiting officer for the Minnesota detachment of the Tenth "ax and saw" regiment, which will be sent to France for forest service, announces that the regiment is recruited to full strength. Additional regiments are to be organized, however, and the recruiting will continue in Minnesota, Mr. Cox said.

Members of the Minnesota Bar association, including some of the most prominent citizens in the state, voted to aid the government by going into every section of the state to speak on loyalty and patriotism. This action was taken to counteract what was declared to be an organized effort to stir up unpatriotic sentiment in the state.

"Rather than fight against my own brothers and maybe kill them, I would kill myself," was one of the statements of Joseph Schaefer, whose body was found in Snail lake, near St. Paul. The remark was made to companions on a grading gang near the lake. Schaefer registered in Guessing, Ind. He has two brothers in the German army.

M. W. Fitzgerald, for eighteen years register of deeds of Ramsey county, is dead at St. Paul. Mr. Fitzgerald was the author of the Minnesota Torrens law for the registration of land titles and was considered one of the best authorities in the United States on this subject, frequently being consulted by legislative committees from different states.

Although several state fairs have been turned down on their request to the secretary of war for a war exhibit Minnesota stands a good show of getting both an army and navy exhibit. Every member of the state congressional delegation has been asked by the fair board to take the subject up with the secretary of war and the secretary of the navy.

Fritz Bergmeier, president and manager of the Die Volkszeitung, a German daily newspaper printed in St. Paul, has been arrested on orders of United States Attorney General Gregory. Mr. Bergmeier is accused of being an enemy alien who may be dangerous to the country and was arrested for violating the president's proclamation of April 6.

Judge Wilbur F. Booth of the United States district court handed down a decree at Minneapolis enjoining the Northwestern Lumbermen's association from arbitrarily fixing, establishing and maintaining divisions and classifications in the lumber trade in restraint of interstate trade. This is the noted "lumber trust" case that has been in the courts for years.

Minnesota's wheat crop this year will be 61,332,000 bushels, or approximately 34,000,000 bushels more than last year, according to the United States department of agriculture estimates. Prospects are for 15,000,000 bushels more corn, 33,000,000 bushels more oats, 11,000,000 bushels more rye and approximately 19,000,000 bushels more potatoes than in 1916.

Recommendations that the ethics committee of the Minnesota State Bar association investigate the conduct of Albert Pfaender, who participated in an anti-draft meeting at New Ulm recently, were adopted by state lawyers in annual convention at Minneapolis. Charges of gross misconduct were placed against Pfaender and if they are found to be true he probably will be expelled from the association and barred from practice in the state.

A. L. Sugerman, secretary of the state Socialist committee and one of the leaders of the Socialist party in St. Paul, has been arrested on a charge of attempting to cause "insubordination, disloyalty and refusal of duty in the military forces of the United States." It is alleged that on July 24 at Kelsey, near Arlington, in Sibley county, he urged young men, called by draft to appear for examination, to refuse to report to the exemption boards.

HANDLING MILK IN SUMMER

Whether Intended for Table, Creamery or Market, It Must Be Sweet to Bring Best Price.

It is no trick at all to keep milk sweet in cold weather. It may stay in the sun half a day in December without any damage, but in June and July it must be handled very carefully. Whether the milk or cream is intended for the table, the creamery or the milk market, it must be sweet if it is to bring the best price.

To keep milk sweet just two simple things must be very carefully looked after: (1) it must be cooled as completely and quickly after milking as possible, and (2) absolute cleanliness of pails, pans, and cows must be secured. If this is done, thunderstorms will no longer sour the milk. The warm, damp weather which we have just before thunderstorms really does tend to cause milk to sour if it has not been properly cared for.

This souring takes place because little invisible plants called bacteria get into it in dirt or by lurking in the corners and seams of poorly cleaned pails and cans. The remedy is plain. Keep the bacteria out by using seamless pails and cans and seeing that absolutely no dirt or dust gets into the milk in the stable or anywhere else.

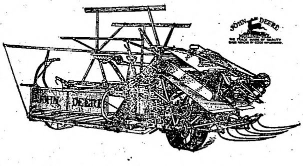
John Deere Binders



JOHN DEERE BINDERS are built for the man who wants real visible quality. The binder is one of the most important machines used on the farm and a few dollars in price is of no consequence when saving a crop is a consideration. If you are in the market for a new binder, let us show you the John Deere.

EASTERN FRONT SHOWS ACTIVITY

Russians and Roumanians Turn on Teutons.

LOSING GROUND IN MOLDAVIA

Austro-Germans Take Railway Town and Probably Have Cut Line Running North.

London.—In repulsing an Austro-German attack in the valley of the River Sloniku, Western Moldavia, the Russians captured more than 600 prisoners and four machine guns, Petrograd reports.

In the region of Ocna the Russians and Roumanians drove the Austro-Germans from a series of heights.

In the fighting around Fokshani the Russians and Roumanians captured 500 Austrians, but were compelled to retire slightly.

The Russians and Roumanians, having been forced to give up the Fokshani-Marasechti line and retire to the Sereth river, Field Marshal von Mackensen has been enabled to capture Pantziu, a railway town west of Marasechti.

By taking the town the Teutons probably have cut the railway line north, imperiling the Russians and Roumanians in Western Moldavia.

Western Front Remains Quiet.

Infantry fighting on the Western front, and especially in Flanders, has not been marked in the past twenty-four hours.

In Flanders the opposing troops apparently are resting in preparation for further infantry activity.

The Germans can hardly permit the British to hold the important salient east of Ypres and between Pilkem and Hollebeke without first making additional efforts to straighten out their front. By widening the salient Field Marshal Haig adds to the insecurity of the German line from Dixmude to the coast as well as the front southwest toward Lens.

French troops again have repulsed German attacks along the Aisne front in an attempt to recapture ground south of Ailles. East of the positions the French took the offensive and made a small advance. Elsewhere on the French front the artillery fighting continues violent.

TWENTY-THREE SHIPS SUNK

Slight Increase Noted in Week's Submarine Toll.

London. — There was a slight increase in the loss of British merchant vessels by submarines or mines in the past week.

Twenty-one British vessels of more than 1,600 tons and two vessels of less than 1,600 tons were sunk last week. Thirteen ships were attacked unsuccessfully. No fishing boats were lost.

Arrivals for the week numbered 2,676 and sailings 2,796.

TWENTY-THREE ARE KILLED

German Airplanes Drop Bombs Forty Miles South of London.

London.—Bombs dropped by German airplane raiders killed twenty-three persons and injured fifty at Southend, forty miles from London. Of those killed nine were women and six children.

At Rochford and Margate, where bombs also were dropped, comparatively small harm was done and but a few persons injured.

FIRE WRECKS POWDER PLANT

Incendiaries Blamed for Half Million Dollar Blaze.

Gary, Ind.—Fire which is believed to have been of incendiary origin destroyed about half the million-dollar plant of the Aetna Explosives company near here. Two employes named Holt and Choisse were arrested.

The plant was working on government contracts, it is said. It had a capacity of 46,000 pounds of powder a day.

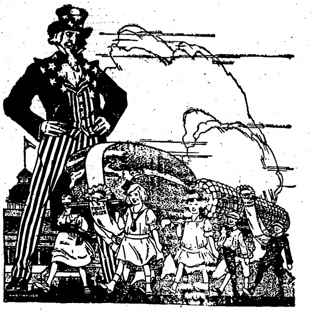
MILK FEVER IS BOTHERSOME

Danger Among Cows Appears Greatest in Late Summer—Keep Animal in Barn and Feed Hay.

Milk fever is a rather serious trouble with good cows, as it is said that none but well-bred, heavy-producing cows have it. It seems to be more prevalent among grass-fed cows.

The danger of milk fever among cows seems to be greatest in late summer or early fall, notably June, July, August and September. The recommendation is to put the cow in the barn and feed dry hay about a week before she comes fresh. Three or four days before calving the cow is given a dose of salts with a little ginger. Another dose is also given five or six hours after the calf is born. A bucket of warm water should be given the cow two or three times a day. She should not be allowed to have cold water for some time.

Remember your Subscription We need the money now past due.



WAR SERVICE FOR CHILDREN.

The children as well as the grown-ups must do their bit for their country. The Minnesota State Fair Food Training Camp, Sept. 3 to 8, will devote an entire department to stimulating interest in children's work and to pointing out ways in which the children may best serve their country.

CHANCE FOR HIGH SERVICE IN ARMY

Always an Opportunity for Enlisted Men to Secure Commissions.

WELL PAID AND CARED FOR

Food, Clothing, Lodging and Medical Attendance Provided—Many Who Have Entered Service as Privates Have Gained High Rank.

By EDWARD B. CLARK,

Washington.—"In the regular army, O!"

This line is from a song in praise of the regulars which is as old as the army itself. It is the pride of the regulars to say that they are always ready and it would seem to the civilian who reads the history of the standing army that the pride is not misplaced.

There seems to be throughout the country a misunderstanding concerning enlistments in the regular army today. The registration of men between the ages of twenty-one and thirty-one for possible selection as soldiers in the new national army does not in any way prevent the registered man from enlisting today in the regular army, the navy or the Marine corps. There is still a chance for a man to become a volunteer and by becoming one to enter the ranks of an army which has made history and will continue to make it so long as American fighting men take the field.

In the regular army the enlisted man is assured of a fine quality of leadership. He is under the command of men who know the war game from its beginning to its end and who understand thoroughly how to instill a strict discipline which is good for the men and for the service because, while necessarily strict, it has for its spirit a kindly consideration and a knowledge of the needs of the soldier. Moreover, the regular army officers know how to care thoroughly for the health of their men.

Thoroughly Trained Leaders.

It must not be understood from this that the new national army will not be well led and well cared for, but in the regular service the entire personnel of the commissioned ranks is that of men who have had the best kind of training with special reference to the guidance of those who shall be under their control. In the national army in each organization there will be some regular officers, whose duty it will be to impart to the newer officers the things which they have learned by long experience. Both services will be of the highest order.

The young man wo enlists in the regular service has every chance of promotion. He enters as a private, but there is an opportunity for him while still an enlisted man to secure a position which will pay him $81 a month in addition to his entire support so far as food, clothing, lodging and medical attendance are concerned. The government gives all these things gratis.

There is always an opportunity for enlisted men of the United States army who are mentally and physically alert to secure commissions, and thereby to pass from the ranks of an enlisted man to that of an officer, and be assured of a profession for the rest of his life. Enlisted men who remain enlisted men in the army can retire after 30 years service with good pay and allowance.

Pay in the Army.

In order that the young man who desires to become a volunteer through enlistment in the United States army, for probable first service in the field of the present war, may know just what his pay will be, the following table is given by which he can determine almost at a glance what his "monthly money" will amount to, and while studying the table he should remember that the government takes it upon itself to keep him in food and clothing, to give him lodging and medical attendance and, in fact, to provide for him every necessary of life free of cost. Here is the table:

	Per Month.
Private. Private, second class. Bugler.	$30
Private, hospital corps (private medical department)	31
Private, first class	33
Corporal, artillery, cavalry, infantry. Saddler. Mechanic, infantry, cavalry, field artillery, medical department. Farrier. Wagoner	36
Corporal, engineers, ordnance, signal corps, Q. M. corps, medical department. Mechanic, coast artillery. Chief mechanic, field artillery. Musician, third class, infantry, cavalry, artillery, engineers	38
Sergeant, artillery, cavalry, infantry. Stable sergeant, field artillery, infantry, cavalry. Supply sergeant, infantry, cavalry, artillery. Mess sergeant, infantry, cavalry, artillery. Cook. Horseshoer. Radio sergeant. Fireman. Band corporal. Musician second class, infantry, cavalry, artillery, engineers. Musician, third class, military academy	38
Sergeant, engineers, ordnance, signal corps, Q. M. corps, medical department. Stable sergeant, engineers. Supply sergeant, engineers. Mess sergeant, engineers. Color sergeant. Electrician sergeant, second class. Band sergeant. Musician, first class, infantry, cavalry, artillery, engineers. Musician, second class, military academy	44
Battalion sergeant major, field artillery, infantry. Squadron sergeant major. Sergeant major, junior grade. Master gunner. Sergeant Bugler. Assistant band leader	[illegible]
Regimental sergeant major. Regimental supply sergeant. Sergeant major, senior grade. Quartermaster sergeant, Q. M. corps. Ordnance sergeant. First sergeant. Battalion sergeant [illegible] supply sergeant, engineers. Electrician sergeant, first class. Sergeant, first class, engineers, Q. M. corps, signal corps. Assistant engineer. Musician, first class, military academy	51
Sergeant, first class, medical department. Sergeant, field musician, military academy	54
Hospital sergeant. Master engineer. Engineer	71
Quartermaster sergeant, senior grade Q. M. corps. Band leader. Master signal electrician. Master electrician. Master engineer, senior grade. Master hospital sergeant. Band sergeant and assistant leader, military academy	81

Additional Pay Per Month.

Mess sergeant	6
Casemate electrician	9
Observer, first class	9
Plotter	9
Coxswain	9
Chief planter	7
Chief loader	7
Observer, second class	7
Gun commander	7
Gun pointer	7
Surgical assistant	5
Expert rifleman	5
Nurse	3
Sharpshooter	3
First class gunner	3
Second class gunner	2
Marksman	2
Dispensary assistant	2
Certificate of merit	2

Win Additional Pay.

On the first re-enlistment each private in the United States army gets $3 additional pay each month, and this is increased for each succeeding enlistment. It will be seen from the table that men who qualify as good shots, or who, because of their capabilities, are given certain positions, receive an increase of monthly pay. It may also be said that each enlisted man who serves in the aviation corps receives an addition of 50 per cent in his pay while he is on duty that requires him to participate regularly and frequently in aerial flights, or while holding the rating of aviation mechanician.

The regular army of the United States dates back for its organization to the year 1789, when it was a body of men barely 500 in number. Prior to this time there was a force, the units of which were paid by the different states, or it might almost be said colonies, for it was not until 1789 that the United States as the United States came into existence. The federal government took over a part of these state forces and formed the original regular army.

The regulars fought Indians from the very start of their existence as an organized body. They made a fine record for themselves small as were their numbers in the war of 1812. Later they took up the work of guarding the frontier, and the history of the army for years and years was one of self-sacrifice, of devotion to duty, and of achievement in the fields so far removed from civilization that the people never realized what their little force was doing for them. To the fact that the high work of the regulars was done for so many years in remote fields was due the lack of the people's appreciation of the heroism of their standing army.

Long List of Achievements.

It was the regulars who suffered in the Fort Dearborn massacre on the site of Chicago over a hundred years ago; it was the regulars under Major Dade who in Florida, hopelessly outnumbered and ambushed, fought until almost the last man was killed, the Seminole Indians under the fine leadership of one of Osceola's chieftains. It was the regulars who went to death in the country of the Rosebud under the white chief, Custer; it was a little band of regulars who met Big Foot and his warriors on Wounded Knee creek in 1890 and won the fight after appalling losses. It was the regulars who fought Red Cloud, Crazy Horse, Chief Joseph, and who followed Geronimo, The Kid, and other savage Apaches, into the mountain fastnesses of Mexico. It was the regulars who from the beginning until the present day have dared everything for their country. Their record is a magnificent one.

The regular army is now being brought up to a war standard of strength. When the ranks are full there will be following the colors as a part of the regular establishment some 285,000 Americans. Any young American today has an opportunity to become by volunteering a member of this devoted band. It means service, and hard service, but it also means high service, and in all human probability glorious service. Hardships there will be in plenty; dangers, a multitude, but there are the compensations of service that is service, and of a sense of patriotic duty done in a field of life into which devotion to country calls the young American.

Organization of the Army.

The organization of the army today is different from the organization of other days. In the old days there was no aviation service and little or no signal service of any kind. The medical service was crude; the artillery had not become the great factor in warfare that it is today, and there was less specialization along all lines of military endeavor.

Let us take the American army as it is provided for under the law of today, a time when we are in war with a great military power. Of course it must be remembered that in addition to the regular army we shall have the great new national army, the National Guardsmen, the navy and the Marine corps to help us win in the fight for the liberty of the world.

The regular army of the United States upon the present war footing consists of 64 regiments of infantry, 25 regiments of cavalry; 26 regiments of field artillery, a coast artillery corps, brigade, division, army corps, and army headquarters, with their detachments of troops; a general staff corps, an adjutant general's department, an inspector general's department, a judge advocate general's department, a quartermaster's corps, a medical department, a corps of engineers, an ordnance department, in signal corps, in officers of the bureau of insular affairs, a military bureau, the regular army reserve, the corps of cadets at West Point, and other smaller organizations used for disciplinary grades, service schools, and record depot detachments and for some other purposes.

How It Is Commanded.

An army is a huge body of men gathered together for fighting purposes in different units of organization. An army when it passes a certain strength usually is commanded by a general. Today there is no general in the United States army, but it is probable that within a few months congress will revive the rank and name some officer, who, taking the title of general, shall have supreme command of all the fighting forces in the field.

An army is composed of army corps. There may be two or three or more corps in an army. Sometimes when there is a huge number of troops in the field one general is put in supreme command while his forces are divided into several armies, each one in command of a lieutenant general. It is likely that congress soon will make Maj. Gen. John J. Pershing a lieutenant general and put him in command of the First corps, consisting of several divisions of troops, to see service in France.

A division of troops is commanded by a major general. It is composed of several brigades, each one of which is commanded by a brigadier general. It is possible for a brigade to consist of a combination of cavalry, infantry and artillery, but frequently each brigade is composed of regiments all of the same branch of the service. The typical infantry brigade, for instance, consists of a headquarters and three regiments of infantry, while a typical cavalry brigade consists of a headquarters and three regiments of cavalry.

Composition of the Regiment.

Each regiment is commanded by a colonel, who has under him a lieutenant colonel, whose duties are rather nondescript, although his chief duty is to take the place of the colonel in his absence or in case he is wounded or killed in battle.

Each regiment is divided into battalions, and each battalion is commanded by a major. A battalion consists of two or more companies, troops or batteries, and each company is commanded by a captain. In each company there is a first lieutenant and a second lieutenant, and complete complement of noncommissioned officers, first sergeants, duty sergeants, and corporals.

The company is divided into squads for purposes of instruction, discipline, control, and order, each squad consisting of a corporal and seven privates. The corporal is the squad leader, and when absent is replaced by a designated private. It might be said that from the squad, consisting as it does only of a corporal and seven privates, the whole formation of an army is developed and in a sense regulated. The squad is a small base unit from which armies take their growth by a series of developing steps.

Men who enter the United States army as recruits have the same chance that men had years ago not only to become commissioned officers, but to reach the high place of command of all the armies of their country.

Does this seem to be an exaggerated statement? Only recently there died a lieutenant general of the United States army who commanded all the forces of Uncle Sam. He entered the service as an enlisted man of regulars, going to a recruiting office just as any boy of today can go to a recruiting office there to don the uniform of a private, later to enter the ranks, and if it is in him to work his way up to the top.

Private Goes to Top.

On July 22, 1861, Lieut. Gen. Adna R. Chaffee applied for enlistment as a regular in the army of the United States. There was nothing to differentiate him from other young men who applied daily at the recruiting office. He was assigned as a private to Troop K of the Sixth cavalry, an organization which exists today and in which John J. Pershing, now commanding our forces in France, saw his first hard fighting duty. General Chaffee rose from private to sergeant, to first sergeant, to second lieutenant and through the rest of the ranks until he was made lieutenant general of the United States army, the ranking officer of Uncle Sam's forces.

Chaffee was a soldier of the highest order. His career in the Spanish-American war was markedly efficient. He fought at San Juan and later went to the Philippines. While there he was ordered to take command of the American forces which were to join the allied forces in their march on Peking, the forbidden city. That was one of the most successful and hard-working expeditions ever dispatched by the United States. Chaffee won fame for his service. Within the compass of his years in the army he had served in every rank barring that of corporal.

Of the three living lieutenant generals of the army, all of whom are on the retired list, not one was a graduate of West Point. They all came up, if not from the ranks, at least from the lowest commissioned offices, working their way by merit, until they received the highest military honor possible under then existing law, promotion to command of the army with the rank of lieutenant general.

The fact that all young men between the ages of twenty-one and thirty-one are registered for possible service does not prevent their volunteering for service in the regular army, the navy or the Marine corps. There is a chance for high service "In the regular army, O."

HOLDS CHARM FOR RED-BLOODED MEN

Navy, With Its High Ideals and Splendid Record, Justifies Nation's Pride.

MEN NEEDED FOR SERVICE

Uncle Sam Pays All Expenses and Monthly Wage Is All Velvet—"There Is Always Room at the Top," True of Navy.

By EDWARD B. CLARK.

Washington.—Sailors of the American navy, many of them young men who only a year ago were on the farm, at the bench, at the counter, or in school, today are in Uncle Sam's destroyers sailing the waters of the northern seas, where they are engaged in the heroic duty of upholding the world principle of freedom for all peoples.

The American people always have shown a kindly disposition toward the man-of-war and the man-o'-warsman. There has been an appeal about the sea which has drawn and held the interest of landsmen who never smelt salt water. Americans always have taken a pride in their navy.

Today Uncle Sam needs men for his navy and he wishes to get them from the ranks of those who are charged with the volunteer spirit of service. Our great fleet is mobilized "somewhere on the coast" for possible deadly service with the great fleet of the enemy. Today, for the navy has allowed the fact to become known, many of our smaller craft, the bulldog destroyers of the navy, are hunting the submarine sharks in the waters off Daunt's Rock, close to the coast of Ireland and farther north, where even in summer the elements at times are almost as fierce as "man, the enemy."

Pay Is Doubled.

Recently the congress of the United States increased the pay of the sailor men so materially that the recruits's pay is double what it was.

In the navy the young men of the country, both in times of peace and in times of war, secure liberal educations. Their opportunities for travel and for sight-seeing are greater than those of men employed in almost any other calling in life. Moreover, the boys just entering manhood who enlist in the navy are given opportunities for instruction which, if they have the ambition and the mental qualifications, will enable them to enter the naval academy at Annapolis on the same terms as midshipmen who are nominated by members of congress, and at that institution to secure an education which fits them for the commissioned rank which the government of the United States will confer upon them.

There are traditions in the American navy which keep high the spirit of endeavor in every man who walks the deck under the colors, from the admiral to the apprentice seaman. The boy learns all about John Paul Jones, and his deeds on the sea for his country; all about Decatur, Bainbridge, Hull, Porter, Farragut and Dewey. As the secretary of the navy has said, in what is really an appeal to the youth of the country to enlist under the navy's colors, the standard is high.

Service of High Ideals.

"The navy has been throughout its entire existence a service of high ideals; and its unbroken record of great and worthy achievement, of duty well done, has been due to the high standard set for officers and men in the beginning and which has been maintained ever since. This standard was never higher than it is today, and any young American who thinks of going into the navy may feel sure that, on enlisting, he will enter a service in which he may, and should, always feel a justifiable pride and of which the uniform is a badge of honor."

Young men between the ages of seventeen and twenty-five, who are not skilled in any naval trade, are enlisted as apprentice seamen. Immediately upon being sworn in at the recruiting stations they are sent at government expense to a naval training station. The apprentice seaman, because he is a green man and simply undergoing training has been paid in the past $17.60 a month. From this time on, however, under the recent act of congress his pay throughout the war and until six months after its ending is to be $32.60 a month.

Now it must be remembered that the sailor, whether he be a recruit or a seasoned man-o'-warsman, is under no expense at all for his livelihood after he once joins the navy. He is given clothing, food, shelter and medical attendance. Out of his pay all that he need spend is such money as he desires to pay out for such luxuries and entertainments as he seems inclined to indulge in.

Increase Soon Comes.

It must not be supposed that an apprentice seaman continues long to draw simply the amount of his first pay. His first raise comes in the seaman branch, and if he is in the fireroom he gets an additional sum.

The navy needs men who are trained or partly trained in the various trades. Men who are proficient along certain lines and who come within certain limits of ages are enlisted for specific purposes in the navy. They are given pay in accordance with standards set for the different lines of endeavor which they must follow. Full information concerning enlistments of this kind can be had at any recruiting office. The navy today is a world in itself. It needs men proficient in nearly all lines of human working endeavor.

Rate of Pay in Navy.

The law increasing the pay of the men in the navy has just been enacted and the pay tables under the new dispensation have not yet been made out; but it is a simple thing to determine the rate of pay of each seaman of whatever class by adding to the pay given in the accompanying table the amount of increase in each case. The increased pay allotment has just gone into effect. Below is given the navy wage table, with the pay as it stood prior to the recent act of congress. In order to know what each man's pay now is, it is only necessary to know that every man now drawing less than $21 a month will receive an increase of $15 a month; that every man drawing at present from $22 to $24 a month, inclusive, will receive $12 a month additional; that every man drawing more than $24 and less than $45, will receive $8 a month additional, and that every man drawing at present $45 or more a month will receive $6 a month additional pay.

It should be borne in mind that the apprentice seaman, the ordinary boy recruit, who ordinarily gets $17.60 a month, will be receiving at the time that this is read $15 additional, making his pay $32.60.

Here is the pay table as it stands today regardless of the increases which congress has ordained:

Chief Petty Officers.

	Monthly Pay.
Chief masters at arms	$71.50
Chief boatswains' mates	55.00
Chief gunners' mates	55.00
Chief turret captains	66.00
Chief quartermasters	55.00
Chief machinists' mates	77.00
Chief electricians	66.00
Chief carpenters' mates	65.00
Chief water tenders	55.00
Chief printers	66.00
Chief storekeepers	55.00
Chief yeomen	66.00
Chief pharmacists' mates	66.00
Bandmasters	67.20

All chief petty officers with a permanent appointment receive $77 a month and allowances.

Petty Officers, First Class.

Masters at arms, first class	$44.00
Boatswains' mates, first class	44.00
Gunners' mates, first class	44.00
Turret captains, first class	55.00
Quartermasters, first class	44.00
Boiler makers	71.50
Machinists' mates, first class	60.50
Coppersmiths	60.50
Shipfitters, first class	60.50
Electricians, first class	55.00
Blacksmiths	55.00
Plumbers and Fitters	49.50
Sailmakers' mates	44.00
Carpenters' mates, first class	44.00
Water tenders	44.00
Painters, first class	44.00
Printers, first class	44.00
Storekeepers, first class	44.00
Yeomen, first class	44.00
First musicians	39.60
Pharmacists' mates, first class	44.00
Masters at arms, second class	38.50
Boatswains' mates, second class	38.50
Gunners' mates, second class	38.50
Quartermasters, second class	38.50
Machinists' mates, second class	44.00
Electricians, second class	44.00
Shipfitters, second class	44.00
Oilers	40.70
Carpenters' mates, second class	38.50
Painters, second class	38.50
Storekeepers, second class	38.50
Yeomen, second class	38.50
Pharmacists' mates, second class	38.50

Petty Officers, Third Class.

Masters at arms, third class	$33.00
Coxswains	33.00
Gunners' mates, third class	33.00
Quartermasters, third class	33.00
Electricians, 3d class	33.00
Carpenters' mates, third class	33.00
Painters, third class	33.00
Storekeepers, third class	33.00
Yeomen, third class	33.00
Pharmacists' mates, third class	33.00

Rating With Seamen.

Seamen gunners	$28.60
Seamen	26.40
Firemen, first class	38.50
Musicians, first class	35.20
Hospital apprentices, first class	26.40

Rating With Seamen, Second Class.

Seamen, second class	$20.90
Firemen, second class	33.00
Shipwrights	27.50
Musicians, second class	33.00
Buglers	33.00
Hospital apprentices, second class	20.90

Rating With Seamen, Third Class.

Apprentice seamen	$17.60
Firemen, third class	24.20
Landsmen	17.60

Commissary Branch.

Chief commissary stewards	$77.00
Commissary stewards	66.00
Ship's cooks, first class	60.50
Ship's cooks, second class	44.00
Ship's cooks, third class	33.00
Ship's cooks, fourth class	27.50
Bakers, first class	49.50
Bakers, second class	38.50
Landsmen	17.60
Stewards to commander in chief	66.00
Cooks to commanders in chief	55.00
Stewards to commandants	66.00
Cooks to commandants	55.00
Cabin stewards	55.00
Cabin cooks	49.50
Wardroom stewards	55.00
Wardroom cooks	49.50
Steerage stewards	38.00
Steerage cooks	33.00
Warrant officers' stewards	38.50
Warrant officers' cooks	33.00
Mess attendants, first class*	33.00
Mess attendants, second class*	27.50
Mess attendants, third class*	22.00

*If Americans citizens.

All stewards and cooks of the messman branch, who are American citizens, and hold certificates of qualification, receive $5.50 a month in addition to the above rates of pay.

Navy Needs Men.

The United States today is at war. The government officials are looking to the young men of the country to come to the help of that democracy which means liberty. There are rear admirals and captains in the United States navy today who rose to their high rank of command from the position of naval apprentice. Rear Admiral William H. H. Southerland once was a naval apprentice. Capt. John Emil Roller was a naval apprentice. "There is always room at the top" is a saying that is credited originally to the sea service. Uncle Sam needs recruits to help sustain the honor of his flag. The sea and its service have a holding charm for men of red blood.

SIR ARTHUR CURRIE.

New Commander of Canadians in France.

Photo by American Press Association.

The new commander of the Canadians in France has won his way by hard fighting. He succeeds General Sir Julian Byng and is the first Canadian to command the contingent.

PEACE SAID TO LIE ONLY IN RESTORATION

Washington, D. C.—Discussion of probable peace terms now being carried on in Europe largely center, as the most certain probabilities, on the restoration of Alsace-Lorraine to France and the cession of Italy irredent to Italy. Official dispatches received here state that Maximilian Harden, the noted German publicist, in the last number of Zunkunft, declares Alsace-Lorraine must be returned to France and Trent and Trieste given to Italy if Europe is to eliminate forever the most probable causes of future wars.

Harden states also the new Europe must not find any nationality oppressed, and he concludes by asserting that the declaration of President Wilson concerning the rights of nations must be the basis upon which the peace of the world shall be assured, through some form of confederation of the powers, somewhat like either the American or Swiss confederation.

BLAST KILLS FORTY-EIGHT

Munition Plant at Cracow, Galicia, Destroyed.

Zurich.—In the explosion of two storehouses near Cracow, Galicia, forty-eight artillerymen were killed and many injured, according to Vienna newspapers.

The storehouses were part of a munition works and the explosion is attributed to spontaneous combustion.

Great damage was done in Cracow.

THIRTY-FOUR PERSONS DEAD

One Hundred Injured in Italian Railroad Wreck.

Alexandria, Italy.—At least thirty-four persons were killed and 100 injured in the derailing of the Genoa-Milan express at Arquata.

GRAIN AND PROVISION PRICES

Duluth Wheat and Flax.

Wheat—On track and to arrive, No. 1 Northern, $2.90; No. 2 Northern, $2.85. Flax—On track and to arrive, $3.45.

St. Paul Grain.

By order of Town Board
T. Morken, Clerk.

Grand Opening of The Grand Theatre.

The Grand Theatre has been remodled and the Grand opening will take place Saturday and Sunday evening. An excellent program has been secured and it will pay you to attend.

At Rest

(Too late for last week).

C. Christiansen, passed away at his home near Neptune, August 1st after an illness of more than three years duration. Deceased was born in Norway on May 25th, 1862, being at the time of his death 55 years, 2 month 6 days of age. Twelve years ago he took up a homestead near Neptune, and moved there with his family the year later, where he resided the past eleven years.

Card Of Thanks.

We wish to extend our thanks to our friends and neighbors who so kindly assisted us during the illness and last sad rites of our husband and father, also for the beautiful floral tributes.

Mrs. Christianson and children.

Notice.

Bids will be received up to 1 o'clock p. m. on Sept. 1st 1917, for the transportation of the children from and to the schoolhouse, one for over the east and one for over the west route.

Successful bidder is required to furnish a bond of $300.00.

Board reserves the right to reject any and all bids.

Nick Bundhund, Clerk.

School To Start The Middle of September.

The local school, after being closed for the summer vacation will commence about the middle of September Although no definite time for opening has been set it is expected that the work of installing the new furnace and the finishing of the upstairs rooms will be finished by that time.

The following teachers have been hired to guide the pupils thru their studies during the coming school yeer.

Prof. A. O. Halvorson will fill the position of principal again this year. Miss Teresa Giefer of Thief River Falls who had charge of the primary department last year will occupy the same position again this year. Miss Ruth Ryan of Eau Claire, Wis. will teach the grammar grades and Miss Ruth E. Anderson of Stephen, Minn. will have charge of the intimediate grades. This makes a total of four teachers this year where last year there were only three. The ever increasing number of pupils made it necessary to engage another teacher this year.

An Announcement to Readers of The New Eleven Towns

Life means activity, development, progress! The town that is not alive is either standing still or going backward.

Goodridge is "alive." It is going forward and developing rapidly.

The writer sees visions of a greater Goodridge and therefore proposes to give our people a larger and better newspaper. We feel that we would not be keeping abreast of the times if we did not expand.

It gives us great pleasure therefore, to announce, that hereafter the Goodridge-Eleven Towns will come to you as a six-column, eight-page paper. We have just concluded arrangements with one of the world's largest news syndicates, and we shall present the news of the state, the nation, and the world at large so that perusal of the columns of our paper will give the reader a comprehensive idea of what goes on in this busy world of ours.

In addition to this there will be about three columns of pictures illustrating the most recent and important news events. These will be copyrighted photos obtained by the "ever awake" operatives of Underwood & Underwood, International Film Service, Harris & Ewing, and other well known syndicates who are actively engaged in securing interesting and instructive pictures in all the corners of the earth.

Good fiction will be found in our pages. In the course of the year we shall publish from three to four of the highest grade novels by such writers as Frances Lynde, Rex Beach, Cyrus Townsend Brady, Mary Roberts Rinehart, and others of equal merit, any one of which books would cost $1.25 to $1.50. As our first serial we have chosen "Contraband," by Randall Parrish. This is a tale of high romance and pure adventure. It is timed to take place during the early part of the war, and every line teems with action. The first installment will appear in about two weeks.

A special department for the women and children will also, we are certain, be highly appreciated. Mrs. Julia Bottomly will conduct the fashion department. She is, without doubt, the most widely read writer in fashion subjects today, and she writes from the viewpoint of the women of the small cities and towns, not of the freakish modes popular with some in the larger cities. There will also be a recipe department conducted by Miss Nellie Maxwell, a well known authority on domestic science. The name of Mary Graham Bonner is immediately called to mind when stories for the children are mentioned.

Our farmer friends will not be forgotten. The big majority of our readers are "doing their bit" these days in farming or gardening, and they will find interesting items prepared by some of the most distinguished agricultural scientists in the world, many of whom are experts at state universities, and in the U. S. department of agriculture. Every word may be depended upon as authentic.

We have borne in mind that Goodridge is gaining a name throughout the Northwest for its dairy products and so we will incorporate in the new Eleven Towns a department devoted exclusively to the interests of our dairymen. This feature will embody all the latest ideas regarding silos and ensilage, bovine ailments and an endless variety of valuable information.

Another weekly department will deal with Better Highways. This excellent feature is prepared for us by the United States department of agriculture and is the best matter procurable on the subject.

In addition there will be articles for autoists, splendid short stories, humorous pictures and an endless variety of other live material.

The Greater Eleven Towns will be a high grade local newspaper, a weekly review of affairs in general, and all at the standard price of the average weekly newspaper.

It will not be necessary to send your dollars to some distant city for reading matter. Examine carefully our enlarged paper. You will find just what you are looking for.

Yours for a greater Goodridge,
H. W. SMITH,
Publisher.

Markets Committee.

The Pennington County Markets Committee, an organization recently appointed through the authority of the Minnesota Public Safety Commission, met at the Commercial Club Rooms, Monday with R. C. Mathwig, of Warren, district Superintendent of such committees Mr. Mathwig, outlined the scope of authority and duties of the men, composing the organization in this county, all of whom are serving voluntarily and without pay. He prefaced his instructions with the statement that the policy of the General Markets Committee of the Commission, to which body the local committee is directly responsible, was one of broad cooperation and urged that the local appointees approach their work in the same spirit.

Among the various suggestions of matters which the committee should take up, the following are perhaps the most important, car shortage and means for relieving it; fuel shortage, the shipping of live stock, the marketing of potatoes and grain, and the conservation of farm machinery.

He urged that the railroads be assisted in providing rolling stock by the prompt unloading and loading of cars. many cars lie upon sidings for one or more days than they should waiting to be unloaded and shippers are often slow in loading after they have received cars. This practice ties up rolling stock unnecessarily.

The county will undoubtedly produce a large crop of potatoes. Storage for this crop should be provided, either in warehouses or by the farmers themselves in pits or root houses, so that when the crop is ripe it will not all be dumped on a glutted market at one time and the farmer be forced to accept a small price due to a crowded market.

He called attention to the fact that the grain crop should not all be marketed at once or delivered at the elevator in too large quantities for storage. Farmers should provide as much storage room as possible on the farm and the grain be allowed to come to the market gradually.

He called particular attention to the live stock situation. This section of the country has more grass feed than almost any other part of the state. Live stock should be imported rather than shipped out.

He suggested the co-operation of the local banks in this respect and believed that it would be possible to obtain farmers from those parts of North Dakota which is without food to ship cattle into the country east of Thief River Falls for feeding purposes.

He called attention to the fact that the farm machinery factories are slowing down in their output, due to lack of laborers and scarcity of material and predicted a shortage in farm machinery next year. He urged that greater conservation and care be taken of farm machinery, citing the large shipments of junk out of this locality, which junk is composed in a large measure of farm machinery which should be still doing its duty upon the farm. He also urged the purchase of farm machinery at this time by such farmers as might be in need of it in the near future.

He called attention to the advantage of insuring all grain and crops in warehouses and other storage, and laid particular stress upon the necessity for guarding against fires of threshing machines or stacks. All machine owners should employ watchmen at all times, for should fires occur to destroy the machines, it will be impossible to replace them and the harvest of the crop will therefore be effected.

The supply of soft coal in this county is in a measure ample, but there has been no hard coal to speak of as yet received by local dealers or individuals He urged the committee to go into this situation at once with the dealers in an effort to remedy this condition. He also urged that consumers put in their orders at once and be ready to receive the coal as soon as it may reach here, in order that the dealers may know what is required and use their efforts with the local committee to obtain a sufficient supply for the winter.

The personal of the committee, which appears to be a very excellent one, is as follows:

Thief River Falls F. H. Herrick,
St. Hilaire, G. W. Hooper,
Hazel, T. J. Sumpter,
Highlanding, Karl Korstad,
Mavie and Kratka, Rev. Halvor Bjornson
Goodridge, Jay Payne,
Torgerson, J. A. McNally,

Minutes Of Red Cross Meeting.

On Wednesday evening, August 15, the organizing committee for branch chapters of the Red Cross came out here from Thief River Falls and organized a branch, the full committee explaining the workings of the Red Cross to the seventeen men and women present.

The meeting was called to order at 8:30 by Prof. A. O. Halvorson, following which Mr. Geo. Johnson, Mrs. Daniel Shaw, Mrs. H. A. Pratt, Mrs. J. R. C. Charest and secretary Scott Laird gave information on the Red Cross. At the close of these remarks eleven of those present came forward and signed for membership and believed that a temporary organization should be formed without delay. Accordingly the motion of Mrs. Jay Payne to that effect, seconded by H. W. Smith, was duly carried. Then H. B. Rockne moved that a nominating committee of

MIGHTY BLOWS ARE STRUCK ON 90-MILE FRONT BY ITALIANS

CARDONA'S TROOPS WIN INITIAL SUCCESSES FROM AUSTRIANS —FIGHTING IS OF GREAT MAGNITUDE.

BATTLE RAGES FROM ADRIATIC SEA TO ALPS

Assaults Made Simultaneously On Isonzo, Carso and Julian Fronts—French Occupy Ridge Near Verdun—Battle in West Favors Allies.

Berlin, Aug. 21.—The war office announces that the French without fighting have occupied the Talou ridge on the Verdun front, east of the Meuse.

At all other places over a front of 14⅝ miles, the German staff reports, fighting is in full swing.

The German high command says that Talon ridge was given up by the Teutons because this line of defense since last March had only been occupied by outposts.

Forces of the Central Powers on the Rumanian front have driven back the Rumanians on both sides of the Oituz valley and in the direction of the Trotus valley, it was officially announced by the German war office.

Italy Starts Great Drive.

Rome, Aug. 21.—Italy is waging a determined offensive against the Austrian lines from the Adriatic to the Alps. Fighting of great magnitude is in progress. The blow is probably the hardest the Italians have yet struck, and early reports tell of initial successes gained by General Cadorna's troops.

Cross Isonzo; Take Prisoners.

The Italians in their offensive in the Isonzo front have crossed the Isonzo river and already have taken 7,500 prisoners, it was officially announced by the war department.

The offensive followed days of artillery preparation and extensive aerial activity during which Italian observers brought the most valuable information to Italian headquarters.

Battle Line 90 Miles Long.

The total length of the battleline in Carso, Isonzo and Julian fronts is about 90 miles. Italy's April offensive centered for the most part along the Isonzo, from Goritz south to the Gulf of Trieste, where the drive was toward the Austrian seaport of Trieste. Italian troops penetrated to within 14 miles of this queen city of the Adriatic.

French Troops Attack.

Paris, Aug. 21.—A new and terrific battle is reaching a climax around the bloody ground near Verdun. An official statement declared the fighting had "developed in our advantage." The conflict was over a front of 12 miles, extending from Avocourt wood to Bezonreau. For a week guns on both sides of the Verdun sector have been active. The roar approached drumfire and the infantry came into action immediately afterward. Front dispatches told of desperate fighting in these clashes, extending into a great struggle over the whole of the 12 miles. French troops forged ahead at numerous places.

VACATION BY OCTOBER 1 IS PROGRAM OF CONGRESS

Legislative Program Assumes Definite Form With Five Big Measures Yet to Be Disposed of.

Washington, Aug. 21.—The legislative program retained for the extra session of Congress has assumed such definite form that leaders express hope for a vacation about September 15, or not later than October 1.

SALONIKI, GREECE, BURNS

City Half Destroyed—80,000 Are Made Homeless.

London, Aug. 21.—More than half the walled city of Saloniki in Greek Macedonia, which is under occupation by the Entente allied troops, has been destroyed by fire. Eighty thousand persons, made homeless, were removed to neighboring villages, according to a dispatch received in London. The fire is now under control.

Germany Spy Suspect Interned.

Denver, Colo., Aug. 21.—Emil Italanier, a New York newspaper man arrested last week as a German spy suspect, was interned at Fort Douglas. When taken into custody he had a letter from a German newspaper commending him for German propaganda work. Italanier worked for a number of German language newspapers in various parts of the country.

Britian Forbids Railroad Strike.

London, Aug. 21.—An official proclamation has been issued applying the munitions war act of 1915 to the differences between the British railway companies and certain of their locomotive drivers, firemen and engine cleaners. The effect of this action is that the dispute may be carried by either party to the ministry of labor for settlement by conciliation or arbitration. Meanwhile, any stoppage of work is prohibited, and it is illegal to apply any union funds for the purpose of paying strike benefits.

FOOD PRODUCTION MACHINERY SHOW

RECORD DISPLAY AT STATE FAIR ANTICIPATED AS RESULT OF U. S. APPEAL.

ALL SPACE TO BE OCCUPIED

"Machinery Hill" to Be Busy Place—Tractor Demonstrations, Auto Exhibits and Electrical Show to Be Thronged—Labor-Saving Devices to Be Shown.

As a direct result of the appeal of the authorities at Washington for the production of more food in order that America and her allies may win the world war, there has been a material increase of interest in the manufacture of modern machinery, which is essential in the production of food. At the Minnesota state fair, Sept. 3 to 8, the largest display of machinery of all kinds is anticipated by those in charge of the department.

"Machinery Hill," as the knoll in the northeastern part of the fair grounds is known, has always been one of the most busy sections of the grounds during the annual state fair. The exhibits and demonstrations by machinery manufacturers have attracted thousands of persons, but this year's show, it is stated by those in authority, will far surpass those of previous years both in respect to the number of exhibitors and also in regard to the greater diversity of improved types of modern implements.

All Space to Be Occupied.

Every foot of space on the big hill will be occupied by some kind of an exhibit during fair week, according to both Curtis M. Johnson, superintendent of the department, and Raymond A. Lee, his assistant, who have both been laboring hard during the past month preparing for the displays.

Not only is it expected that every inch of available ground will be taken for the open air exhibits, but space in the buildings used for exhibits has been at a premium also. Here will be shown machinery and implements of all descriptions that do not require actual demonstrations.

One of the busiest sections of the machinery hill district and one which is expected to be crowded from morning till night by visitors from the rural districts is that section which is to be devoted to the tractor demonstrations, which this year promise to be bigger and more interesting than ever.

Tractors to Give Demonstrations.

Because of the added interest in tractor work the board of managers of the state fair were obliged to seek more ground for demonstration work. Although land in the vicinity of the fair grounds has been at a premium for many years, a ten-acre plot, practically a part of the fair grounds itself, has been provided and here the big tractors will have plenty of chance for demonstration purposes.

Last year great interest was manifested in this branch of the machinery show and there were a large number of tractors demonstrated. This year, however, the number has been increased and Aug. 1 fully forty entries had been received, indicating one of the biggest and best demonstrations ever held in the Northwest.

Other Mechanical Attractions.

All the machinery exhibits at the fair will not be found on "Machinery Hill," however, for there are two other exhibits which will be fully as interesting. These are the big automobile show, which will again be found in the grandstand building, and a brand new feature, a complete electrical show, which will be housed in a separate building by itself.

Since the first automobile show was held at the fair a number of years ago there has been increased interest annually, until at the present time the state fair automobile show is regarded as one of the most important in the Northwest. That this year's show will surpass that of 1916 seems assured, not only because of the larger number of exhibitors secured, but also because of the added space provided for show rooms.

All Types of Cars Shown.

This year at the automobile show there will be an unusually attractive display of pleasure cars, as well as the latest models of trucks, trailers and other vehicles driven by power.

The new electrical show, too, will doubtless prove attractive to visitors from both city and country. Here will be found the very latest modern appliances of all kinds. Conveniences which tend to lighten the laborious duties of the housewife will be demonstrated as will things which will make life worth living on the farm. Those in charge of the arrangements declare that it will be the most comprehensive electrical show this section of the country has seen.

ENTRY LISTS LARGE

Indications Point to Live Stock Show That Will Equal Past Years.

Entries for the horse and cattle shows at the Minnesota state fair, Sept. 3 to 8, closed Thursday, Aug. 9, with record-breaking lists of exhibitors.

Close to 900 horses and 1,100 head of cattle, aggregating in value close to three-quarters of a million dollars, many of them blue bloods in the horse and cattle world, have been entered and will be on exhibition at the fair.

NORTHWEST TO GET COAL PROMPTLY IS LOVETT'S ORDER

RAIL AND STEAMSHIP LINES TO GIVE FUEL SHIPMENTS TO NORTHWEST PRIORITY OVER ALL OTHERS.

PRESIDENT TO SELECT COAL DICTATOR SOON

Administrator to Have Authority to Control Coal Production and Distribution, Including Price Fixing Powers Given to Executive in Food Control Act.

Washington, Aug. 22.—Government control of the coal industry moved a step nearer when President Wilson formally named Robert S. Lovett of the War Industries board, director of priority of transportation, and approved an order issued by Judge Lovett directing that rail and steamship lines give bituminous coal shipments to the Northwest preference over all other shipments.

In the next day or two the President is expected to appoint a coal administrator on whom he will confer authority to control coal production and distribution, including price fixing powers, given to the executive in the food control act. At an hour's conference with the Federal Trade commission he went over details of his plans.

One Man Control Best.

Officials familiar with the President's trend of thought said he appeared firmly convinced that a one-man control would work out better than to place supervision of the industry under one of the existing government agencies.

The man named would have at his disposal the service of the trade commission, which is in a position to suggest fair prices, the Interstate Commerce commission, which will administer the new car service law; the director of priority, who will place shipments of fuel where most needed and the export counsel, which will control exports.

Government May Take Over Output.

Of the several war coal control plans suggested, officials believe the President most likely will adopt the one calling for government requisitioning of the entire output of the mines and government sale of coal to the public. This program has the approval of the trade commission and of many other officials conversant with the coal situation.

An alternative would provide government price fixing by the mines and by jobbers and wholesalers, the coal industry and to take over the business of firms failing to abide by regulations.

The food bill gives the President power to adopt either of these plans and authority to carry it out through any agency he may selcct.

SEEKS TO BAR MEETING OF PEOPLE'S PEACE COUNCIL

Labor's Loyal Legion to Try to Stop National Anti-War Conference Slated for Minneapolis.

Minneapolis, Aug. 22.—The Peoples' Council will not hold its much heralded anti-war conference in Minneapolis the week of September 2, nor its mass meeting set for that day in St. Paul, if recommendations of Labor's Loyal Legion are followed.

Legion members voted unanimously to call upon Governor Burnquist to prevent the Peoples' Council from meeting in Minneapolis or anywhere in Minnesota and to act likewise with other unpatriotic gatherings. The grounds for such action as cited in a message from Schuyler Farnham, the Legion's secretary, will be the state laws forbidding holding of seditious meetings.

Punishment of seditious speakers by depriving them of franchise also was endorsed unanimously.

PLAN AIR RAID FROM MEXICO

Germans Active in Republic, Is Report.

San Antonio, Texas, Aug. 21.—That the Germans are preparing for some destructive move with airplanes against the United States, with Mexico as their base of operations, is the report which A. L. Hartmann brings from that country. He says representatives of the German imperial government unquestionably are organizing an air fleet in Mexico and that he saw parts of at least six machines being assembled at Vera Cruz and knows of a rendezvous about 40 miles from Tampico where he believes airp'anes are being assembled.

Minnesota Leads in Iron Output.

Washington, Aug. 21.—All records for iron ore production in the United States were broken in 1916 when the output reached a total of 75,167,672 gross tons, valued at approximately $180,000,000, according to figures issued by the geological survey. This was an increase in quantity of 19,600,000 gross tons and of 40 per cent in value over 1915. Minnesota, Michigan and Alabama were the greatest producers. Production of pig iron, including ferro-alloys, was 39,434,797 gross tons, an increase of 29,916,213 tons.

The State In Brief

Crosby has a 1,000 candle-power light on the water tank which can be seen for miles.

The school board at Climax has purchased three transportation busses and will operate them when the new district is formed.

A. H. Larson, for the last two years in charge of the Little Falls high school, has resigned to accept a position with the farm school of the University of Minnesota.

While fishing in Big Carnelian lake, Louis Wolf of Stillwater made record catches when he landed three pickerel, otherwise known as Northern pike, which weighed over sixteen pounds apiece.

A patriotic demonstration and carnival was held at Morgan, the proceeds of which were divided between the local Red Cross' and Company L, stationed at Redwood Falls. A military parade was the feature.

Captain Fred C. Ormond, captain of D company, Second Minnesota infantry, is in a critical condition at Rochester with pneumonia. He was taken ill a few days ago and was forced temporarily to relinquish his command.

The Hastings draft board has nearly completed its task of examination of registrants. Six hundred and fifty have been examined to date and few exemptions reported. The board will resume examinations to fill Dakota county's quota of 286 men.

Fifty ring-necked pheasants were taken to Duluth recently from the game farm on Bib Island, in Lake Minnetonka, and will be freed in the Northern Minnesota woods in the hope that they will propagate and furnish some good shooting for the local hunters in a few years.

Captain Clark Keysor, 91 years old, is dead at his home in Mankato, leaving two sons and two daughters. He was an officer in the Tenth Minnesota infantry during the Civil War, and after that was a member of the Mankato Board of Education for several years. He was a Mason.

Mr. and Mrs. Mike Stimich, Mrs. Belle Guilletti and Mrs. Simon Perovich, arrested in the blind pig raid in the west end of Crosby, pleaded not guilty and are out on bail. Mrs. Frances Lacher, another caught in the raid, is still in jail. Fifteen quarts of whisky and several empty barrels were found.

To save more than 10,000,000 fish for the dual purpose of aiding the government in its food economy campaign and of enhancing professional and amateur fishing on the Mississippi river, the United States fisheries at Homer have opened probably the most elaborate fish rescue work ever undertaken in northern waters.

Red Wing council, Knights of Columbus, has made a donation of $50 to the Red Wing chapter of the American Red Cross. The local council at its July meeting voted an appropriation of approximately $500 toward the maintenance of recreation centers in the sixteen army camps for the benefit of Catholic soldiers in the service.

Out of 466 drafted men called for physical examination in Crow Wing county, 166 have been accepted. There were many aliens from the ranges, others with dependents and others physically disabled, so that the complete quota called, 233, could not be secured by Crow Wing county and accordingly another call for 200 men to appear for physical examination has been sent out.

Allen S. Broms of St. Paul, is in the Meeker county jail at Litchfield, following his arrest for alleged seditious utterances. He was arrested while speaking at an anti-draft meeting at Lake Manuella, nine miles southeast of Litchfield. The meeting was attended by more than 4,000 persons. Broms was arrested after he had attacked the government for passing the draft law.

The sophomore and junior classes have presented the Pine City high school with a new 6 by 10-foot flag.

H. L. Buck, postmaster of Winona for four years, has been re-appointed by President Wilson. The appointment has been confirmed by the Senate.

John Clausen of Germantown says he counted eighty straws from one kernel of rye in his rye field. The yield in that section, he stated, is going to run quite heavy

Immediate internment of anti-draft and anti-war agitators as traitors was demanded by the loyal citizens of Cottonwood and Jackson counties, in resolutions adopted at a mass meeting at Windom and transmitted today to federal and state authorities.

L. C. Brown was declared elected to the school board in the decision of Judge Rosser in district court filed in the office of the clerk of court at St. Cloud. Twelve ballots, considered doubtful by the election judges, were given to Brown. He had contested the election of W. W. Smith, president of the board. The vote on the court decision stood; Brown, 338; Smith, 222.

Annie Tettkowske, 20 years old, a domestic, is being held at St. Cloud on a charge of slaying her baby girl at the home where she was employed yesterday. The girl had tied a bandage tightly around the baby's throat. The child's head also was cut.

Morgan Keaton was exceedingly busy winning his commission at the reserve officers' training camp at Fort Snelling—he's Lieutenant Keaton now—but he found time to slip away to Red Wing with his fiancee, Miss Jessie Helen Brown, July 14, where they were married, unknown to their friends and relatives

THREE ROADS SHOW LOWER EARNINGS

DECREASE FOR FIRST HALF YEAR —OTHER ROADS ENJOY INCREASE IN REVENUES.

SHERIFFS PLEDGE LOYALTY

Renew Allegiance at Conference Held With State Public Safety Commission at State Capitol.

St. Paul.

Three railroads operating in Minnesota report marked decreases in gross earnings for the first half of 1917, compared with the corresponding 1916 period, and two smaller roads show increases in returns filed late yesterday in the offices of the State Tax Commission, pursuant to the 5 per cent gross earnings tax law.

The Chicago, Milwaukee & St. Paul railway reports $6,879,198 for 1917, against $7,230,230 for 1916; the Duluth, Missabe & Northern railway, $4,111,419, against $4,636,623, and the Minneapolis & St. Paul Suburban railroad $178,512, against $180,477.

Increases were reported by the Chicago, Rock Island & Pacific railway to $1,017,048 from $879,384, and by the Minneapolis, Anoka & Cuyuna Range railway to $40,631 from $30,099.

The state tax is computed at $611,341 on the above Minnesota earnings.

The Railway Transfer company of Minneapolis made a return of $163,748 against $119,851 and the Minnesota Transfer Railway company of $12,853 against $6,967 for the respective first half periods of 1917 and 1916.

Decreases were shown by the report of the Soo line to $4,482,764 from $5,065,725 and that of the Minneapolis & St. Louis road to $1,706,485 from $1,844,789.

Increases were shown by three other reports, as follows: The Burlington road, $375,209 against $335,198; the Duluth, South Shore & Atlantic, $2,853 against $2,389, and the Dubuque & Sioux City, $61,639 against $59,296.

Sheriffs Renew Allegiance.

Minnesota sheriffs are today under a voluntary pledge to Uncle Sam to perform any duties that may be assigned to them by the federal authorities, without compensation. A resolution by Sheriff Peter Bonde of Kandiyohi county was adopted at the meeting of sheriffs from all over the state. The sheriffs conferred with the Minnesota Public Safety commission at the state capitol:

The resolution follows:

Whereas, the sheriffs of the state of Minnesota have been appointed to assist the government of the United States in the registration, exemption and selection of our conscriptive army pursuant to act of congress;

Now, therefore, be it resolved, that we, the sheriffs of Minnesota assembled at the state capitol of Minnesota this 15th day of August, A. D. 1917, do hereby renew our pledge of allegiance to our beloved country and cheerfully consent to perform the duties so required of us during such time as may please the president and those acting under his authority, and be it further resolved that we cheerfully tender such services without compensation or emoluments.

Another resolution, offered by Sheriff N. Nicholson of Mower county, pledges the sheriffs to do not only their official duties, but any other service that the United States may ask of them.

The sheriffs had an "experience meeting," and were advised by Attorney General Lyndon A. Smith how to handle problems of vagrancy, liquor law enforcement and sedition.

The sheriffs were advised that when a man is found with a supply of seditious literature he should be arrested on the presumption that he has it for distribution and is not "carrying it around for ballast."

Phone Valuation Crews Start.

In three new automobiles of popular make, field crews in the telephone valuation work undertaken by the State Railroad and Warehouse Commission, left the Capitol for Winona, where a practical school of instruction will be conducted. The physical valuation of all telephone properties in the state will be taken to serve as a basis for telephone rates and regulations.

D. F. Jurgenson, chief engineer for the commission, and two assistant engineers, F. F. Post and W. T. Donaldson, were in charge of the three crews. The crews are made up of a chief, one assistant and a chauffeur.

The pole counting and wire measuring crews will be increased to ten as the necessary help can be secured, Engineer Jurgenson announced.

★ ★ ★

Home guard commanders throughout of the state have been notified that home guard uniforms will consist of khaki or olive drab coats, pants and shirts, canvas leggings and campaigns, but that no insignia will be worn on the coat collar and no cords on the hat. Distribution of 2,523 rifles among the home guard companies has been begun. Major Oscar Seebach said that additional companies cannot be organized because of lack of rifles, the present number being sufficient to equip only three-fourths of the members of each company so far organized.

IN BED FOR WEEKS

Mr. Smith Was in a Bad Way, But Doan's Restored Him to the Best of Health.

In April, 1916, Louis Smith, 90 New St., Hackensack, N. J., said: "Words fail to describe the misery I endured from kidney complaint. In my work I have to do a lot of heavy lifting and this weakened my kidneys. At first I only suffered from a slight backache, but almost before I knew it, I was all bent over like a man a hundred years old.

Mr. Smith.

"I began to grow worse as the days passed and finally I had to take to my bed where I remained for weeks. My head pained terribly and my back just throbbed. I was always dizzy and it seemed as if everything was whirling. Little black specks came before my eyes and I also suffered from painful and scanty passages of the kidney secretions. Everything seemed dark and dreary. "Doan's Kidney Pills completely cured me and I am enjoying the best of health now."

"Sworn to before me."
E. M. Johnson, Justice Peace.

On March 19, 1917, Mr. Smith added: "I will never forget what Doan's have done for me. Whenever I catch cold on my kidneys, I can depend on Doan's to fix me up all right."

A toilet preparation of merit. Helps to eradicate dandruff. For Restoring Color and Beauty to Gray or Faded Hair. 50c. and $1.00 at Druggists.

RECOGNIZE WOMAN AS EQUAL

Heads of Industrial Plants Say She Can Do Any Work Consistent With Strength Better Than Men.

Once man pretended to place woman on a pedestal and worship her. Now, according to Donald Wilhelm, who reports "The Confessions of a Munition-Maker" in the Century, he is forced to recognize her as an equal, and respect her. The quotation below states the opinion of a hardheaded factory foreman, on the importance of women in the world of labor:

"Welch, one can see, isn't emotional. One can trust his judgment of women.

"That is why I was glad he was present in the officers' room of the company eating quarters when the report was made in detail of the strike scheduled to take place the following Monday morning. He made a speech, saying:

"'Gentlemen, we've all known women practically all our lives—ever since we were born, practically. Most of us get to thinking that a woman can't do mechanical work because they're always willing to let a man use the hammer, that being something he thinks he can do. But a woman can do it. A woman can do anything that a man can do, and most things better, but men can't do anything near what women can do. Now, maybe you can imagine what women can do in mechanics, and I know what they can do. Leaving out big girls, I say women can do any kind of mechanical work that's consistent with their strength better than men.'

"Another superintendent, a new man, said he had thrown out a hundred men in his plant 'back in Ohio' and put girls in their places, and he had found them better all around."

His Costly Mistake.

"What ruined your business?"
"Advertising."
"How?"
"I let it all be done by my competitors."

What He Heard.

Visitor—Well, you don't know who I am.

Kid—Oh, yes, I do. You're the man ma says would be a good catch for our Lillian.

SHY ON CONFIDENCE

Fear of Unexpected Things Cause of Trouble to Women Driving Cars.

MOTORIST GIVES HER IDEAS

As Soon as Anyone Discovers How Near Impossible It Is for Things to Happen She Will Have Learned Her Lesson.

As has been said about worry—timely, that most of one's troubles ver happen—so the fear that a woman has in driving a car is not so much at as it is the fear of being afraid. least that is the opinion of a well-own woman motorist.

"From my own experience and the experience of other women to whom I have talked about the subject, I believe the most difficult thing a woman has to overcome in learning to drive a car is not to be afraid of being afraid," says this expert woman driver. "Probably this sounds a little complicated, and an easier way to say it would be that women as a whole, I believe, lack confidence in themselves to handle the unexpected, should the unexpected occur.

Much Advice Offered.

"A lot has been said about driving. Much advice has been offered as to what to do and what not to do. I believe that good driving is simply a state of mind, and that as soon as anyone discovers how easy it is to handle a car and how near an impossibility it is for an emergency to arise that cannot be met with little effort, when the simple mechanism of the modern car is mastered, she has learned about all there is to know in order to drive a car.

"Of course, one might know what to do under practically all conditions, and still not do it. Here is where lots of women fail as good drivers; their fear of doing the wrong thing is so great that they do nothing at all.

Best Nerve Tonic.

"I have yet to see any woman who has not been materially benefited by driving. The fresh air, the co-ordination of eye, mind and muscle, the exhilaration of feeling that you are master of the powerful and yet tractable motor and that it will answer your every whim cannot help but have a beneficial effect on the nerves. In fact, I firmly believe that driving is the best nerve tonic in the world.

"I have driven my car over thousands of miles of all kinds of roads—boulevards, deserts and mountains. The fact that I have never had an accident of any kind adds a lot to the sum total of my pleasures, of course, but I know that even had I experienced a lot of trouble I would not sacrifice for a great deal the actual gain in health and the joy of driving that I have experienced in my car."

WHY SOME REPAIRMEN FAIL

Attempt Being Made to Use Materials From Two or More Concerns in the Same Repair.

A few repairmen are attempting to use materials from two or more concerns in the same repair. For example, sometimes a fabric from one firm curing at 40 pounds steam pressure for 40 minutes, with gum from another firm curing at 55 pounds for 40 minutes. This combination inevitably results in improper curing of one or the other, or both of these materials. It is best to use one make of repair materials for satisfactory results.

CRACKS IN PORCELAIN PLUGS

Usual Cause of Trouble Is From Screwing Them Too Hard Into Cylinders—Other Causes.

Spark plug porcelains crack from a variety of causes. A chance blow from a wrench while tightening, pulling too hard on the ignition wire, dropping the plug or a defect in manufacture are frequent causes. But the usual trouble is from screwing them too hard into the cylinders. As the plug heats up and expands it cracks the porcelain.

ATTEND TO COOLING SYSTEM

Well to Drain Radiator and Flush Whole System With Water Where Solution Has Been Used.

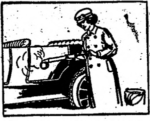
When a non-freezing solution has been used in the cooling system during the winter, it is well to drain the radiator and flush the whole system with fresh water before hot weather arrives. If this is done it will prevent any sediment from such mixture gumming or interfering with the free flow in the water passage and the fine tubes of the radiator, writes S. C. Clark in Farm and Home. In the warm weather the liquid should be as fluid as possible and free from foreign substances, as the water circulation in the cooling system should then be at its best.

These "non-freezing" solutions are really not "non-freezing" at all, but are termed thus because they lower the freezing point of the water below any temperature liable to be encountered where the motor car is used. Solutions with low-freezing points also have low-boiling points, and it is not uncommon for them to steam at 30 degrees below the boiling point of water. Immediately when the weather becomes mild these solutions should be eliminated entirely.

KEEPING CAR POLISH BRIGHT

One Should Be Careful Never to Rub Sponge, Chamois or Rag Over the Surface of Body.

After a car has been properly washed and dried it should be well polished. Be careful never to rub a sponge, chamois or rag over the body when covered with mud or dust. A little grit will make ugly scratches.



Applying Polish With Sprayer.

There are many polishes made for this purpose and a can will last for one or more years.

The polish can be best applied with a sprayer. One of the small tin sprayers such as you use for spraying fly oil on the cows will save much time. After spraying the polish, the car should be rubbed with a soft cloth until the desired brilliancy is obtained. Don't be stingy with your cloths. Change them often as they become soiled.—Farm and Home.

LENGTHENING LIFE OF TOPS

Little Attention Now and Then Will Do Much to Keep It in Condition—Material Is Pinched.

The service and beauty of a motor top may be indefinitely lengthened with only slight attention upon the part of the owner or driver.

When folded for spring or summer use the top is most abused. Often the material is pinched by the bows or top fasteners and the fabric is stretched out of shape. Care in lowering the top can prevent this. An occasional brushing inside and out will keep the top in good condition.

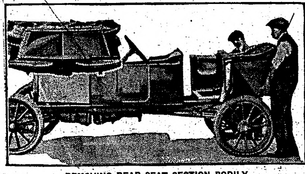
Soap and water should be used to wash it to remove the accumulation of dust and grease spots. Gasoline must never be used for cleaning the rubberized cloth, as it dissolves the waterproofing preparation.

TOOLS COMBINED IN WRENCH

Eight Standard Wrenches, Screwdriver and Bottle Opener Held Together by Wing Nut.

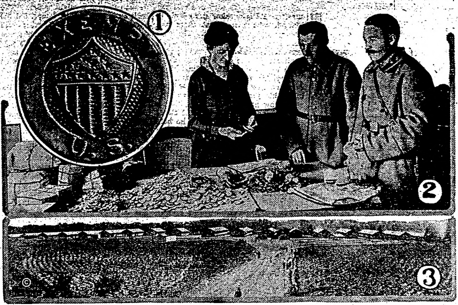
Eleven tools are combined in one in a new wrench. There are eight standard wrenches, an alligator wrench, a screwdriver and a bottle opener, in four separate members, held together by a wing nut and screw. The tool to be used is slid forward and the nut is tightened. The remaining tools form a handle.

AUTO BODY PACKED FLAT IN SECTIONS



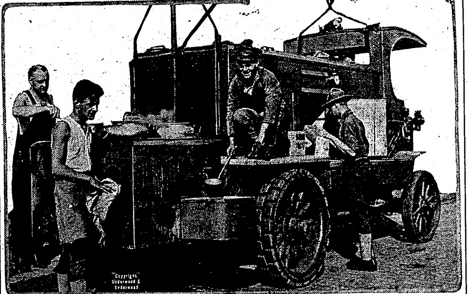
REMOVING REAR SEAT SECTION BODILY.

A motorcar body made in sections, so that it will pack flat and occupy little space in shipment, is an idea recently introduced from South Africa, where it originated. The parts are made with upholstery attached, and a few bolts hold the sections firmly together without rattling, while the appearance is that of a standard body. A four-passenger body of this kind reached the United States in a packing case of only 66 cubic feet capacity, and it is claimed that this form of construction will enable 12 packed bodies to be shipped in a box car that would contain only six of the ordinary bodies.—Popular Mechanics Magazine.



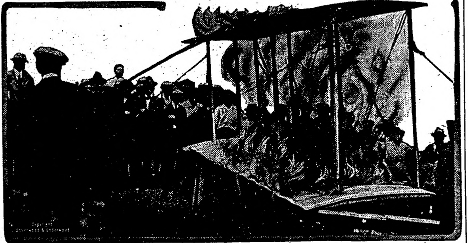
1—Badge to be given every man who responds to the draft and is exempted. 2—Gold and silver decorations, relics of the old regime, given by Russian soldiers to help the new republic. 3—View of Camp Wadsworth at Spartanburg, S. C., where the New York National Guard is to train.

MOTOR "CHOW WAGON" FOR THE ENGINEERS



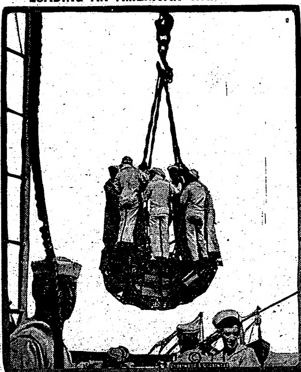
This motor kitchen is the latest improvement for the feeding of the Twenty-second engineers. It was presented to the regiment by Louis Sherry of New York.

NEW FIREPROOF "DOPE" FOR OUR AIRPLANES



Demonstration of a new fireproofing compound for airplanes that renders their fabric waterproof as well.

LOADING AN AMERICAN WAR VESSEL



When the supplies have been piled into the basket and are about to be swung to the warship, the tars jump aboard and take the trip.

Big Words.

Little Girl—The doctor said mamma must take a constitutional every morning. What does that mean?

Little Boy—That means walking.

Little Girl—Then why didn't he say so?

Little Boy—I don't know, but I guess may be if he called it that he couldn't charge for it.

Lemon Juice For Freckles

Girls! Make beauty lotion at home for a few cents. Try it!

Squeeze the juice of two lemons into a bottle containing three ounces of orchard white, shake well, and you have a quarter pint of the best freckle and tan lotion, and complexion beautifier, at very, very small cost.

Your grocer has the lemons and any drug store or toilet counter will supply three ounces of orchard white for a few cents. Massage this sweetly fragrant lotion into the face, neck, arms and hands each day and see how freckles and blemishes disappear and how clear, soft and white the skin becomes. Yes! It is harmless. Adv.

A Get-Rich-Quick Scheme.

Two young Irishmen in a Canadian regiment were going into the trenches for the first time, and their captain promised them five shillings each for every German they killed.

Pat lay down to rest, while Mick performed the duty of watching. Pat had not lain long when he was awakened by Mick shouting:

"They're comin'! They're comin'!"

"Who's comin'?" shouts Pat.

"The Germans," replies Mick.

"How many are there?"

"About fifty thousand."

"Begorra," shouts Pat, jumping up and grabbing his rifle, "our fortune's made!"—London Opinion.

A Sad Memory.

Availing herself of her ecclesiastical privileges, the clergyman's wife asked questions which, coming from anybody else, would have been thought impertinent.

"I presume you carry a memento of some kind in that locket you wear?" she said.

"Yes, ma'am," said the parishioner; "it is a lock of my husband's hair."

"But your husband is still alive," the lady exclaimed.

"Yes, ma'am, but his hair is gone."

Now She's Angry.

He—I wonder what the meaning of that picture is? The youth and the maiden are in a tender attitude.

She—Oh, don't you see? He has just asked her to marry him, and she is accepting him. How sweet! What does the artist call the picture?

He (looking about)—Oh, I see. It's written on a card at the bottom—"Sold."

A Call to Your Grocer will bring a package of Grape-Nuts

A delicious, healthful food and a pleasing lesson in economy.

Now She's Angry.

He—I wonder what the meaning of that picture is? The youth and the maiden are in a tender attitude.

She—Oh, don't you see? He has just asked her to marry him, and she is accepting him. How sweet! What does the artist call the picture?

He (looking about)—Oh, I see. It's written on a card at the bottom—"Sold."

A delicious, healthful food and a pleasing lesson in economy.

"There's a Reason"

INTENTIONAL DUPLICATE EXPOSURE

The Protector of Finance

Tales of Resilius Marvel, Guardian of Bank Treasure

By WELDON J. COBB

THE INVALID LOAN

Copyright, W. G. Chapman

I AWAITED the opening of a door in Resilius Marvel's private office with a good deal of interest. Upon that action hinged something important, and I knew it. Here was a place where small things counted—a strange room, a strange man its master; only the unusual happened here. Besides that, beyond the door of this, the headquarters office of the United Bankers' Protective association, there were strange sounds. They were impelling and then deterrent; a shrill cackle, more eerie than human, as of some hunted animal in mortal terror—a voice calling distressfully into the bleak stormy night, like that of a victim from the outer world being resistingly dragged over the threshold of a new and uncertain one.

To the inner circle of financial men given to good comradeship in exclusive club circles, the mention of the name of Resilius Marvel would bring a tender glow to heart and brain. It would suggest a quaint tale told so evenly and entrancingly that the memory of the tranquil, musical tones would be like the echo of golden beads dropped into a crystal dish. In one mood steeped in the ichors of Thalia, of Calliope, of Euterpe, of Erato, in the next following some sloping fancy down a fairy trail of thought sweet and refreshing as a field of daisies, one of the Marvel reminiscent hours would mean a transformation of lazy rising rings of rich Havana smoke into filmy lace pictures formed of cobwebs and starshine. His sayings were chaste as a Tiffany gem, his mind a palace, making men forget for the nonce that he held the destinies of the great banks as an egg shell in the palm of a giant, lulling them with this necromancy of tone and professional expertness into the security of a Vision house.

I had not spoken since I entered the rooms, for I saw that Resilius Marvel was in one of his dark moods. So well did I know him that I at once discerned that he was struggling with some great case where the dead blank wall of "No Clue" faced him grimly. He stood at the window looking out at the rain-blurred lights of a glowing thoroughfare, just now remindful of some woeful Bagdad. Out of that world of shadows a lone bird beat its wings against the window. Into its secret recesses Marvel seemed boring his way through obscure labyrinths, seeking that which he must find. Fitly framing the picture was a wall covered with duplicates of famous forged checks, portraits of the great counterfeiters, cabinet sections containing odd trophies of his career. Here was a stamped brick from Assyria four thousand years old—"the Book of the Dead"—one line of the hieroglyphics of which had solved an international mystery. Next was a rude seal from the Beloki Congo, wrested from the possession of a native chief who had flooded the country with "phoney" government scrip until Resilius Marvel had found him. Next was an ivory fan from Turkestan with a sanguinary streak that was the blood of a princess, a fragment from a dynamited American steel pillar of Hindia that could have told a racy tale of a smooth contractor. And a bulging scrap book, clasped and locked like a bank code ledger, containing his private personal notes on the new generation of bank criminals, modern in education as in an appreciation of the value at the graver's tool, "the drag," the raised check manipulator, the automobile as assets to crime against obsolete police methods.

Always there was an air of complete stillness in this inner room. At the disturbing sound without Resilius Marvel turned—distracted, and therefore annoyed. His eye fell upon Loti, his servitor, who, velvet-shod, noiselessly opened the door and closed it after him. The man had a face like one of those you see on old Roman medals, an acquaintance with the moods and ways of his master that enabled him to question intelligently and to respond through a look, a hand movement, a mere expression of the lips. Loti was of three generations who had given their entire lives to the production of four famous statues—one at the cemetery of Genoa, three at the beautiful Pere le Chaise at Paris. He was a theorist as to the sense of smell, holding that he could analyze a man by scenting his favorite dish. At him now in sharp silent challenge Marvel looked.

I know not what telepathic system bridged the chasm of inquiry and response, but at once Marvel straightened up magically as if touched by a sharp mental prod. Then he glanced at me, and I further knew that he had made some new and important discovery in the Paget case.

When I had first entered this room I felt sure that Marvel was preoccupied, and that, too, over the case I have mentioned. In fact I had come there on that business, being a bank man and myself interested in its outcome. To Marvel the banks were something more than clients—they were as children who went toppling down the line like tilted cards, once started in panic. It was for this reason, when the Clearing House after two recent bank failures feared a general run on deposits, that Marvel had exerted all his abilities to smother a scandal in the case of the Guardian Trust & Savings bank, of which young Tyler Paget was president.

That official was the son of one of the oldest financiers in the city. Fatherly influence had given the junior a fine start, in fact business had been so active that double the original capital was soon invested. It was trusting a great deal of responsibility to a very young and inexperienced man, but Paget, Jr., was of excellent personal character and habits, and energetic and ambitious. However, the minute a new bank is started there is an immediate invasion on the part of crooks, schemers, "pikers" and delinquents who have been flagged at the older institutions. Young Paget pretty shrewdly evaded most of the pitfalls, but one day "King" Gundorf walked into the bank.

It was not as Gundorf that he did this, but as Bogart Rutledge. He announced that he was about to buy out the old and established Acme Metals company, a concern so well known to Paget that he was at once interested. Gundorf stated that he was paying $400,000 for the business, half cash, now held in escrow, as a receipt showed. He wished the bank to loan him $200,000, for which he, as the new president of the Acme, would put up the entire $500,000 stocks of that company. The bank had no right to make a loan in one volume so largely in excess of proportional capital restrictions, but Gundorf claimed it would be for only ten days and offered a handsome bonus, and the deal was made.

In five days the explosion came. To his dismay Paget learned that the pretended Rutledge, in giving the collateral note for $200,000, had no authority to sign, at that time, as president of the Acme. This fact relieved the corporation of all liability and the bank held a worthless piece of paper and a non-valid stock transfer receipt. The next discovery was that Gundorf had disappeared with the $200,000 received from the bank, and that the $200,000 in escrow comprised counterfeit notes. When the escrow funds were examined this was made manifest, and at this point Resilius Marvel was called in.

He recognized the culprit from his earmarks at once. Gundorf had been sentenced to a long term of imprisonment in Brazil a year back. He was supposed to be out of the way, for a spell at least. But about six months since there had appeared on the market a fifty-dollar counterfeit note, which, to Marvel's experienced eyes, was the product of Gundorf's skill. Before any of them had been recognized as dangerous by the banks, Marvel had detected the flaws in the issue. There were two material variations from the good notes. As soon as he sent out this possibility of world-wide identification, all fifty-dollar notes were of course scanned closely.

To run down the counterfeits was Marvel's first purpose; to help out the Guardian Trust and Savings an added motive. The Acme people had lost nothing, as they simply invalidated the stock contract. Paget, however, was out $200,000. His father was now trying to raise this amount so the bank could continue, or, if necessary, go out of business honorably. The banks within the Clearing House were trying to smother publicity, for fear of a general run. Paget had been given thirty days by the bank examiners to clear the situation. He had technically violated the banking laws, and but for the pending strained financial situation his bank would have been closed and himself prosecuted.

The Guardian Trust and Savings cleared through our bank, Paget was a personal friend, I held fifty shares of the stock—that is how I was interested. For two weeks Marvel had been on the track of Gundorf. He had his own ideas as to how far catching him would relieve conditions.

"You are interested," he said, as I arose to leave the room, fearing I might be in the way. "Stay where you are. I have had a man watching the house where Gundorf lived until he put over this last deal of his."

"But vacant, I understand you to say?"

"Vacant, true, but the rent paid up for six months, and telephone, gas and electricity ordered kept ready for use and paid for ahead. I fancy my man has learned something at last, and I also imagine he is bringing somebody with him."

As the door opened on noiseless hinges Loti ushered into the room two men. The one who held the other a prisoner was a powerful, unkempt fellow, who resembled a tramp who might have been sleeping in a dog kennel over night. I later found out that this was literally true—but for a week, instead of a day.

His companion, cringing, terror-faced, wildly distraught, was a lithe, wiry man, brown as a berry, with small, beady eyes. His garb was half foreign, his actions those of a menial. He was in a frantic excess of terror, and trembled as Marvel fixed those grave, boring eyes upon him.

"I made the catch on suspicion," spoke his captor. "He was ringing at the door bell of the place we know, when I showed up. He's an innocent, and doesn't understand a word of English. Held out this card and this picture," and the speaker gave both to Marvel, who glanced at them and then passed them to me. The card bore the address of the house under surveillance. The photograph was a duplicate of one he had shown me more than once—"King" Gundorf.

Marvel nodded to his assistant, who departed like a man thoroughly trained in his profession. The foreigner stood now nervously pressing his unsteady hands together, the cold sweat gathering on his face. Once he held out his hand piteously for the return of the articles taken from him. Marvel never removed his eyes from him. I saw that he was studying him critically. He spoke a word to Loti I did not hear. As for himself, he went over to a bookcase. Loti went through the clothing of the man with remarkable rapidity. All he came across, as I saw, was a purse containing a small sum of money. Marvel hastily consulted half a dozen books, and turned and consulted the man.

"Comprenez vous moi?" he asked. But he need not have spoken for all the words conveyed to his strange guest.

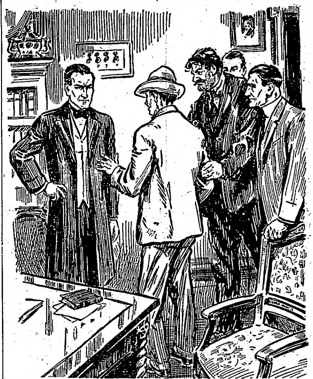
"Wer bist du?"

The foreigner looked puzzled. Then he jabbered out a hideous jargon in some obscure tongue.

"Quien es usted?"

No, the man spoke neither French, German nor Spanish. In some oriental patois Marvel made a new try, followed by one in a South African dialect.

It was of no avail. Whoever the man, whatever his purpose in visiting the Gundorf house, he could not be intelligently approached on the subject. I saw Marvel grappling with this new, baffling problem in a mighty mental throe. Then he gave Loti an unspoken instruction and the latter left the room. Marvel backed to his desk. I saw him place his hands behind him, seize a broad topped bottle, remove the stopper, insert one finger in it and come again to the stranger. As if carelessly he touched him on the back with that finger, drew him about, opened the door and waved him from the room.



HE WAS IN A FRANTIC EXCESS OF TERROR AND TREMBLING AS MARVEL FIXED THOSE GRAVE, BORING EYES UPON HIM

The man sped away at the injunction as though his feet were winged. Marvel pointed to my hat and overcoat. He briskly arrayed himself for the street. When we reached it no one was in sight. As we turned the corner I saw Loti on one side of the thoroughfare. On the other, racing along as though relieved from a vivid spell of restraint, was a man in the center of whose back glowed a dull splotch of phosphorus, an infallible guide at a distance, and explaining the manipulation of the bottle from the desk.

Twice we lost sight of Loti, whose duty it was to keep sight of the foreigner. On these occasions my companion was not at all perturbed. But his roving eyes were all the more watchful. I followed their direction more than once to observe some white marks on pavement or building, made, I knew afterwards, by a chalk crayon inserted in the end of the cane which Loti carried.

I do not think Loti spoke a half dozen words to his master as we finally came up with him, but these, the expression of his face, and some quick signs, seemed to convey to Marvel a world of intelligence. Loti stepped back, Marvel moved me aside with a pressure of his palm and pushed open the street door of one of those small upper story hotels with which the city abounds.

The inference was that Loti had traced his man to this place. I soon knew this for a certainty. I was not at all sure that some sound signal, remote and vague, was not conveyed to my companion—that, or something telepathic or mystic. At all events, from an attitude of prim, soldier-like patience, Loti suddenly started like a manikin unhinged. With a movement extremely courteous and apologetic, as if deprecating that he must be in advance, he proceeded up the stairs, and I followed him.

Not for an instant did he falter or deviate from a straight course. The hallway was lighted by lamps, but his eyes were cast down. Then, at the second landing I noticed a tiny green thread of raw silk close to the protecting baseboards alongside the stair treads, and guessed who had unreeled it. At the end of the third Loti, with unerring precision, arrived at a door, the transom of which showed light beyond. Almost but not quite noiselessly, his long, shapely fingers groped across a panel. Again he must have caught some sound signal in response, entirely unnoticed by myself. He turned the knob of the door and we entered the room.

Once more the foreigner was in evidence. He sat, or rather lay crouched back in a ragged arm chair, akin to the rest of the poor furniture of that poor room. The old terror lurked in the depths of his shrinking eyes, and he was hushed and inert as a person subdued by some deadening influence of power he dared not resist. Marvel had lifted a satchel to the rickety table in the center of the room. There was in the apartment apparently no other personal possession of the foreigner.

To my crude mind, crude at least as compared with the professional workings of the mental machinery of a great man and his equally remarkable assistant, it was the most natural thing in the world that Marvel, having cornered a mysterious quarry, should seize upon that satchel. Given a man who could not converse save in an obscure and unknown tongue, an investigation of his personal belongings might reveal everything—anything. Therefore the only sensation I experienced as Marvel pressed the catch that held the satchel locked was curiosity. But as the bending flaps opened out, to my amazement, Loti, with slight warning cry, betokening the most vivid alarm, was at the side of his master in a swift slide. He snatched at the satchel, snapped it shut again, and maintaining a tense grasp of the lock he stood pallid, his nostrils dilated, gazing with fixed and resolute challenge into the face of Marvel.

"It is—pestilence," he said simply, and slightly drew the satchel towards him. His fine mobile face expressed protection, defense. I noted a tremor spreading all over his sensitive frame, and he waved his hand. It made somewhat the same gesture that a person would make in dissipating an annoying cloud of thick smoke.

Marvel returned the daring glance of his ally. Then those quick thoughts of his seemed to make a brisk run. He shrugged his shoulders as if there was a potentiality to the suggestions of Loti he could not dispute. He took out his card case. I was near enough to him to read the name he scribbled in pencil—"Dr. Peter Horn."

I knew that he had sent for the most famous analyst in the city and I wondered what was coming next. Marvel was not the man to tell, at the present juncture. He sat down on the bed, facing the foreigner. He leaned his chin on his two hands, these resting on his knees, and fixed his eyes upon the cowering wretch as if he was looking through him and beyond him.

It must have been fully an hour before Loti showed up. He was followed by the doctor, whom I had seen before—a big, burly, heavily whiskered man, breathing deeply, looking everywhere—a restless monument of power and force.

There was a small room with glass doors connecting with the one we were in. It seemed to have been used as a dressing room before the hotel had sunk to second class, and, being small, went gratis with the larger apartment. The doctor barely nodded to Marvel, who did not speak so much as a word. He was wont to impress his friends into service in a professional case. The doctor knew his ways as I know them. Loti must have explained what was expected of him. He proceeded to business at once.

Dr. Horn had brought up from his automobile a large case. He set this on the floor, and his first movement was to proceed to the glass doors, thrust them open, survey the space afforded, and then point to the table.

"Move it," he said tersely, and Loti carried it into the adjoining apartment. There was gas there, and the doctor lit a jet. Then he carried his case into the room, closed the doors, and drew from the case a glass head with air tubes at the top. He sprinkled some deodorizing acid about the room from a bottle, put on a pair of gloves, took out a microscope and proceeded to his strange task.

The foreigner paid no attention to all this. Marvel did not seem particularly interested. We four were left in the outer room, but could discern the doctor's activities through the connecting door. I noticed Loti glide to the side of his master; I caught the words:

"The man is from a banana raising country."

"Your sixth sense tells you that, does it?" responded Marvel lightly. "Then it must be South America."

How true that instinctive sense of odor, of which Loti made a theory, was correct, the examination of the satchel by the doctor would soon tell. The illustrious savant rapidly pulled forth its contents. It held nothing but a few worn garments. Selecting a skull cap from the litter, upon this the doctor focussed his microscope. There were flashes of finely mirrored plates and instruments, the application of acids, a mixture of the scrapings of the wool from the cap, massed in a little lake of chemicals. Then the doctor closed the satchel, poured a new bottle of some disinfecting agent over it, and replacing his analytical gear in its case, came out into the larger room.

"Peru," he said simply to Marvel. "Southern part. The germs are the a bacilli, peculiar to that country alone. And to the falling sickness particularly prevalent there. You will yet come before the great societies, Loti," he added admiringly. "You diagnosed it right—a banana country, and the pestilential taint. The man should talk Spanish," he supplemented, with a keen glance over the foreigner.

"But he doesn't," responded Marvel tersely. "I know what to do now. Thanks, doctor."

He glanced at Loti and motioned me to follow him and Dr. Horn. At the street Marvel dismissed the latter with a nod, proceeded along briskly, hailed the first taxi we met, gave a brief direction, and we were whirled away to a street in the foreign quarter.

The taxi halted in front of a row of old buildings. Their occupants were incongruous. One little store bore a window full of more varieties of sausages than I expected to exist in the entire world. There was a store given over to Hungarian wines, a Japanese restaurant and two curio shops.

These were reminders of world's fair years, of stranded importations, and Marvel seemed to know them like a book. It was not five minutes before he reappeared from one of the curio stores. A swarthy man in a fez was with him. We were again whirling along to our terminus, the hotel.

It was all so swift, so silent, so impressive—Marvel's resistless rush of ideas and events, carrying me along irresistibly—that it reminded me of the changing scenes of a motion picture film. The curio man was ushered into the room where we had left Loti and the other. He viewed the foreigner with a measuring glance, and spoke half a dozen words in a tongue-twisting dialect.

In an instant the foreigner was transformed. Eyes, frame and soul seemed to awake. He uttered a joyful cry and flung himself on his knees, clasping those of the curio man, jabbering away twixt sobs of delight and tears of relief.

Marvel softly rolled a cigarette with those deft hands of his, which with equal facility could slip a ring upon the dainty finger of a debutante or snap a pair of handcuffs around the brawny wrists of a burglar. I knew he divined the end of circumstnce and the beginning of coherency. There was a rapid colloquy between the foreigners. Then there was a whispered conversation carried on by Marvel and the curio man in a corner of the room. The latter returned to the prisoner. Some animated discussion ensued. And then the foreigner did a quite remarkable thing.

He removed his shoes, and for the first time I noticed how broad and how thick were the soles. Their owner looked appealingly at the curio man, who nodded reassuringly, as though promising protection. The former took a shell-like article from his pocket, stripped back the edge of each sole, tore them lengthwise, and from those hiding places produced two oblong rigid articles cased and encased in cushions of the softest wool.

I watched Marvel as he received these, placed them in his pocket, and made a motion to Loti, who in turn touched my arm ceremoniously with the simple words:

"We will go."

"To sum up," Resilius Marvel advised me when I visited his office the next evening, "the two packages were these," and he produced from his desk two steel plates and proofs of the same.

"The $50 plates," I remarked naturally.

"Not at all," was the dissent—"duplicates of the old plates, with the flaws I pointed out rectified. The old issue served their purpose. These people are shrewd. Cashiers will be on the lookout for the old flaws only. The new notes would pass without suspicion, at least for a time. I know the man who has been making those plates, but I did not know that he was working, secluded in Peru, until last night. That native was sent with these plates, concealed as you have seen. He was instructed in detail what he was to do. There has been a hitch somewhere, at least a change in the plans of the people at this end of the line, of Gundorf and his associates. That he or they will be looking out for the Peruvian, however, is so certain that I shall install myself in the house where we found the native. You may help me out, and I will tell you how."

Marvel proceeded to do so. For two nights in succession I carried food supplies to my patient and invincible friend, and messages from him and to Loti. The third night, as I approached the house by the rear, as I always did, I noticed a strange thing and halted, looking up sharply.

A man was leaping the space between the two houses. I knew that he saw me and was startled, for I watched him peer down at me. I could only construe that this person was entering the vacant house surreptitiously by the roof and scuttle route. At just that moment a clear sound proceeded from the house I was about to enter—the sharp, quick jangle of a telephone bell.

The man aloft must have been suspicious of my appearance. Perhaps he caught the sound of footsteps in the house, those of its solitary occupant. At any rate, I heard a sharp snap, a severed wire whipped down between the houses, nearly striking my face, and the man leaped back over the space and disappeared.

Perhaps two full minutes passed away, and I was about to enter the house, when the rear door flew open and Marvel was upon me.

"No delay!" he spoke quickly, and seized the food valise I carried and flung it on the step. Then he started on a run, reached the next street, and hailed a taxicab, and gave the quick words:

"Central telephone office."

"What?" I interrogated simply.

"A crash of thunder."

I did not understand, but I hoped to, soon. He left me, his first point of destination reached. I watched him rush into the telephone building, then out of it, with the sharp mandate: "Signal service bureau," to the chauffeur—"Bad system in there," to myself.

"You are ready for a fifty mile run, double fares?" he inquired of the chauffeur as he came out from the weather brueau.

"I'm ready," was the willing response.

"My wait at the vacant house," said Marvel, as he fled down a country road, "was rewarded by a telephone call. I was at the receiver promptly. 'Is that you Franklin?' was challenged, and then—'It's King'—and I knew I was talking with Gundorf. There was an interruption, and the current went."

"Yes, the wires on the roof were cut—" I began.

"No, a crash of thunder at the far end of the line."

I pointed to the blue sky, with all the stars a-sparkle. Marvel laughed.

"There was no trace at the exchange of the call," he explained. "Suburban, that was all. At the weather bureau a passing storm cloud reported at one station only—at Bloxton. We are going there."

We reached Bloxton in an hour and a half. Marvel located the telephone exchange. He came out bright and brisk.

"Message sent from the office here direct by one Colonel Worthington," he said to me, after giving a direction to the chauffeur. "Newcomer. Blind. Passing cloud, clap of thunder—only one—struck the wires. My man."

I was standing just behind Marvel when he entered the library of a secluded house at the edge of the town. A bewhiskered man with big, obscuring goggles, was seated in an armchair. Marvel approached him, looked keenly at him, reached over and—removed a false ear. This was the identifying trademark of "King" Gundorf, half an ear bitten off by a swindler confrere in the years past.

I know not in detail how the case was adjusted, but Gundorf gave up nearly all of the $200,000. I think the bargain was that he should leave the country. At all events, the Guardian Trust & Savings did not go out of business, and is still within the clearing house.

A week later, while in the office of the United Bankers' Protective association, Marvel led me with a look to his desk. He opened a drawer and took out the photograph of a lovely woman. Her name, "Orthello," was written on the card. He next unrolled the plans of a wonderful mansion. With a pencil he drew a line through its first story.

Then I knew that his exertions in the Paget case had paid for that much of his future home, and that he was that much nearer to the fruition of his dream of a home—and Orthello.

Ridiculing the Puritans.

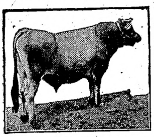
It is the fashion of late to speak condescendingly of the Puritans, as of a people of narrow views and of men of sour temperament; but no descendant of theirs, and no later immigrant who now dwells in the commonwealth they founded, and enjoys the blessings which it bestows upon us, will fail to glory in being able to trace back to such forerunners, writes William Roscoe Thayer in the American Magazine. The story of the conditions which faced the passengers of the 'Mayflower' when they landed at Plymouth can never be too often repeated. To have as founders of our state men and women who 'had the fear of God in their hearts, but feared the face of no man,' ranks as the initial glory of Massachusetts.

DAIRY

NEED MORE DAIRY PRODUCTS

Farmers Have Peculiar Responsibility Placed Upon Them—Better Sires Are Needed.

Dairy farmers have a particular responsibility in this time of strict economy, says Secretary C. R. George of the Indiana State Dairy association. "The dairy cow," says he, "is unequaled by any other class of live stock in her ability to convert our farm crops, and particularly the roughages, into human food. The production and storing of the greatest amount of these feeds, feeding them in such a way as to get the largest production, and strict economy in the handling and use of the products are the things that should receive our especial attention at this time.



Jersey Bull of Fine Quality.

"Don't sell the dairy cow at tempting beef prices, for in the end she will do you more good as a milk producer and she will produce more food during the coming year than her carcass will furnish now—and you will have her left to do it again. Be sure that proper housing facilities will be available for the next winter so that the cows will be protected from storms and wind and in this way save feed and increase production. Use better sires than ever before and develop the heifer calves with the best of care. The war department is making its plan on a three-year basis. Why shouldn't we?"

SILAGE IS GOOD FOR CALVES

Gradual Introduction of Feed May Be Begun When Animal Is About Six Weeks Old.

By the time the calf is six weeks old we may begin to feed silage, very gradually at first, using care to see that it is free from mold. In a little while the calf will be able to consume quite a quantity of silage and the amount will increase as time advances. The grain fed to the calf always should depend in some degree upon the kind of roughage consumed. There is no better roughage than alfalfa hay. It is easily digested. The leaves of the alfalfa contain a principle indispensable in the development of the young animals and not present in other roughage, but alfalfa hay alone is not good for a calf. Taken in connection with skim milk the ration is too narrow, that is to say, the amount of protein as related to the carbohydrates and fat is in excess of the demands of the animal. This condition is corrected by the feeding of silage and grain like corn, rich in carbohydrates.

REGULAR MILKING IS URGED

Cow Will Do Her Best When Milked at Regular Periods of About Twelve Hours Every Day.

A cow can do her best only when milked at equal and regular daily periods of about twelve hours each the year around. The full supply of milk is not in the udder, ready to be drawn out before milking time comes, but some of it is produced by the glands during the operation of milking. The udder, however, is usually filled, and the cow becomes accustomed to this, but if the operation of milking is delayed the glands cease to some extent to secrete milk, and they will then not be stimulated to good activity during the process of milking. This injures the glands and produces a decrease in the milk flow. So it is very important that the milking be done regularly at as near the same time each morning and evening as possible.

IMPROPER FLAVORS IN MILK

If Onions or Garlic Are Eaten by Cow Odor Will Pass Into Milk—Feed Is Important.

Milk has its natural flavor, which is a pleasant flavor to most people, and then it can have acquired flavors. These are of two kinds. First, from the food the cow eats. If onions or garlic are eaten their odor will be passed into the milk. Some weeds also cause flavors in the milk. Second, the milk will also absorb many odors. To produce milk with a good flavor it is necessary that the cow is not fed anything that will be kept where it can absorb any odors.—North Dakota Experiment Station

This department of THE ELEVEN TOWNS is devoted to the interests of the agriculturists of Pennington and Marshall Counties. All the articles are by foremost authorities, including U. S. Government experts.

TRAPS STOP MOLES

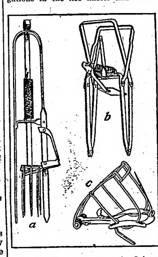
Raider Destroys Harmful Insects and Need Not Be Exterminated.

LIFE HABITS OF EXPLORER

Leveling of Ridges by Means of Roller Tends to Discourage Further Incursions of Animals—Ready Market for Skins.

(Prepared by the United States Department of Agriculture.)

The case against the garden mole is not clear-cut. The damage that it does by burrowing in the soil and uprooting plants is somewhat offset by its helpful habit of feeding upon insects and in working the soil. A specialist in the bureau of biological survey of the United States department of agriculture, who has made a careful study of this underground explorer, concludes that judgment against the mole may be rendered when it actually invades the lawn or garden—the overt act—but that no general warfare against an insect-eating mammal should be encouraged. In Farmers' Bulletin 583, "The Common Mole of Eastern United States," a report is made of investigations in the life habits and methods of destroying this animal when necessary.



Mole Traps—a, Harpoon; b, Scissor Jaw; c, Choker.

Trapping is the most effective means for putting an end to mole depredations. Although this bulletin considers the common garden mole of Eastern United States, to a great extent the instructions for trapping it apply to all American moles. Three general types of traps—the harpoon, the scissors-jaw, and the choker—are on the market, and most of them give good results. Specific instructions for handling any particular make should be obtainable from the manufacturer.

Successful Mole Trap.

In general, a mole trap can be successfully operated only when set on that part of the runway that is near enough to the surface to upridge the sod or soil. A little observation will soon enable one to distinguish the newer and more frequently used runways from those that have been partially or wholly abandoned. In placing the trap, one of the stretches of the run that seems to be leading in some definite direction should be selected rather than one of the turns of a labyrinth that may not be traversed every time the mole comes into the vicinity. Before setting the trap it is well to ascertain the course of the burrow by thrusting down a lead pencil or a stick of about the same size. The trap selected should then be lined up with the course as nearly as possible; that is, the jaws of the scissor-jaw type should be astride it, the loops of the choker type should encircle it, and the spikes of the harpoon type should be directly above it. If the harpoon type is used, it is best to force the impaling spikes into the ground once or twice to facilitate their penetrating into the burrow when the trap is later sprung. This type of trap injures the pelts of moles, and is not recommended for use when it is desired to preserve the fur.

Repeated leveling of the mole ridges on the lawn by means of a roller not only tends to discourage the animals from making further incursions, but prevents that injury to the grass roots which otherwise would result, and restores to the lawn its more sightly appearance.

Unjustly Blamed.

The mole is blamed for much damage it does not do, the specialist explains, because other small animals, particularly voles or meadow mice, deer mice, and sometimes ordinary house mice use the convenient runways of the mole for marauding. Most of the injury to seed grains, tubers, and roots of cultivated plants is directly chargeable to these intruding rodents, as an examination of the toothmarks on the damaged products will show.

From an examination of the stomach contents of 200 moles taken in all months of the year it was found that earthworms and white grubs constitute the bulk of the food. Beetles and their larvae and other insects that enter the ground, spiders, centipedes, cocoons, and puparia also form a part of the diet. In one stomach were found the remains of 171 small white grubs, in another 10 cutworms, and in another 12 earthworms. The presence of starchy material in some of the stomachs is proof that the mole occasionally finds vegetable food, as certain seed grains, softened by contact with the moist soil, an acceptable addition to its worm and insect diet. Seed coats of corn, wheat, oats, and peanuts have been identified in a few stomachs.

Market for Skins.

Moleskins have found a ready market in recent years owing to the gradually decreasing number of wild fur-bearing animals. A new industry amounting to many thousands of dollars annually might be developed in this country in the utilization of moleskins, the specialist believes. It is not feasible to attempt to breed moles for their pelts, but farmers' boys or others may easily earn small profits by capturing moles found damaging crops or seriously interfering with garden plants, cemeteries or lawns. Information regarding addresses of firms that will purchase moleskins, the care of skins, and home tanning will be furnished by the biological survey on request.

SOIL SERVES AS A STOMACH

Expression "Available Plant Food" Is Explained by Expert of Missouri College.

Every reader of a farm paper must have encountered frequently the expression "available plant food." As defined by R. R. Hudelson of the University of Missouri College of Agriculture, it means the plant food which will readily dissolve in the soil water so that the plant can take it up. In the animal stomach there are certain digestive fluids that dissolve the food so that it can be absorbed into the blood stream. The soil must serve as a stomach for plants and as the plant food dissolves in the soil water it is absorbed into the plant juices and moves up through the plant, where it can be used. The extra water evaporates from the leaves and moves up, giving a constant circulation. From this it can be seen that only dissolved plant food can be used. Almost all soil materials can be dissolved to a slight extent, but often the rate of dissolving is too slow.

WETTING SPOILS GOOD EGGS

Careful Investigation Shows That From 17 to 22 Per Cent of Washed Eggs Are Worthless.

Approximately 5,016,000 dozen eggs spoil needlessly every year in cold storage in this country simply because someone has let clean eggs get wet or washed dirty eggs before sending them to market. Careful investigations of large quantities of stored eggs show that from 17 to 22 per cent of washed eggs become worthless in storage, whereas only four to eight per cent of dirty eggs stored unwashed spoil. The explanation is simple. Water removes from the shell of the egg a gelatinous covering which helps to keep air and germs out of the inside of the eggs. Once this covering is removed by washing or rain which gets the eggs in the nest, germs and molds find ready access to the contents and spoil the eggs.

Millions of eggs spoil in storage because they have been exposed to dew, rain, dirt and sun in stolen nests in the grass or fence corners.

ORDER FRUIT CRATES EARLY

United States Department of Agriculture Urges Farmers to Make Necessary Preparation.

Fruit growers are again being urged by the United States department of agriculture to place their orders for fruit packages at the earliest possible moment in order to insure their delivery when needed. It seems that the supply is likely to be scarce and the price high. Shipments should be made early as there is likely to be a slow delivery of anything that looks like non-perishable freight.

CULTIVATE EARLY AND OFTEN

Constant Work Will Keep Soil in Ideal Physical Condition and Keep Out Harmful Weeds.

Constant cultivation should be the rule, for this will keep the soil in an ideal physical condition for the roots to grow in, besides keeping the weeds in check. Cultivate early and persistently and keep ahead of the weeds.

Highway Improvement

MAINTENANCE TAX IS URGED

Governor of North Carolina Would Keep Highways in Good Order and Make Improvements

"To spend $100,000 to build highways and then leave the roads without provision for maintenance, is folly equal to that indulged in by the farmer who buys $1,000 worth of farm machinery and then refuses to build a shed under which to keep it."

Gov. T. W. Bickett of North Carolina points to the fact that it is not only necessary for a state to build good roads, but also to keep them in good shape and to improve them from time to time. In North Carolina, convicts have been employed on the roads since 1881, but the counties have been required to hire them from the state and pay for them out of the county funds. The counties have, therefore, been parsimonious in their expenditures on road improvements. Governor Bickett suggests that county commissioners be compelled to levy an annual maintenance tax, to be spent by the state highway commission for the upkeep of the roads.

Convicts Working on Good Road.

The national committee on prison labor has repeatedly shown the value of employing convicts in road-making. In North Carolina and other agricultural states, this method of employing the convict is particularly advantageous because of the scarcity of labor at this time.

The war brings the matter of the employment of unskilled labor on roads before the public again. Unskilled labor has become very scarce and expensive; yet the present crisis demands that the roads of the country be maintained in good shape to insure rapid transmission of products. The national committee on prisons and prison labor has begun a movement for the mobilization of the convicts of the country in a national and state service for the building and upkeep of good roads.

In this effort the committee will have the hearty support of the American Automobile association through its good roads board, which includes a member from each one of the 600 odd clubs contained in the national body of car owners.

CUTTING HEDGES ON CORNERS

Obstruction Is Menace to Motorists in That It Shuts Off View of Approaching Cars.

Along with the better roads that the farmers are achieving comes the attendant better care of hedges, noticeable almost everywhere. The fact that no road can be so good if it has an untrimmed hedge alongside it, is being generally recognized, and the further fact that a hedge at a corner is a menace to motorists in that it shuts off the view of approaching cars, is leading to the cutting of hedges at the intersections, and in many places to their elimination altogether and their replacement with wire.

NEGLECT MAKES POOR ROADS

Carelessness Requires $2 to Be Spent, Where $1 Invested Earlier Would Have Done Work.

It is neglect which makes earth roads bad, and requires $2 to be spent where $1 invested earlier would have done the work. Every township should arrange for a patrol system of maintenance, or its equivalent, under which someone will give his entire time to a section of roads and be responsible for their condition.

Tool for Foundations.

Operated by one man, a gasoline-driven machine has been invented that delivers more than 1,000 hammer blows a minute to newly laid concrete foundations for roads to give them an even density.

Prejudice Against Oiled Roads.

It may be that prejudice against oiled roads has arisen among too enthusiastic champions of concrete. But concrete costs so much that in many instances its use is out of the question.

HOOVER TELLS OF FOOD SITUATION

Administrator Issues Message on Conservation.

IS GREAT PROBLEM OF WAR

America's Production and Needs of the Allied Nations Set Forth—What We Must Do to Keep Wolf From the Door.

TABLE NO. 1.

Commodity.	Production.	Imports from U. S.	Imports from Canada.	Net Imports Other Sources.	Consumption.
Wheat	590,675,000	79,428,000	112,900,000	188,478,000	974,485,000
Corn	121,109,000	10,811,000	....	125,675,000	266,596,000
Oats	570,890,000	6,783,000	16,590,000	88,612,000	682,865,000
Barley	125,201,000	4,946,000	6,660,000	63,030,000	199,793,066
Rye	78,573,000	567,000	60,000	11,337,000	90,537,000
Total	1,486,448,000	102,533,000	136,200,000	487,134,000	2,214,276,000

TABLE NO. 2.

Commodity.	Probable U. S 1917	Average Normal U. S. Consumption	Probable U. S. Surplus	Add possible Canadian Surplus
Wheat	678,000,000	590,304,000	88,600,000	120,000,000
Corn	3,124,000,000	2,653,698,000	470,000,000	63,000,000
Oats	1,453,000,000	1,148,713,000	304,000,000	30,000,000
Barley	214,000,000	178,829,000	35,000,000	9,000,000
Rye	56,100,000	35,866,000	20,200,000	18,000,000
Totals	5,525,100,000	4,607,410,000	917,200,000	239,000,000

Washington, Aug. 20.—Herbert C. Hoover, United States food administrator, today issued to the American public his statement covering the food situation as it now exists and the necessity of conserving the food resources of the nation to provide for the future during the continuance of the war. The statement follows:

Food is always more or less of a problem in every phase of its production, handling and consumption. It is a problem with every farmer, every transporter and seller, every householder. It is a problem with every town, state and nation. And now, very conspicuously, it is a problem with three great groups of nations, namely, the allies, the central empires and the neutrals; in a word it is a great international problem.

The food problem today of our own nation, therefore has as its most conspicuous phase an international character. A sufficient and regular supply of food for the maintenance of the great field armies of our fighting allies and of their no less great armies of working men and working women in the war industries, and finally for the maintenance of the women and children in the home, is an absolute necessity, second to no other, for the successful prosecution of the war for liberty. In the providing of this food for the great allied food pool, the United States plays a predominant part.

With the present diversion of tens of millions of men from the farms into the fighting and industrial armies, resulting in a marked lessening of food production, and the present necessity of increasing the daily ration of other millions of men turned from sedentary occupations into those of strenuous physical labor, resulting in a marked increase of consumption, this deficiency between the food needs and the food production of the allies becomes greater than ever, with the consequence of a large increase in the food quantities imperatively needed from the United States if the allied armies are to be able to "carry on."

World's Larder Examined.

This is a general statement of a condition which only needs to be elaborated in detail to show just what we have to do. The time has come when this detailed statement can be made. Our harvest and the harvests of Europe can now be forecast. We can also survey our combined stocks of food animals; in other words, the size of that part of the world's larder on which we and the allies can draw for the next twelve months can now be estimated. This estimate shows at once that it contains too little for our own and our allies use unless we all administer the supply with the greatest care and wisdom. The allied peoples are energetically undertaking this administration. It lies now with us to do our part. If we fail, the people of the allies cannot be maintained at war. Their soldiers cannot fight without food. A certain definitely determinable part of that food must come from us. Let us then examine carefully the world's larder as it appears today, or so much of it as is at our disposal.

I propose to review the situation first, as regards the cereals, second, as regards food animals and their products, third, as regards sugar, fourth, as regards vegetables, fifth, as regards fish and sea foods, and, finally, as regards our duty in the matter.

Cereals.

The 1917 harvest is now so far advanced that we may compare it with previous production, and with the demands which are going to be made on it.

Table No. 1 is given to show the normal peace sources of the annual supplies of France, Italy, the United Kingdom and Belgium, being an average of the three-year pre-war period.

It will be seen from this table that the normal imports of wheat are 381,000,000 bushels and of other cereals 345,000,000 bushels. The estimate of the 1917 harvest in the allied countries based upon crop reports from these countries, is as follows:

Commodity.	Probable 1917 production.	Av. normal production.	Deficiency in prod'n. due to war.
Wheat	393,770,000	590,675,000	196,905,000
Corn	94,464,000	121,109,000	26,645,000
Oats	337,235,000	570,890,000	233,655,000
Barley	93,585,000	125,201,000	31,616,000
Rye	41,732,600	78,573,000	36,841,000
Total	960,786,000	1,486,448,000	525,662,000

In order to provide normal consumption it would therefore be necessary to import in the next 12 months a total of 577,000,000 bushels of wheat and 674,000,000 bushels of other cereals.

The prospective position of our own and the Canadian harvest is given in table No. 2.

Our crops, especially our corn crop, cannot yet be considered as certain, but if all mature safely, North America will have an apparent surplus of wheat of 208,000,000 bushels and of other cereals of about 950,000,000 bushels.

Demand on Our Crops.

The allies are isolated from those markets, other than Canada and the United States, on which they were accustomed to rely before the war. The Russian supply cannot be got out. Bulgarian and Roumanian supplies are in the hands of the central empires. The voyage from Australia and India is three times as long and therefore requires three times as many tons of shipping as is required from North Atlantic ports. It is also twice as dangerous because of the longer exposure to submarine attack. There has been a large failure in the South American countries and the new harvest from that quarter will not be available in Europe until next spring. As already said, all the allied countries are and have been for some time rigorously administering and economizing their food. In Belgium, the relief commission has been compelled to reduce the consumption of cereals by nearly 50 per cent; this brings the food supply so low that the population are incapable of labor.

From the above tables it will be seen that on normal bases of consumption the total allied wheat import requirements are 577,000,000 bushels against a North American surplus of 208,000,000 bushels—and from our United States supplies we must reserve a certain amount for neutrals from which we receive vital supplies and also an amount to protect our stocks better next year than this last. There is therefore on normal consumption a deficit of over 400,000,000 bushels. In the other cereals used in Europe mostly for animal feed, the import necessities of the allies on normal consumption basis are about 674,000,000 against a North American surplus of 950,000,000. But again a reserve for neutrals and increased "carry over" will absorb all the margin. In any event it means we must multiply our exports of these cereals 20 times. However, upon the basis of our present crop prospects we should be able to supply their requirements in cereals other than wheat.

Wheat Situation Difficult.

The situation in wheat is one of great difficulty and concern, and must be met by an elimination of waste and reduction of consumption on the part of the allied peoples and ourselves, in one word, by an effective administration of the available supply.

The allies are unable to use other cereals alone for bread. They can use them only as added to wheat flour to make the war bread now in universal use in European countries. Except in Italy, whose people normally consume much corn, our allies have few corn mills and cornmeal is not a durable commodity and therefore cannot be shipped in great quantities.

Moreover, for generations they have bought bread from the bakeries; they have no equipment nor do they know how to bake in the household. Every American knows that it is infeasible to distribute corn bread from bakeries, and it is therefore necessary for us to furnish our allies with sufficient wheat to enable them to have a wheat basis for the loaf. However, they can use and must use other cereals for mixture in their war bread, and by this substitution and by savings on their part a great deal can be accomplished. On the other hand, a deficit of 400,000,000 bushels can be at least partially overcome if we can increase our exports from 88,000,000 to 220,000,000 or nearly triple. This can be accomplished if we will substitute one pound of other cereals for one pound of wheat flour weekly per person; that is, if we reduce our consumption of wheat flour from five pounds per week to four pounds per week per person. It will be no privation to us and will reduce the privation of our allies.

Food Animals.

Owing to the ascending standard of living, the world was already strained to supply enough animal products to meet the demand before the war began. The war has injected into an already difficult situation a number of vicious conditions which are jeopardizing the ultimate animal products supply of the world. The production of fodder in Europe has been diminished by the diversion of productive labor to war, and its import has been curtailed by shortage in shipping and by the isolation of markets by belligerent lines. From these causes not only are the actual numbers of animals decreasing in Europe, but the average weight and the annual output of dairy products per animal, are decreasing.

A careful estimate of the world's food animal position shows the following position:

	Increase or decrease United States	Decrease western allies	Decrease in other countries including enemies	Total net decrease
Cattle	7,090,000	8,420,000	26,750,000	28,080,000
Sheep	3,000,000	17,500,000	34,000,000	54,500,000
Hogs	6,275,000	7,100,000	31,600,000	32,425,000
		33,020,000	92,350,000	115,005,000

The problem facing the American people is not only one of supplying the immediate demand of the allies, but one which is more far-reaching in its future significance. As the war goes on there will be a constant lessening of the capital stock of food animals of the world. Among our western allies the demand outruns further every day the decreasing production, as shipping becomes further shortened by continued submarine destruction, less tonnage can be devoted to fodder, and further reduction of the herds must ensue. These destructive forces have given rise to reactions in many directions. The world's supply of meat and dairy products, of animal fats and industrial fats, wool and hides, are all involved not only now, but for far into the future.

Meats.

The immediate problem is to furnish increased meat supplies to the allies to maintain them during the war. An important factor contributing to the present situation lies in the disturbance to the world's trade by destruction of shipping resulting in throwing a larger burden on North America, the nearest market. Shipments from the Australasian, South American and from the continental countries into the allied countries have been interfered with. Their contributions must be replaced by increased shipments from North America.

The growth of American meat exports since the war began, most of which have been supplied by allied nations, is revealed by the following figures:

Three-year pre-war average, 493,848,000 pounds.

Year ending June 30, 1916, 1,339,193,000 pounds.

The impact of European demand upon our animal products will be maintained for a long period of years after peace. We can contemplate a high range of prices, for meat and for animal products for many years to come. We must undertake to meet the demand not only during the war, so as to enable our allies to continue to fight, but we must be prepared to meet the demand after the war. Our herd cannot be increased in a single night or in a single year. Our producers will not only be working in their own ultimate interest in laying the foundation of larger herds and flocks, but will serve our national interest and the interest of humanity, for years to come, if the best strains of young animals are preserved. The increase in herds can only be accomplished if we save more of our roughage and raise more fodder grains. It is worth noting that after the war Europe with lessened herds will, pending their recuperation, require less fodder and will therefore produce more bread grains and import less of them, so that we can after the war safely reduce our bread grain production to increase our fodder. But we must lay our foundation in the meantime to increase our herds.

There is only one immediate solution to the short supply of meat for export pending the increase in our herds and flocks which will take years. During the course of the war, we can, just as with the cereals, reduce the consumption and eliminate the waste particularly among those classes which can best afford it. In the meantime, in order to protect all of our people, we must carefully control our meat exports in order that the people shall not be denied this prime necessity of life.

Dairy Products.

The world's dairy supplies are decreasing rapidly for two important reasons. First, the dairy cattle of Europe are diminishing, for Europe is being driven to eat its cattle for meat; second, the diversion of labor to war has decreased the fodder supplies and the shortage of shipping has limited the amount of imported fodder and therefore the cattle which can be supported and the productivity of the individual cow have been reduced. Even our own dairy supplies are not keeping pace with our growth of population, for our per capita milk supply has fallen from 90 to 75 gallons annually in the past 15 years. Yet today we must ship increasing amounts of dairy products to our allies.

The dairy supplies of the allies in normal times came to a considerable degree from western Scandinavia, Holland and Switzerland, but under German pressure these supplies are now partly diverted to Germany. The men under arms and the wounded must be supplied with condensed milk in large quantities. The net result of these conditions, despite rigorous reduction of consumption among the adults of the civil population in Europe, is that our allies are still short of large quantities and again the burden of the replacement of this shortage must fall on North America. The growing exports of dairy products from the United States to the allies are shown in the following table:

	Three year average.	Year ending June 30,1913.
Butter	4,457,000 lbs.	13,487,000 lbs.
Cheese	3,750,000 lbs.	44,394,000 lbs.
Cond. milk	17,792,000 lbs.	159,577,000 lbs.

The high price of fodder and meat in the United States during the past few months induced by the pressing European demand has set up dangerous currents in this country, especially in those regions dependent upon butter and the sale of milk to municipalities having made it more profitable to sell the cattle for meat than to keep them and produce dairy products. Therefore; the dairy cattle are decreasing in some sections. The only sections in which dairy products have had a rise in price in appropriate proportion to the increase in most of feeds are those producing condensed milk and cheese.

Our home milk and butter supplies are therefore looked at in a broad way, decreasing while our population is increasing. This deficiency of dairy butter is shown by the increased sales of margarine, which show an increase of several million pounds per month over similar periods in 1915. Dairy butter, however, has qualities which render it vitally necessary for children. Milk has no substitute and is not only intrinsically one of our cheapest animal foods, but is absolutely fundamental to the rearing of the children.

The dairy situation resolves itself into several phases. First, it is to be hoped that the forthcoming abundant harvest together with a proper restriction upon exports of feeding stuffs will result in lower prices of feed and diminish the impetus to sell the cattle for meat. Second, the industry needs encouragement so as to increase the dairy herd and thus our dairy supplies, for the sake first of our own people and second of the allies. The people must realize the vital dependence of the well-being of their children, and thus of the nation, upon the encouragement and upbuilding of the industry. Third, we must save the wastes in milk and butter during the war if we are to provide milk supplies to all. We waste large quantities of our milk value from our lack of national demand for products of skimmed and sour milk.

Pork Products.

The hog is the most efficient of machines for the production of animal fat. The hog not only makes more fat from a given amount of feed, but also the products made are specially capable of preservation and most economical for commercial handling.

The swine of Europe are rapidly decreasing and the consumption demand induced by the war is much increased, this particularly because bacon, ham and lard are so adaptable for military supplies. Moreover, our allies are isolated from many markets and a large amount from northern neutrals is being diverted to Germany.

While our hogs have increased in number by 3,000,000 animals, the average weight at slaughter is falling and our production is probably only about maintained. The increasing demand upon us since the war began is shown by the following figures of comparative exports:

Three-year, pre-war period, 1,055,614,000 pounds.

Year ending June 30, 1916, 1,512,376,000 pounds.

Wool and Leather.

Our national supply of both wool and leather are less than our needs, and we are importing them more and more largely, as shown by the following figures:

Importations of wool and manufactures of wool (value) for the three-year pre-war period, 862,457,965; for the fiscal year ending June 30, 1916, $158,078,271.

Importations (value) of hides, leather, and manufactures of leather average of the three-year pre-war period, $133,171,398; for the year ending June 30, 1916, $177,880,902.

At the present time the world's demand for these products has increased far above the peace level owing to the extra consumption in supplying the armies. This demand is now again increased by the mobilization of a large American army. In the face of this, not only is the European herd decreasing, but also American sheep have decreased about 3,000,000 since the war began. After the war is over, the various countries of the world from which we formerly drew our wool are likely to retain it for their own use until their flocks again become normal.

Sugar.

The sugar supply on which our allies in Europe normally draw has been tremendously reduced, so that they must have recourse to other sources. In consequence of the shipping situation the area from which they must draw is also curtailed and, as a result, they are driven into those markets from which our own supply normally arises. Furthermore, their own production has been greatly diminished. Before the war, Europe supplied in a large measure its own needs, through the production of beet sugar, as will appear from the following table showing the average yearly production and consumption for the five years before the war (1909-1913), in some of the chief countries of Europe:

	Prod'n. (short tons)	Consump. (short tons)	Surp. (†) or deficiency (-)
Germany	2,525,899	1,299,585	†1,226,314
Austria	1,651,889	679,204	† 972,685
Russia	1,659,947	1,322,285	† 337,662
United Kingdom..	......	2,056,000	-2,056,000
France	752,542	704,830	† 47,712
Italy	211,050	190,000	† 21,050
Belgium	279,918	120,358	† 159,560
Holland	246,146	131,538	† 114,608

As appears from the table, France, Italy, Russia and Belgium were self-supporting, while the United Kingdom drew its entire sugar supply from exterior sources. The supply of the United Kingdom came to the amount of about 70 per cent from countries from which it is now cut off by the war. Ten per cent came from the East Indies and 20 per cent from the United States and the West Indies.

The prospective 1918 crop in France has diminished to 207,000 tons and that of Italy to 75,000 tons, and they are therefore short 590,000 tons. The displacement of United Kingdom supplies amounts to 1,435,000 tons; and therefore, in total, these three allied countries must import about 2,700,000 tons in order to maintain their normal consumption. Of this, 2,000,000 tons must come from new sources.

The disturbance of shipping reduces the tonage available and drives the demand to a large degree upon the nearest markets, the United States and the West Indies. This field has since the war increased its production by 1,000,000 tons per annum. How far this demand will interfere with the American supply of 4,000,000 tons is difficult to forecast, first, because some increased supplies may be obtained by the allies from the East Indies, and, second, because the allies have reduced their consumption to some extent.

In any event, if all the enemies of Germany are to be supplied, there must be economy in consumption everywhere. The normal American consumption is about 90 pounds per person per annum and is just double the French consumption.

Vegetables.

We have this year a most abundant crop of vegetables for our use as a result of a patriotic endeavor almost universal throughout the country. Our potato harvest alone promises an increase from 285,000,000 bushels last year to over 400,000,000 bushels this year. The other vegetables are likewise enormously increased through the planting and extension of millions of gardens. The sweet potato crop promises to be from 10 to 20 per cent above what it was last year, and the commercial crop of sweet corn for canning purposes is estimated to be from 20 to 30 per cent above that of last year. The commercial crop of tomatoes for canning purposes will probably be somewhere between 10 and 20 per cent above what it was last year. There is an increase in the acreage of late onions of about 54 per cent over the area harvested in 1916.

Fish and Sea Foods.

The waters of our coasts and lakes are enormously rich in food fish and shell fish. Our streams, too, contribute a great quantity of fish. Many varieties are now not used for human food, but are thrown away or used for fertilizer. Habit has confined our use of fish to a few varieties, and inadequate methods of commercial handling have limited our use of these largely to only certain days in the week. With better marketing facilities, with better understanding of how to use the most varieties, with proper preservation by smoking and salting and by establishing plants for frozen fish, we can increase greatly our supply and thus relieve largely the pressure due to the inadequate supply of meat. We only have to harvest our own fish supply. It feeds itself. Every fish eaten is that much gained in solving the present problem of living. The products of the land are conserved by eating those of the sea.

Our Duty.

I have endeavored to show in previous articles that the world is short of food; that Europe is confronted with the grim specter of starvation unless from our abundance and our waste we keep the wolf from the door. Not only must we have a proper use of our food supply in order that we may furnish our allies with the sinews with which they may fight our battles, but it is an act of humanity towards fellow men, women and children.

By the diversion of millions of men from production to war, by the occupation of land by armies, by the isolation of markets, by belligerent lines, and by the destruction of shipping by submarines, not only has the home production of our allies fallen by over 500,000,000 bushels of grain, but they are thrown upon us for a much larger proportion of their normal imports formerly obtained from other markets.

They have reduced consumption at every point, but men in the trenches, men in the shops, and the millions of women placed at physical labor require more food than during peace times, and the incidence of their saving and any shortage which they may suffer, falls first upon women and children. If this privation becomes too great, their peoples cannot be maintained constant in the war, and we will be left alone to fight the battle of democracy with Germany.

The problem of food conservation is one of many complexions. We cannot, and we do not wish, with our free institutions and our large resources of food, to imitate Europe in its policed rationing, but we must voluntarily and intelligently assume the responsibility before us as one in which everyone has a direct and inescapable interest. We must increase our export of foods to the allies, and in the circumstances of our shipping situation, these exports must be of the most concentrated foods. These are wheat, flour, beef, pork and dairy products. We have other foods in great abundance which we can use instead of these commodities, and we can prevent wastes in a thousand directions. We must guard the drainage of exports from the United States, that we retain a proper supply for our own country, and we must adopt such measures as will ameliorate, so far as may be, the price conditions of our less fortunate. We might so drain the supplies from the country to Europe as by the high prices that would follow to force our people to shorten their consumption. This operation of "normal economic forces" would starve that element of the community to whom we owe the most protection. We must try to impose the burden equally upon all.

Action Must Be Voluntary.

There is no royal road to food conservation. We can only accomplish this by the voluntary action of our whole people, each element in proportion to its means. It is a matter of equality of burden; a matter of minute saving and substitution at every point in the 20,000,000 kitchens, on the 20,000,000 dinner tables and in the 2,000,000 manufacturing, wholesale and retail establishments of the country. The task is thus in its essence the daily individual service of all the people. Every group can substitute and even the great majority of thrifty people can save a little—and the more luxurious elements of the population can by reduction to simple living save much. The final result of substituting other products and saving one pound of wheat flour, two ounces of fats, seven ounces of sugar and seven ounces of meat weekly, by each person, will, when we have multiplied this by one hundred million, have increased our exports to the amounts absolutely required by our allies. This means no more than that we should eat plenty, but eat wisely and without waste.

Food conservation has other aspects of utmost importance. Wars must be paid for by savings. We must save in the consumption in commodities and the consumption of unproductive labor in order that we may divert our manhood to the army and to the shops. If by the reduction in consumption of labor and the commodities that it produces and the diversion of this saving to that labor and those commodities demanded by the war, we shall be able to fight to eternity. We can mortgage our future savings for a little while, but a piling up of mortgages is but a short step toward bankruptcy. Every atom that we save is available for subscription to Liberty bonds.

The whole of Europe has been engaged ever since the war began in the elimination of waste, the simplification of life, and the increase of its industrial capacity. When the war is over the consuming power of the world will be reduced by the loss of prosperity and man power, and we shall enter a period of competition without parallel in ferocity. After the war, we must maintain our foreign markets if our working people are to be employed. We shall be in no position to compete if we continue to live on the same basis of waste and extravagance on which we have lived hitherto. Simple, temperate living is a moral issue of the first order at any time, and any other basis of conduct during the war becomes a wrong against the interest of the country and the interest of democracy.

The impact of the food shortage of Europe has knocked at every door of the United States during the past three years. The prices of foodstuffs have nearly doubled, and the reverberations of Europe's increasing shortage would have thundered twice as loudly during the coming year even had we not entered the war, and it can now only be mitigated if we can exert a strong control and this in many directions.

We are today in an era of high prices. We must maintain prices at such a level as will stimulate production, for we are faced by a starving world and the value of a commodity to the hungry is greater than its price.

As a result of the world shortage of supplies, our consumers have suffered from speculation and extortion. While wages for some kinds of labor have increased with the rise in food prices, in others, it has been difficult to maintain our high standard of nutrition.

By the elimination of waste in all classes, by the reduction in the consumption of foodstuffs by the more fortunate, we shall increase our supplies not only for export but for home, and by increased supplies we can help in the amelioration of prices.

For Better Distribution.

Beyond this the duty has been laid upon the food administration to co-operate with the patriotic men in trades and commerce, that we may eliminate the evils which have grown into our system of distribution, that the burden may fall equitably upon all by restoration, so far as may be, of the normal course of trade. It is the purpose of the food administration to use its utmost power and the utmost ability that patriotism can assemble to ameliorate this situation to such a degree as may be possible.

The food administration is assembling the best expert advice in the country on home economics, on food utilization, on trade practices and trade wastes, and on the conduct of public eating places, and we shall outline from time to time detailed suggestions, which if honestly carried out by such individuals in the country, we believe will effect the result which we must attain. We are asking every home, every public eating place and many trades, to sign a pledge card to accept these directions, so far as their circumstances permit, and we are organizing various instrumentalities to ameliorate speculation. We are asking the men of the country who are not actually engaged in the handling of food to sign similar pledges that they shall see to it, so far as they are able, that these directions are followed. We are asking all who wish us well and who undertake our service to become actual members of the food administration, just as much volunteers in national service as we ourselves are, so that thus the food administration may not be composed of a small body of men in Washington and a small representation in each state, but may become a body of 50,000,000 people, devoted absolutely to the services of democracy. We hope to see the insignia of membership in every patriotic window in the country.

Autocracy finds its strength in its ability to impose organization by force from the top. The essence of democracy consists in the application of the initiative in its own people. If individualism cannot be so organized as to defend itself, then democracy is a faith which cannot stand. We are seeking to impose no organization from the top. We are asking the American people to organize from the bottom up, and this is the essence of democracy itself.

The call of patriotism, of humanity and of duty rings clear and insistent. We must heed it if we are to defend our ideals, maintain our form of government, and safeguard our future welfare.

GOODBY

By S. S. LEWIS.

r you the call of the bugle
ar you the roll of the drum,
our boys arm for struggle,
otice they willingly come?
le, how thoughtful their bear-

m is the glance of the eye,
to the field are repairing,—
ll, now, and bid them goodby.

m and from shop let us gath-

ommerce and gain let us rest,
and rivalry smother
ing forth the truest and best;
fling out the Star Spangled
ner
the free breeze let it fly,
g its fame and its honor
boys and bid them goodby.

v you are gallant defenders
y bright star in the folds
banner that never surrenders
ngs that a tyrant upholds;
cohorts of tyrants defying
field you will conquer or die
he banner that o'er you is
g,—
st you, we bid you goodby.

Though friends and your kindred
you're leaving,
And all the endearments of peace,
Fond hearts to you closely are cleav-
ing
With a love that never will cease,
And while with the tyrant contending
On their faith and devotion rely,
For with you their love they are send-
ing
And weep as they bid you goodby.

And though you may cross the wide
ocean,
On autocracy's trenches advance,
How grandly will swell your emotion
To see the fair lilies of France
Entwined with the folds of Old Glory
In union that never can die
While told is sweet Liberty's story,—
'Tis for her we bid you goodby.

Where autocracy's bayonets bristle,
Shells rain from humanity's foes,
By your side is old Scotia's thistle,
By your side is Albion's rose;
The shamrock of Erin there heeding
The down trodden Belgian's cry,—
You go to aid freedom now bleeding
And our prayers go with you. Good-
by.

S ALL TO EASE THE SUFFERING

s Uses No Part of War for Administration Expenses.

crease in Staff Since Year tal War Fund Subscrip- Paid In Is More Than $30,000,000.

ton.—Although the Ameri- oss has more than 700 sal- oyees in its headquarters gton, and the cost of con- affairs reaches a very e each month, absolutely contributed to the war d for administrative ex- ording to a statement is- nry P. Davidson, chairman council.

vidson announced that ave been appropriated for work by the war council 31, 1917. The total war iption paid in on August 1 to $30,037,116.13. Actual nts up to that date were 4.

of maintaining the office ton, it is explained, is met s of the Red Cross. On re were 2,517,412 members, om has contributed to the n, thus making it possi- ials to carry on their work o-date business way. The ssued says:

lous Growth in Year.

le the business of the Red ar ago there were 75 em- the Washington headquar- there are 700 paid em- 61 full-time volunteers. eces of mail come into headquarters every day, ust receive attention.

l-time volunteer workers ding in administering the he Red Cross during the the head of the largest pany in the world, a bank a railroad vice president ous men of influence and from all parts of the tes. The ability and en- hich has been placed free- lisposal of the Red Cross ation is one of the most remarkable features of this enterprise.

"Members of the war council and their staff assistants, together with many heads of departments created specially for war service, are serving without salary.

"In addition to the 61 volunteer officers or employees at headquarters giving their full time to the Red Cross without salary, the organization on July 15 had on its pay roll 43 officers or employees receiving salaries of $2,000 or more a year. Of the 43, 14 have been added since the appointment of the war council on May 10, one with a salary of $6,000, one at $4,500, one at $4,000, two at $3,000, one at $2,700, one at $2,500, three between $2,000 and $2,400, and four at $2,000.

Many Give Their Services.

"Aside from the officers and employees receiving salaries of $2,000 or above, all other paid employees at headquarters are clerks or messengers. Of the clerks 24 receive salaries in excess of $100 a month, 33 are paid $100 a month, and 607 are paid less than $100 a month. Many employees receive only nominal salaries, whereas they are accustomed to earn much more. This service is their contribution to the Red Cross. All administration and overhead expenses at headquarters are much more than met by dues from members of the Red Cross. Thus the war fund is and will continue to be available for actual relief work in Europe as well as in this country."

The statement says it is the earnest desire of the Red Cross that the American people, "to whom the Red Cross belongs, should know all about its acts and its affairs." Praise is given for the manner in which offerings have been made and it is noted that the task undertaken by the Red Cross to relieve suffering and distress is the most stupendous effort of the kind in the history of mankind.

"The accounts of the Red Cross," it is stated, "are regularly audited by the war department and an annual report is made to congress. But it is the purpose of the war council to take the people, day by day, as fully as possible into its confidence. Information as to Red Cross matters will accordingly be made public in great detail."

It is stated that the campaign for $100,000,000 resulted in subscriptions of about that sum. Final returns are not yet available, it is said.

HAS BUNGALOW ON WHEELS

Wisconsin Couple Travel 4,750 Miles in House Mounted on Motor Car Chassis.

Marysville, Ore.—Traveling in a "home on wheels," Mr. and Mrs. J. H. Basel of Milton Junction, Wis., arrived here recently on their way home.

Mr. and Mrs. Basel are comfortably quartered in a neat little house built on a motor car chassis. The house is 6 by 6 by 13 feet, contains a cooking gallery, lavatory, table, chairs and bed. There are three windows on each side of the house and one in the rear. The house is built of basswood and covered with canvas. The floor is covered with rugs and the windows curtained. They have traveled 4,750 miles in their nomadic home.

BOY SURVIVES SNAKE BITE

California Lad Walks Fourteen Miles to His Home After Rattler Struck Him.

Oroville, Cal.—Willie Kirkpatrick, young son of Henry Kirkpatrick of Mountain House, was brought to the Oroville hospital the other day suffering from a rattlesnake bite. The boy was bitten on the index finger by a big rattler as he was scrambling over some rocks in the French creek canyon while on a fishing trip.

After being bitten by the rattler the boy had to walk 14 miles to his home, where a doctor was summoned, so that it was about fourteen hours after the accident before medical aid was given.

Recently the lad was reported as doing well as could be expected, but that all danger from the poisoning was not past.

LONE AVIATOR SCATTERS HOST

Thrilling Air Battles in Recent Big Offensive in Flanders.

FIGHTS CLOSE TO THE EARTH

British Airman Swoops Down Low, Bombs Airdrome, Puts Machine Gun Out of Action and Disperses 200 Men.

British Headquarters in France and Belgium.—The work done by the British air service in the recent offensive in Flanders has not been surpassed in efficiency and spectacular features since the war began.

Many fights occurred between the rival pilots, but the Teutons were completely outclassed, both in numbers and skill, and were forced to retire at most points after losing six machines.

The majority of these air battles were at a height of 200 feet or less, and in at least one instance the two opposing pilots battled to within fifty feet of the ground, at which height the German sidestepped and crashed to the earth.

The British planes were under constant and heavy fire, particularly from rifles and machine guns, owing to the low altitude at which they were flying, but through all this hurricane of lead and steel all but three came safely. These are reported missing, and there is no indication of what befell them.

Wonderful heroism was displayed by the British airmen, who performed remarkable deeds. One typical instance will indicate the nature of the important work they carried out. A British aviator crossed the Ypres salient just as the infantry attack began at dawn.

One Man Attacks a Force.

For a time he patrolled the roads and canals, now and then running the gantlet of enemy fire at a height of thirty feet in order to obtain information for the guidance of the infantry in their advance. During this patrol work he came to a German airdrome. Owing to the early hour only one enemy was stirring outside the shed, and he paused in his ablutions only long enough to satisfy himself that the plane above him evidently was one of his own.

The British airman circled low and dropped a bomb squarely on one of the sheds. This brought numbers of Germans tumbling in a panic from the buildings. He turned his machine gun on them, and, circling about the field, bombed two other sheds with disastrous effect. All the time he kept up a steady stream of machine-gun fire at the Germans, a number of whom were killed or wounded.

Alone, Disperses 200 Men.

The Germans finally got a machine gun into action against him, but he dived and at twenty feet silenced it with his own gun. Having put their gun out of action, he circled the field, firing with his machine gun through the doors of buildings at the huddled enemy within. At one time his machine actually touched the ground.

Leaving the airdrome, the British aviator attacked two German mounted officers and put them to flight. A little later he encountered a column of 200 troops and swept along the line, with his gun working steadily. The entire column was dispersed and fled by devious ways to cover, leaving numbers of their comrades lying in the road.

Two German battle planes appeared on the scene and the Briton engaged them both, sending one to earth and putting the other to flight. He pursued the fleeing plane, but it was soon lost in the clouds.

Pumps Lead Into Troop Train.

In the meantime a large body of German soldiers had gathered around the machine which had been brought down. The British flying man came sweeping back from the mists in which he had hidden and accounted for several of their number with his machine gun.

His next objective was a troop train. He traveled along its entire length, pumping bullets into the crowded cars. Later he did valuable scouting work over the enemy lines.

Numerous instances are related of pilots charging the anti-aircraft gunners and machine-gun operators at a height of thirty or forty feet and silencing the guns. Pistol duels between the British aviators and the German infantry were not uncommon occurrences. In one instance a young aviator, in a burst of chivalry, deliberately stopped his machine gun when a German officer drew his pistol and began shooting at him and engaged the enemy with his own pistol, apparently feeling that he had no right to take an unfair advantage of his opponent. The aviator's pistol was sufficient, however.

Prefers Tent to Hotel.

Cleveland, O.—Fred Edman of Memphis jingled $2,000 in his pants pocket here the other day, but it didn't seem to alter his method of living much. Edman piloted Colonel Armstrong to victory in the Edwards pacing stake at the opening day of the grand circuit meet. But, though Edman is making a pile of money, he lives the simple life in a tent with Mrs. Edman. He carries that tent everywhere. The only things he hates are hotels.

GIRL OF 14 SOLDIER'S WIFE

While Her Husband Fights in France Young Bride Will Go to School in This Country.

A fourteen-year-old schoolgirl became a soldier's wife in Brooklyn recently, thus following the example of her mother, who became the bride of one of Uncle Sam's men in khaki 14 months ago.

Mattie Lee Hudsbeth of Douglas, Ariz., was the latest bride, says the Brooklyn Eagle. The soldier boy who became her husband is David Eugene Henry of Spring, Tex. The bridegroom is only twenty-two, and a member of the Twenty-second infantry, now stationed at Fort Hamilton.

The girl's stepfather went abroad with General Pershing, and is now "somewhere in France." His wife planned to join him and come East. While waiting passports here her daughter met Henry, with whom she became acquainted in Arizona, two years ago.

While the bride's mother is absent in France her daughter will remain here and attend school.

SKIN TORTURES

That Itch, Burn and Scale Quickly Relieved by Cuticura—Trial Free.

It takes about ten minutes to prove that a hot bath with Cuticura Soap followed by gentle applications of Cuticura Ointment will afford relief and point to speedy healment of eczemas, itchings and irritations. They are ideal for all toilet purposes.

What Ailed Smith.

A plainly dressed man, who introduced himself as Mr. John Smith, walked into a doctor's office in a Texas town, and, having explained his symptoms, asked the doctor how long it would take to cure him. The doctor, who had treated the visitor with every possible courtesy, replied:

"You will require careful treatment under my personal supervision for about two months before you are able to resume your labors in the bank."

"Doctor, you are fooling yourself. I am not Smith the banker, but Smith, the street car driver."

"Is that so? Well, my good fellow, I don't see what you came to see me for."

When a fool doesn't act like a fool he fools a lot of other people.

One-Sided Recognition.

They passed on the street without speaking, but their eyes had mutual recognition and challenge. She was accompanied by a female friend, and he had a male companion. When they had passed the girl said:

"That was poor Jack Jurgens. He didn't speak, but you noticed his look, didn't you? Poor boy, it hurts me to think how he has never got over my refusal to marry him. Of course he was all broken up at the time, but I thought he would soon get over it. He's thinner, isn't he? I do hope that he hasn't plunged into dissipation. He couldn't trust himself to speak, could he? Oh, dear!"

And the man was saying:

"Did you see how that dame gave me the eye? I suppose I should have spoken to her, because I can't help thinking I've met her somewhere—her face is familiar, but I can't place her."—Cleveland Plain Dealer.

Same Old Lectures.

On a certain occasion Professor Brander Matthews of Columbia university, speaking jokingly of his age, said he trusted that he was not so old that the students could play on him the trick he once saw tried on a senior professor in his own college days.

"Professor Blank," he said, "was our most venerable instructor, and he could be just a little irritable at times. Once, noticing that a member of his class who sat right under his eye never took any notes or paid the slightest attention to his lectures, he stopped abruptly and demanded:

" 'See here, young man, what do you mean by coming into my classroom day after day and never taking notes?'

" 'I have my father's,' was the student's complacent reply."—Youth's Companion.

Once Was Enough.

"My wife never rouses me up to cut the grass before breakfast."

"Is that so?"

"Yes; she tried it once, and I was so sleepy that I ran the lawn mower all over her flower beds."

Knew Father's Weakness.

Johnny B——, who has seen eight summers go by, not very long ago developed a fondness for playing "hookey" from school. After two or three offenses of this kind he was taken to task by his teacher.

"Johnny," she said, "the next time you are absent I want you to bring me an excuse from your father telling me why you were not here."

"I don't want to bring any excuse from father," protested the boy.

"Why not?" asked the teacher, her suspicion plain.

" 'Cause father isn't any good at making excuses. Mother finds him out every time."—Rehoboth Sunday Herald.

Msnutes of Red Cross Meeting.

Continued from 6th column on first page

three be appointed to select the temporary officers. This motion was seconded by Prof. A. O. Halvorson and duly carried, the committee being Mrs. J Payne, Prof. A. O. Halvorson and H. B. Rockne.

The report of the nominating committee endorsing Prof. A, 1O. Halvorson for chairman, Mr. H. W. Smith for secretary and Mr. H. B. Rockne for treasurer, was on motion duly seconded, carried, placing these temporary officers in charge.

It was then decided that the branch represent the township of Goodridge and that the name be the Goodridge Branch of the Pennington County Chapter of the American Red Cross.

No further business appearing the meeting adjourned and the women asked several questions of the representatives from Thief River Falls relative to the work being done there.

Monday evening the temporary officers of the local branch met at the Farmers State Bank and the following committee was appointed to solicit memberships in the village;

H. B. Rockne, Mrs. Jay Payne, Mrs. M. G. Thoreson, Mrs. A. O. Halvorson Mrs. R. H. McDonald, Mrs. Carl Christianson, Miss Florence Richards and Mrs. O. S. Kirklie.

So far the work of the soliciting is very gratifying, for up to this time 33 members have been secured. The Red Cross, as everyone knows, is doing good work and it is up to everybody to do their bit by helping this worthy cause along.

The following is a list of those who have joined.

Goodridge Plays Great Ball.

Goodridge played great ball last Sunday when they defeated Grygla by a score of 9 to 10 in an eleven inning game. Dutch pitched good ball, getting 23 strike outs against Grygla's two pitchers 22. They having pitcher Olson of Newfolden, who defeated Goodridge at that place last year, but last Sunday we got even with him.

The main feature of the game was when Dutch knocked two home runs off him, one in the ninth inning, which tied the score and one in the eleventh which was the winning run. Pickles Tvedt also played a star game at second, getting three put outs in one inning, handling all in an errorless manner. Grandpa Race who can play any place you put him, played an excellent game at first, playing that initial sack as an old position. Sammie, our little star third baseman is right there when it comes to digging them out of the dirt, scooping them up in league fashion. Our short stop McDonald is all over, once on third and then on second, making air tight plays and leaves nothing undone that comes in his path. Tobe, our iron backstop is right there to handle the spitter and driving the ball over to second in bullet fashion and catching a runner from first to second. Also demonstrated himself by knocking in three men with one of his three base hits. Jack Tvedt our left fielder who was shifted to second was hit by a pitched ball in the fore part of the game, was out for a couple of innings, but came back strong as a base runner for little Pickles, during the rest of the game. We must leave it to him as the fleetest foot on the diamond. Shorty is right there when a little bit is needed, and you can count on him as a pinch hitter some day. Abe, you old Tyrus Cobb olds every thing that comes into center field, and has a pretty whip that our team can be proud of. Nothing goes from third home when he handles the pill. Left field was kind of a crippled place, as Pickles and Olson had that position. Pickles holding that position in the fore part of the game but was taken to second. Olson playing a stiff game and making a sensational catch. Althrough it was the fastest game played here this season.

Goodridge will play Newfolden next Sunday on the home diamond.

September 1st. Dedication Day.

Saturday, September 1, has been officially designated as "Dedication Day", a day to be devoted to the honoring of all the men conscripted in the first draft.

Pennington county will on that occasion pay its respects to the brave men who go to represent this county in the European war. There are to be 89 of them, and they come from all parts of the county as well as from the cities. They are "honored" men, indeed.

This is to be a celebration in which every citizen should take part, and the committees named by the Commercial Club having the matter in hand ask that everyone do their share in making the day one that will be remembered for years to come. It should be the biggest day this county has ever known.

Speakers of reputation thruout state the and elsewhere are now being sought for the occasion. The celebration will be staged at Squaw Point, just across the river from Thief River Falls. The spot was chosen as being about the most central in the county, and easy of access to every inhabitant. There is plenty of room for everyone.

The program of the day will include a big parade from down town to the grounds. A basket picnic at the grounds with a special banquet table for the guests and speakers, will follow the arrival of the people at Squaw Point. Then will come speeches and a general farewell reception to the departing men by all present.

The day will be observed thruout the state as a holiday, following a proclamation by the governor and the State Safety Board. The stores of Thief River Falls will be closed only from twelve o'clock at noon till five, thus giving outsiders a chance to make their purchases while in the city.

BIG RECREATION PROGRAM.

President Wilson has said that he favors the continuance of athletics and sport events during the progress of the war; that these things tend to make strong and healthy men. The program of sporting events at the Minnesota State Fair, Sept. 3 to 8, will this year be more varied and much more attractive than ever. Do not fail to attend the speed contests between horses and also the dazzling automobile races.

Frank Hirn, of the firm of Law & Hirn, of Minneapolis, who have the western horses here for sale, arrived here Tuesday evening to visit Oscar Douglass who has charge of the horses here.

The base ball dance given here Saturday evening was attended by a record breaking crowd. Excellent music was furnished by Angels Orchestra of Thief River Falls. Every one present report that they had the time of their lives.

NOTICE.

Farmers are hereby requested to cut the weeds and brush and haul the stones away from the road and ditch side adjoining their land, within the town of Goodridge, by Oct. 1st, 1917, otherwise the town will do tse work and charge it against the land.

By order of Town Board,
Nicoly Urdahl, Clerk.

NOTICE.

Farmers are hereby requested to cut the weeds and brush and haul the stones away from the road and ditch side adjoining their land, within the town of Reiner, by Oct. 1st., 1917, otherwise the town will do the work and charge it against the land.

By order of Town Board
T. Morken, Clerk

Notice.

Bids will be received up to 1 o'clock p. m. on Sept. 1st 1917, for the transportation of the children from and to the schoolhouse, one for over the east and one for over the west route.

Successful bidder is required to furnish a bond of $300.00.

Board reserves the right to reject any and all bids.

Nick Bundhund, Clerk.

Hay Baler Arrives.

The hay baler for Johnson and Tolley arrived here Tuesday and work of getting it in shape has already commenced. They will start baling soon and it is their intention to buy all the loose hay they can secure.

To Put In New Side Track.

Daniel Shaw, H. W. Protzeller and Engineer George Walker were up here Tuesday running thru stakes for a new side track which will be built here soon. It is the intention of the railway company to build a hay shed also, work on which will be commenced right away. It is expected that a large quanity of hay will be shipped from here this fall and the railway company is putting in this hay shed and new side track to take care of this extra business.

Reiner Shipping Assn.

Doing Good Work.

Manager McEnelly of the Reiner Shipping Assn. returned Tuesday morning from St. Paul where he went Saturday with two cars of stock for the association. He reports that the market was good. Farmers shipping thru an association of this kind reap the benefits of the profits instead of it going into one mans pocket as is the case when they sell direct to some stockbuyer who has no interests in the community. By shipping thru a Farmers Shipping Assn. like the Reiner Assn. the profits stay right in the community instead of being taken out of the country by private individuals. Stick by the association and when you have some stock to ship call up Manager McEnelly.

One Year Of High School.

First year of High School studies will be taught at the local school this year. This will give those pupils who have completed their eight grade course an opportunity to take advanced work. All pupils who passed the eight grade last year should attend this year and take high school studies. The more learning you get the better prepared you are to secure good positions later on. Employers now a days are looking for young men and women with a good education and it is your fault if you do not get it for you have the opportunity right here in your own town to secure first year of High School training. Parents it is your duty, if you have children who have passed thru the eight grade to see that they attend the local school and take the first year of high school studies.

Public Sale.

A public sale of Pure Bred and Grade Cattle, Sheep and Hogs, will be held in conjunction with the Red Lake County Fair, at Red Lake Falls, Minn., Sept. 6th 1917. This sale will carry the consignments of the best breeders of Red Lake and surrounding counties, and sale will include animals of both sexes, in both Pure Bred and grade, Short Horn, Holstein, Guernsey, Jersey, Aberdeen Angus and Hereford cattle, Yorkshire, Duroc, Jersey and Poland China hogs, and Shropshire sheep.

10 pure bred short horn bulls, 15 pure bred shorthorn cows and heifers of beef and dairy type, 5 pure bred Holstein Bulls, 15 pure bred and grade holstein cows and heifers, 3 pure bred Aberdeen Angus bulls, 2 pure bred Jersey bulls, 20 good milch and breeding cows, 20 breeding sheep, 50 pure bred brood sows, gilts, and young boars; all animals offered will be on exhibition at fair and Calf show, Sept. 4th, 5th and 6th, and will all be judged before being offered.

For particulars write Frank Jeffers, Supt., Red Lake Falls, Minn.

Feed For Stock.

It is a fairly safe propheay that feeds for livestock are going to be both scarce and expensive the coming winter. This will be especially true in Northern Minnesota.

Now that feeding time is at hand attention should be called to the fact that the oats straw this year in the Red River Valley is especially good. It is clean, bright and free from rust and much of it is cut on the green side. This kind of straw makes a most excellent Feed. Every stack of oats straw should be saved this fall and either fed on the farm or else be baled and shipped to neighboring states. This will be a safe and profitable business this year and is besides in line with our duty to conserve food stuffs.

Wm. Dietrich,
N. W. Experiment Station.

Mr. and Mrs. Carl Habedank were callers at the D. Dau home Sunday.

Bennie Habedank was a caller at Henry Roller's Sunday.

Mr. and Mrs. Chas. Struble were out berrie picking Sunday, and had good luck.

Bennie Habedank and G. Benson made a trip to Malcolm Monday morning.

Bennie Habedank made a flying trip to Warren for examination Thursday morning. He returned saying that he was one of Uncle Sam's fighting boys now.

Mr. and Mrs. Nick Bundhund and family of Goodridge were callers at the C. L. Wayne home Friday evening.

Della Roller and her sister Bessie called on Mrs. C. L. Wayne Saturday afternoon.

O. P. Nelson was a Thief River Falls visitor Saturday morning.

A Special Invitation.

The vigorous young manhood of the State of Minnesota, a certain quota from each county, have been selected under a law enacted by the nation represented in Congress, who for a time, abandon their usual occupations and consecrate their efforts, and if need be their lives, in defense of those ideals which have made America the haven and refuge for liberty loving people.

These young men, soon probably to be followed by their associates, are entitled to full honor and recognition. Their departure from their home county to prepare themselves for the ordeal of meeting the country's enemies where such enemies are to be found, should be fittingly celebrated.

In accordance therewith the people of Thief River Falls and of Pennington County have deemed it wise to tender a reception to these departing heroes, their families and friends, at Squaw Point on Saturday, September 1, designated by Governor J. A. A. Burnquist as "Dedication Day." To you, therefore, is extended a most cordial invitation to be present on that occasion as one of the "honored Guests."

The speakers of the day will be ex-congressman Frank M. Eddy and Judge Andrew Grindeland.

Whereas: In view of the fact that the State Public Safety Commission has designated Saturday, September 1, as "Dedication Day" in honor of the "boys" who are going to the front; and,

Whereas; Our Governor J. A. A. Burnquist, has pubicly approved of this action and has requested that all the people of Minnesota shall observe this day as a public holiday; now,

Therefore: I, H. A. Halvorson mayor of the Village of Goodridge, call upon all those to whom this comes in touch to meet with the people assembled from various parts of the county according to the program prepared, and to lay aside all work from the hours of twelve o'clock in the forenoon till six o'clock in the afternoon, thereby honoring the splendid band of young men who go now and those who may go later on subsequent calls, that our peace, and prosperity and honor may be sustained.

Issued this the twenty-seventh day of August, 1917, under my hand and seal.

(Signed) H. A. Halvorson, Mayor.

Goodridge Defeats

Combination Team.

New Folden motored down here Sunday with their combination team with the intention of beating Goodridge. Their team consisted of Halma, Holt, Strandquist and New Folden. But were badly mistaken, at the end of the eight and one-half innings, the score showed that the local boys were the victors by a score of 11 to 12.

Our boys being up to a dance Saturday night played listless ball, but tightened up in pinches and made things real interesting during the game with exception of one inning, when on account of a few errors among the boys and Dutch being somewhat under the weather, let a couple of fingles, giving their opponents the majority of their scores at this time.

Tobe again was master behind the bat and played alround his opponent.

Dutch pitched good ball, altho he was found for a few safties but kept them well scattered and tightened up in pinches.

Grandpa Race played a star first and dug a few nasty slickers out of the dirt

Pickles, our wee star second bagger, played excellent, tapping one of their fellows on the head with the ball as a gentle reminder that he had better play real ball.

Mac, our speedy short stop, scooped them up in great style and was star with the bat.

Sambo, our little third baseman, played all around his opponent, "Gum" Olson, holding third in star fashion.

Shorty made a couple of star catches in right fied in league manner.

Center field was taken care of perfectly by Abe, a second Ty Cobb.

Our left field was held in excellent manner.

Palmer, our official umpire, made his decisions without fear or favor to either side.

PLANS ARE READY FOR MOBILIZATION OF DRAFTED ARMY

FIVE PER CENT OF QUOTAS OF CITIZEN MANHOOD IN WAR TO BE ON WAY TO CANTONMENTS BY SEPTEMBER 5.

MEN CANNOT TAKE ANY BAGGAGE WITH THEM

First Men Called to Be Selected Because of Special Qualifications Through Previous Experience or Ability to Cook—Details All Arranged.

Washington, Aug. 28.—America's first mobilization of her citizen manhood for war will begin within 10 days.

War department officials have detailed at length each step of the vast process which will bring 687,000 men to the colors before it is complete.

The first move will be made early this week. Each of the approximately 4,500 local boards will notify 5 per cent of their quota to present themselves Monday, September 3, or Tuesday, September 4, for military service. The men thus called will be selected from among the quota called in the first draft because of their special qualifications through previous military service or their ability to cook.

In accordance with instructions, they will present themselves at the office of the local board of their district. There they will be given instructions when and where to appear for entrainment to the mobilization camp to which men from their locality are assigned. In addition they will be handed railroad tickets and meal tickets.

To Travel in Day Coaches.

They will travel in day coaches, as the mobilization camps are so located that there will be few long hauls, except in the West and Southwest.

Army officials have estimated fully 90 per cent of the men passed for service as physically fit by the local boards would be accepted after examination at the mobilization camps by army surgeons. This means that approximately 68,700 men will be sent home from the mobilization camps. Local boards will be ordered to call up new men immediately to fill each such vacancy in their jurisdiction.

No Baggage to Take.

All the boards will have to do is to instruct the men what train to take and give them their tickets. A representative of the board will be at the station to see that the men ordered out report and are entrained. If a man fails to show up a military guard will be sent after him and he will be arrested as a deserter.

The men will be permitted to take with them these things:

Extra underwear, toothbrush, tooth paste, comb and brush, fresh handkerchiefs. They will not be allowed to have any more baggage; they may bring no food with them.

September 5 the movement will be on.

THREE SPECIAL TRAINS CARRY SOLDIERS SOUTH

Third Minnesota Infantry Leaves St. Paul for Training Camp at Deming, New Mexico.

St. Paul, Aug. 28.—The farewell greetings of members of the Third Minnesota infantry to St. Paul were given as they departed from the Union station for Camp Cody, Deming, N. M., where they will undergo a strenuous training preparatory to being placed on the battle lines "somewhere in France."

Three special trains carried the companies out of St. Paul. It is expected that it will take four days to reach the camps.

Senate Delays War Tax Debate.

Washington, Aug. 26.—After a brief session Saturday the senate recessed until Monday without action or debate on the war tax bill. Absence of senators, conferences by both factions in the contest over raising income and war profits tax rates, and reluctance to spend the day in perfunctory speech making induced leaders to agree to the recess.

Buenos Aires Catholics for Peace Plan.

Buenos Aires, Aug. 28—The Catholic societies of Buenos Aires yesterday held a great demonstration in favor of acceptance by the belligerent powers of the peace proposals of Pope Benedict.

U. S. Airman Downs German.

On the French Front, Aug. 28.—Sergeant Walter Lovell, of the Lafayette flying squadron, forced a German aviator to land after a thrilling air fight yesterday.

Chicago Wheat Pit Is Closed.

Chicago, Aug. 28.—The wheat pit of the Chicago Board of Trade has been closed. The action of the directors in closing the pit was due to request by Herbert C. Hoover, food administrator, that trading in wheat futures cease at least for the period of the war. The closing of the pit was without particular incident. Most of the traders expressed little regret at the passing of the pit and a number were of the opinion that it would be well if trading in futures should never be resumed.

MANY LABOR CHIEFS COMING

LEADERS TO ATTEND BIG CONFERENCE IN MILL CITY.

Special Trains From Both Coasts to Bring Noted Labor Men to Great Gathering.

Minneapolis, Aug. 29.—Special trains from the Atlantic and Pacific coasts will carry labor leaders to Minneapolis for the conference of the American Alliance of Labor and Democracy to be held here starting September 5.

Labor leaders, headed by Samuel Gompers, president of the American Federation of Labor, are coming to hear him give the lie to the traitorous utterances of the so-called People's Council and Workmen's Council, which charge that the working people have no interest in the war.

"The Red, White and Blue" labor special which will carry delegates from the East and Middle West to the conference will leave New York city Sunday, September 2. Another special will start from San Francisco, going through Salt Lake City, Denver and Omaha.

Noted Men Coming.

Samuel Gompers, Charles Edward Russell, member of the United States mission to Russia; John Spargo, one of the Socialist leaders who left their party because of its pro-German leanings; Rabbi Stephen Wise of New York, Frank P. Walsh, chairman of the industrial relations committee, and Frank Morrison, vice president of the American Federation of Labor, are among those who will speak here. They will all come on the special train from the East.

The conference here will be held in the Auditorium, September 5, 6 and 7. Governor Burnquist will give the address of welcome.

WILSON PLEDGES AID IN MESSAGE TO RUSSIANS

Sends Assurances to Russian National Council Assembly at Moscow By Cable.

Washington, Aug. 28.—President Wilson sent to the members of the National Council assembly at Moscow assurances that this government is willing to extend "every material and moral assistance" to the government of Russia.

The message cabled by President Wilson follows:

"I take the liberty to send to the members of the great council now meeting in Moscow the cordial greetings of their friends, the people of the United States, to express their confidence in the ultimate triumph of ideals of democracy and self-government against all enemies within and without and to give their renewed assurance of every material and moral assistance they can extend to the government of Russia in the promotion of the common cause in which the two nations are unselfishly united.

"WOODROW WILSON."

HOOVER IS NOT URGING $1.65 AS PRICE OF WHEAT

Food Administrator Denies Reports That He Is in Any Way Trying to Influence Price-Fixing Committee.

Washington, Aug. 28.—The food administration denied reports that Herbert Hoover is attempting to influence the price-fixing committee headed by Dr. H. A. Garfield to put a price of $1.65 on the 1917 crop of wheat and gave out copies of a telegram sent by Mr. Hoover to a North Dakota newspaper which declared the food administrator was offering no suggestions as to prices.

NECESSARY FOOD IS SCARCE

Germans Facing Serious Shortage of Supplies, Says American.

An Atlantic Port, Aug. 28.—The people of Germany are unquestionably facing a serious shortage of necessary food and the maximum efforts of the authorities are required to make what supplies they have go around, according to William Bartholomew, former representative of an American oil company at Hamburg who arrived here on a Danish steamship having left Germany July 30.

Trouble Feared in Southern Coal Mines.

Lexington, Ky., Aug. 28.—Trouble is feared in the Kentucky and Tennessee coal district today when an effort will be made to reopen some of the mines with strikebreakers. Seventeen thousand men are on strike in this region and government conciliators so far have been unable to settle the trouble.

Officers of 88th Division Report.

Camp Dodge, Des Moines, Iowa, Aug. 28.—(Special.)—More than 200 major officers of the 88th division of the national army, which will be trained at Camp Dodge, have reported for service to Maj. Gen. E. H. Plummer, divisional commander.

German Factories In Neutral Lands.

Copenhagen, Aug. 28.—Germany is believed to be making preparations for the establishment in Denmark and Sweden of a large number of branches of well known German factories and industrial firms, says Svenska Dagbladet. These plans if carried out would be detrimental to neutral trade, since the countries of the Allies would be naturally suspicious of all neutral firms which might be serving German interests. The paper suggests a combination of industry and finance to offset this German influence.

PRESIDENT TAKES FULL CONTROL OF ALL EXPORTATION

UNITED STATES TAKES UP BURDEN OF PREVENTING TRADE WITH GERMANY FROM BRITISH.

WILL HOLD NEUTRALS TO BARE NECESSITIES

All Shipments Which May in Any Way Be Diverted to Enemy Are to Be Tightened up by Administration—No Aid Directly or Indirectly.

Washington, Aug. 29. — President Wilson has tightened the government control of exports by issuing an order forbidding the shipment of any goods to European neutral countries except under license and by extending the lists for which license is required in shipments to the allies and neutrals other than European countries to include cotton, all meats, sugar and most of America's other export commodities.

In a statement accompanying his proclamation the President said one of the first intentions of the government would be to see that no American products were made the occasion of benefit to the enemy, either directly or indirectly.

Officials interpreted the order as forecasting a vigorous use of the export control as a war weapon and a policy of the strictest ration of countries contiguous to Germany.

Exports to Germany Stopped.

Exports to Germany and her allies also are formally prohibited by the President's order and this is understood to mean that the export control is about to supersede the British system of giving letters of assurance for American cargoes. Up to now there has been nothing except the British blockade to prevent the shipment of American goods to Germany.

The order in this respect achieves one of the purposes sought in the trading with the enemy bill pending in Congress. Coin, bullion, currency and evidence of indebtedness are placed under export license restrictions to European neutrals whenever regulations governing their export have been promulgated by the Secretary of the Treasury.

Authority Transferred.

The President's order contains the first formal announcement of the transfer of administration of the export control from the Department of Commerce to the Export Administrative board, of which Vance McCormick is chairman. When the administrative board made the fact public a few days ago, it was explained that the action was taken to facilitate the issuance of licenses.

WILSON ASKS RULING ON FOOD CONTROL ACT

Seeks Opinion of Attorney-General Gregory in Defining Powers for Keeping Prices Down.

Washington, Aug. 29.—An interpretation of existing laws which will define clearly the government's power to keep war prices down, has been asked of Attorney General Gregory by President Wilson. The President particularly wishes to know how far the government can go under the food control and the national defense acts.

The defense act authorized the executive in time of war or other national emergency to commandeer supplis at fair prices. Doubt, however, existed as to whether the law vests in him power to force producers to sell to the Allies, and to the general public at the same figures obtained by the government.

$3 WHEAT IS MINIMUM DEMANDED BY FARMERS

Northwest Growers Hold Conference and Present Figures to Show Price Gives Profit of Only 10 Per Cent.

St. Paul, Aug. 28.—A government fixed minimum price of $3 a bushel for No. 1 Northern wheat, other grades to be priced on a differential not exceeding four cents a bushel is urged in a resolution adopted by representatives of the farmers of Minnesota, North Dakota and South Dakota, in conference at the state capitol on the call of Governor J. A. A. Burnquist. The resolution was sent by telegraph to Chairman H. A. Garfield of the federal price-fixing committee, and a delegation of three was selected to go to Washington to support it.

Idle Miners Walk Butte Streets.

Butte, Mont., Aug. 28.—Butte's streets are crowded with thousands of miners who are idle because of the shut down of copper mines, made necessary by the closing of the Washoe smelting plant of the Anaconda company at Anaconda, when of 3,000 men employed on the day shift only 110 reported for work. Indications are that the independent mines of the district which did not shut down will be compelled to cease operations soon. There is a belief that the machinists union will declare a strike.

AMERICAN SHIP MAKES SMOKE SCREEN

One of the vessels of the Atlantic fleet making a screen of thick black smoke that conceals it from the observation of enemy ships.

SAYS CROCKERLAND IS MYTH

EXPLORER MacMILLAN ASSERTS PLACE DOES NOT EXIST.

Returning Home From Years' Stay in Polar Regions Contends that Mirage Deceived Peary's Party.

Sydney, N. S., Aug. 28.—Donald MacMillan's Arctic exploration expedition has arrived on the relief steamer Neptune after four years spent in the polar regions. He was one of Rear Admiral Peary's lieutenants on his successful dash for the North pole.

MacMillan confirmed previous dispatches from him that there was no Crockerland such as had been reported by Peary. Peary's mistake was due to a mirage so real that the MacMillan party had been deceived by it for four days, he said.

The first objective of the MacMillan expedition, which was organized under the auspices of the American Museum of Natural History and the American Geographical society, with the co-operation of the University of Illinois, was to prove or disprove the existence of Peary's Crockerland, which has been a prolific source of dispute among geographers and scientists. The next purpose of the expedition was to conduct a survey of the Greenland ice cap.

WILSON OPPOSES DRAFT OF HEADS OF FAMILIES

President In Letter to Secretary Baker Says Single Men Should Be Chosen Wherever Possible.

Washington, Aug. 27.—Drafting into the new national army married men who are heads of families should be avoided, if possible, says President Wilson in a letter to N. D. Baker, secretary of war. The president says further that single men should be selected wherever possible.

In his letter the president said the only exception to this rule should be in the case of a man seeking exemption or his dependents having sufficient income to supply the needs of those dependents.

The president's action is expected to result in a modification of the rules recently promulgated by Provost Marshal General E. H. Crowder on the subject.

CATHOLICS PLEDGE LOYALTY

Head of U. S. Federation Is Speaker at Kansas City.

Kansas City, Aug. 28.—Catholics of America will support the cause of their country "with undeviating loyalty" throughout the war with the Teuton empires. That pledge was given here by John Whalen of New York, in his annual address as president before the opening session of the convention of the American Federation of Catholic societies.

I. W. W. IS HELD FOR LYNCHING

Arrested in Connection with Death of Frank H. Little.

Butte, Aug. 28.—It has become known that C. A. McCarthy, alias Albright, local executive board member of the Industrial Workers of the World, has been arrested in connection with the recent lynching here of Frank H. Little, national executive board member of the I. W. W.

KAISER HAS EYES ON U. S.; GOVERNMENT HAS PROOF

Washington, Aug. 28.—Evidence which made American government officials believe Germany planned to war on the United States after defeating France and England is in the hands of the administration, the State department announces.

Montana Fires Driven By Gale.

Missoula, Mont., Aug. 28.—One hundred western Montana forest fires, driven by a gale, are gaining headway in the mountain valleys about Missoula. District Forester Robert Rutledge makes no attempt to conceal his alarm. "There is no telling what may follow," he said. The fact that the wind is blowing out of the east will save Lola Hot Springs and the small towns in the lower Bitter Root valley. But the wind may bring the Blackfoot fires back from the upper end of the Blackfoot and Clearwater valleys.

URGE PROBE BOARD FOR I. W. W.

PRESIDENT ASKED TO CREATE SPECIAL BODY.

Requests Special Commission to Investigate Disorders Such as Have Occurred in West.

Washington, Aug. 29.—Creation of a special federal commission to investigate disorders such as those resulting from the I. W. W. activities in the West has been recommended to President Wilson by the Council of National Defense.

The proposed commission would have the authority and support of the President to investigate and report on agitations and labor disturbances. Creation of the commission was originally recommended by Samuel Gompers.

Would Remove Cause.

"It is felt," said a defense council statement, "that the suggested commission, going from one state to another representing the national government, perhaps meeting in each instance the governors of the states with a view to lending sympathetic counsel to the state governments and dealing both with employers and employes in a conciliatory spirit, would go far toward discovering the real cause of this particular manifestation of social discontent and assist further in the adjustment of the whole industrial situation."

NO PLANS UNDER WAY TO FIX BEEF OR PORK PRICE

Hoover States Emphatically no Foundation for Report of Intention to Make Prices on Beef or Pork.

Chicago, Aug. 28.—Herbert C. Hoover has issued the following official statement after meeting the packers and editors of farm papers.

"Mr. Hoover wishes to state emphatically that there is no foundation for any statement that the food administration has any intention to fix prices of beef or pork products. The administration hopes to develop by discussion with representative committees of the hog producers, the cattle producers, the commission men and the packers greater stabilization of the industry during the war and in such a way as to encourage production, to eliminate speculative profits and risks so far as may be and by so doing to protect the consumer."

34 NEGRO SOLDIERS ARE UNDER CHARGE OF MURDER

First Move of State to Punish Colored Troops as Result of Riot at Houston, Texas.

Houston, Texas, Aug. 27. — Blanket charges of murder have been filed by District Attorney John Crocker against 34 negro soldiers of the Twenty-fourth infantry held in the county jail as result of the trouble which ended with the death of 17 persons, four of them city police officers. This was the first move indicative of an attempt by the state to retain custody of the soldiers rather than to turn them over to the army for punishment.

WAR COSTS MILLION AN HOUR

Two-thirds of U. S. Outlay Represented by Loans to Allies.

Washington, Aug. 26.—War expenditures of the United States, including allied loans, have mounted during August to more than $24,000,000 every 24 hours, according to figures in a treasury statement.

Two-thirds of the sum is represented by advances to the Allies. The United States has been spending daily during August for its own needs an average of $8,088,652.

Northwest Guard to Charlotte.

Washington, Aug. 25.—The Forty-first National guard division, comprising troops from Washington, Oregon, Montana, Idaho and Wyoming, has been ordered trained at Camp Greene, Charlotte, N. C. Camp Fremont, at Palo Alto, Cal., has been abandoned because the California state health authorities have decided that a latrine sewage system such as the War department proposed would be injurious to the health of the community. Secretary Baker said the government could not build a new sewer.

45 OFFICERS FOR MINNESOTA HOME GUARD ARE NAMED

NEW PROMOTIONS SIGNED BY GOVERNOR BURNQUIST ARE MADE PUBLIC BY MAJOR SEEBACH.

ORGANIZER TO TRAINING CAMP

Seebach Goes to Fort Snelling and Is Succeeded by Captain W. F. Rhinow, Military Secretary to Governor Burnquist.

Commissions for 45 officers in the Minnesota Home Guard have been signed by Governor Burnquist and made public by Major Oscar Seebach, Home Guard organizer of the State Public Safety commission. The list follows:

Duluth—D company, Third battalion: Second lieutenant, Donald McD. Westbrook.

Hibbing—B company, Fourth battalion: First lieutenant, George D. Healy, second lieutenant, Albert St. Vincent.

Grand Rapids—D company, Fourth battalion: Captain, Hubert D. Powers; first lieutenant, Edward J. Luther; second lieutenant, Carl J. Biler.

International Falls — E company, Fourth battalion: Captain, Joseph J. Lloyd; first lieutenant, Allison C. Gorham; second lieutenant, Thomas L. McManamin.

Fourth battalion: First lieutenant and Surgeon, Dr. Jonner P. Chance of International Falls.

Red Wing—A company, Fifth battalion: First lieutenant, Carl J. Heglund; second lieutenant, Alfred G. Rehder.

Fairmont—B company, Sixth battalion: First lieutenant, Earnest N. Chute; second lieutenant, Emil C. Bellina.

Worthington—D company, Sixth battalion: First lieutenant, David O. Tripp; second lieutenant, James G. Mott.

Northfield—A company, Seventh battalion: First lieutenant, Edwin H. Vollner; second lieutenant, Isaac F. Seeley.

Faribault—B company, Seventh battalion: Second lieutenant, John T. Wall.

Austin—C company, Seventh battalion: First lieutenant, George E. Anderson; second lieutenant, John E. Detwiler.

Gilbert—B company, Eighth battalion: Captain, Richard T. Dukelow; first lieutenant, Amos H. Weiglo; second lieutenant, Samuel B. Koller.

Ely—D company, Eighth battalion: Captain, George T. Ayres; first lieutenant, William A. McCurdy; second lieutenant, William D. Gallagher.

Morris—A company, Ninth battalion: First lieutenant, Nicolai Vinje; second lieutenant, William H. Cherry.

Breckenridge—B company, Ninth battalion: First lieutenant, William H. Bentley; second lieutenant, Clarence P. Rice.

Moorhead—C company, Ninth battalion: First lieutenant, Ralph Torson; second lieutenant, Oscar W. Rustad.

St. Cloud—D company, Ninth battalion: First lieutenant, Frederick A. Compton; second lieutenant, John W. Carter.

Crosby-Ironton—E company, Ninth battalion: Captain, Edward M. Prindle; first lieutenant, Clyde M. Pierce; second lieutenant, William C. Deering.

Ninth battalion: First lieutenant and surgeon, Dr. Harry E. Sutton of St. Cloud.

Crookston—A company, Tenth battalion: First lieutenant, Gustave Johnson; second lieutenant, John F. Fournet.

East Grand Forks—B company, Tenth battalion: First lieutenant, John C. Sherlock; second lieutenant, James E. O'Leary.

Thief River Falls—C company, Tenth battalion: First lieutenant, Henry Z. Mitchell; second lieutenant, Oscar Sponheim.

Bemidji—D company, Tenth battalion: First lieutenant, Roy W. Leibsle; second lieutenant, Verner A. Stewart.

Major Seebach will enter the second training camp for officers at Fort Snelling and will be succeeded as Home Guard organizer by Captain W. F. Rhinow, military secretary to Governor Burnquist.

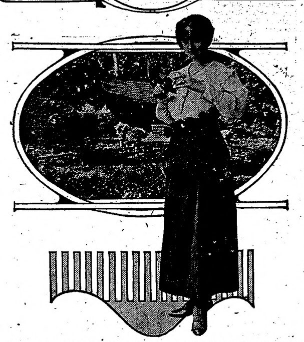
Uniforms for Guard.

Uniforms for privates in the Home Guard will consist of overcoats, blouse and breeches of drab wool suiting, canvas leggings and campaign hats. They will be ready within the next two weeks.

Country Faces Gasoline Shortage.

Washington, Aug. 27.—Danger that the country's increasing military and industrial demands for gasoline and other petroleum products may not be filled because of lack of equipment for drilling new wells has been brought to the attention of the Council of National Defense by the bureau of mines. Director Manning of the bureau said he was hopeful that arrangements would be made by the council whereby materials from the steel industry and other supplies would be speedily furnished oil producers.

Fads And Fancies Of Fashion

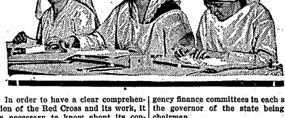


Suits and coats and hats lead off the fall fashion parade but in the reserve forces of the wardrobe along come the dependable separate skirts. They are beautifully fitted and tailored and made of all the staple or fashionable wool fabrics. There is an abiding attraction in these everyday clothes of the average woman—no one gets tired of them.

Quiet colors in plaids, crossbar mixtures and figured materials share honors with plain goods for the separate skirt for fall and winter. Needlework, in the simpler kinds of embroidery, proved so effective on late summer skirts that it has carried over and become a new chapter in the story of fall fashions. In the skirt pictured it appears in silk thread on the pockets and on the skirt about six inches above the hem. But the designer refrains from breaking the length of the panel at the front and terminates the embroidered disks at each side of it.

The pockets serve a double purpose for they are actual pockets as well as decorative parts of the design. The embroidery for them is placed on a separate piece of material, cut out the shape of the pocket and sewed over it. A belt of the material is finished with a plaited frill at the top which extends across the sides and back but not across the front where the designer refuses to allow anything to interfere with the straight line, and a large flat button is used for fastening.

WHAT CAN WE DO?



In order to have a clear comprehension of the Red Cross and its work, it is necessary to know about its construction and its methods. The president of the United States is not merely an honorary officer but an active president of the society. He presides at the annual meetings, appoints members of various boards and issues important public appeals in time of war or disaster. It is important to understand that it is the arm or instrument of the government for giving aid to humanity. Its work goes on at all times in the department of civilian relief. Under its charter all accounts of the American Red Cross are audited by the war department and an annual report submitted to congress by the secretary of war. To President Taft belongs much credit for the time and attention he gave to the affairs of the society, in order to build it up to its present efficiency and establish it in the public confidence.

The central committee is the governing body, under it coming three important boards whose chairmen and vice chairmen are members of the committee. These boards are the war, national and international relief boards. They establish the policies in their respective fields of activity and recommendations for appropriations are made by them to the central or executive committee which has the sole right of appropriating funds.

The chairman and vice chairman of the war relief board are the surgeon generals of the army and navy. Those of the international relief board are representatives of the state department and the navy and those of the national relief board are members of the central committee particularly familiar with this part of Red Cross work.

"Under these boards are various subcommittees, the medical bureau, the first aid department, the nursing service, town and country nursing and the Christmas seal. State boards, consisting of from three to ten prominent persons, constitute permanent emergency finance committees in each state, the governor of the state being the chairman.

Besides the state boards there are local organizations which are called chapters, each with its own officers and members. The special duties of the chapters are to collect funds and supplies on appeal from headquarters or from the governor of their respective state, and, in case of local disasters, to co-operate with the institutional member in immediate relief measures."

The above brief review of the organization of the American Red Cross is in part quoted from "Under the Red Cross Flag," by Mabel T. Boardman, which gives a very comprehensive and thorough history of the organization, its aims and its work.

Julia Bottomley

To Fix Buttonholes.

For mending buttonholes in the neckbands of shirts, stitch pieces of tape flat along each edge of the buttonhole, bringing them together at its ends. The tape on each side should be just wide enough to extend to the edge of the neckband, where it should also be stitched. This new buttonhole will outlast the rest of the shirt.

Bags to Match Hats This Fall.

The knitting epidemic will bring forth hats and bags to match this fall, and it is a great opportunity for the woman who loves handwork. She can cross-stitch or embroider both and feel thoroughly in the mode.

Duvetyn hats will be very smart, and it is soft enough to make lovely bags.

Panel Effect in Evening Gowns.

Evening gowns have paneled effects in the back and a sash or girdle in front, or again they are made with drapery to follow the lines of the body, somewhat in antique style. Many of these gowns have a satin foundation.

The State In Brief

Another infantile paralysis case is reported at East Grand Forks. The 2-year-old daughter of Mr. and Mrs. E. E. Hutchinson is the latest victim.

The thirty-sixth annual convention of the Minnesota Woman Suffrage association will be held at St. Paul October 12 and 13. Plans for obtaining speakers and entertaining visitors are well under way.

The St. Paul road bridge over the Straight river, 4½ miles east of Faribault, was burned. As no trains that could have set fire to the bridge had passed over it for some time previously, the authorities suspect arson.

The jury in the case of George A. Elder, a Duluth bond broker, charged with attempting to influence the official action of County Treasurer Fogarty at Brainerd by offering him $50, brought in a verdict of guilty, after being out four and one-half hours.

A man who gave his name to the police as George Baldwin is held in the county jail at Moorhead, as the result of the finding of a spike and pieces of iron on the Northern Pacific railway tracks near Muskoda. The county authorities are investigating. The train was stopped in time.

N. A. Lee, superintendent of the electric light plant at Hawley, had his right arm broken and his left hand cut and bruised when he was caught in the cam shaft of the gas engine. He was pulled into the flywheel and only the fact that he pulled his shirt sleeve out of the wheel saved his life.

Prsident Marion LeRoy Burton of the University of Minnesotat will deliver an address on loyalty at Little Falls, where a big Dedication day demonstration is planned September 1, Director M. Williams of Morrison county, who is in charge of the celebration, has advised the Public Safety Commission.

The American Fisheries society and the National Association of Game and Fish commissions met at St. Paul four days this week. The St. Paul Association, the Ramsey County Game Protective league, the St. Paul Rod and Gun club and the Minneapolis Game Protective league co-operated in entertaining the visitors.

Numerous applications from farming districts for exemption on the agricultural grounds received by the Fourth Federal exemption board at Duluth, have caused the board considerable difficulty. The men working on farms feel that the statement, "I work on a farm," is sufficient to grant them exemption from service in the national army.

The Minnesota Chiropractors' association, in convention at Brainerd, reelected Dr. I. C. Edwards president of the association. Dr. Edwards has been called to the second officers' reserve training camp, but members declared that no man should lose office in the association simply because he was serving the United States government in a war emergency.

At a meeting of the members of the Clay County Fair association it was decided to hold the fair at Barnesville, Oct. 17, 18 and 19.

Herbert Conner, son of John B. Conner, president of the Thief River Falls Commercial club, was attacked by a bull on his farm and was seriously injured.

The Kingfisher, the cruising yacht of E. L. King, wealthy medicine manufacturer and banker of Winona, has left here for its first trip up the Mississippi to the head of navigation.

At a special election held in the village of Albany the citizens voted 56 to 2, to sell the municipal electric light and power plant to the Union Light & Power company of St. Cloud for $12,000.

Andrew E. Reardon of Mora, who received injuries of the spine and concussion of the brain by a fall in the dropping of the elevator at the new school building is rapidly regaining his health.

The Purchase, an excursion steamer on the Mississippi river that was caught on the rocks near Wabasha, is now practically a total loss. The boat was one of the finest excursion steamers that ply the river.

The Minnesota Guernsey Breeders' association has assured Secretary Charles F. Schroeder of the Beltrami County Fair association that it has a silver cup to be awarded at the Beltrami county fair this year.

Henry Zaender a German farmer living at Albert Lea, was arrested on complaint of Capt. Oscar Suby of the local Battery A, charged with insulting the American flag. He pleaded guilty to the charge and was sentenced to jail.

Allen S. Broms of St. Paul, is in the Meeker county jail at Litchfield, following his arrest for alleged seditious utterances. He was arrested while speaking at an anti-draft meeting at Lake Manuella, nine miles southeast of Litchfield. The meeting was attended by more than 4,000 persons.

Former State Auditor Sam Iverson has received a commission as first lieutenant in the adjutant general's department of the national army and has reported to Fort Snelling. His first military experience was with Company C, Minnesota National Guard.

J. A. Anderegg, for the past several years a practicing attorney at Sauk Rapids, has been elected to a position in the legal department of the Federal Farm Loan bank located at St. Paul. Mr. Anderegg will be the fourth attorney employed in this department for the consideration of mortgages and loans.

PROSPECTS GOOD FOR BIRD HUNTING

SEASON EXPECTED TO BE ONE OF BEST IN HISTORY OF STATE FOR SMALL GAME.

48 COUNTIES SHOW GAINS

Increase in Money and Credits at Rate of 14.2 Per Cent May Bring Total for State Up to $270,000,000—Estimates Show.

St. Paul,

Reports from Minnesota and North Dakota indicate the hunting season of 1917, soon to open for small game, will be one of the best in the history of these two states. While nimrods already are getting down their guns, rubbing them up and using the oil freely, chickens, ducks, geese and other varieties of game birds are thoughtlessly hieing themselves to "no birds' land" for the annual slaughter.

George M. Hogue, secretary of the North Dakota Game and Fish Commission, is optimistic over the prospects. "The chicken and duck hunting will be very fine in this state this season," he says. "Chickens will be especially plentiful for the reason that the dry weather we have had gave the birds a good chance to hatch."

Others in touch with conditions are equally optimistic. While the season does not open until the middle of September, those versed in the hunting outlook declare that not for several years have so many birds loitered around.

It is a well known adage that small game hunting is prolific in seasons of good crops. This year Minnesota is to produce one of the largest grain yields in its history, while North Dakota, especially in some localities, will harvest bountifully. Therefore, hunters are preparing for a season of extreme joy.

* * *

48 Counties Show Gain.

Forty-eight counties have transmitted to the Minnesota Tax Commission abstracts of money and credit returns for 1917 which show a gain of approximately 14.2 per cent over 1916.

If this same rate of increase is maintained by the remaining thirty-eight counties, the total assessment for this class of property will come close to $270,000,000, as compared to the 1916 record of $234,108,268.

The total in these forty-eight counties for 1916 was $59,228,817 and for 1917 is $66,463,488. Ramsey, Hennepin and St. Louis county reports are not included.

Only three counties, Dakota, Red Lake and Dodge, of the forty-eight tabulated show a decrease.

Money and credits are assessed at full value and are subject to a general rate of but 3 mills. Prior to 1911 this class of property was assessed and taxed as all other personalty and as a result of the heavy burden then imposed the amount reported in 1910, the last year under the old law, was but $13,919,806, and the revenue derived but $379,754, contributed by 6,200 persons.

In 1916 the number reporting money and credits under the new system was 74,219, the assessment $234,186,268 and the revenue $702,588.

* * *

Must Pay for Shortage.

The state supreme court holds that the law providing for a maximum of 60 pounds loss to each car of grain while in transit is a penal provision only and does not affect the civil liability of the carrier. Accordingly, the municipal court of Minneapolis is reversed on the appeal of the National Elevator company in its suit against the Great Northern Railway company.

The elevator company delivered 85,086 pounds of rye to the Great Northern for transportation from Clarissa to Minneapolis. The company delivered 81,160 at Minneapolis.

The trial court found that 3,926 pounds of rye, valued at $64.55 were lost in transit. Making a deduction of 60 pounds, it awarded a judgment for $63.53. The appeal followed.

* * *

Sheriff to Have Hearing.

Governor J. A. A. Burnquist has appointed L. S. Headley, a St. Paul attorney, commissioner to take testimony on charges of malfeasance filed against Sheriff Joseph J. Urness of Mahnomen county by County-Attorney Clayton C. Cooper. Hearings are to start soon at Mahnomen. Sheriff Urness will be permitted to continue in office. The removal of Sheriff Urness was recently recommended by the state public safety commission on allegations that he failed to enforce the liquor laws, but the governor announced no such action would be taken.

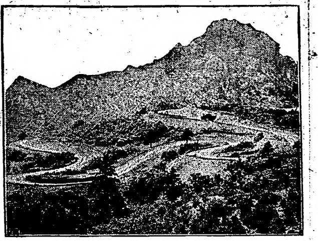
Rothenburg on New Ulm Board.

Dr. J. C. Rothenburg of Springfield will replace Louis G. Vogel of New Ulm, deposed auditor of Brown county, on the Brown county exemption board, today.

Vogel's dismissal and Rothenburg's appointment were announced by Governor J. A. A. Burnquist following the approval of federal authorities.

Vogel acted as marshal of the parade that preceded the New Ulm anti-war meeting. He is a former adjutant of the Second Minnesota infantry.

TRIP THROUGH PANORAMIC CRYSTAL PARK



REMARKABLE AUTO ROAD IN COLORADO.

The Crystal park auto road from Colorado Springs and Manitou is one of the most remarkable mountain roads in the West. The road was blasted out of the solid rock along the mountainside. The trip is entirely through extremely rugged country, with a panoramic view of mountains and plains. The building of the road was no mean engineering feat. The road resembles a ribbon, tossed haphazard over the hills. It offers a wonderful view of the mountains and plains in the entire Pikes Peak region.

MOTOR CAR SPRING

Full Elliptics, Semi-Elliptics and Cantilevers Meet Varied Favor.

INVENTION IS CENTURY OLD

Leaf Steel Devices Hold Their Own, Although Time and Again New Arrangements Have Been Introduced.

Progress in automobile construction has each year been accompanied by improvements in springs. In fact, few parts that contribute to the user's comfort have been so fully and so far improved as have the springs. We naturally expect improvements in devices that are comparatively new, like the pneumatic tires, but remembering that leaf-steel springs were invented a century ago, we are inclined to assume them to be practically perfect and to look for very little change in them.

As first applied they were far too short for comfort. Makers attempted to apply the lengths and widths used on horse-drawn vehicles, and simply added thickness to carry the heavier weight of the power vehicle. That this was not satisfactory could have been foretold, and every year since has seen a bettering of these necessary articles.

Semi-Elliptic in Favor.

The full elliptics at first used gave way to semi-elliptics, which carried the load lower and better resisted the side swaying of the body, which tended to throw a change on driving mechanism out of alignment. These advantages have not been superseded, and still hold the semi-elliptic in growing favor today.

Time and again new springs or new arrangements are introduced, but through them all the old standby holds its own. It is a most simple form, and if the same number of pounds or inches of steel employed in other forms is used in it there will be no complaint about the service.

Three-Quarter Platform.

The three-quarter platform adds to the rear ends of a pair of semi-elliptics a mate placed crossways, and attached to the body at its upcurved center. This gets added spring length without extending the body further to the rear, but it has not found much favor.

More was expected from the cantilever, and it still has strong advocates, but it has not been adopted with that rush which seemed probable a couple of years ago. The cantilever is a semi-elliptic turned over and resting one end on the car axle instead of resting its middle thereon as does the semi-elliptic. Because of this peculiar mounting it has nearly twice the springy motion possible in a semi-elliptic of the same length, but also requires to be about twice as thick. Each year the public is gaining the knowledge that every car can be properly sprung, and that a well-sprung light car rides more comfortably than a less efficiently sprung heavy car, and, consequently, they are demanding and getting better spring values each year.

TRICK FOR OILING SPRINGS

Application of Kerosene and Then Followed by Lubricant Will Answer Purpose Fairly Well.

An emergency trick for oiling a spring is to go over it with kerosene, wiping off the dirt as you do so, and guiding the kerosene down the sides so it will run in between the leaves. Wipe off the surplus. Pour oil over them the same way. It is led in by kerosene and oils the leaves very effectually. Now rock the car or jounce the running board and your springs will be fairly well oiled. The best way to oil a spring, however, is to remove it and take it apart, scraping or filing off all rust and covering both sides with graphite, grease or oil. This is troublesome, but is the best in the end.

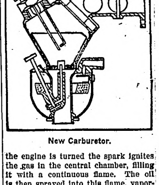
USE KEROSENE OR GASOLINE

Clevelander Perfects Carburetor for Internal Combustion Engines—Offered for War Use.

A carburetor for internal combustion engines which uses either kerosene or gasoline for fuel has been perfected by a Clevelander, who has just offered his patents to the government for war use.

The carburetor is said to be attachable to any motor and to start almost instantly in any temperature.

The kerosene is converted into vapor by means of a small electrical resistance wire and a fibrous material which absorbs the oil. The moment the engine is turned the spark ignites the gas in the central chamber, filling it with a continuous flame. The oil is then sprayed into this flame, vaporizing it as it passes through. This producer flame is checked by a baffle plate.



New Carburetor.

By turning off the electric current, the carburetor is used for gasoline.—Cleveland Plain Dealer.

PLAN TO KEEP HANDS CLEAN

Simple Method Described Herewith Is Better and Cheaper Than Using Expensive Oil.

It is impossible to keep the hands clean when making repairs on the machine.

A simple and economical way in which to cleanse them is as follows: Mix a quantity of sawdust and lubricating oil together and rub thoroughly into the pores of the skin.

The oil should then be removed by wiping the hands with a cloth which has been saturated with a little gasoline or kerosene.

This should be followed by the ordinary wash with soap and water.

It is poor practice to attempt to remove the dirt from the hands by bathing them in gasoline, as this will cause some of the matter to become deeply imbedded in the skin.

ATTENTION TO SPARE WHEEL

If So Desired It May Be Covered Completely With Cover and Locked in Proper Place.

Thieves, dust, rain, and the weather generally are enemies to the well-being of your spare wire wheel. You may now, if you desire, cover it completely with a carrier which locks on. This consists of a flexible cover for the tire and a pair of convex plates between which cover, tire, and wheel are clamped by the nut on the supporting spindle. Removing the nut releases the end plate and the wheel.

PUT OIL IN GASOLINE TANK

Particularly Efficacious for Limbering Up New Motor—Better Service Also Secured.

An automobile dealer says that anyone who wants to have a fine running motor should put a couple of quarts of light or medium lubricating oil in with every ten gallons of gasoline pumped into the tank. This is particularly efficacious, he says, in the case of a new motor. It will be limbered up in considerably less time and will give better service thereafter.

The Protector of Finance

Tales of Resilius Marvel, Guardian of Bank Treasure

By WELDON J. COBB

THE FOURTEENTH MAN

Copyright, W. G. Chapman

IT WAS a hard task that the president of one bank had given me. A standard financial institution is rarely desirous of doing business with a woman, at least beyond the mere depositor basis. In the present instance it was not only a woman, but a young and pretty one. Add to this the fact that the lady in question was in deep distress, that her case presented angles suggesting evasion and even mystery, and you will not wonder why every official of the bank from the president down to the assistant cashier had shied at the task which I was now obliged to shoulder.

"Do the best you can to get ou. money out of this muddle," the president had told me tersely, handing me the folder which contained all the papers in the case from the day, four years back, where Royal Ludington, member of the Board of Trade, had made his initial deposit with our bank down to and beyond the recent date of his sudden death. The record of his dealings with our institution up to the time of his demise was clear as crystal. A child could have read and understood, pretentious as to magnitude and importance as had been some of his dealings. Direct and margin accounts were cleanly attended to. There was not a mar or break in the admirable paying system of Royal Ludington. When death closed the account, however, we held his note unsecured for $37,950; and we held it still, past due, uncollectable, to our bewilderment, in any legal way.

I familiarized myself with all the details of the case through a hurried glance over the contents of the folder, tidied collar and coat with a twist of my hand, and put on my best banking face to enter the private office of the directors' room where I had been advised Miss Grace Ludington was awaiting attention.

"I came about this," she said in a tone child-like, confiding, slightly reproachful, all at once. The letter she handed me notified Mrs. Royal Ludington that the overdue paper of her dead husband required immediate settlement, rather strictly referring to the fact that no attention had been paid to previous notifications of the same fact. I turned it over and over in my hand, seeking to fix upon the manner I should assume in serving the best interests of the bank in dealing with an emissary instead of the chief person now in interest in the case.

"I see," I observed, trying to gain time, for I am not a ready diplomat; "but why did not Mrs. Royal Ludington—your mother—" the fair head bowed—"come herself?"

A wave of singular intensity crossed the face of the young girl. Her lips parted to speak. Then she subdued their expression. They quivered. Her eyes dropped, her cheeks grew the paler.

"She would not come," was spoken finally—"she will not come."

"Surely," I observed, "Mrs. Royal Ludington does not repudiate the obligation?"

"For the present—yes."

"Yet we have notations here that show transfers of property within the past month representing over $20,000. Aside from that two notes have passed through the bank for $10,000 which she has seen fit to pay promptly. Those notes were signed by your father—not by your mother. Why does she discriminate unfairly against the bank in caring for your father's obligations? I refer to the notes given by your father to one Abel Vandamann."

"My message, is," she said evenly, coldly, "that there are circumstances encouraging our fervent hopes, the possible relief of the bank, that you and ourselves must wait for—must."

It was her last word. With a motion of head and body that was all it should be, with the air of an empress she went from the room, and I stood staring blankly after her, analyzing every word she had said, weighing it, dissecting it, seized with a sudden inspiration and carrying it forthwith to the president of the bank. He was a man of few words and I lent myself to his system.

"It is simply—wait," I said.

He shrugged his shoulders, knowing I had done my full duty.

"No pressure possible, then, you think!"

"None at the present time. There is action possible, though," I said.

"You mean?"

"Resilius Marvel."

"Get him."

When the bank—or any other bank—said "get Resilius Marvel," it signified the abandonment of direction or opinion. It meant unrestricted power awarded Marvel, great man that he was—he, the brains, mouthpiece and active director of the great United Bankers' Protective association. Marvel was not a collector for the banks. He was the last resource, the final court of appeal in a case when the layman in investigatory science came face to face with a blank wall, threw up his cards, and left the game to an expert.

My friend listened patiently, but rather bored I fancied, to my tame story of what had seemed quite sensational at my first impetuous view of it. He made a brief notation now and then on a tab of paper of the dry details I gave him of the Ludington affair. I had brought the folder with me, the dossier in which the credit department was supposed to store up everything concerning a client and keep it up to date. As I closed it he asked the question:

"That is all you have?"

"Except the newspaper clippings referring to the death of Mr. Ludington," I replied.

The newspaper story was simple and plain. It was only because the circumstances were out of the ordinary and the decedent an apparently successful business man, that the public prints had given any space to the death of the exchange trader.

It was a chill March evening when he had been found dead, lying against a building. There was no evidence whatever that he had been assailed. The contents of his pockets were undisturbed. There were no marks of violence on his body. He carried no life insurance, but an autopsy was held by the coroner. The inquest developed nothing new. According to two expert physicians Royal Ludington had died from heart failure. He had been ailing and depressed for some time preceding his demise. There was not the slightest hint at suicide.

The police, tracing the movements of the decedent previous to his death, testified at the inquest that Ludington had been one of a small party of friends who had met at the home of Abel Vandamann. The latter was an apparently reputable business man of the city of some wealth and social standing. The occasion of the social function was the grouping up of a number of business men to whom Vandamann wished to present a stock selling scheme to float a copper mine in Northern Michigan. A pleasant evening had passed, a few cigars, not too much wine, and the guests had departed in pleasant humor and seemingly all in the best of health. Two of the guests had walked some distance with Ludington, and had bade him good night about a square and a half from the spot where his body was later discovered.

Mrs. Ludington had testified that she knew her husband to have had business dealings for a long time previous to his death with Mr. Vandamann. The latter she understood had loaned her husband money. This was not a new phase of the character of Vandamann. His business was that of a high interest rate note shaver, but he had been always shrewd enough to conceal his usurious transactions under the guise of expenses, commissions and the like.

This was the story told by the newspaper clippings I handed to Resilius Marvel. Pasted to it was a briefer item dated two days later. It had been preserved in the folder because it mentioned the name of Royal Ludington. It covered a strange happening. On the evening of the funeral of the dead trader, a man had been detected in leaving by the window route the room Ludington formerly occupied at his home. A watchman had trapped him as the midnight marauder dropped to the ground. He was held until the police were summoned and was sent to the nearest police station. Upon searching him nothing whatever was found upon him. He seemed to be some homeless tramp, he had taken nothing from the room he had entered, and when questioned declared with a foolish grin that he had been looking for something to eat, struck a sleeping chamber instead of a pantry, and was too honest to steal anything more than a bite of food.

The contention of the man was carried out in the main by circumstances. The room he had entered had not been at all disturbed. Upon the bureau lay the trader's purse with some money and papers in it. This had been opened, but nothing removed. A suit of clothes in a closet had been looked over, it seemed, but not even the pockets had been searched.

The marauder, giving the name of Edward Briggs, had been brought before a police magistrate, charged with vagrancy, and sent to the house of correction for sixty days.

I noticed that my friend read and re-read the little clipping telling all this. I noticed him mark on the pad the name—"Edward Briggs." I saw also that he copied the names of the two guests who had left the Vandamann home with the trader the night of his death. Then he arose, and I could tell by the expression of his eye that he was ready for work. Further, I regarded him with the admiration his ability always evoked within me, for although I could not guess how, I was sure that out of the bare skeleton fabric of an unpaid note at bank, a weeping girl and two newspaper clippings, Resilius Marvel had already discovered a diverging suggestion, direct and important.

"Drop around in the morning," he said casually. "You were right to bring this case to my notice."

I told the president of our bank this, later. In the light of past events in which Resilius Marvel had been concerned, that functionary smiled hopefully, as if he felt he had landed the burden of a distributing circumstance on helpful and reliable shoulders.

I found Marvel pacing the floor of his office in a thoughtful way, his hands clasped behind him, when I called the next morning. He drew out his watch and consulted it with a slight gesture of impatience, as though I had kept him waiting.

"Two minutes," he announced, "and then you will come with me. There is a person to find, and no time to lose."

"And the person?" I intimated.

"The fourteenth man."

I stared helplessly at Marvel. He kept up his restless walk, puncturing each step with a sentence rapid and enlightening.

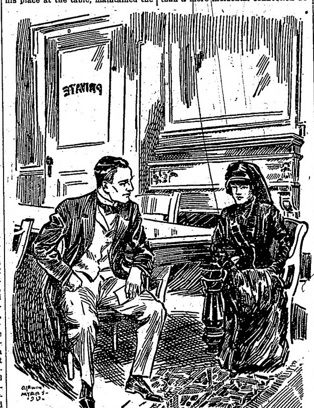
"There was nothing unusual nor suspicious as to the social function which transpired at the Vandamann home," spoke Marvel. "There was no motive to it, no plan or anticipation of foul play. Get that clear in your mind in the first place. A strange thing occurred, however, just as the guests were about to be seated at the table. It was discovered that there were just 13 persons present."

I began to receive a glimmer of where a "Fourteenth Man" might come in.

"That arose which might readily arise where one man of a group is superstitious. Such a man was present—he was the man who died, Royal Ludington. He was probably in a mood for weird forebodings. Vandamann did not debate the point. He excused himself to his guests, put on his hat, went out into the street and apparently picked up the first man he met to break the hoodoo."

"And this man?" I asked.

"Known to none of them, apparently some city wreck on error's shore, a freakish contrast in his attire to the perfectly dressed guests, quietly took his place at the table, maintained the silence he was paid to maintain, ate like the hungry man he was, and then seemed to disappear, his paid mission executed."



"SHE WOULD NOT COME," WAS SPOKEN FINALLY—"SHE WILL NOT COME."

"And you now seek to find this man?"

"He must be found," declared Marvel positively.

"Why?"

"Because I am satisfied he can explain the mystery in this case."

"There is a mystery, then?"

"A deep one. That matters not now. I wish to show you something. As a memento of the first meeting of the organizers of the Copper Queen Mining company, a flash photograph was taken. That is the group."

My friend drew from his pocket a card four by eight inches and held it before me.

"That is Vandamann," he explained, indicating the broker, whom I recognized—"that Ludington," I knew him, too. "That," and by some irony of fate the forlorn, frowsy figure at the far end of the table seemed to have been focussed more prominently than any of the others—"that is the Fourteenth Man."

I studied the face with interest. Its owner was apparently one of the stray waifs of the city to be picked up anywhere in the crowded center within a five minutes' walk.

"Come with me," directed Marvel.

He hailed a taxicab as we reached the street. It conveyed us to a police station in the residence portion of the city. I followed after my friend at his bidding as he went to the office of the captain.

Marvel named a date—it was the day of the funeral of Royal Ludington. He gave a name. It was Edward Briggs, the man arested at the Ludington home that same night. The official consulted the record book. He read its details ending with the sixty days' sentence of the prisoner.

"Photographed?" inquired my friend.

"So noted—No. 8796."

"That is all—thanks," nodded Marvel, and within ten minutes we were at the identification bureau.

"The Fourteenth Man—Edward Briggs," he observed, as No. 8796 was produced, and he held it beside the flashlight photograph of the Vandamann function. There was no doubt as to the conclusion he had arrived at. The faces were identical. I was wondering what all this was going to lead to while the bureau official was explaining that although only a misdemeanor had been charged against the prisoner, it had been thought best to take his picture for possible past and future reference.

Marvel went over to a phone and called up the house of correction. I had done some brief calculating in my mind. Edward Briggs had yet ten days of his sentence to serve, so we were in time, if that meant anything, I decided. We were not in time, I knew instantly, as my friend hung up the receiver with the words.

"Not there—pardoned out."

Our next visit was to the mayor's office. Marvel knew all the ropes. There was no indecision or waste of time in his procedure. There was no reluctancy on the part of the mayor's secretary in giving him access to all the records of the office.

I was close enough to the desk of the secretary to catch what was said. Edward Briggs had been sent to the house of correction on the day he appeared in court. On the one ensuing, he was pardoned out on the recommendation of Alderman Miles Ryner. Ah, here it was, observed the clerk—letter to the mayor from the councilman in question. Request that a pardon be granted as the criminal charge of housebreaking had not been pressed; introduces Mr. Abel Vandamann, a valued constituent, who would vouch for the general good character of Edward Briggs and practically accept parole conditions in behalf of the prisoner.

"That establishes something more than a mere incidental connection between these two men, I fancy," observed Marvel as we went outside again.

"And what of that—and what next?" I inquired.

"Well, when I locate our Fourteenth Man it will be a forward step, of course," observed Marvel. "We go back to the Ludington end of the chain now, however. Do you think you know the daughter of the house well enough to venture a call upon her?"

"For what purpose?" I inquired doubtingly.

"To induce her to come to my office."

I ruminated. I considered the effort to move Miss Grace Ludington from her stated position hopeless, and my friend knew instantly that so I thought. He went on, however, regardless of my opinion.

"You will inform Miss Ludington that it is vital that I should see her—two to four today. She had better come alone. Tell her that it has nothing to do with the money of the bank, that it is not a question of cash, but of—family honor."

I could not for the life of me imagine under what dark curtain Resilius Marvel was gazing, but there was an indescribably lucid accuracy in the broad hint that he was about to strike a note with the young lady that would influence her more than promises or threats. He suggested explicity, before I left him, the course I was to pursue in dealing with Miss Ludington. I went straightway to her home, lingered about its vicinity while framing the manner of my approach, and accepted the opportunity offered as she appeared with some letters in her hand to mail at the nearest letter box.

"I am not here in behalf of the bank, Miss Ludington," I stated concisely. "I come from a friend and a professional man who has been pursuing some investigation regarding the circumstances surrounding the death of your father. They are, he assures me, of sufficient importance to require your attention. You have heard of Resilius Marvel?"

"I have read about him," was the reply, shrinking and muffled.

"If you knew Mr. Marvel as I knew him, you would trust to his earnest desire to be always helpful," I continued. "He seeks only to protect the family honor."

"Stop!" cried Miss Ludington suddenly, sharply interrupting me, throwing aside her veil and presenting a colorless, defiant face. "What do you know—what does he know?"

"I—I, nothing," I stammered, fairly abashed at the resolute challenge—"he, everything, probably. From two to four—you will see him?"

"I will see Mr. Marvel," she said slowly, and passed on her way.

"She was adamant to every attack I made to win one intimation, the faintest clew as to what she and her mother are holding back," Resilius Marvel narrated to me the next morning. "This girl is spanning ten years of her life with the agony, the resolve of one. She is under some terrific stress, and there is some influence that is holding these two women under a dreadful thrall."

"She would tell you nothing?" I asked.

"Until the last, absolutely nothing, except to beg that I would not disturb a condition that only she and her mother could remedy. She arose to leave. Suddenly she fixed her eyes upon me. I saw her studying me as if to search me through and through. I noted the flush of some impelling force in her face. 'Mr. Marvel,' she said, 'you claim a wish to be helpful to us, and I believe you, but this is a case where help from your viewpoint, instead of assisting us, might precipitate a direful catastrophe. But you are said to be a man who can find where others fail, who from the shadow can evolve a reality. You can do something for us, imperative, vital. If you can inform us what we cannot learn—the whereabouts of a certain person—you will bring us nearer to the light for the end.'"

"And the person?" I inquired.

Resilius Marvel handed me a worn photograph. It was that of a woman loud of dress, bold of face, wicked of eye. She had a certain wild beauty, but her smile was that of one who lures only to destroy. On the reverse of the card were these words: "Always as now—Idalia."

I wondered what was passing in the mind of my friend at this new element injected into the Ludington case. He did not see fit to enlighten me. He called for me at the bank the next day.

"A witness is sometimes handy," he observed, and as we went spinning along the boulevard south he briefly told of his success in locating this new woman in the case.

"The name of the photographer was a guiding clew," he advised me. "He did not know 'Idalia,' but he knew a friend of hers, an actress. From this friend I learned the whereabouts of the original of the picture. She is the inmate of the reformatory, on a sentence for robbery. We are going there."

A woman clad in light blue cotton uniform was called to us, after we had reached the place in question. She came into the room where we awaited her, her eyes roaming everywhere in an attempt to surmise the motive of our visit. Promptly Marvel drew the photograph Miss Ludington had supplied him from his pocket.

"I have come to ask you a question," he said. "How long have you known the man to whom you gave this photograph?"

In an instant the prison restraint, the forced reserve of discipline, all self control went to the winds. The woman first attempted to wrest the picture from the hand that held it towards her to tear it to atoms. Her eyes glared like a tiger's, her face became distorted, she raved, she trembled from head to foot, she poured out curses upon the man a memory of whom the photograph had evoked.

"Listen," she cried. "Mark me, I swear it!—the day I am freed from here, be it when it may—I will kill him!"

"You are too late," observed Marvel quietly.

"I am too late?" she repeated, skeptically.

"Yes, he has been dead for weeks."

She laughed, this Idalia, this woman who made men shrink whom she did not cause to weep.

"You came to draw me out, to delude me," she scoffed. "From him! I see through you. Dead? Do you think I do not keep track of him through my friends on the outside, to be ready to know when, and where, and how I shall strike when the hour comes? Go back and tell Abel Vandamann that from me."

A low whistle, so low that it would have been difficult to trace its source, proceeded from the lips of Resilius Marvel. He restored the photograph to his pocket. He made a motion to the attendant that his mission was accomplished. He said to me:

"The case is complete."

What he meant I groped vaguely in my mind to find out. He left me to think out one fact; that the photograph was the property of Abel Vandamann, not of dead Royal Ludington. Then how had it come into the possession of his daughter?

The great man proved his last statement to me the following evening. I was seated in the office of the United Bankers' Protective association when there came a commotion in its ante room. Then a man was thrust into the private office by two officers in uniform. Marvel followed, and the one policeman retired at his words: "I will be responsible for this man. Now then, my friend, sit down and get your breath."

At a glance I knew the prisoner. It was Edward Briggs. He was frowsy, unkempt, savage looking, somewhat the worse for drink, and of lowering brow and set pugnacious lips.

"What's all this?" he growled out.

"You have been arrested for deadly assault upon one certain Vandamann," observed Marvel.

"It would have been more certain if I'd had the show," retorted the fellow.

"Did you hurt him much?"

"Worse luck, no. The next time!"—the man glared across his knotted fist.

"On top of your last exploit," remarked Marvel, "it may be six months or a year this time. Unless you have left a case of mayhem behind you down at Vandamann's, I can promise you a chance to get out of this mix-up—on conditions."

"What conditions?" muttered the fellow, an evil eye fixed on both of us—suspicious and leery.

"As the Fourteenth Man—"

"What's that!" ejaculated Briggs with a start, and then he shrank back within himself, the barrier up, like a man in a trap.

"As the Fourteenth Man, you of course knew Royal Ludington."

"Suppose I did?"

"What did you take to his house the day of his funeral?"

Briggs bored into the questioner's face with his shrewd ferret eyes. He shook his head. "This is some kind of a frame-up," he declared. "I don't say a word till I know what's doing."

After some persuasion the man told. It amounted to this: Scoundrel-hearted Abel Vandamann had seen an opportunity in the sudden death of one of his victims to press fictitious claims. He had utilized the Fourteenth Man in his plot. This had been to have Briggs visit the Ludington home surreptitiously, place the photograph in a pocket of Ludington's coat, and in his desk a card bearing notations of various amounts. These, corresponded in amounts to alleged notes of the decedent, were later presented to his widow for payment.

The wily schemer had convinced Mrs. Ludington that he held notes—they were forgeries—to a large amount, given him by her husband. He had further persuaded her to believe that the borrowed money they represented had been squandered in gambling and in financing the extravagant whims of the woman, Idalia.

The notations, the photograph, all seemed to verify the foul misrepresentations that brought sorrow and dread to the wife and daughter of the dead trader. Mrs. Ludington was a proud woman. The fear of disgrace, publicity, had made her the easy victim of the arch swindler, Abel Vandamann.

The demands of the broker were so extensive that his black-mailed victim found that after she had sacrificed her personal belongings to satisfy the notes, there would be no hope of liquidating the indebtedness at the bank.

Resilius Marvel held a brief but productive interview with Abel Vandamann the next day. Then he carried to the bank twelve forged notes for $50,000, and a like amount in cash already extorted from Mrs. Ludington on similar forgeries. The bank therefore, lost nothing, and the Ludingtons were restored to fortune and lifted from the shadow of a great grief.

"There is such a thing as earthly retribution," observed Resilius Marvel to me one day.

A column in a daily newspaper was the basis of the remark. It told of the murder in cold blood of Abel Vandamann. A stiletto had dealt him his death wound, so it might have been a woman. But his strong box was rifled, so it might have been a man. The police never found out, for the woman, Idalia, and the Fourteenth Man had disappeared as completely as though the earth had opened and swallowed them up.

Now Make Dried Soup.

One of the beneficial effects of the recent scare over a threatened shortage of tin cans was an extended investigation into other possible methods of preserving food. The canned soup manufacturers were among the most earnest seekers, for they were threatened with having their tin supply cut off at an early date. They have worked out a process for putting up a dried soup in powdered form in containers of heavy wax paper. Similar systems of drying and packing vegetables are already in use in Europe, but the soup idea represents American enterprise. Apparently, it will not come on the market, because tin cans are going to be more plentiful than was anticipated.

"Getting By the Editor."

Getting by the editor is the most fascinating of indoor sports, says a writer in the Atlantic. When I was a journalist in the Freudian sense (that is, as an unfulfilled wish), my chum and I devised a way to get money for all our articles. Each agreed when he sent out a "story" to bet the other the price of the "story" that it wouldn't be accepted. That little arrangement took the sting out of a rejection completely; and when you lost your pay, you had the glory of the acceptance. Why and how the scheme broke down, I shall not divulge.

Could Do His Part.

Frederick the Great heard of a Silesian clergyman who had a reputation of communicating with the spirits.

He sent for him and received him with the following question:

"Can you call up ghosts?"

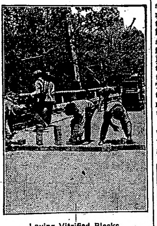
"At your pleasure, your majesty," replied the clergyman, "but they won't come."

FOR BETTER ROADS

SMALL PAVING BLOCKS USED

They Are Proving Popular in Rural Regions in Europe—First Laid in New York State.

For a number of years country roads in parts of Germany, Austria and other European countries have been paved with small cubes of stone but it is not so generally known that small-block pavements have been laid in the United States. They are believed to have been introduced first by J. Y. McClintock, county superintendent of Monroe county, N. Y. After an experience of ten years or so, he recommends the use of blocks of vitrified clay, measuring 2¼ inches on each side. These are laid on a base of gravel, macadam, concrete or broken slag, which is usually made wider than the pavement in order to support the gravel or broken stone laid beside the cubes to form hard shoulders to carry vehicles that are forced to turn out of the main roadway. During the last year about six miles of such pavement were put down in the county.



Laying Vitrified Blocks.

Mr. McClintock holds that this type of construction is desirable where a substantial base is already in place, as in the case of an old gravel or macadam road which is not worn out, or a base can be constructed at low cost. The vitrified blocks are often laid by unskilled labor, properly supervised, with entirely satisfactory results.

Another type of small-block pavement was recently laid on the Morristown turnpike in New Jersey, which carries a heavy traffic. There is a section of this road about 1,200 feet long having a 7 per cent grade, where it was decided to try small granite blocks in the hope that their numerous joints would reduce the tendency to slip and skid on this rather steep slope. The blocks are 3 to 4-inch cubes and were laid on a thin foundation. They were not laid in rows but in curved lines, forming a mosaic pattern, and the joints were filled with fine stone and a grout of cement and sand.

PIONEER GOOD ROAD BUILDER

Over $120,000,000 Expended or Pledged During Last Two Decades in New York State.

Twenty years ago New York embarked upon its policy of state aid for the construction, maintenance and repair of state, county and township highways. Since that time approximately 20,000 of the total mileage, estimated to exceed 80,000, have been improved.

As a pioneer in the good roads movement, the Empire state has always occupied first rank. Over $120,000,000 has been expended or pledged during the last two decades for highway construction.

CONVICTS BUILD GOOD ROADS

Prison Camps No Longer in Experimental Stage in Oklahoma—Accepted Institution.

In Oklahoma prison road camps are no longer in the experimental stage, says the National Committee on Prisons and Prison Labor. They have become an accepted institution in the state. In the central and southwest sections prisoners are building the Ozark jail; in the southeast, they are grading the Jefferson highway, and in other districts they are assisting in the local good road movement.

Illinois in Earnest.

The state of Illinois will put to its voters at the 1918 election the question of issuing $60,000,000 in highway bonds, the interest and retiring fund for which is to be provided for by an increase in the motor vehicle registration fees.

Drainage and Foundation.

Drainage and a good foundation are the first considerations in improving a road with a hard surface. The best possible foundation is a good earth road with a low crown.

AGRICULTURAL DEPARTMENT

This department of THE ELEVEN TOWNS is devoted to the interests of the agriculturists of Pennington and Marshall Counties. All the articles are by foremost authorities, including U. S. Government experts.

GRAVEL ROAD WORK

Construction Is Usually Divided Into Two Entire Distinct Classes.

SUBGRADE FOR THE SURFACE

Some of Most Important Details Requiring Careful Attention Are Frequently Overlooked — Some Precautions to Observe.

Figure 1 shows a typical cross section for a gravel-road surface and indicates the customary steps involved in the construction of such a surface. The limiting thicknesses shown on this cross section are by no means followed universally, but are believed to represent the best current practice. The minimum thickness shown is supposed to be employed where the traffic is light and the subgrade is uniformly stable, while the maximum thickness is adapted for opposite conditions. Perhaps the most usual compacted thickness of surface is eight inches at the center and six inches at the edges. The difference in thickness between the edges and center is effected by making the crown of the subgrade flatter than that of the surface.

The construction of a gravel road usually is divided into two entirely distinct classes of work. The work of grading and preparing the subgrade falls into one class, and that of hauling, spreading and compacting the gravel into the other. The first class of work has been discussed at considerable length in connection with earth and sand-clay roads, but since it is desired to emphasize certain features of subgrade preparation that are of increased importance in connection with gravel-road construction, both classes of work will be considered in the following discussion:

Preparation of the Subgrade.

In grading the roadbed and preparing the subgrade for a gravel surface, it should be borne in mind also that the more expensive a road surface, the greater should be the care exercised to prevent it from being damaged through settlement or upheaval of the subgrade, and the greater should be the accuracy with which the subgrade is constructed, so that no unnecessary surfacing material may be required to correct irregularities in grade and cross section. No matter what the soil conditions may be, the subgrade for a gravel road surface, when completed, should conform closely in grade and cross section with the requirements of the plans and should present an even, uniform appearance. Also, it should be as firm and unyielding as the conditions will permit.

Some of the most important details requiring careful attention in preparing the subgrade, and which are perhaps most frequently overlooked, are (1) backfilling culvert trenches so as to prevent subsequent settlement, (2) exclusion of vegetable matter from fills, (3) provision for draining wet-weather springs which occur in the subgrade, and (4) the matter of thoroughly loosening and distributing the materials contained in old road crusts.

After the roadbed has been graded and drained properly, and the details mentioned above have received proper attention, the work of preparing the subgrade consists simply in forming a trench, as shown in figure 1, to receive the gravel surface. The trench may be formed largely with a grading machine, but the final shaping should be effected by means of picks and shovels and rolling. It is customary to provide grade stakes at intervals of about 50 feet, to serve as a guide for the pick and shovel work, and where extreme accuracy is desired cords may be stretched between the stakes to insure that the subgrade conforms to the required grade throughout. The rolling is done ordinarily with a power roller weighing about ten tons.

In order that the subgrade may be well drained during the process of spreading and compacting the gravel it is frequently necessary to provide shoulder drains at comparatively short intervals. Such drains are constructed by opening small ditches through the shoulders and partially filling them with gravel.

TYPICAL CROSS SECTIONS SHOWING METHOD OF CONSTRUCTING A GRAVEL ROAD

"W" should be at least 10 feet for single track roadway and "S" generally not less than 5 feet; for double track, "W" should be not less than 14 feet and "S" not less than 3 feet.

"H", crown, varies from ½ inch per foot for level grade, to 1 inch per foot for a grade of 5%.

FIG. 1

PROPER FEED FOR CHICKENS

Dry Ground Mixture in Hoppers Should Be Kept Before Them at All Times—Give Some Milk.

Farmers should keep dry ground feed, such as a mixture of bran, shorts and corn meal, in hoppers before the hens at all times. Either sour milk or buttermilk should be given as a drink. Crushed limestone or oyster shell should be before the hens all the time, and the hens should go to roost with full crops.

FARMER SHOULD KEEP BEES

Interesting and Profitable Pursuit—Every Farm Should Have Its Supply of Honey.

A careful study of the bee and its life and habits and a little effort to adjust one's actions to those of the bees will soon make beekeeping an interesting and profitable pursuit. Every farmer should produce his own supply of honey by keeping and properly caring for a few stands of bees.

TO DESTROY SHEEP SORREL

Weed Cannot Be Entirely Exterminated by Mowing, But It Can Be Weakened to Great Extent.

Sheep sorrel cannot be entirely exterminated by mowing, but it can be greatly weakened. The weed should be mown as soon as the flowering stalks have attained full size, but before they have commenced to turn red.

Ideal Ventilation.

The "King system" of ventilation is ideal for the piggery. Then the hog house will not "smell to heaven."

COLLIDED WTH A BUMBLEBEE

Aviator Finds There Are Other Things Besides Airplanes That It Is Not Safe to Encounter in the Air.

Birds and airplanes are not the only flying things with which it is possible for an aviator to have a serious collision. The author of "Tales of the Flying Service" gives as an instance a strange accident that occurred in France.

Not long ago, he says, I ran across an aviator I know, looking very much annoyed and with one eye seriously obstructed by a large contused swelling on his cheekbone. Thinking that he had had a smash of some kind, probably a bad landing in which he had been pitched against the front of his machine, I asked him what had happened.

He explained that about six hours earlier he was starting out on a fast biplane, and was going full speed on the ground in order to get a good jump into the air, when he met a large-sized bumblebee going in a hurry in the opposite direction.

"You see," he explained, "I was doing about sixty knots due east, and he was doing between thirty-five and forty knots due west, and he was a large bee, and the impact was something terrific. And," he added vindictively, "I hope he has spilled all his honey and that he's still unconscious!"—Youth's Companion.

Cultivating Muskmelons.

When the muskmelons come up, surface cultivation is best to remove weeds and to conserve moisture, stimulate a rapid growth and early maturity of the plants and the melons.

Profits From Feeding.

Profits from feeding are greater for the man who does not have to buy grain. That is merely another way of saying, "Grow your own feed."

Cultivating Beans.

Do not cultivate beans when moisture is on the foliage.

Waste Nothing.

In these days of high prices the wise farmer will let nothing go to waste.

DAIRY

HOW TO AVOID BITTER MILK

Use of Laxative Feeds Is Recommended as Preventive—Churning Difficulties Relieved.

Both the quality and quantity of a herd's milk production depend on the physical fitness of the cows as well as on the nutrients in the feed. Bitter milk and milk with a strong odor both indicate that something in the cow's digestive system is out of order. A few doses of Epsom salts are frequently of benefit, but a better method is to choose the feed that disorders will not occur.

Among dairy feeds that are inclined to be constipating and a cause of bitter milk are corn fodder, corn stover, timothy hay (and most hays except those from leguminous crops like clover and alfalfa), all straws, cottonseed meal.

Among the feeds that are laxative in their effect on the system are linseed meal, wheat bran, silage, hay from the legumes, roots, tubers and fruits, all fresh green feeds.

The use of feeds in the second list will in a large measure prevent bitter milk and also the difficulties of churning cream skimmed from such milk.

CALF PRECAUTIONS

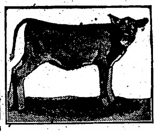
1. Feed regularly.
2. Feed at proper temperature (100 degrees Farenheit).
3. Feed individually.
4. Do not overfeed.
5. Make all changes gradually.
6. Give access to fresh water and salt.
7. Keep all utensils clean.
8. Provide clean pens with plenty of light and sunshine.
9. Provide plenty of bedding.

FEED CALVES SKIMMED MILK

Richer in Protein Than Whole Milk, but Lower in Carbohydrates—Use Clean Vessels.

Skimmed milk is a little richer in protein than whole milk, but lower in carbohydrates. Since most of the fat has been removed in the cream the skimmed milk will need carbohydrates to make it a balanced ration for calves.

A good plan is to replace a portion of the whole milk with skimmed milk, gradually increase the skimmed milk with some form of carbohydrates till all of the whole milk is replaced by skimmed milk. Fine ground meal is one of the best carbohydrate supplements to be fed with skimmed milk. Some feeders cook the meal, stir it in the skimmed milk and feed it to the calf. After the calf is two weeks old it will eat fine ground meal and if fed small quantities will assimilate it. Linseed meal is also used.



Skim Milk Age (One to Six Months.)

Care should be taken in feeding calves. They should be taught to drink from the pail as soon as possible. Nothing but clean vessels should be used and the milk should be clean and warm.

GIVE CALF PAILS ATTENTION

During Warm Weather Especial Attention Should Be Given to Utensils—Keep Them Clean.

The farmer who uses the swill pail for feeding calves or who hangs the pail on a post between feedings without washing it will soon be looking for a cure for calf scours. The dirty calf pail is one of the chief causes of scours, according to L. W. Wing, Jr., of the University of Missouri College of Agriculture. With the fly season and warm weather at hand extra precautions must be taken in caring for the calf pails. They should be washed thoroughly after each feed and sterilized either with steam or hot water. After the pails have been sterilized they should be inverted in a clean protected place until time to use them again.

UNDESIRABLE HABIT OF COW

Usually Acquired When Animals Are Young—Hard to Break When When Once Established.

It is disappointing to give a cow good care, and feed her well, and then have her suck herself. This undesirable habit is one that cows get into usually while they are young. After the habit is once established they never quit it, and it is not an easy matter to break them of it permanently.

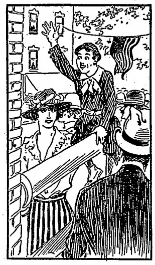
A LABOR DAY STORY

by Arthur Price

THE Labor day procession was coming down the street. The first man in it was six feet four inches tall, with a bearskin hat on his head that raised him to seven feet. He was the drum major of the band and was twirling his big silver-headed staff and throwing it into the air with fine jugglery. Behind him came the band. Then came the different unions marching in line, every man looking happy on this clear September day that he could lay aside his hammer or his trowel or whatsoever tool best represented his trade and step out to the inspiring strains of martial music.

Among those who lined the sidewalk, occupied the steps of the buildings or climbed the lamp-posts along the line of march was a certain Mrs. O'Toole, who had recently come over from Ireland. With her was her son Daniel, six years old. The mother was standing with the crowd on the curb, but Danny was perched with leg on each side of a horizontal piece of iron under the lamp, straining his eyes to catch the first glimpse of sunlight that would strike the brass horns of the band.

The drum major passed, the band passed, the grand marshal and his aids passed. Then came the carpenters' union, the plumbers' union and the masons' union.



"Which?" Cried Danny.

"Oh, Danny," cried Mrs. O'Toole, "there's your father!"

Now, Danny O'Toole had known ever since he was old enough to know anything that his father had left him and his mother in Ireland, when Danny was a baby, to come to America. He was to send money home and when he got enough together to send for his wife and boy he would do so. For awhile letters had come from him, then they had ceased. His wife had come to America to look for him.

"Which?" cried Danny.

"The man on the far side, him with the red head. Call him."

Danny, knowing only one way to attract his parent's attention, shouted "Redhead!" with all the power of his little lungs. The man heard him and, turning his head, saw a kid on a lamp-post waving his hat at him. Then, lowering his eyes, he saw his wife looking in his direction. Leaving the ranks, he came across the street, elbowed his way through the crowd to his wife, and she fell into his arms.

Meanwhile, Danny, seeing that he was not getting his share on this family reunion, dropped down on his father with one leg on each shoulder. His father pulled him down into his arms.

"The child?" asked O'Toole.

"Yes. It's Danny."

Danny got a hug that made him cry out, and, drawing off as far as he could, he punched his hugger with his little fist.

"Don't you hurt me that way ag'in!" he said, fiercely.

"Oh, Danny," said Mrs. O'Toole, laughing through her tears, "your father's so glad to see you."

That ended the O'Toole family's interest in the Labor day procession. O'Toole went with his wife and boy to their rooms, where he explained his long silence. He had been suddenly taken ill and attacked with loss of memory. It had partially returned to him and he had written his wife, but she had already left Ireland for America.

That was a number of years ago. Since then Danny O'Toole has grown to be a stalwart young fellow, has learned his trade and can swing a sledgehammer with any man. And when Labor day processions march down the street between admiring crowds Danny is sure to be among them. And he takes a great interest in the day because it is the anniversary of his first meeting with his father in America and of his family reunion.

His Holiday

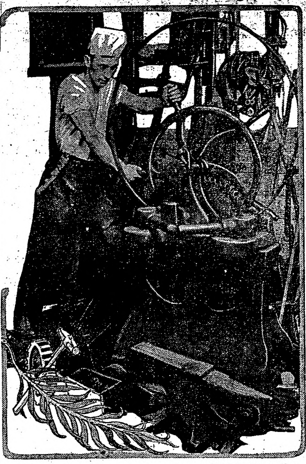

Photo by George Alsop.

TODAY we pay a tribute to the power behind the throne—the man who sweats and delves and toils for everything we own. He plots our channels, paves our streets, he steers the ship of state, he holds within a giant's grasp great engineering feats. He walks out to catastrophes with steady, fearless eye, he looks on death a thousand times—he's not afraid to die He hears big speeches in his praise, he smiles (and well he may) he knows his power and what we keep in this, his holiday.

POVERTY RECOGNIZED AS SOCIAL DISEASE

Leaders of Thought Say Its Disappearance Will in Time Be Effected by Adoption of Wise Social Party.

Alfred W. Greeley in Pennsylvania Grit.

> It is not to die, or even to die of hunger, that makes man wretched; many men have died; all men must die. . . . But it is to live miserable we know not why; to work sore and yet gain nothing; to be heat-worn, weary, yet isolated, unrelated, girt in with cold, universal laissez faire—Thomas Carlyle.

IT IS beginning to be recognized that the great bulk of the burden of poverty is as unnecessary and preventable as smallpox or tuberculosis. Just as tuberculosis is a physical disease, so poverty is a disease of the social organism. It is probably the greatest burden humanity staggers under and it exacts directly and indirectly its toll from all members of society. Why should there be hungry mouths when the proper cultivation of even one state of the Union would furnish sufficient food for our whole population? Why should millions shiver underclothed every winter when we are able to furnish textiles for the whole world? Why should there be grim periods of unemployment with vast natural resources yet untouched? These and similar questions are beginning to demand an answer that must be more than a smug, hypocritical shouldering of the responsibility upon Providence.

Poverty Never Essential.

The conquest of poverty is now an economic possibility. It is definitely within reach if we are willing to pay for it and formly desire its achievement. The campaign, many of its features now in development, is mainly one of social and economic betterments for the correction of social injustice, for the increase of the earning power of labor and capital, not one but both as a unit of efficient production; for the prolongation of human life through public sanitation and hygiene, together with preventive medicine in a war on preventable disease; for the salvage of the deficient and defective classes of society, and for the rectification of underpayment and the prevention of unemployment, understood as involuntary idleness of competent workmen. Every factor of human betterment is doing its part directly or indirectly, in this war upon poverty.

Social Surplus a Necessity.

The success of this battle with poverty is contingent upon the existence of a social surplus, the basis of all social well-being. That is, as a nation we must produce goods or services much in excess of our immediate needs of subsistence. And we are doing that today upon a scale never before known in the world. It has made us the richest nation with wealth estimated at something close to $250,000,000,000. It is an intolerable condition that when there is enough and more than enough to feed all that any should hunger, save, perhaps, the chronically criminal and the unemployable of various antisocial types.

Civilization has kept pace with increased economic production. "Starting from a rude social order wherein bare and uncertain existence was the most that man could wrest from nature, society has attained an incredible economic productivity by the development of intellectual force and manual dexterity, by the more efficient arrangement of its own powers, and most of all by the discovery and utilization of natural energies. The diffusion of comforts, the possibilities of luxuries, the rise of arts and letters, the spread of culture—in a word, the development of civilization is the consequence of increased economic production." And furthermore, we can place no limit to the future rate of increase in production clearly assignable.

The history of the United States illustrates the working of this principle which has ousted the gloomy, pessimistic prophecy of Malthus. From 1850 to 1900 the population increased 226 per cent, while the production of the eight great cereals increased 409 per cent. And what is true of our agricultural products is also true even to a greater extent of iron and steel, textiles and other manufactures. Our per capita wealth in 1850 was $307. It is now supposed to be about $1,800 or $2,000.

Workers' Condition Bettered.

Together with this great increase in national production and wealth, with the creation of a great unprecedented social surplus, has gone a wonderful betterment in the condition of the working classes. Wages have risen, expenditures have increased for nonphysical satisfaction; the deposits in savings banks have augmented; the per capita consumption of wheat, sugar and meat have grown; the death rate has declined, and, taken altogether, there has been a steady and unprecedented improvement in the condition of the workers.

But the creation of this huge social surplus has not removed the challenge of want; it has not destroyed the menace of poverty. It has only made a solution of a bitter problem possible. While there is no doubt that the intensity of poverty is less today than in the past, even in this country, yet the challenge of poverty and its consequent misery still stands wolflike at our threshold. In the words of Professor Hollander: "The root of the problem lies deeper. Poverty, like certain of its primary causes, is a phase of modern industry. The very forces which increase the national product and enlarge the social surplus, if left to themselves, breed conditions of want. . . . Far from diminishing with increased wealth production, the misery resulting from such causes is, in the face of social inaction, likely to augment and intensify. Society may grow richer, civilization may advance, and yet poverty continue to gnaw cancer-like at its vitals."

Our enormous national wealth with its unprecedented social surplus, our vast natural resources which we are conserving in time, our national ideals and aspirations for social, political and industrial justice, are the factors which, sooner or later, may give us the unique distinction of being the world's first nation to abolish poverty.

REGULARS IN NOVEL BILLET

United States regulars are quartered in the old Mexican adobe village at the San Diego Exposition grounds. Upon passing the sentry one is given a pleasant surprise to see our boys at home in the "Painted Desert," formerly a concession.

HUSKY MAN FOR THE NAVY

Joe Cox, a heavyweight pugilist, has enlisted in the Naval Reserve and gains many recruits by exhibitions of his feats of strength. Lately he has been helping get cooks for the service.

Coffin as a Mascot.

Mme. Bertha, who was deported from her sumptuous mansion in the West end of London as an "undesirable alien" a couple of years ago, had an upper room, which her servants irreverently called her "vault," hung with somber black curtains, and in the center, mounted on trestles, the most elaborate specimen of the undertaker's art that could be imagined.

It was of polished rosewood, finely worked with silver mountings, very massive. On the name plate was delicately engraved "Bertha Trost." The favorite entertainment of this notorious beauty specialist, and "reincarnation of Marie Antoinette," was a reception to "view my mascot," as she termed this coffin, and she would explain to her startled guests that she kept it near at hand to reconcile her to the idea of death!

Stock Steak.

The diner had finished his first course and lay back, frowning at the unvanquished steak before him. Twice in one minute the new waiter made an attempt to clear away and received a sullen dismissal each time.

"Beg pardon, sir," he said at last. "There's a big demand for steak today. We have only three of them in stock, and the other two being in use, we'd be glad if you've finished with this one."

92,000 Pieces in Clock.

At Beauvais cathedral there is a clock which is composed of 92,000 separate pieces, having 52 dial plates. This clock gives the time in the big capitals of the world as well as the local hour, the day of the week and month, the rising and setting of the sun, the phases of the moon and tides as well as considerable other information.

WOMAN NOW IN PERFECT HEALTH

What Came From Reading a Pinkham Advertisement.

Paterson, N. J.—"I thank you for the Lydia E. Pinkham remedies as they have made me well and healthy. Sometime ago I felt so run down, had pains in my back and side, was very irregular, tired, nervous, had such bad dreams, did not feel like eating and had short breath. I read your advertisement in the newspapers and decided to try a bottle of Lydia E. Pinkham's Vegetable Compound. It worked from the first bottle, so I took a second and a third, also a bottle of Lydia E. Pinkham's Blood Purifier, and now I am just as well as any other woman. I advise every woman, single or married, who is troubled with any of the aforesaid ailments, to try your wonderful Vegetable Compound and Blood Purifier and I am sure they will help her to get rid of her troubles as they did me."—Mrs. ELSIE J. VAN DER SANDE, 36 No. York St., Paterson, N. J.

Write the Lydia E. Pinkham Medicine Co., (confidential) Lynn, Mass, if you need special advice.

LIMBS MADE OF CARDBOARD

Artificial leg, Invented by Danish Doctor, Enables Wearer to Walk Soon After Amputation.

A Danish doctor at a hospital in Paris has invented a cardboard leg which enables the wearer to go about without crutches two days after his limb has been amputated.

The materials used are two sheets of cardboard about three-sixteenth of an inch thick, and bandages soaked in a starch solution. After careful measurements have been taken the cardboard is cut into what looks like two peg-tops, which after being soaked in the bath fold round each other and are secured with bandages.

The principle is that of an egg in a cup, and the patient can wear the leg long before the wound is completely healed. He can thus get air and exercise, which it is usually impossible to obtain at this phase of his convalescence; also he has to suffer none of the inconvenience of crutches, a stick sufficing for his needs. The leg, properly treated, lasts from six months to a year, by which time a permanent artificial limb is ready to be fitted.

Horse Chestnuts for Food.

An effort is being made to adapt the horse chestnuts to the human dietary. The nuts are more than half starch and sugar, with some protein and fat, and are nutritious. Their value chiefly depends on the elimination of the bitter elements and the irritating saponi-like glucosides.

Feed the Fighters! Win the War!!

Harvest the Crops—Save the Yields

On the battle fields of France and Flanders, the United States boys and the Canadian boys are fighting side by side to win for the World the freedom that Prussianism would destroy. While doing this they must be fed and every ounce of muscle that can be requisitioned must go into use to save this year's crop. A short harvest period requires the combined forces of the two countries in team work, such as the soldier boys in France and Flanders are demonstrating.

The Combined Fighters in France and Flanders and the Combined Harvesters in America WILL Bring the Allied Victory Nearer.

A reciprocal arrangement for the use of farm workers has been perfected between the Department of the Interior of Canada and the Departments of Labor and Agriculture of the United States, under which it is proposed to permit the harvesters that are now engaged in the wheat fields of Oklahoma, Kansas, Iowa, North Dakota, South Dakota, Nebraska, Minnesota and Wisconsin to move over into Canada, with the privilege of later returning to the United States, when the crops in the United States have been conserved, and help to save the enormous crops in Canada which by that time will be ready for harvesting.

HELP YOUR CANADIAN NEIGHBOURS WHEN YOUR OWN CROP IS HARVESTED!!!

Canada Wants 40,000 Harvest Hands to Take Care of its 13,000,000 ACRE WHEAT FIELD.

One cent a mile railway fare from the International boundary line to destination and the same rate returning to the International Boundary.

High Wages, Good Board, Comfortable Lodgings.

An Identification Card issued at the boundary by a Canadian Immigration Officer will guarantee no trouble in returning to the United States.

AS SOON AS YOUR OWN HARVEST IS SAVED, move northward and assist your Canadian neighbour in harvesting his; in this way do your bit in helping "Win the War". For particulars as to routes, identification cards and place where employment may be had, apply to Superintendent of Immigration, Ottawa, Canada, or to

R. A. GARRETT, 311 Jackson Street, St. Paul, Minn.
Canadian Government Agent.

A Helpful Hint.

"Do you think it really necessary to go to the trouble of having the suspected courtplaster analyzed by a bacteriologist?" asked J. Fuller Gloom. "Haven't you a brother-in-law that you can try it on?"—Kansas City Star.

Lemons Whiten and Beautify the Skin! Make Cheap Lotion

The juice of two fresh lemons strained into a bottle containing three ounces of orchard white makes a whole quarter pint of the most remarkable lemon skin beautifier at about the cost one must pay for a small jar of the ordinary cold creams. Care should be taken to strain the lemon juice through a fine cloth so no lemon pulp gets in, then this lotion will keep fresh for months. Every woman knows that lemon juice is used to bleach and remove such blemishes as freckles, sallowness and tan and is the ideal skin softener, smoothener and beautifier.

Just try it! Make up a quarter pint of this sweetly fragrant lemon lotion and massage it daily into the face, neck, arms and hands. It should naturally help to whiten, soften, freshen and bring out the hidden roses and beauty of any skin. It is wonderful for rough, red hands.

Your druggist will sell three ounces of orchard white at little cost, and any grocer will supply the lemons. Adv.

Slight Mistake.

"I must say this khaki camping skirt is a loose fit."

"You're in wrong, auntie. That is the boy's tent you have on."

HOW INSANITY HAS GAINED

Increase in United States Revealed by Census Taken by National Committee for Mental Hygiene.

Insanity in the United States is decidedly on the increase. This fact is revealed by reason of a census taken of the insane, feebleminded, epileptics, inebriates and drug addicts by the National Committee for Mental Hygiene. Analysis of this census is found in the Mental Hygiene. It was compiled by Horatio M. Pollack, statistician of the New York State Hospital commission, and Edith M. Furbush, statistician of the National Committee for Mental Hygiene.

The federal census bureau estimates that the increase of population from April 15, 1910, to January 1, 1917, was 11.80 per cent. The same government agency found in 1910 that the number of insane in institutions was 187,791. The census taken in the present year revealed 234,055 insane persons in institutions. Thus the increase in the insane in institutions during the corresponding period was 24.64 per cent, a growth more than double that of the general population.

Moreover, the rate of increase of the insane in institutions was relatively greater than that of the general population in every state except Arizona, Kansas, Mississippi, Nevada and South Carolina. Illinois is one of the states in which the disparity between growth of population and increase in insanity has been greatest. In this state the population increase was 9.84 per cent, as compared with a percentage of increase of insane in institutions of 27.38. The neighboring state of Indiana shows an even greater disparity, with percentages of 4.64 and 27.44 respectively.

Alert for the Future.

"You've got a lot of weeds in your garden."

"Pretty fine weeds, too, don't you think?" rejoined Mr. Crosslots.

"Surely you are not nursing them along?"

"Yes, sir. I've been finding out that so many new things are edible that I'm holding out to see whether science won't discover some way of frying the jimpson or stewing the burdock."

"No bowl is too big when it holds Post Toasties"
—Bobby

DADDY'S EVENING FAIRY TALE

By MARY GRAHAM BONNER

FLOWER GARDEN.

"In an old-fashioned garden," said Daddy, "there were many of the same flowers that grow up year after year. In the spring the hyacinths, the lilies of the valley, the crocus plants, the daffodils and tulips all came up and blossomed.

"Sometimes they were a little early and the cool days would come which half-froze them, but they bravely kept their little heads up and the sun usually rewarded them by coming back and shining on them so as to make them warm.

"Then there were the lilacs on the bushes. Such lovely lilacs as there were. Some were white, and some were purple, and there were lovely lavender ones, which were called Persian.'

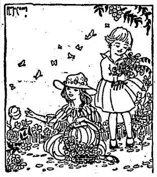
"And then came the time for roses and lilies, peonies and tall iris flowers. And the more flowers that came out, the more did the butterflies and humming birds come to the garden for their meals of delicious flower honey. Now one day, the flowers were growing up that had been planted by seed. The roses were whispering in the soft summer wind. And their whispering made the air so fragrant and sweet. That was really not at all surprising for they were whispering secrets of how much they loved the sun and the garden and how well they were looked after, and how many buds they thought would open the next day.

"One was saying, 'I'm going to the big ball tonight.'

"'What big ball?' asked another.

"'I am being saved for the great ball,' repeated the rose. 'I am not just sure which one, but it's to be very big and splendid. I am being saved for the girl who loves us so, and who spends so much time over us. I am going to be worn by her. Yes, and I am to give color to her dress, she said. She is to wear a white dress and as I am dark and red I will make her look quite dressed-up. That was what she said. Think of the honor of making someone feel dressed up at a ball.'

"'Whatever do you mean by being saved for this and that entertainment?'



"All Flowers Are My Favorites."

asked the little flowers that had grown up from seeds which had been planted early in the spring. There were candytufts, mignonettes, poppies and many others.

"'We mean,' said two of the roses together, 'that we will not be picked until a certain time, and then for a great entertainment. We will not be used for anything at all, but will be saved for something very fine. Yes, something very special!'

"'We don't know what to make of it all,' said the mignonettes.

"'You don't know what to make of us?' asked the roses.

"'I know you are beautiful and so very fragrant,' said one little mignonette. 'But we try to be as sweet as sweet can be, too. And we look our best. We can't be big and beautiful like roses, but we do try to be as nice as we can, and sometimes, sometimes it hurts our feelings a little to have folks say that roses are the only flowers worth while.'

"'I am sure,' said the first rose, 'that no one says that. We are considered fine, it is true, but you've never known it to spoil us, have you? We've never grown conceited. It has just made us happy and proud. And we have never lost our sweetness. Still roses are fragrant as they ever were. You mustn't feel hurt, little mignonettes. We're sure you'll be picked for a dear little vase and put in the nice old-fashioned house.'

"'Yes,' said the nasturtiums, 'and so will we. We are glad too, for they like brightness—only perhaps we're not so nice after all—we aren't especially sweet.'

"'But you're so bright and happy and gay," said the mignonettes.

"Just then two little girls came out in the garden. They each had a pair of scissors and were picking flowers for the old-fashioned house. 'I never can make up my mind,' said the first little girl, 'just which is my favorite flower. One day I say that I have decided on three and the next day I have chosen three more. After all, I think I love them all the same. For they all are sweet or bright or lovely in some way, and they make me so very, very glad I'm alive.'

"'Yes,' said the second little girl, 'I am the same way, but I have decided that no one flower is my favorite, but that all flowers are my favorites.'

"And the flowers in the garden each nodded their pretty heads in thanks, and not only looked, but felt their very best!"

The KITCHEN CABINET

I would be true, for there are those
who trust me,
I would be pure for there are those
who care.
I would be strong for there is much to
suffer;
I would be brave for there is much
to dare.
—H. Arnold Walters.

HOT DAY DRINKS.

Mix the juice of one pineapple and one lemon with four tablespoonfuls of mint leaves cut into bits and a half cupful of sugar. Beat the whites of four eggs until stiff and gradually whip in the fruit juice. Add a quart of carbonated water and serve.

Maple Egg.—Beat an egg until foamy, add gradually two tablespoonfuls of ice-cold maple sirup. Stir in half a cupful of rich milk. Cover with whipped cream and top it with grated maple sugar.

Tea Cream.—Pour boiling water over two ounces of the best tea, cover and let stand for five minutes, stir into it one quart of scalded cream, cover and stand five minutes, strain, sweeten and chill.

Grape Eggnog.—Beat one egg very light, add half a glass of grape juice and beat again. Then add half a glass of cream, beat well, sweeten if desired and serve with wafers.

Banana Float.—Mash three bananas with the juice of one lemon, add a cupful of sugar and gradually one cupful of sugar, then fold in two cupfuls of whipped cream. Put a few spoonfuls of this mixture in a glass and fill up with orange juice.

Jelly Jumble.—Dissolve a glassful each of blackberry, crab apple and plum jelly in two quarts of boiling water. When cold add the juice of two lemons and sugar to sweeten.

Egg Orangeade.—Beat separately the white and yolk of an egg. Add gradually to the yolk the juice of one orange, then add the beaten white and stir to a froth. Pour milk into a glass and top with the mixture. Serve with pale yellow nasturtiums on the plate as a garnish.

Ginger Water.—This is an old-fashioned drink which is most refreshing and wholesome. Mix a tablespoonful of ginger with three of sugar and add a pint of iced water, stir until well mixed and serve at once.

Place marshmallows on round crackers, put a nut meat on each and brown in the oven.

We are very slightly changed
From the semi-apes who ranged
India's prehistoric clay;
Whoso drew the longest bow,
Ran his brother down, you know,
As we run men down today.
—Kipling.

SOME FRUIT DISHES.

Peaches may be used in various combinations for desserts, the following is one worth bearing in mind:

Peach Trifle.—Scald a pound of peaches, drain, remove the skins and stones. Prepare a sirup of sugar and water and when boiling hot drop in the peaches and cook until soft, then rub them through a sieve. Pour the sirup into a sponge cake and when well-soaked add the pulp carefully. Whip a pint of cream, add two tablespoonfuls of sugar, a teaspoonful of almond extract and pile lightly on top of the cake just before sending to the table.

Fresh fruit may be used for this dessert, not cooking the fruit but stirring the sugar into the pulp after putting it through a sieve.

Apricot Tapioca Pudding.—Cover one and a half cupfuls of tapioca with cold water and soak three hours, then cook in three cupfuls of boiling water, add a half teaspoonful of salt and a cupful of sugar, cook in a double boiler until transparent.

Peel and stone twelve apricots and put them in the bottom of a buttered dish, pour over the tapioca mixture and bake in a moderate oven for twenty minutes. Serve hot or cold with cream and sugar.

Gooseberry Chutney.—Wash, stem and top six cupfuls of gooseberries, add one chopped onion and two cupfuls of raisins, put all through a food chopper. Add one and a half cupfuls of brown sugar to the chopped mixture, two tablespoonfuls of powdered ginger, one tablespoonful of cinnamon, three tablespoonfuls of mustard, two tablespoonfuls of salt, one-fourth of a teaspoonful of red pepper and paprika mixed, one teaspoonful of tumeric powder and a quart of cider vinegar. Bring gently to the boiling point and simmer for an hour. It may be bottled unstrained or if strained may be used as a relish or catsup.

Nellie Maxwell

Cheerfulness.

"Cheerfulness is a small virtue, it is true, but it sheds such a brightness around us in this life that neither the dark clouds nor the rain can dispel its happy influence."—E. V. B. Alexander.

A Sign of Age.

When a man begins to say that all he does is to get up in the morning and go to work and go home in the evening and go to bed, he's getting old, whether he will admit it or not.—Atchison Globe.

Plausible.

Tille Clinger says taht the reason she thinks her new boss' wife is keeping cool through the hot weather is because her telephone voice sounds as if it were right off the ice.—Galveston News.

CUTICURA IS SO SOOTHING

To Itching, Burning Skins—It Not Only Soothes, but Heals—Trial Free.

Treatment: Bathe the affected surface with Cuticura Soap and hot water, dry gently and apply Cuticura Ointment. Repeat morning and night. This method affords immediate relief, and points to speedy healment. They are ideal for every-day toilet uses.

Free sample each by mail with Book. Address postcard, Cuticura, Dept. L, Boston. Sold everywhere.—Adv.

The Reason.

"Let that man down easy."

"Why should I?"

"Because he's so hard up."

DRUGGISTS PLEASED WITH GOOD KIDNEY MEDICINE

I have sold your remedy for the past fifteen years and have sufficient confidence in it to give it my personal recommendation. I believe it is one of the best medicines of its class on the market today and I find pleasure in selling it at all times.

Very truly yours,
KAMINER'S DRUG STORE,
F. V. Kaminer, Prop.,
Nov. 4, 1916. Spartanburg, S. C.

Letter to
Dr. Kilmer & Co.
Binghamton, N. Y.

Prove What Swamp-Root Will Do For You

Send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample size bottle. It will convince anyone. You will also receive a booklet of valuable information, telling about the kidneys and bladder. When writing, be sure and mention this paper. Large and medium size bottles for sale at all drug stores.—Adv.

The angels couldn't be better than men in love assert that they will be after marriage.

A Message to Mothers

YOU know the real human doctors right around in your neighborhood: the doctors made of flesh and blood just like you: the doctors with souls and hearts: those men who are responding to your call in the dead of night as readily as in the broad daylight; they are ready to tell you the good that Fletcher's Castoria has done, is doing and will do, from their experience and their love for children.

Fletcher's Castoria is nothing new. We are not asking you to try an experiment. We just want to impress upon you the importance of buying Fletcher's.

Your physician will tell you this, as he knows there are a number of imitations on the market, and he is particularly interested in the welfare of your baby.

Genuine Castoria always bears the signature of Chas. H. Fletcher.

160 ACRE FARMS IN WESTERN CANADA FREE

Canada's Liberal Offer of Wheat Land to Settlers

is open to you—to every farmer or farmer's son who is anxious to establish for himself a happy home and prosperity. Canada's hearty invitation this year is more attractive than ever. Wheat is much higher but her fertile farm land just as cheap, and in the provinces of Manitoba, Saskatchewan and Alberta

160 Acre Homesteads Are Actually Free to Settlers and Other Land Sold at from $15 to $20 per Acre

The great demand for Canadian Wheat will keep up the price. Where a farmer can get near $2 for wheat and raise 20 to 45 bushels to the acre he is bound to make money—that's what you can expect in Western Canada. Wonderful yields also of Oats, Barley and Flax. Mixed Farming in Western Canada is fully as profitable an industry as grain raising.

The excellent grasses, full of nutrition, are the only food required either for beef or dairy purposes. Good schools, churches, markets convenient, climate excellent. There is an unusual demand for farm labor to replace the many young men who have volunteered for the war. Write for literature and particulars as to reduced railway rates to Supt. of Immigration, Ottawa, Can., or to

Typewriter Service in Rural Communities

The typewriter is coming into more extended use in rural communities because of the assistance it renders to all classes of people. *Here are a few examples:*

Think of the possibilities of selling produce by the means of typewritten letters sent out to customers? Typewritten letters give the sender a business standing with the people who receive them and also enable the keeping of carbon copies of the correspondence, which many times does away with misunderstandings and lawsuits.

The boy or girl who is intending to follow a business career can secure no better start than a knowledge of typewriter operating. Children who learn to use the typewriter learn spelling at the same time. The housewife finds it a great convenience in writing recipes and for general correspondence.

L. C. SMITH & BROS. TYPEWRITER CO., Syracuse, N.Y.

Should She?

Simplicity—Is the light out in the hall?

Dullmus—Yes. Shall I bring it in?

YES! MAGICALLY! CORNS LIFT OUT WITH FINGERS

You say to the drug store man, "Give me a small bottle of freezone." This will cost very little but will positively remove every hard or soft corn or callus from one's feet.

A few drops of this new ether compound applied directly upon a tender, aching corn relieves the soreness instantly, and soon the entire corn or callus, root and all, dries up and can be lifted off with the fingers.

This new way to rid one's feet of corns was introduced by a Cincinnati man, who says that freezone dries in a moment, and simply shrivels up the corn or callus without irritating the surrounding skin.

If your druggist hasn't any freezone tell him to order a small bottle from his wholesale drug house for you.—adv.

A man caters to a woman's vanity when he thinks it will further his own interests.

Red Cross Meeting.

A meeting of The Goodridge Branch Chapter of the Pennington County Chapter of the American Red Cross Society will hold a meeting in the school house next Tuesday evening Sept. 4th at 8 P. M. The purpose of this meeting is to form a permanent branch chapter and elect permanent officers. All those who have become members are urged to be present also non-members are cordially invited to attend.

It is very pleasing to note the enthusiasm which new members are displaying, as we now have fifty-five members, that means twenty-two new members this past week. Two weeks more of good work like this will give us at least one hundred members. Everybody is kindly asked to do their bit.

The following is the list of names of the 22 new members that haved joined the Red Cross Chapter during the past week.

Miss Laurence Urdahl
Carl Christianson
H. A. Halvorson
P. C. Halvorson
Miss Mabel Johnson
G. C. Gulrud
Miss Myrtle Resan
Oluf Omlid
O. G. Lee
Sever Anderson

Andrew Wells
Mrs. M. G. Thoreson
Miss Tillie Thompson
H. L. Ward
Stuart McLeod
Martin Olson
Clarence G. Stephenson
Miss Arvilla Heggestuen
Miss Ella Olson
Mrs. H A. Halvorson
Mrs. Otto C. Schultz

LOSSES TOTAL 4,500,000

German Official Lists Show Casualties Since War Began.

London.—Total German casualties reported during July in the German official lists, but not necessarily having occurred in July, amounted to 89,-863, as follows:

Killed or died of wounds or sickness, 12.389.

Prisoners or missing, 14,620.

Severely wounded, 13,896.

Wounded and slightly wounded, 39,-958.

The total German casualties of all classes since the beginning of the war exceeds 4,500,000.

NORTHWEST COAL SUPPLY

President Declares Sufficient Fuel Will Be Available.

Washington, D. C. — President Wilson will take action that will insure the Northwest its winter supply of coal.

This action will be an executive order designating an administrator to handle the coal problem under the priority shipping law.

This priority law administrator will have authority over the loading of cars at the mines and their movement to Lake Erie ports, where the coal will be shipped by water to the Head of the Lakes.

ENEMY TOWNS ARE RAIDED

Tons of Explosives Dropped by British Airplanes.

London.—Many tons of explosives were dropped on enemy aerodromes and railway stations by British navy planes.

Several fires were observed following raids on the Ostend station and the Chisteless aerodrome.

At Engel and Uytkerke aerodromes were bombed and road transports attacked by gunfire from the air.

ONLY ONE BLAST VICTIM

Others in Canadian Powder Explosion Accounted For.

Montreal, Que.—Only one person, a foreigner, is known to have been killed by the explosion which destroyed the powder plant of the Curtis & Harvey Co., Ltd., at Regaud, near here. Six workmen were injured severely. This statament was made by T. H. Curtis, director of the company. The monetary loss was placed at $2,000,000.

Former Czar Sent to Siberia.

Petrograd, Russia.—Telegrams from Viatka, on the northern route to Siberia, report the passage of the special train with lowered blinds which no one was allowed to approach. The train, which is going eastward, is assumed to contain the former Emperor Nicholas and his family.

Von Bernstorff to Turkey.

Amsterdam, Holland. — Count von Bernstorff, the former German ambassador to the United States, has been appointed to the post at Constantinople. He will leave Berlin immediately.

CONTRABAND

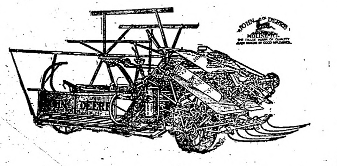
By RANDALL PARRISH

THE outbreak of the Great War and the attempt by a big speculator to organize a copper pool supplies the motif for this splendid story. The scene is laid almost entirely on the high seas, first on the private yacht of the Copper King, then on a big freighter, filled with contraband of war, attempting to run the blockade. With the sinking of this vessel the action passes to a gruesome death ship, laden with treasure and horrors.

From the time Robert Hollis encounters a strange, mysterious young woman on board the "Esmeralda" until the two leave the death ship together, there is a succession of thrilling situations and perilous adventures related as only Parrish can tell them. Watch for and read

Our New Serial!

John Deere Binders



JOHN DEERE BINDERS are built for the man who wants real visible quality. The binder is one of the most important machines used on the farm and a few dollars in price is of no consequence when saving a crop is a consideration. Curfew Will Not Ring.

At a meeting of the village counci held Monday evening the village dads decided to drop the Curfew Ordinance and the money now being used to pay a curfew officer will be used for installing three more street lights. It was thought that the lights would be of more benefit to the public than the ringing of the curfew. Accordingly three new street lights will be installed one on the south side of the track, one on the west end of the main street and one on the corner by Johnsrud residence. This will make Goodridge a little brighter this winter.

Surprise On Rev. Bjornson.

Last Sunday afternoon members of Rev. H. Bjornson's congregation gave him a surprise party in honor of his 18th anniversitry of his wedding. Twenty two auto loads and twelve teams were present. As a token of the esteem in which he is held by his people, Mr. Berve, in behalf of the congregation, in a few well chosen words, presented him with the sum of $124.00.

Hire Buss Drivers.

At a regular meeting of the school board held Tuesday evening, the buss drivers and the janitor were hired for the coming school year. Osmund Urdahl will drive the buss on the west route and Emil Swarre will have the hauling of the children on the east route. Bennie Johnson will hold down the janitors chair again this year. No definite date has yet been set for the opening of the school but it is expected that the work now being done on the school house will be finished in time so that school can commence about the middle of this month.

At The Grand Theatre.

Remember the show at the Grand Theatre Saturday and Sunday evening. A very interesting program has been secured. The following will be shown Strong Men of the North, The Taming of the shrew and a Son's Sacrifice. After the show on Saturday night the floor will be cleared for dancing, at which good music will be furnished. Come in and take in the show and stay for the dance. You will surely have a good time.

Goodrdge Again
Defeats Newfolden.

Sunday the Goodridge base ball team, accompanied by a small bunch of rooters. autoed to Newfolden and defeated that aggregation by a score of 10 to 3. Newfolden getting their three lone scores in the first and sixth innings, while Goodridge ran in a score in most every inning. Dutch again pitched great ball, getting 15 strike outs to their pitcher's 7. Even their heaviest batters were easy meat for him. Our whole infield played errorless ball thruout the entire game, while the out field had practically nothing to do, excepting two fly balls went out to Abe, who garnered them well. P. P. Palmer umpired the game to the satisfaction of both sides Nuff Said!, Newfolden was easy meat for Goodridge.

Dedication Day.

Last Saturday being designated as "Dedication Day", a day set apart to honor the lads who were called to the colors in the first draft. A big celebration in honor of the boys leaving from Pennington County was held at Thief River Falls Saturday afternoon In order that the people from Goodridge might attend all business places here were closed from twelve o'clock noon to six p. m. A large crowd from this part of the county were in attendance at the celebration.

The first part of the celebration was an auto parade thru the main business streets of the city and out to Squaw Point where a big dinner was served to the Home Guards and the drafted men. Several hundred autos participated in the parade. After dinner the Home Guard went thru their drills. When they were thru two very interesting and patriotic speeches were delivered by Ex-Congressman Frank M. Eddy and Hon. Judge Andrew Grindeland, which was enjoyed very much by all present. After the speeches the drafted men were lined up in front of the speakers stand coming up there one at a time as their names were read from the honor rol by Judge Grindeland, who spoke a few encouraging words to them. After this the drafted men lined up in front of the camera and had their pictures taken. The Kid Band of Thief River Falls rendered some beautiful music during the afternoon. The big crowd dispersed about 4:30 feeling that their time had been well spent, and thus a most eventful day went down in the history of Pennington County.

Germantown News.

Jack Frost was here the other night and bit everything that was in the garden.

Miss Della Roller was a Thief River Falls visitor Monday, and returned Tuesday night.

Mr. and Mrs. Nick Bundhund were callers at the C. L. Wayne home Tuesday evening.

C. L. Wayne was a caller at Hans Clausen's Wednesday night.

Mr. and Mrs. L. G. Ludtke and Mr. and Mrs. Leon Babcock and family of Thief River Falls were up here Sunday visiting with friends.

Mr. and Mrs. Emil Ristau and Hans Clausen were visitors at the Jack Kast home Sunday.

Mr. and Mrs. Frank Kianz were callers at the Aug. Ristau home Sunday.

Mr. and Mrs. L. G. Ludtke were up from Thief River Falls saying goodbye to their friends as they will leave Wednesday for Montana.

Miss Lois Struble left Monday for Thief River Falls to attend High School.

Mr. and Mrs. George Schwandt of Mavie were callers at Paul Stouck's home Sunday.

Hans Clausen was a visitor at the Emil Ristau home Sunday night.

Henry Ristau was a visitor at Hans Clausen's Sunday.

Carl Habedank and son Emil made a flying trip to Thief River Falls Friday morning.

Miss Bessie Roller was a visitor at the G. Benson home Sunday.

August Ristau was a Thief River Falls vistor Saturday.

Star News.

(Too late for last week).

Hubert Jacobson, accompanied by his Uncle Pete Jacobson of Steiner, motored out for a brief visit to the former's claim Sunday, returning Monday morning.

Ole Trontvet transacted business in Goodridge Saturday.

Mr. Tharaldson of Germantown a nephew of Ole Tharaldson of eastern Star, purchased during the past week, a large number of cattle in this vicinity which were shipped to South St. Paul from Goodridge Saturday.

Mrs. Caroline Dahlen and son, Olaf, visited at the Syverson home Sunday afternoon.

H. C. Iverson was a Goodridge business visitor Saturday.

Threshing rigs are already at work. Joseph Johnson had his grain threshed on his farm southeast of Erie last Saturday and a good yield is reported.

Star News.

(This week's News)

Mrs. Gaarden and Mrs. Bammerud of Mayfield autoed out here Sunday for a brief visit at the Gust Iverson home.

Adolf and Henry Tangen, accompanied by their mother, came up here from Fosston by car Thursday for a few days visit at the homes of Christ Tangen and H. C. Solberg. The same party accompanied by Mrs. Solberg made a flying trip to the county seat Saturday afternoon to take part in the demonstration in honor of the departing soldiers.

Halvor Syverson recently received word from his two oldest sons, Sigurd and Erick, that they are now Uncle Sam's fighting boys and are training at the military camp at Crosby, N. Dak.

Mrs. Gustina Hrg and children, Helen, Rueben and Henry, of Northwood, N. Dak., arrived here last Wednesday via Goodridge for an ex visit with relatives in southeast Star. Mrs. Haga is a sister of Iverson's and Mrs. H. A. Dahlen.

Red Lake Agency
Sunday September 16th.

The Goodridge base ball team will journey to the Red Lake Agency Sunday September 16th and will cross bats with the Red Lake Indians. This is expected to be the final game of the season and a fine time will be had for it is the intenion to make it a picnic day. All those having cars are asked to accompany the team and bring their lunch with them and have a picnic dinner among the pines around the lake. A number of cars from Grygla are contemplating on making the trip. Remember the date Sunday September 16th, and make it a point to make the trip. You will never regret it if you do.

HALF OF SALONIKI IS RAZED BY FIRE

London. — More than one-half of the walled city of Saloniki, in Greek Macedonia, which is under occupation by the entente allied troops, was destroyed by fire.

Eighty thousand persons, who were rendered homeless, are being removed to neighboring villages, according to a dispatch received in London.

The fire is now under control.

GRAND ARMY IN SESSION

Confederate Veteran Is Conspicuous at Encampment.

Boston, Mass. — Thousands of veterans of the Civil war and their families, here to attend the fifty-first national encampment of the Grand Army of the Republic, were officially welcomed to the city by Governor McCall and Mayor Curley.

Other speakers were former Governor John L. Bates, Commander-in-Chief W. J. Patterson of Pittsburg, and Department Commander Daniel E. Denny of Massachusetts.

A conspicuous figure among the Union soldiers was a man in Confederate gray—Major Frank M. Burrows, now in the government service at Washington, but formerly of the Culpepper minute men.

ONLY SIXTEEN SHIPS SUNK

British Losses During Past Week Show Falling Off.

London. — A heavy falling off in British tonnage sunk last week by mines or submarines is indicated in the weekly admiralty statement.

Fourteen vessels of 1,600 tons and more were sent to the bottom, as against twenty-one the previous week.

Two vessels of less than 1,600 tons were sunk last week, the same number reported the previous week.

RIGA ABANDONED; IN GERMAN HANDS AS RUSSIANS FLEE

SLAVS TAKE OPEN ROAD TO PETROGRAD IN HASTY RETREAT, BURNING EVERYTHING IN PORT CITIES.

ITALIANS CONTINUE TO PRESS AUSTRIANS HARD

Batteries of Field Marshal Haig Still Pouring Incessant Fire Against German Trenches in Flanders, But Expected Dash to Capture Them Has Not Started.

London, Sept. 5.—Riga, Russia's big port on the Gulf of Riga, is in the hands of the Germans, and its garrison and the civilian population are in retreat eastward.

Following up rapidly the advantage they gained in driving the Russians across the Dvina river on both sides of Uxkull last Saturday, the Germans threw bridges across this stream and soon were on the heels for the former defenders, some of whom offered resistance, but others of whom showed the white feather, giving the invaders no trouble in marching up the eastern bank of the Dvina toward Riga, 15 miles distant. Seeing the disaffection and the inability to stem the tides of the advance, the Russian commander ordered an evacuation.

Retreating Russians Force Capture.

With the falling back of the Russians from the city proper and the advance of the Germans northward along both sides of the stream, the Russians still defending the western bank around Dahlen, seemingly are in danger of being caught between the two fast moving bodies of the enemy and made prisoners.

The Russians in their retreat from Riga are laying the country in waste, burning villages and farms. Whether the city itself remains intact has not yet been made known, but doubtless the guns in the fortress and the ammunition stores either were moved or destroyed to prevent them falling into the hands of the Germans.

Aside from the strategic value of controlling the Gulf of Riga and of a base nearer the mouth of the Gulf of Finland, at the head of which Petrograd is situated, for the moment it is impossible to see the importance of the German gain, especially with the near approach of winter, when military operations in this northern region are almost impossible.

Italians Continue Gains.

On none of the other fronts have there been operations of great moment except in the Austro-Italian theater, where the Italians have made further progress on the Bainsizza plateau and on the Brestovizza valley and at various points along the line have repulsed fresh counter-attacks launched by the Austrians. Throughout this entire theter violent artillery duels are in progress from Tomino to the sea.

Advices to the Italian embassy in Washington are to the effect that along the front of the present offensive the Austrians have lost more than 128,000 men. Reports from Udine, Italy, give the Austrians' losses as one-third of the first line of the army.

The batteries of Field Marshal Haig are still pouring an incessant fire against the German trenches in Flanders, but as yet the anticipated new dash by his men to capture them has not strated. Doubtless the knocking down of the defenses has not reached the limits which the British commander always requires before he throws his infantrymen into the fray.

U. S. TREASURY GETS MILLIONS

Final Installment of Liberty Loan Paid By Subscribers.

Washington, Sept. 1.—Money by the millions is rolling into the treasury and its branches—the final installment on the first Liberty Loan of $2,000,000,000. The $415,000,000 represented will not be rounded up completely for several days.

Meantime government engravers are hastening the task of finishing the fancy bonds which will replace the interim certificates now held by the purchasers.

STATE FAIR BREAKS RECORD

Largest Opening Day Attendance in Institution's History.

Minneapolis, Sept. 4.—A record-breaking crowd—116,555 persons, to be exact—attended the Minnesota State Fair on the opening day. This was 23,978 more than were present at last year's opening and biggest day. Before 6 p. m. the day's attendance had broken the previous high record, that of Labor day, 1912, when 100,792 admissions were recorded.

Spain Promises Reforms.

Madrid, Sept. 2.—After a cabinet meeting presided over by King Alfonso, Premier Dato announced that a comprehensive program of reforms was in preparation and would soon be announced, after which general elections would be held. The king will return to Santander at once. There have been widespread strikes accompanied by bloodshed in Spain at intervals for several months. It is evidently in the hope of quieting this unrest that the government has determined to propose extensive reforms.

POOR MUNITIONS CAUSE STIR

RENEWED MURMURS OF DISCONTENT WITH WAR DEPARTMENT.

Situation Stirs up Antagonism Against General Crozier, and Congressional Probe Is Mentioned.

Washington, Sept. 5.—Renewed murmurs of discontent with the War department's oranance branch are heard as a result of defective ammunition being furnished General Pershing.

This situation has stirred up old ontagonisms against General Crozier, head of the bureau, and there was talk of a Congressional investigation.

This is the second time defective munitions have popped up since war was declared. Two American nurses were killed by defective gun shells aboard and American vessel bound for Europe shortly after the declaration of war.

Not Held Directly Responsible.

That Crozier was not directly responsible for impure potassium chlorate used in the defective ammunition is admitted. But his critics hold that there must be something faulty with his system when inspectors, chemists and others responsible in the Frankfort arsenal, Philadelphia, failed to discover that the potash contained some potassium bromide.

Presence of this chemical made the ammunition useless for actual fighting. With one-third of the supply—a vast quantity—thus imperfect, the lives of Pershing's men would have been wasted had not the error been disocvered at once through actual tests after shipment.

GERMANS THINK U. S. NOTE IS BAR TO EARLY PEACE

All Berlin Papers Take View That's President's Response Makes Peace Out of Question for Present.

Copenhagen, Sept. 4.—All the Berlin newspapers in their comment on President Wilson's reply to the papal peace note take the view that the American President's response makes peace out of the question for the present. Even the Tageblatt, one of the strong advocates of parliamentary reform, rejects the idea of outside pressure upon Germany for the introduction of the desired reforms.

"For the present," comments the Tageblatt, "the American government flatly refuses any peace negotiations and it is impossible to deny or question this fact."

The Vossiche Zeitung adopts a scolding attitude toward President Wilson, declaring him to be employing "deliberate lies," and declaring that the Reichstag resolution on the peace question should be an adequate guarantee for him from the German people.

GERMAN PUBLIC BELIEVES WAR WAS FORCED ON THEM

Captive Belgian Returns and Says German People Consider They Are Only Defending Their Country.

Paris, Sept. 4.—President Wilson's note being virtually addressed to the German people, there is more than usual interest in the latest account of the German people's condition and feelings as related by an army nurse named De Winne, a Belgian, who has just returned after thirty-four months of captivity in Germany.

With regard to the spirit of the Germans, he said:

"The Germans believe hard as iron that Germany was attacked and is only defending her existence. Not only do the people repeat this, but intellectuals, doctors and officers with whom I talked—and I cannot question the sincerity of their conviction, as their patriotism is as ardent as England's or France's for Germany's triumph—are so convinced of this that they are ready to make the greatest sacrifices."

KAISER POISONS CHILDREN

Teuton Airmen Scatter Poisoned Candy in France.

Plymouth, Mass., Sept. 4.—German airmen, flying by night over a French town near Rheims, recently, dropped poisoned candy, causing the death of many childrein who ate it, according to a letter from Brownlee Benzel Gauld, a former Harvard university student, who is now driving an ambulance on the western battle front. The communication was made public by his father, the Rev. F. J. Gauld, of Toledo, Ohio. The letter also states that the Germans are "continually shelling hospitals."

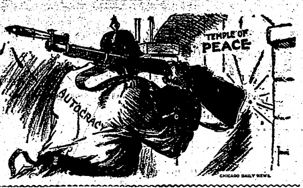
Turkish Attitude Receptive One.

Copenhagen, Sept. 4.—A Constantinople dispatch states that the attitude of the porte toward the papal peace note is a very receptive one. The Turkish reply, it is stated, probably will be delivered in a few days, simultaneously with the responses of the other Central powers.

H. C. L. Hits Army Officers.

New York, Sept. 4.—The cost of army officers' uniforms and equipment, which has been rising steadily for years, has taken such a decided jump within the last six months that it will cost most of the officers being graduated from training camps at least two months of their salary to purchase the necessaries of army life when they enter upon their new careers. While uniforms and equipment are furnished free to privates and non-commissioned officers, commissioned officers must buy their own

CLOSED TO HIM



WILL NOT USE GREEN TROOPS

PERSHING SAYS ONLY SEASONED SOLDIERY ON FRENCH FRONT

Asserts That Germany Is Not to Feel Military Weight Until Next Year—Public Must Be Patient.

Paris, Sept. 4—Major General Pershing, who has remained in Paris clearing up the work of his old headquarters and who is not going to field headquarters for a few days, declared in connection with the plans for the coming winter that the American people must learn the meaning and value of patience and not expect that the expeditionary forces landed in France can be rushed immediately to the front line trenches.

To Surprise Germany:

To put an adequate, insufficiently supplied force into actual combat, he said, merely would be making a mistake which the Germans unquestionably have hoped and expected the United States would make. It is the determination, rather, that when America does take her place in the line next year, she will be fully prepared to make the Germans feel the full weight of her military power.

Task Is Immense.

"Those of us who have fully studied the situation and who know what is necessary to be done," said General Pershing,, "are anxious that the people at home shall strive to realize the immensity of the task in which we are engaged and shall, through patience and confidence, help us to accomplish that task in the shortest possible time. Everything is going well with us, both as a nation and as an army."

SIX NEGROES SENTENCED FOLLOWING HOUSTON RIOTS

Found Guilty by Court Martial at Camp MacArthur and Must Spend Five Years in Leavenworth.

San Antonio, Texas, Sept. 4.—Six negro soldiers of the Twenty-fourth infantry, who clashed with the civil police and the troops sent to subdue them at Waco the night of July 29 were found guilty of the 93d article of war before the general court marital trial recently at Camp MacArthur.

Five were sentenced to five years at hard labor in the United States penitentiary at Leavenworth, Kan.

The sixth man received ten years. All were sentenced to be dishonorably discharged.

The findings of the court martial have been forwarded to the War department at Washington.

FRICTION SEEN BETWEEN TEUTON HIGH COMMANDS

Von Hindenburg Refuses Austrian Request for Troops to Aid in Stopping Italian Advance.

Rome, Sept. 1.—Friction has arisen between the German and Austrian high commands, according to the Idea Nazionale. The newspaper says that the Vienna government urgently requested immediate German re-enforcement to fill the gaps in the Austrian lines and stem the Italian advance on Trieste and northward from the Bainsizza plateau, but that Field Marshal von Hindenburg replied he could not spare troops for this purpose. It is reported that a lively controversy between the two high commands ensued.

POPE ONLY FATIGUED; ILLNESS RUMOR DENIED

Suspension of Audiences by Pontiff Causes Circulation of Report That He Is Seriously Ill.

Rome, Sept. 4.—Owing to the suspension of audiences by Pope Benedict, a report was circulated that he was not well. The report was without foundation as the Pope was suffering merely fom fatigue due to his arduous labors, particularly in connection with the peace proposals and the renewed interest in them aroused by President Wilson's reply. The Pope has resumed his audiences.

Makes Gopher Traps Exemption Claim.

Los Angeles, Sept. 4.—Frank M. Cushing based his claim for exemption on the ground that he was engaged in the manufacture of a commodity essential to the army and navy of the United States. In all seriousness, Cushing explained that he manufactures gopher traps. Cushing neglected to state whether the traps were to be used by the government to rid French trenches of rodents or to aid in capturing the burrowing Germans. Board officials are faced with the problem of deciding the question.

DUTCH CAN GET NO MORE GRAIN

U. S. REFUSES LICENSE TO 100 SHIPS FOR HOLLAND.

Say That Present Supply Is Adequate for Home Needs—Cargoes Ready to Sail Must Be Unloaded.

Washington, Sept. 4.—No grain will be permitted to leave this country for Holland at present, it is announced.

Licenses for 100 Dutch grain ships have been refused.

The agreement by which the Hollanders were to divide their cargoes between Holland and Belgium, is cancelled by the Embargo Administration board.

In making the announcement the board emphasized that the United States is willing to feed the neutrals, but that the needs of this country must be considered first. The same attitude is expected to be observed in dealing with exports to other neutral countries.

Counter-Proposal Made.

In refusing licenses for the 100 Dutch ships, already loaded with grain, the administrative board made a counter-proposition that the vessels be unloaded, their cargoes taken over by the United States at a fair price and the ships used to bring wheat and sugar from Australia and Java.

The contention of the board is that Holland has a sufficient supply of grain to last her for months, probably well into Deecember.

SNOW IN MONTANA PUTS CHECK ON FOREST FIRES

First Fall of Year Is Greeted With Joy by Those Fighting Fires for Past Three Weeks.

Missoula, Mont., Sept. 4.—Snow has put out a serious fire near Gordon Pass in the Flathead country, according to reports received at Forest Service headquarters.

The snow is the first of the year for Western Montana and was greeted with joy by government officers who have been fighting for three weeks against a dangerous fire situation.

All fires are abating and control lines have been established everywhere. Danger has definitely passed, it is believed.

MAY SEND 4,000,000 TROOPS

Wood Says Big American Force Is Needed in Europe.

Fort Riley, Kan., Sept. 2.—It is not impossible that from 2,500,000 to 4,000 American soldiers will be fighting on battlefields of France before the war is won, Major General Leonard E. Wood, who is to be in command of Camp Funston, declared here at a reception given in his honor.

General Wood said universal service is the only sure guarantee for a lasting democracy and urged the civilian population to give its utmost support to the Red Cross and the Y. M. C. A., to grow large crops and economize in every way to help win the war.

"SHOP GIRL BONDS", IS NAME

Term Applied to New Loan Issue For War.

Washington, Sept. 4.—"Shop girl bonds" is the term applied to the war saving certificates authorized in the second bond issue bill reported to the House by Chairman Kitchin of the ways and means committee.

These certificates will be in denominations as small as $5, thus enabling persons of small means to help finance the war for democracy. A $5 certificate will cost $4 and be worth face value on maturity in five years. England tried out the plan and it was a big success. More than 8,000,000 persons subscribed.

New French Cabinet Probable.

Paris, Sept. 4.—A complete remodeling of the cabinet appears to be more and more probable, says the Matin, which adds that in such even Premier Ribot will not present the collective resignation of the ministry until he has a new combination ready.

Kaiser Openly Called Liar.

London, Sept. 4.—The Saturday Review referring to President Wilson's note to Pope Benedict as "the most forcible state paper issued during the war," says: "We cannot remember that ever before the sovereign of a great nation with an army and a fleet in existence has been told that he is a liar and a chief with whom no treaty can be made. This terrible insult, so amply deserved, comes with great effect from a nation that is not a European rival of Germany and cannot be described as jealous."

PRESIDENT SENDS MESSAGE TO NEW NATIONAL ARMY

ADDRESSES FINAL WORD TO DRAFTED MEN WHO WILL MAKE UP AMERICA'S GREAT FIGHTING FORCE.

"EYES OF THE WORLD WILL BE ON YOU," SAYS WILSON

"Let Us Set for Ourselves a Standard So High That It Will Be a Glory to Live up to and Add New Laurels to Crown of America," He Says.

Washington, Sept. 5.—On the eve of their mobilization, President Wilson yesterday addressed a final word to the drafted men who will make up America's first great national army.

The President's greeting follows:

"To the soldiers of the national army:

"You are undertaking a great duty. The heart of the whole country is with you. Everything that you do will be watched with the deepest solitude not only by those who are near and dear to you, but by the whole nation besides.

All Drawn Together.

"For this great war draws us all together, makes us all comrades, and brothers, as all true Americans felt themselves to be when we first made good our national independence.

"The eyes of the world will be upon you, because you are in some special sense the soldiers of freedom. Let it be your pride, therefore, to show all men not only what good soldiers you are, but also what good men you are, keeping yourselves fit and straight in everything and pure and clean through and through.

"Let us set for ourselves a standard so high that it will be a glory to live up to it and add a new laurel to the crown of America.

"My affectionate confidence goes with you in every battle and every test.

"God keep and guide you."

PEACE COUNCIL QUIET; NO MEETINGS ARE HELD

No Attempt to Hold Gatherings Since Arrival in Chicago of Troops Under Instructions From Governor.

Chicago, Sept. 5.—Delegates to the People's Council of America for Democracy and Peace made no effort to hold a public meeting Labor day. Several conferences were held at hotels, where the deelgates were quartered.

Some of the pacifists attended a labor picnic, having previously said they would make speeches there if permitted to do so. None made an address, but no person would say that they either asker permission to speak or were denied the privilege. A large force of deputy sheriffs was sent to the picnic grounds by Sheriff Traeger, who has been co-operating with Adjutant General Dickson since the arrival of the four companies of national guardsmen from Springfield.

Mayor Thompson, by whose instructions the meeting of pacifists was held under police protection, was in seclusion. Members of the state Council of Defense discussed possibility of action against the mayor for what was regarded as his illegal action in permitting the pacifists' meeting to be held in defiance of Governor Lowden's orders.

MORE FOOD SHIPS NEEDED

Necessary if Belgians Are to Be Kept Alive.

New York, Sept. 5.—The urgent need of ships to supply food to the Belgian and French people in the area occupied by the Germans was emphasized in a statement issued here by Prentiss Gray, American director of the Belgian relief commission. Mr. Gray asserted that if "these people are to be kept alive during the coming winter, the relief commission must be supplied with 220,000 tons of shipping, or about 45 steamers of average size."

Norway Has Only Month's Food.

Copenhagen, Sept. 4.—The Christiana Social Demokraten asserts Norway has provisions for only one month and that the import prospects are gloomy. The paper demands the government seize all private stocks and take over the ocntrol of imports and food distribution.

Kaiser Decorates Von Bernstorff.

Berlin, Sept. 4.—Count von Bernstorff, former German ambassador to the United States, has received from Emperor William at great headquarters the civilian iron cross.

British Trade Unionists Meet.

London, Sept. 4.—The forty-ninth annual union congress has opened at Blackpool with a record attendance of nearly 700 delegates, representing more than 3,000,000 workers. John Hilyl, secretary of the boilermakers' union, will preside. Many leading labor leaders are in attendance, including Arthur Henderson, former member of the war cabinet, who, however, is present merely as a "fraternal delegate" from the Parliamentary Labor party. Two other delegates are Americans, James Lord and John Golden.

WOMEN! IT'S CHEAP! USE LEMON JUICE TO MAKE BEAUTY LOTION

In all weathers the skin and complexion can be kept wonderfully clear, soft and white by the use of this inexpensive lemon lotion which any girl or woman can easily prepare.

The juice of two fresh lemons strained into a bottle containing three ounces of orchard white makes a whole quarter pint of the most remarkable lemon skin beautifier at about the cost one must pay for a small jar of the ordinary cold creams. Care should be taken to strain the lemon juice through a fine cloth so no lemon pulp gets in, then this lotion will keep fresh for months. Every woman knows that lemon juice is used to bleach and remove such blemishes as freckles, sallowness and tan, and is the ideal skin softener, smoothener and beautifier.

Just try it! Get three ounces of orchard white at any pharmacy and two lemons from the grocer and make up a quarter pint of this sweetly fragrant lemon lotion. It naturally should help to soften, freshen, bleach and bring out the roses and hidden beauty of any skin. Those who will make it a habit to gently massage this lotion into the face, neck, arms and hands once or twice daily may be repaid with a skin that is flexible and young looking and a peach-like complexion. Adv.

Rough Going.

A youth who had accomplished considerable glory in football but little in his studies, was dropped from one preparatory school and immediately invited to another. He had been there about a week when he was approached by a member of the faculty.

"Well," said the professor, "how do you find it here?"

"Pretty fair," answered the boy."

"That's good. Find it smooth going, eh?"

The youth meditated a moment. "Well, I shouldn't like to say that, exactly," he replied. "The field's sort of rough yet in places, sir."—Exchange.

YES! LIFT A CORN OFF WITHOUT PAIN!

Cincinnati man tells how to dry up a corn or callus so it lifts off with fingers.

You corn-pestered men and women need suffer no longer. Wear the shoes that nearly killed you before, says this Cincinnati authority, because a few drops of freezone applied directly on a tender, aching corn or callus, stops soreness at once and soon the corn or hardened callus loosens so it can be lifted off, root and all, without pain.

A small bottle of freezone costs very little at any drug store, but will positively take off every hard or soft corn or callus. This should be tried, as it is inexpensive and is said not to irritate the surrounding skin.

If your druggist hasn't any freezone tell him to get a small bottle for you from his wholesale drug house.—adv.

Had Made Good Use of Time.

The Anzac read the advertisement on the door, and strolled in.

"I want ter speak ter a pal o' mine," he said.

"Ah yes. Be seated, my good sir."

Then in a dreamy voice the medium began to ring up the Beyond.

"I am in touch with the person you want," he said at last. "He tells me that he has made a lot of friends. Already he has met Cromwell, Shakespeare, Queen Elizabeth, Henry Irving, Mark Twain, Balzac, and a score of others."

"Gee!" muttered the Australian. "Jim allus was a hustler. 'E ain't bin dead an hour yet!"—London Tit-Bits.

"CONTRABAND"

A Thrilling War Story of the North Atlantic

By RANDALL PARRISH

Copyright A. C. McClurg & Co.

"THE BEST SEA STORY IN TEN YEARS"

In quoting that statement made by one of the most widely known book reviewers in the country about "Contraband," we can best introduce this new serial to our readers. Certainly it is a tale for men and women whose arteries carry red blood. It is as full of adventure as an airplane battle over the trenches in northern France. Its romance is as beautiful as a night in midsummer when the moon is round, the mist silvery and the air laden with the odor of honeysuckle. Too, in "Contraband" you will get a plot composed of strong lines and characterization as vivid as human beings can be. We need say no more. Just read on—

The Editor.

CHAPTER I.

—1—

A Yacht Party.

So many items bearing upon those strange adventures which have lately befallen me have found publication in the newspapers, oftentimes distorted and untrue, and resulting in letters of inquiry from friends, induce me now to write out the tale while the incidents remain fresh in memory. Indeed, I owe the truth not only to myself but even more, to her who so bravely shared with me those days and nights of peril.

The earlier passion of my life was the sea, and, when others of my age were grinding away through their courses in college, I was apprenticed to the merchant service in a fleet owned by my father, trading between New York and northern European ports. Loving the work, and, possibly, assisted by the fact that I was my father's sons, I rose rapidly, until licensed as captain of steam, and assigned to command the Vulcan, a freighter of 3,000 tons. At thirty, however, the novelty and fascination of a sea life ceased its attraction, and when my father died sufficient property became my share from the estate to enable my resigning this command, and retiring permanently from the service. Circumstances, unnecessary now to relate, caused me to make permanent home in Chicago, where I soon became engrossed in business, finding my sole recreation in yachting upon the Great Lakes. Such were the rather commonplace surroundings of my life, when, at thirty-seven, adventure suddenly called me out into the unknown.

Nothing could have been more unexpected than the occasion which took me to New York. Carrington—Gerald Carrington, the Copper King—had just placed his new steam yacht, the Esmeralda, in commission, and was eager to christen it by a run across to the ports of Spain. He wrote urging me to become one of the party. The temptation was irresistible, for, as I knew Mrs. Carrington was in Europe, the guests on board would undoubtedly all be men, and probably congenial fellows. A bachelor myself, the long hours at sea had left me unaccustomed to the society of women, whose presence I avoided whenever possible. Hence, I accepted Carrington's invitation immediately by wire, hastily packed the few things necessary for the trip, and, unaccompanied even by a valet, caught the Twentieth Century for New York.

Carrington lived on Long Island, and I talked with him on the phone. There were to be twelve in the party, the names of two, who were former acquaintances, alone being mentioned in our brief conversation. The yacht was lying at Tompkinsville, provisioned, and ready for the sea. I must be on board by three o'clock the following day, and he gave me quite explicit instructions as to the best mode of reaching the vessel.

An accident to the ferry caused me to miss the local train which I had anticipated taking the next morning, and I was consequently the last of our yachting party to arrive at Tompkinsville. The others were already safely aboard when I hurried across the gangplank, to receive the cordial welcome of Carrington, who immediately ordered the vessel under way. The guests must have been gathered on the upper deck, enjoying the excitement of departure, for I caught no glimpse of anyone on board, excepting some members of the crew, as the steward led me to the cabin assigned to my use during the voyage.

Even the brief view I had obtained of the, boat impressed me strongly, both with its beauty and seagoing qualities. I was sailor enough to appreciate all this at a glance. The Esmeralda was a steam yacht, schooner rigged aloft, of over fifteen hundred tons, constructed for deep-water cruising, well manned, and able to combat the storms of any ocean.

I opened the door and emerged into the main cabin. It was deserted, except for a waiter or two attired in white jackets who had covered a long table suspended by stanchions from the deck beams above, and were spreading it with snowy linen in preparation for the six o'clock meal. Never had I seen a more cozy, homelike interior.

Forward, an open passage, guarded only by silently swinging doors, led to the steward's pantry, and various storerooms beyond, while beside this opening a broad, brass-railed stairway led easily to the upper deck. Sunlight touched the edge of the companionway, and flickered down through a half-opened skylight above, yielding cheerfulness to the scene, yet inviting to the open air. I would meet those with whom I was destined to companion on this voyage across summer seas.

No passengers were visible on the deck, yet this mystery was soon explained as I stepped to one side and glanced aft. The cabin projection was not high, yet sufficiently so to break the force of the headwind, and besides was far enough advanced to give ample deck space at the stern. Here an awning had been erected, and beneath its shelter were gathered the vessel's guests. I recognized but three in the group — Carrington, red-faced and white-haired, a cigar gripped in his teeth, giving some instructions to the steward; Fosdick, tall, slim, thin-lipped, a lawyer well known to corporations who desired to keep just within legal restrictions, sat at a table, his hand fingering a half-filled glass while he talked to the men opposite; and McCann, fat, good-natured, born to his father's millions, who amused himself by the pretense of being a broker, interrupting the game of cards in which he was engaged with three others, to tell the latest story of the street. Personally I cared little for either of these men, yet had known both, in a way, for some time. The others, judging from the outward appearances, had been recruited from about the same class—business acquaintances of Carrington no doubt. I went forward, greeting those whom I knew, and being duly presented to the others.

Whatever they might have been in a business way, and for that I cared absolutely nothing, they proved themselves a most companionable bunch of fellows to meet.

The memory of that first meal in the snug after cabin of the Esmeralda remains a most pleasant recollection. The cabin had been darkened, and the soft light of a swinging lamp gleamed back from snowy damask and glittering silver. The center was banked with flowers, the service was perfection, and the chef was evidently a genius. We lingered over the wine and cigars, the conversation drifting where it would.

I believe I was among the first to leave the table and return outside, and as my inclination was to remain alone and enjoy the calm of the night, I ventured forward along the deserted deck, until I found fancied security from observation in the shadow of a small boat. The others, as they emerged later from the companion, outlined a moment against the light, turned once again aft, and resumed their old places.

Nothing occurred to break the monotony, and finally, wearying of it all, I went below, being in no mind to join at games with the others. I was soon asleep.

"Anything Going Wrong?" I Asked.

Some dormant sense of seamanship, aroused to new life, perhaps, by my brief watch on deck, must have awakened me. For I sat up in bed, conscious that the vessel's motion had ceased. All was silent; no jar shook the keel, no footsteps sounded on the deck above. I switched on the electric light, and glanced at my watch; it was slightly after midnight. Through the open port nothing was visible but the dark waters, and the far-off gleam of a light, alternating in flashes of white. I did not know enough of this coast line to identify the signal, yet it was plainly evident we were some distance from land.

Why the Esmeralda had stopped her engines was no special concern of mine, and I lay down again. But sleep would not return. I tossed and turned, and finally arising in sheer desperation, hastily donned my clothes. The after cabin was deserted, dimly lighted by one shaded electric globe, beneath which the brass stair rails shone dully. I emerged on the deck, gratefully breathing in the fresh night air. As I stood there, a man descended the ladder from the bridge, entered the chart-house and switched on a light. In the momentary gleam I recognized the face of the second officer, and when he finally came out again, I crossed the deck so as to intercept him.

"Anything going wrong, Mr. Seeley?" I asked. "You have stopped the engines."

He stared at me through the dark, blinded still perhaps by the glare of the chartroom, and unable to recognize my strange voice. Yet he was a yachtsman, trained above all to courtesy.

"Nothing serious, sir," he announced, civilly enough. "The engines are new, and not well adjusted yet; a bit of shaft went wrong, and has to be repaired."

He turned away, but at that instant my eyes caught the flashing of a beacon away off to the southeast.

"What light is that out yonder, Mr. Seeley? We must be well beyond Eaton?"

He glanced in the direction indicated.

"Those white flashes? That is Oldfield point, sir. Are you acquainted with these waters?"

"Not intimately, although I retain some memory of the charts. I saw merchants' service on the old Atlas line."

"A fine line that," he acknowledged heartily. "I made my first voyage, as cabin boy, on the Mohawk. You are Mr. Hollis, I presume, sir. I overheard Mr. Carrington tell Captain Turner you were to be one of the party aboard. Well, good night, sir; I must make certain the watch is awake."

He touched his cap courteously, and disappeared beneath the shadow of the bridge, leaving me again alone, undecided whether to return below, or endeavor to walk off my sleeplessness. I scarcely know what idle curiosity led me to stroll along the narrow deck space, around the cabin to the lounging place at the stern. I stopped suddenly in surprise, staring across at the opposite rail, questioning the evidence of my own eyes. There, clearly outlined in the star glimmer, was plainly revealed the figure of a woman. Some instinct of fear, or, perchance, a slight sound of approach, must have apprised her of my near presence, for she turned instantly toward me, bending slightly forward, her face visible in the shadow; and then, before I could either move or speak, she fled along the port rail, vanishing immediately behind the protection of the cabin. I felt sure that her parted lips had uttered a quick exclamation, and her startled effort at escape was sufficient to urge me to pursue. Who could she be? Why was she here on board the Esmeralda? Above all, why should she be so eager to escape observation?

I ran forward across the deck, and quickly explored the passage between the cabin and rail. It was clearly visible in the bright starlight, but the swiftly fleeing figure had totally vanished. I reached the steps of the companion, and gazed down through the glass doors. The light below revealed nothing, the cabin remained quiet and deserted. Not a shadow rewarded my search, either on the open deck, or below. Yet surely this was no dream, no hallucination, no mere vision of the night. The woman had actually been there; I had seen her plainly enough; had even heard the echo of her voice. There was then a woman on board—a woman who sought to hide from observation; who ventured on deck only when she thought it entirely deserted, and who fled in fright from discovery. I even felt a vague impression of her personality—she was young, slender of form, dressed in some shimmering gray stuff, a light, fluffy scarf concealing her hair.

There was nothing more to do then, although I prowled about for some time peering into dark corners, and turning the matter over and over in my mind. It must have been nearly daybreak before I fell asleep again in my own stateroom, nor did I awaken until the steward announced the last breakfast call, by a vigorous rapping on my door.

Carrington was seated alone at the table when I entered the cabin, lingering over his coffee, and he remained to keep me company, seemingly in a genial mood in spite of the delay.

He lit a cigar, and leaned comfortably back in his chair, looking amiably across at me through the blue haze of smoke.

"Rather nice bunch of fellows for a cruise, don't you think?"

"Quite so, although I only knew two previously."

"Yes—Fosdick and McCann. The others are either bankers or brokers; fellows I meet every day or so in my business, you know. You have never done much in stocks?"

I shook my head.

"My business education was in an entirely different school," I said quietly, ignoring his lead. "My father never speculated."

"I know his feelings on that subject," and Carrington chuckled, as though at a pleasant memory. "I never advocate speculation myself, but have never shown any qualms of conscience against betting on a sure thing. Perhaps we can discuss this later—before our voyage ends."

"This, then, is more of a business than a pleasure trip, sir?"

He laughed, watching the smoke rings rise lazily in the air.

"Well, hardly that, my boy. My hospitality is not to be so strictly limited. However, no doubt, we shall discuss some matters of business importance before our return. By the way, you have some idle money, I hear?"

He Lit a Cigar and Leaned Comfortably Back in His Chair.

"Not a large sum at present, although it is true I control some capital."

Carrington pushed back his chair and arose to his feet.

"That is of no immediate importance," he said carelessly. "But in my judgment, we are not far away from a great opportunity in finance, when it will pay well to be on the inside. It may interest you to know that a copper pool is being organized."

"I suspected as much; you have some news?"

"Exceedingly important news. Listen, Hollis, this is strictly confidential and worth your thinking it over. Only two men on board know the truth. There will be war in Europe—the biggest war ever known in history—within a month. Do you realize what that will mean, for instance, to copper?"

"I can imagine, sir. But if we are on the verge of such a sudden rise in market value, why do you leave New York for a long voyage?"

Carrington smiled, stroking his gray mustache.

"A natural question, perhaps coming from one not acquainted with my methods," he answered good-humoredly. "Because I prefer to be thought out of it. Everybody on the street is aware that I am at sea. I thus escape being interviewed, importuned for information. I am unsuspected of being where I can manipulate the market. The Esmeralda is equipped with a powerful wireless outfit, and we have on board the most expert operator to be procured in New York. I shall be in direct communication with my office every hour of the day and night. Tomorrow, once safely beyond Point Judith, I shall explain my plan; meanwhile, Hollis, think it over."

He turned toward the stairs, but I stopped him, more deeply interested in something else than in his rather vague financial scheme. The girl on board; was it possible she could have any connection with this affair?

"By the way," I spoke with an assumption of carelessness, "Mrs. Carrington, I understand, is at present in Europe?"

"Yes, in Switzerland; I have cabled her that she had better return as far as London at once."

"You seem very confident as to the truth of your advices."

"I am; I know the men who have reported to me."

"I see; and consequently there are no women on board?"

"Women?" He made a swift, expressive gesture. "Certainly not. I wrote you to that effect, I believe; at least I so instructed my secretary. This voyage is primarily a business affair. Why should you ask that question, Hollis? You have met all my guests."

I hesitated, yet determined to put him fully to the test. If he knew, either his face or manner would betray him, irrespective of his words.

"I imagined I saw a woman on the deck last night, when I ventured out to learn why the engine had stopped. No doubt it was an illusion."

"It surely must have been," his voice evidencing surprise, "for I give you my word there is not a woman on this yacht. What, to your mind, did the creature look like?"

"Nothing at all definite, a mere outline in the gleam of the stars. It may have been an odd combination of shadow, but, at the time, I felt convinced the vision was actually flesh and blood."

Carrington laughed heartily.

"Dismiss it, my boy," he said, his hand gripping the brass rail. "We may indeed have ghost women on board, but no flesh and blood ones. Better join us on deck, and let the sun and wind clear your brain—perhaps the champagne caused the mischief?"

"Hardly," I answered, adopting his mood, "as I did not touch any. However, I will join you presently."

I watched him disappear through the companion, stirring my coffee nonchalantly enough. Yet I was not satisfied; Carrington did not know, possessed no suspicion; nevertheless I remained convinced there was a woman on board the Esmeralda.

CHAPTER II.

I Meet the Mystery.

Before the evening meal had ended—the party still lingering in the cozy quarters below over their coffee and cigars—the yacht once again got under way, and steamed slowly eastward down the Sound. It was already dusk when we returned to the deck and resumed card playing beneath the awning, electric lights sparkling overhead. I never recall a softer, sweeter air. The men behind me were again discussing the war news, but their voices scarcely reached my ears. Once I leaned forward, observing the red and green lights of an approaching steamer, as our siren spoke, but was altogether too negligent to cross the deck and watch the stranger pass by.

The fact was I could not banish entirely from mind the recollection of that woman whom I had seen in this very spot the night before. I had actually seen her—it was no vision, no dream. No doubt Carrington had faith in what he said, and possessed no suspicion whatever of her presence on the yacht. But she was here nevertheless—why, how, for what purpose, by whose help I could not conjecture—but that she actually existed and was hidden somewhere aboard, I had not the slightest doubt, and I must solve the mystery alone.

But how could I prove the vision true? how establish, at least to my own satisfaction, her identity, and purpose? I thought it all over again and again. If Carrington was unaware of her presence—and of this I really no longer felt any doubt—then she must have slipped aboard unseen, or, perchance, aided and abetted by one of the crew. Somewhere below, where discovery was not probable except through accident, she was kept in hiding. Yet to accomplish this she would need assistance. She must have had aid in getting aboard unseen; someone who knew of a vacant cabin, and who could supply her with food. Only an officer could hope to do this without arousing suspicion. Except for the engineer, Gault, whom I had not seen, but who was hardly in a situation to render such service, there were three who might be accomplices—the captain, Turner, and the first and second officers—Hatch and Seeley. I dismissed all thought of the first two almost instantly. Turner was an old sea-dog, a former naval officer, unapproachable, and an extremely strict disciplinarian; while Hatch was a tall, lank, slow-spoken individual, never guilty of the slightest civility to anyone. Neither of these would ever aid and abet a woman under any conceivable circumstances.

Of the second officer, Seeley, I remembered Carrington had mentioned the fact that he had been in his employ for over ten years. He was the one most likely to listen to the plea of a woman, and to be deceived by her; and besides, as I suddenly recalled, it was during his watch on the bridge that the girl had ventured on deck seeking the fresh night air.

What is your guess about the girl? Do you suppose she is a spy for some foreign government who wants to get to Europe in a manner less public than the regular steamship lines offer?

(TO BE CONTINUED.)

More Appropriate.

"Your hired man, out there under the tree, is a most picturesque figure," said the stranger with the flowing necktie. "I should like to paint him; and—"

"Sartin!" replied honest Farmer Bentover. "Paint him all ye want to. But it would do him more good to sandpaper him. He is petrified."—Kansas City Star.

DADDY'S EVENING FAIRY TALE

BY MARY GRAHAM BONNER

SCHOOLS OF FISHES.

"The fishes were splashing in the lake. It was a hot summer day—like the days we have been having lately," said Daddy, "and the fishes were glad they were in a cool place.

"'How awful it must be to live on the dry earth,' said Mrs. Perch splashing.

"'Yes,' said Mr. Sun Fish, 'I never could understand it.'

"'And on these hot days I feel especially sorry for people,' said Mrs. Perch.

"'So do I,' said young Miss Bass.

"'I really don't see how they can breathe out of water. Once I was caught in a net,' continued Mrs. Perch, wiggling her fins excitedly, 'and I could not breathe at all—at least hardly at all. But I was thrown back into the water soon enough to get well quickly. Ah, the great long breath I drew when back in the water.'

"'I suppose,' said young Miss Bass, 'that animals and people think it is queer we can live in water.'

"'Do you suppose they do?' asked Mrs. Perch.

"'I shouldn't wonder,' said Miss Bass. 'You see if we think it is so funny for them to be able to breathe out of water—they must think it is funny for us to breathe in water.'

"'I don't understand,' said Mrs. Perch. 'Please make yourself clearer, Miss Bass.'

"Miss Bass opened her mouth very wide in surprise as Mrs. Perch was not usually so severe. But perhaps it was the heat, thought Miss Bass. So she forgave Mrs. Perch and went on talking as she splashed about.

"'You see, if they live out of water they must like it. We live in water and we like it. Creatures usually live where they can enjoy themselves most. And surely they wouldn't live on the earth if they could live in the water.'

"'I suppose that is true,' said Mrs. Perch. 'They must like it or they wouldn't live there. But I do not understand it.'

"'I notice they like to come in swimming on hot days,' said Mr. Sun Fish.

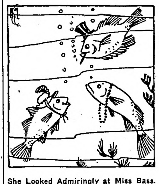
"'True,' said young Miss Bass, 'but they do not let their heads go under the water. That is, they do not let their heads stay under the water. They dive in and then they come up again and swim around with their heads on top.'

"'How queer people and animals are,' said Mrs. Perch. 'Well, I am sure they envy us on days like these.'

"'They certainly must,' said Mr. Sun Fish.

"'How did you ever think out all those great and wise thoughts?' asked Mr. Perch as she looked admiringly at Miss Bass.

"'Because,' said Miss Bass, 'I've been studying in school. It just so happened you never learned that one particular lesson as to why some creatures lived out of water and others in water. As you well know fishes are fond of studying.



She Looked Admiringly at Miss Bass.

"'They always speak of fishes as moving in "schools"—not crowds, nor bunches, nor groups—always in schools. That shows that we are students. Even if they do think we look stupid it shows we are not. Fishes travel in schools! And in schools we learn to flap our fins and swim—that is the easiest lesson of all—and what to eat and what not to eat.'

"'Yes,' said Mrs. Perch, 'you are quite right; we should be thought learned.'

"'We don't study so much,' said Mr. Sun Fish.

"'And we don't really have many lessons,' said Mr. Perch.

"'That makes no difference,' said young Miss Bass, 'if they say we travel in schools it must mean we are wise and learned. And let's say we are, anyway.'

"'Yes, we shall,' said Mrs. Perch. 'From this day on we shall speak of ourselves as the wise student fishes, the ones who always are said to move in schools.'

"'But don't let's worry about it today,' said Mrs. Perch. 'It is too hot.'

They all agreed, but how sorry they did feel for the creatures who didn't know the joy of living in water."

An Abstract Noun.

"What is an abstract noun, Esther?" asked the teacher of a bright little girl.

"Don't know," was the answer.

"You don't know!" exclaimed the teacher. "Well, it's the name of something you can think of, but can't touch. Now, can you give me an example?"

"A red hot poker," was the prompt reply

GERMANY AT END OF HER RESOURCES

Escaped Prisoners Say There Is Insufficient Food for Soldiers and Civilians.

STARVE IN PRISON CAMPS

Boys of Seventeen in Trenches, Declare Refugees Who Recently Reached This Country—Mothers Are Vainly Protesting.

New York.—Germany is reaching the end of her resources, according to Max Tannenbaum and Jacob Schurek, who arrived here after escaping into Holland from German prison camps. The homes of the people have been stripped of old men and boys for the firing line, aged men and women are at work and metals of all kinds are disappearing, the escaped prisoners say.

The two men met each other in Holland and succeeded in reaching this country by stowing away on a steamship. Tannenbaum spent more than two years in mines and internment camps after he was forcefully taken into Germany from Russia. He says that the German people are coming to look upon victory as a lost hope and are so tired of war that thousands are wondering if it is worth while.

The call to arms has reached seventeen-year-old boys, and mothers are vainly protesting. The enthusiasm of the earlier days of the war is lacking. The people are thin to the point of emaciation because of scanty rations. To be fat is almost a crime, and to eat more than the government allotment is sometimes punishable by death. The people are becoming less and less stirred by optimistic government announcements.

Was Smuggled Across Border.

Tannenbaum, a Russian Jew, was allowed no freedom in Germany. He bribed a woman to smuggle him across the Dutch border. In Holland he could obtain no authority to leave that country, although he had left his wife destitute in Russia. He met Schurek at the Russian consulate, and after unsuccessfully trying to secure steamship passage the pair boldly walked aboard a liner. They were unchallenged and reached this city by way of Halifax. Their entrance into this country was unknown to immigration officials, but they announced their presence, and after an investigation they were allowed to remain.

To own a cat or dog in Germany brings a fine of $500. Gold has disappeared and very little nickel is in evidence. Paper money is used entirely, and it is put into circulation by the various sections of the country. The Krupps issue their own money, which is redeemed for food.

Tannenbaum was thrown into prison for standing outside a railroad station waiting for a train. He was ordered to scrub his cell every morning with a cup of salt and a pail of water. For food he received an ounce of bread, cereal coffee, bread crumbs and soup made of potato peelings.

Prisoners Beaten Frequently.

In a camp where Tannebaum spent three months with French and Belgian prisoners wooden benches were the beds, and rotten bread, with potato-peel soup, was the food. The men were frequently examined by doctors; and often were marched naked on snow-covered ground for ice water baths. They were beaten on the slightest provocation. An epidemic of cholera and typhoid broke out, and when it was over the survivors were vaccinated.

The German soldiers and doctors deserted the camp during the epidemic, and prisoners were left to care for the sick. Finally the camp was investigated by a government commission, which ordered better food.

The food allowance for the German people was as follows: For one person, one week, three pounds of bread, 30 grams of butter, one egg, 250 grams of meat, 50 grams of sugar, 20 grams of soup, one flake of fat. The people are hungry all the time. They can have potatoes and vegetables only when there is plenty.

A special permit is required for securing clothes, and articles of apparel can only be obtained after authorities have determined they are really needed. The soldiers fare little better, receiving poor clothes, and food enough only when there is an abundance. The soldiers receive three pounds of bread every four days when there is enough to go around. There is practically no milk and very little real coffee. It is drunk black.

The people discount the effectiveness of the United States in the war, these men who have just returned from Germany believe. They admit that this country has food and munitions, but they are taught that the American soldiers do not amount to much.

HOW SHE DOES HER BIT

Anxious to do her bit and make it the most valuable deed she is capable of rendering the nation, Miss Lucille Patterson, a twenty-three-year-old artist of prominence, is devoting her artistic talent to war work. She is now at work on a gigantic service poster for the National League for Women's Service, and to paint it she has to work on a scaffold high above the busy throngs in the street below.

The poster is 20 feet high and will take the patriotic young artist at least three days to finish her task. It depicts a modern Joan of Arc holding aloft a banner and leading an army of American women in various necessary branches of the service in aid of their country. The poster will appear on the "busiest corner in New York." The use of the billboard at Forty-second street and Fifth avenue was donated to the league.

BARS UP TO GAMBLERS AT ARMY CANTONMENTS

Memphis, Tenn.—Crap shooters, card sharps and other nimble-fingered gentry are having a hard time breaking into the camps of working men established at United States army cantonments. In examining applicants for jobs pains were taken to look into the character of the men. The examiners in several instances found that the applicant was not a worker, but a gambler. Six professionals from Memphis reached the government cantonment at Little Rock. Within an hour after their arrival they had a game "going." They were deported. Other cantonments had the same experience.

GERMANS RIVAL TURKS IN CRUELTY

Armenian Reports Them More Merciless in Persecuting Educated of His Race.

NOTHING SACRED TO THEM

They Have Less Respect Than Turks for Religious and Racial Customs of Their Victims — Worse Than Dantes' Inferno.

Bombay.—The following statement, given to the Associated Press by a British officer now in a hospital here, presents a vivid picture of the sufferings undergone by the Armenians, of which comparatively little first-hand information has hitherto been forthcoming:

"Before I got my wound in the fighting up beyond Bagdad I came into contact on several occasions with a highly educated Armenian, who had escaped from the Turks and was being employed by us as an interpreter. The stories he told of the inhumanities inflicted upon his compatriots were so appalling that I made notes of his conversations, and have attempted here to reproduce them in something like his own language so that you can get at the heart of the man and realize what he and all educated Armenians feel. The interpreter was in Constantinople until the end of last year, when he was sent to the front with a party of Armenians, several of whom escaped."

Worse Than Dante's Inferno.

The interpreter's story follows:

"What you have read and heard about Armenia is not a hundredth part of the truth. Dante's Inferno was a heaven compared with the hell that the Turks have made of my country. Something of the awful reality of the last twelve months I have myself seen in passing through on the way to the front.

"At Aleppo there are four factories in which, under the supervision of deported Armenians, two thousand Armenian women are being employed under terrible conditions. The women are all deportees. One of them said to me: 'On a halt during our deportations I saw a gendarme bury a sick woman alive. Cold-blooded murders were an everyday occurrence. Our guards had orders to kill on the spot anyone who lagged a pace behind on the journey. Often several were killed at once, and there was no separate grave for them—the bodies were just thrown into a ditch together and covered. It was all horrible to behold, but our eyes eventually became hardened to the sight.'

"Bab, Messguene, and Zor are three places never to be forgotten by us Armenians. I have visited them. Do you know what happened there a few months since? By the order of the governor, Afif, nearly one hundred thousand of my brothers were murdered, massacred by armed Circassians.

"At Bosanti I saw six railway trucks of little Armenian children being dispatched 'to an unknown destination.' What had these little innocents done to offend? Was it the mere fact of being alive and being sons and daughters of our thrice unhappy race?

Worse Than the Turks.

"The German soldiers that one sees around the stations in Armenia are generally of a low type, and not far behind the Turks in their disregard for the rights of our people. Their cruelty is a little different from that of the Turks, but the difference is only one of kind. The Turk, for example, often respects certain things which we have learned to associate with our religious or racial beliefs; the German has no respect for anything—nothing is too sacred for his profane hands. The Turk frequently used to show some respect and deference to the upper class Armenians, the educated people, regarding them as perhaps capable of being useful even in a Turkish dominion. The German, as soon as he arrived here, pointed out the educated Armenian as the most dangerous of all, and instigated the Turks into organizing a ruthless persecution of the intellectual classes of Armenians. One day they surrounded the offices of the conservative newspaper Asadamard, arrested all the staff and deported them, I know not whither. Will they ever return? Who knows?

"One day I walked from a place where thousands of innocent women, girls, and children were bivouacked, suffering nameless miseries. I walked away because I could not bear any more to gaze upon them, and I came to a hill where I saw a little child. I was in Turkish uniform. The child came near me and cried in Turkish: 'Give me for God's sake a piece of bread! For five days I have eaten nothing but this.' He pointed to some melon skin that had been left lying by the road. I answered him in Armenian, and the poor boy jumped into my arms, saying: 'Art thou Armenian?' He remained there for a minute, uttering no other word. But I felt warm tears falling down on my cheek.

"The waters of the Euphrates, the sands of the deserts of Mesopotamia, are the graves of the whole Armenian nation. I can no longer weep: My tears have frozen in my eyes."

WAR CROSS TO WOMAN MAYOR

Mme. Pellequer, Also Schoolmistress at Quesmy, Is Decorated by General.

Paris.—Quesmy, a little village north of the Oise, counts July 7, 1917, as the proudest day in its modest annals. On that day a French general, with a guard of war veterans in attendance, came to pin the War Cross on the breast of Mme. Pellequer, the local schoolmistress and mayor, for her gallant conduct.

Mme. Pellequer is one of those modest heroines of whom France has reason to be proud. When the war broke out Mme. Pellequer was teaching school in Quesmy while her husband was similarly employed at the neighboring village of Maucourt. Her husband left for the front, and she took over his pupils.

The Germans occupied Quesmy, and found Mme. Pellequer installed as mayor, maintaining order and attending to everything. She it was who first refused to salute the invaders, who, for once, overlooked this insubordination.

Then, at last, the French returned in March, and the report they made of the noble work accomplished by Mme. Pellequer has earned her the distinction reserved for the heroes of France.

STEER SNAPS NECK IN FIELD

Wisconsin Animal Chased, Becomes Entangled in Growth and Is Killed.

Ashland, Wis.—A story about a steer that broke its neck in a field of alfalfa was brought here by Otto Reglein.

"The steer had escaped from its pen and madly dashed for the open field," Reglein says. "With several neighboring farmers efforts were made to chase the animal back to its quarters.

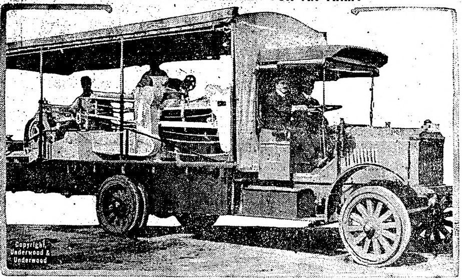
"Enraged because of its being pursued, it headed for a field of alfalfa which had grown nearly three feet high. The steer became entangled in the vines. In its fall the animal's neck was broken.

"The aid of a large scythe was found necessary to reach the carcass.

Birds Ruin Gardens.

Marietta, O.—Blackbirds by the thousands are making their homes in Mound cemetery and are devastating war gardens around this city. In order to put the birds to flight and secure relief the fire department is called out each night and the hose is turned on the birds roosting in the trees.

PORTABLE BREAD MAKER FOR AN ARMY



James and J. H. Garvey have invented a portable mechanical bread maker that should be a mighty big help in feeding the doughboys in the trenches. Its inventors say a crew of five men with this bread maker can do the work of a hundred. It has made 6,000 loaves in an hour, a quantity sufficient for 30,000 men. All the apparatus is housed ready for use on an automobile truck.

HEADS "RAINBOW" DIVISION

© HARRIS & EWING

Maj. Gen. W. A. Mann, who is to command the Forty-second or "Rainbow" division, composed of National Guardsmen from 26 states and the District of Columbia, soon to be sent across to France.

SENTINEL DOG WHICH LOST ONE EYE

© International Film Service

A sentinel dog from the French Vosges which has lost one eye in a trench raid and is being treated at a French dog hospital.

ANGEL OF ITALIAN ARMY

Madame Mazzuchi, beloved by the Italian soldiers for the work she has done in the war hospitals back of the Alpine fighting lines, has come to the United States to solicit funds that are urgently needed for the Italian war hospitals. Known along the entire front of the Italian forces as "the angel of the army," Mme. Mazzuchi is the third of the six women who were given permits to drive army ambulances in Italy.

Fright Changed a Dog's Color.

According to Andrew Fisher, widely known rancher of this district, the black hair of his high-bred water spaniel turned white from fright when the dog was locked in an empty grain bin with exploding firecrackers, says a Live Oaks (Cal.) dispatch to the Sacramento Bee. He produced the dog to prove his story. When the dog was liberated it staggered under the barn, where it remained two days. When it again appeared at the house, to the astonishment of the family, its hair was streaked with gray.

GUNS COULDN'T DRIVE THEM AWAY

FRENCH OFFICIAL PHOTO

French farmer and wife who stood the German bombardment of their village Avricourt. They are of the type of determined French farm folk to whom their home and its associations mean everything. Of their farm nothing remains but a mass of ruin and rough broken ground.

GATHERED INFORMATION

A new range oven has been devised, so arranged that it can be swung outward for examination of its contents.

For the protection of men who carry ice or meat waterproof shoulder pads and body shields have recently been invented.

That the human brain is radio-active and emits a faint glow under certain conditions is the conclusion reached by European scientists.

A German inventor has invented clasps which fold down flat when shoestrings are passed around them and drawn tight to replace the usual eyelets and hooks on shoes.

A cane which can be taken apart and rebuilt into a stool has been invented by a Frenchman.

A new gas range has two ovens of the usual kind and a third constructed on the fireless cooker principle.

A recently invented door, intended for garages, is made in three sections and slides around the corner of the building on a track.

A furnace of a special type has been installed in the Bank of France to destroy all cancelled bonds and damaged or returned paper money.

The most important of the true bees are the honey bee and the bumble bee, next to these are the cuckoo bee, carpenter bee and the Mason, leaf-cutting, and potter bees.

The DAIRY

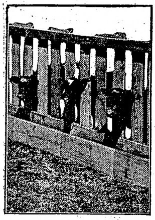
ROB CALF OF MOTHER'S MILK

Expert of Colorado Station Says It Is "Saving at the Spigot and Losing at the Bung."

(By GEORGE H. GLOVER, Colorado Agricultural College, Fort Collins.)

We are beginning to question whether after all it pays in the long run to rob the calf of its mother's milk and try to raise the future cow on whitewash and sawdust, or, to express it with a little more moderation, to try to raise the calf on separator milk and patent foods.

Certain it is that the calf will keep healthier and grow into a better cow or bull if given whole milk, at least as a part ration. Dairymen have figured it out to their satisfaction that whole milk is too valuable to feed to calves and from the standpoint of immediate returns, these figures don't lie. But if we could in some way estimate the ultimate loss in calves that die from this treatment the depreciation in value of mature animals that have been stunted in their growth and the price that must be paid for milch cows, it might look different. Is it not a case of 'saving at the spigot and losing at the bung?'



Feeding Calves in Stanchions.

BUTTER PRODUCED ON FARMS

Amount Is Continually Decreasing According to Investigation Made in Wisconsin.

An investigation made in Wisconsin shows that the amount of butter produced in the farm dairy is continually decreasing and what is produced is generally sold direct to the consumer. The market butter is made in the 835 creameries of the state, 45 per cent of which are owned co-operatively by the farmers. An important feature is that the co-operative creameries are the most successful. They pay the farmer more for his butter fat, pay the buttermaker higher wages, and sell the product for a higher price.

It costs 1.66 cents per pound of butterfat to get the cream to the creamery and 2.33 cents to make a pound of butter. The shipping charges vary from 0.25 to 1.25 cents per pound, depending upon the distance from the market. The investigation brought ou the interesting fact that for every pound of butter sold to the consumer the farmer received two-thirds of the money and the retailer one-tenth.

REMOVING HORNS ON CALVES

Application of Caustic Potash When Animal Is Two or Three Days Old Is Satisfactory.

Horns on calves may be removed by an application of caustic potash. When the calf is two or three days old, clip the hair from the spot where the horn buttons protrude. Moisten the end of a wrapped stick of caustic potash and rub on the horn. Care should be taken to see that all of the horn is removed in order to prevent the growth of scurs. The calf should not be turned out into the rain immediately after the operation, as the caustic preparation may wash down into the eyes and injure them. Caustic potash should be kept in an air-tight container or it will absorb water and dissolve.—Wisconsin College of Agriculture.

SALT IS OFTEN OVERLOOKED

All Animals That Consume Large Quantities of Vegetable Matter Require Some Salt.

An important item that is often overlooked in the management of dairy cows is providing them with plenty of salt. All animals that consume large quantities of vegetable food require salt. Unless cows receive plenty of salt they will cease to thrive, and will therefore decrease in milk flow. Some dairymen mix the salt with the feed, but the better plan is to keep it in a convenient place where the cows may have ready access to it when they so desire.

AGRICULTURAL DEPARTMENT

This department of THE ELEVEN TOWNS is devoted to the interests of the agriculturists of Pennington and Marshall Counties. All the articles are by foremost authorities, including U. S. Government experts.

EARTH ROADS WORK

Necessary Tools and Machinery Needed for Building.

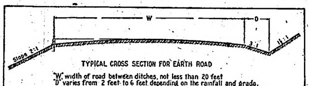
USE OF ELEVATING GRADERS

Machine May Be Operated Successfully With 25-Horsepower Tractor or Twelve Well-Trained Horses—Scrapers and Wagons.

(Prepared Specially by the United States Department of Agriculture.)

The use of elevating graders is sometimes desirable in the construction of earth roads. The essential features of this machine are a plow with a heavy moldboard, an elevating belt, a suitable frame for supporting the plow and belt, and driving and adjusting mechanisms for operating the belt and controlling the work. The plow loosens the material and throws it onto the belt, which conveys and deposits it either in the roadbed or wagons.

Elevating graders are adapted especially to building up embankments with material excavated from shallow borrow ditches along each side of the road. They also may be used to advantage in excavating long, shallow, through cuts and loading the material thus excavated into wagons for use in building up embankments at other points. The latter use, however, is restricted to situations where there is sufficient space to operate the grader and at the same time afford passageway for the teams and wagons to follow under the end of the belt to receive the successive loads as the grader is drawn forward.



TYPICAL CROSS SECTION FOR EARTH ROAD

Fig. 1 'W' width of road between ditches, not less than 20 feet
'D' varies from 2 feet to 6 feet depending on the rainfall and grade.
'H' crown, varies from ½ inch to the foot for level grade to 1 inch to the foot for a grade of 5%

Operating Elevating Grader.

It is customary to employ a traction engine for operating the elevating grader, though teams are used sometimes. Ordinarily, the machine may be operated successfully either with a 25-horse power tractor or with 12 well-trained horses.

The rate at which earth can be excavated with an elevating grader is relatively very high when conditions are favorable and the grader can be kept moving. But there are a number of rather complicated parts about such a machine which sometimes get out of order, and the work also is usually hampered by many unforeseen contingencies, such as "bogging" of the wheels, choking of the plow or the elevator belt, occurrence of buried stumps or stones in the excavation, etc. For these reasons the actual capacity of elevating graders, considered over a long period, seldom is more than about one-third or one-half the rated capacity, and where the material is loaded into wagons as it is excavated the actual capacity of the machine may be reduced still further. Elevating graders of the size used ordinarily in road work have a rated capacity of about 100 cubic yards per hour.

Use of Scrapers, Wagons, Etc.

To grade a road of any considerable length, no matter where it is located, usually will require a considerable amount of work with devices other than the grading machine and elevating grader. The latter machine, as previously explained, may be very economical for special conditions to which they are adapted. But these special conditions seldom prevail for more than comparatively short stretches of road without sections intervening which require that a relatively large volume of material be moved from excavation to embankment within a distance of only a few hundred feet. Figure 1 shows a typical cross section for an earth road, where the grading machine hardly could be used advantageously except for finishing the road surface. To accomplish work of this kind economically, the devices for loosening, loading and hauling the material must all be adapted to turning around quickly in a small space and, not infrequently, must be such as to be handled readily over very rough ground. Such implements as wagons, wheeled scrapers, drag scrapers and plows therefore should form a part of the equipment on practically all road-grading projects.

The choice of proper implements to employ in moving material from excavation to embankment depends, first, on the nature and quantity of the material to be moved, and, second, on the length of haul. In general, where the material consists of earth it is loosened with plows and the economical method of hauling is fixed by the haul length about as follows:

For lengths of haul not exceeding 150 feet, drag scrapers; for lengths of haul between 150 feet and 600 feet, wheeled scrapers; for lengths of haul above 600 feet, wagons. Where the material consists of solid rock it must be loosened by drilling and blasting and practically always is hauled in wagons or carts, regardless of the haul length.

Types of Plows Used.

Two types of plows commonly are used in road grading. One is the type generally used for loosening ordinary soils, while the other is used for breaking up hardpan, lode road surfaces and other earth unusually difficult to loosen. Either type is drawn by four horses, or in some cases by a traction engine, and is operated by three men, including the driver. Such plows average about 150 pounds in weight and sell at an average price of from $12 to $18, but heavier plows of this type range in cost up to about $30. With average soil conditions they may be made to turn a furrow about 7 or 8 inches deep and from 8 to 10 inches wide. The hardpan plows vary considerably in weight and selling price but cost more than the turn plows. One reason for the higher cost is that the points must be made of a very high grade of steel in order to be durable.

Drag scrapers are made in 1-horse, 1½-horse and 2-horse sizes, which have respective rated capacities of 3, 5 and 7 cubic feet. Drag scrapers have an average weight, when empty, of from 75 to 100 pounds, and an actual capacity of about three-fourths the rated capacity. The price, f. o. b. factory, averages from $4 to $6 per scraper.

In operating drag scrapers the drivers also may load and empty the scraper, but frequently, it is economical to provide additional laborers for this purpose. With a haul length of 100 feet and the teams moving steadily, one laborer should be able to load or empty and spread the material for about three scrapers. For scraper work to be effective the material to be excavated must be thoroughly loosened by the plows and should be free from large roots or stones. Where such obstructions occur time is saved by having them removed by hand during the process of plowing.

Keep Vermin Away.

To keep lice away from the sitting hens, dust the nest and the hen with sulphur. It will not hurt the eggs in the least, but no lice will stay near.

MEAT FOR FOREGN PEOPLES

Every Farmer Must Put Forth Efforts to Produce More Hogs—No Chance of Excess.

If we expect to continue to provide meat to foreign peoples as well as our own people, every farmer must put forth the best effort to produce more hogs. Hogs can be kept profitably upon many farms where they are not found today. Farmers who already raise hogs can produce many more, as there is not much chance of producing meat this year in excess of the requirements.

More dairy farmers should raise hogs for they fit in especially well upon dairy farms where skim milk, buttermilk, or whey is fed upon the farm. A man who has skim milk is in a better position to raise pigs than a man who has none.

Neglect of Water Vessels.

It is a trifling thing to neglect washing out the drinking vessels, but trouble lurks there if it isn't regularly attended to.

CORN LOSES QUALITY QUICK

Sweet Variety Should Be in Hands of Consumer in Very Few Hours After Harvesting.

In order to obtain the very highest quality of sweet corn it is necessary that the corn be delivered into the hands of the consumer in a very few hours after harvesting. Sweet corn will lose 50 per cent of its sweetness in 12 hours. Corn pulled in the evening, as is the case with most of the marketed products, and placed on sale the next day cannot compare in quality with similar corn harvested in the morning and sold to the consumer before noon. Corn which must, by forced circumstances, be harvested in the evening should be handled in such a way as to avoid large piles.

Alfalfa or Rye.

Have an alfalfa or rye lot, or rather lots, for your hogs and growing pigs, and learn that to get results from these pastures it pays to feed some grain, if only a little every day.

GOOD ROADS

BUILD ROADS ON WAR FRONT

Possible and Desirable to Construct Highest Types of Surfaces for Moving Supplies.

With the arrival of the Balfour mission late information has been obtained regarding road building methods followed in the war regions of France and Belgium.

English military engineers have recently made experiments demonstrating that it is possible and desirable to build the highest type of road surfaces for the temporary or emergency movement of artillery and supplies. Roads built with asphalt sent over from England have recently been constructed in the rear of the French-Belgium front. Roads so improved gave far better service than any type heretofore attempted under the swift and heavy movements necessitated by the artillery action which precedes infantry attacks. It was observed that motor trucks and gun carriages suffered no injury in movement over these hastily constructed asphalt pavements, while frequent breakdowns were experienced when road building was not attempted.

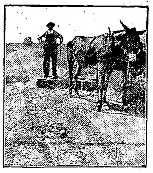
These experiments being done, a mission including officers of the British and French engineer corps looked over the pavements in the environs of Paris built in the last three or four years. Among other roads inspected early in this month was the Trinidad asphalt pavement laid on the road to Versailles which has been carrying military traffic ever since the war began. As a result of these experiments and investigations it has been decided, wherever possible, to construct similar surfaces for the movement of military traffic in regions where roads have been destroyed or where they may be made necessary by battle plans.

GETTING CROPS TO MARKET

Of Little Avail to Raise Produce of Any Kind If It Cannot Be Moved to Shipping Point.

While a great deal is being said about the crying need of cultivating every acre of land which can be made to yield crops at a fair profit, there is a surprising silence about the equally important need of providing facilities or getting those crops to shipping points. It is of little avail to raise wheat if it cannot be hauled to market.

At a recent convention of the Ohio Good Roads association the farmer delegates spoke with the utmost conviction of the need of improved roads, good 365 days in the year, if they were to do their part in the mobilization of the resources of the country in the cause of humanity. Moreover, these delegates from the farms did not ask to have the roads improved for them; they promised their full proportion of financial support for their construction.



Using Drag.

An entirely different condition is reported from New England, New York and New Jersey. There the congestion of railway traffic makes the highways of great value in delivering manufactured materials from one city to another; the motor truck has suddenly become a real necessity in meeting the urgent requirements for transporting the products of the cities. In short, the rational improvement of roads is an essential element of the grave economic problems of the day, to make the valuable products of the farm and shop available to the user at the lowest possible cost. This subject should be studied at once as an economic problem, the same as the provision of railway and waterway transportation, the increase in cultivated acreage and the improvement of manufacturing facilities. Crops that cannot be moved from the farms except at enormous expense and manufactured products that must lie in storehouse because of congestion of railways are of little value to a nation which needs such things now.

Tender Vegetables.

Vegetables quickly grown are more tender and of better quality than those slowly grown. Good soil and good cultivation are needed.

Cinders for Surfacing.

For surfacing footpaths, gravel, mixtures of sand and clay, and cinders will, in general, give good satisfaction.

Drag for Better Roads.

More dragging will mean better roads.

BIG CROPS IN WESTERN CANADA

Good Yields of Wheat, Splendid Production of Pork, Beef, Mutton and Wool.

The latest reports give an assurance of good grain crops throughout most of Western Canada, where the wheat, oats and barley are now being harvested, about ten days earlier than last year. Manitoba, Saskatchewan and Alberta are all "doing their bit" in a noble way towards furnishing food for the allies.

While the total yield of wheat will not be as heavy as in 1915, there are indications that it will be an average crop in most of the districts. A letter received at the St. Paul office of the Canadian Government, from a farmer near Delia, Alberta, says harvest in that district is one month earlier than last year. His wheat crop is estimated at 35 bushels per acre, while some of his neighbors will have more. The average in the district will be about 30 bushels per acre. Now, with the price of wheat in the neighborhood of $2 per bushel, it is safe to say that there will be very few farmers but will be able to bank from forty to fifty dollars per acre after paying all expenses of seeding, harvesting and threshing, as well as taxes. The price of land in this district is from $25 to $30 per acre. What may be said of this district will apply to almost any other in Manitoba, Saskatchewan or Alberta. Many farmers have gone to Western Canada from the United States in the past three or four years, who having purchased lands, had the pleasure of completing the payments before they were due. They have made the money out of their crops during the past couple of years, and if they are as successful in the future as in the past they will have put themselves and their families beyond all possibility of lack of money for the rest of their lives. It is not only in wheat that the farmers of Western Canada are making money. Their hogs have brought them wealth, and hogs are easy to raise there—barley is plentiful and grass abundant, and the climate just the kind that hogs glory in. The price is good and likely to remain so for a long time.

A few days since a farmer from Daysland, Alberta, shipped a carload of hogs to the St. Paul market, and got a higher price than was ever before paid on that market. Two million three hundred and seventy-seven thousand two hundred and fifty dollars was received at Winnipeg for Western hogs during the first six months of this year. 181,575 hogs were sold at an average price of $15 per cwt., and had an average weight of 200 pounds each. The raising of hogs is a profitable and continually growing industry of Western Canada, and this class of stock is raised as economically here as anywhere on the North American continent. There is practically no hog disease, and immense quantities of food can be produced cheaply.

It has been told for years that the grasses of Western Canada supply to both beef and milk producers the nutritive properties that go to the development of both branches. The stories that are now being published by dairymen and beef cattle men verify all the predictions that have ever been made regarding the country's importance in the raising of both beef and dairy cattle. The sheep industry is developing rapidly. At a sale at Calgary 151,453 pounds of wool were disposed of at sixty cents a pound. At a sale at Edmonton 60,000 pounds were sold at even better prices than those paid at Calgary. The total clip this season will probably approximate two million pounds. Many reports are to hand showing from six to eight pounds per fleece. 35 carloads were sent to the Toronto market alone.—Advertisement.

He Could Draw.

Redd—What's he doing now?"

Greene—He's a draftsman in an automobile factory, and, believe me, he can draw some.

"Really? What horse power?"

WILSON REJECTS PEACE PROPOSALS OFFERED BY POPE

WILL NOT DEAL WITH RULERS RESPONSIBLE FOR BLOOD OF INNOCENT WOMEN AND CHILDREN AS WELL AS SOLDIERS.

PEACE MUST BE BASED ON FAITH OF ALL PEOPLES

Cannot Take Word of German Rulers as Guarantee of Anything That Is to Endure Without Evidence of Will and Purpose of German People.

Washington, Aug. 30. — President Wilson has rejected the Pope's peace proposals. In a note dispatched and made public here the President says that every heart not blinded and hardened by the terrible war must be touched by the moving appeal of His Holiness, it would be folly to take the path of peace he points out if it does not in fact lead to the goal he proposes.

To deal with such a power as the present ruler of Germany upon Pope Benedict's plan, declares the President, would involve a recuperation of the strength and renewal of the world domination of that power, now balked but not defeated after sweeping a continent with blood of innocent women and children and the helpless poor as well as of soldiers.

Permanent peace must be based upon the faith of all the peoples and upon justice and fairness and the common rights of mankind, he adds.

Complete Text of Note.

The complete text of the not follows:

"To His Holiness, Benedictus XV, Pope:

"In acknowledgement of the communication of Your Holiness to the belligerent peoples, dated August 1, 1917, the President of the United States requests me to transmit the following reply:

"Every heart that has not been blinded and hardened by this terrible war must be touched by this moving appeal of His Holiness, the Pope, must feel the dignity and force of the humane and generous motives which prompted it, and must fervently wish that we might take the path of peace he so persuasively points out. But it would be folly to take it, if it does not in fact lead to the goal he proposes. Our response must be based upon the stern facts and upon nothing else. It is not a mere cessation of arms he desires; it is a stable and enduring peace. This agony must not be gone through with again, and it must be a matter of very sober judgment that will insure us against it.

"His Holiness in substance proposes that we return to the status quo ante bellum and that then there be a general condonation, disarmament, and a concert of nations based upon an acceptance of the principle of arbitration; that by a similar concert freedom of the seas be established; and that the territorial claims of France and Italy, the perplexing problems of the Balkan states, and the restitution of Poland be left to such conciliatory adjustments as may be possible in the new temper of such a peace, due regard being paid to the aspirations of the peoples whose political fortunes and affiliations will be involved.

Free Peoples Menaced.

"It is manifest that no part of this program can be successfully carried out unless the restitution of the status quo ante bellum furnishes a firm and satisfactory basis for it. The object of this war is to deliver the free peoples of the world from the menace and the actual power of a vast military establishment controlled by an irresponsible government, which, having secretly planned to dominate the world, proceeded to carry the plan out without regard either to the sacred obligations of treaty or the long established practices and long cherished principles of international action and honor; which chose its own time for the war; delivered its blow fiercely and suddenly; stopped at no barrier, either law or mercy; swept a whole continent within the tide of blood—not the blood of soldiers only, but the blood of innocent women and children also, and of the helpless poor; and now stands balked, but not defeated, the enemy of four-fifths of the world. This power is not the German people. It is the ruthless master of the German people. It is no business of ours how that great people came under its control or submitted with temporary zest to the domination of its purpose; but it is our business to see to it that the history of the rest of the world is no longer left to its handling.

No Peace on Status Quo.

"To deal with such a power by way of peace upon the plan proposed by His Holiness, the Pope, would, so far as we can see, involve a recuperation of its strength and a renewal of its policy; would make it necessary to create a permanent hostile combination of nations against the German people, who are its instruments; and would result in abandoning the newborn Russia to the intrigue, the manifold subtle interference, and the certain counter-resolution which would be attempted by all the malign influences to which the German government has of late accustomed the world. Can peace be based upon a restitution of its power or upon any word of honor it could pledge in a treaty of settlement and accommodation?

"Responsible statesmen must now everywhere see, if they never saw before, that no peace can rest securely upon political or economic restrictions meant to benefit some nations and cripple or embarrass others, upon vindicative action of any sort, or any kind of revenge or deliberate injury.

"The American people have suffered intolerable wrongs at the hands of the Imperial German government, but they desire no reprisal upon the German people, who have themselves suffered all things in this war, which they did not choose. They believe that peace should rest upon the rights of peoples, not the rights of governments—the rights of peoples great or small, weak or powerful—their equal right to freedom and security and self-government and to a participation upon fair terms in the economic opportunities of the world—the German people of course included, if they will accept equality and not seek domination.

"The test, therefore, in every plan of peace is this: Is it based upon the faith of all peoples involved or merely upon the word of an ambitious and intriguing government, on the one hand, and of a group of free peoples on the other? This is a test which goes to the root of the matter; and it is the test which must be applied.

U. S. Aims Known to World.

"The purposes of the United States in this war are known to the whole world—to every people to whom the truth has been permitted to come. They do not need to be stated again. We seek no material advantage of any kind. We believe that the intolerable wrongs done in this war by the furious and brutal power of the Imperial German government ought to be repaired, but not at the expense of the sovereignty of any people—rather a vindication of the sovereignty both of those that are weak and of those that are strong. Punitive damages, the dismemberment of empires, the establishment of selfish and exclusive economic leagues we deem expedient and in the end worse than futile, no proper basis for a peace of any kind, least of all for an enduring peace. That must be based upon justice and fairness and the common rights of mankind.

"We cannot take the word of the present rulers of Germany as a guarantee of anything that is to endure, unless explicitly supported by such conclusive evidence of the will and purpose of the German people themselves as the other peoples of the world would be justified in accepting. Without such guarantees treaties of settlement, agreements for disarmament, covenants to set up arbitration in the place of force, territorial adjustments, reconstitutions of small nations, if made with the German government, no man, no nation could now depend on. We must wait some new evidence of the purposes of the great peoples of the Central Powers. God grant it may be given soon and in a way to restore the confidence of all peoples everywhere in the faith of nations and the possibility of a covenanted peace.

(Signed) "ROBERT LANSING,
"Secretary of State of the United States of America."

DECIDE ON PRICE FOR STEEL

Cost-Plus-Profit Basis Is Plan to Be Used.

Washington, Aug. 30.—Steel prices will be fixed by the War Industries board on a cost-plus-profit basis, it is learned. President Wilson has been given the figures prepared by the Federal Trade commission and has turned them over to the war board for use in fixing contract prices.

While the war boards does not have final legal jurisdiction in fixing prices for the government, it was learned that the President had communicated to the Secretaries of War and Navy his wish that whatever figure the board may agree upon shall be binding upon those executives.

17 Villistas To Prison For Raid.

Deming, N. M., Aug. 30.—Seventeen Villistas captured by the Pershing punitive expedition in Mexico, were to be confined to the state penitentiary at Santa Fe today to serve sentences ranging from 17 to 80 years. The Mexicans, who were accused of participation in the Villa raid on Columbus, N. M., a year and a half ago, pleaded guilty to second degree murder before District Judge Raymond R. Ryan. Guadelupe Chavez, another member of the band, pleaded not guilty and will be tried before the fall term of court.

Canadian Wheat Safe From Frost.

Calgary, Aug. 30.—Seventy-five per cent of the wheat around Medicine Hat, Bassano, Bow Island, Lomond, Lethbridge, Nobleford, Raymond, Magrath and Carmangay is in stack and by the end of the present week the whole crop south of the main line of the Canadian Pacific railway to the international boundary will be safe from any serious damage by frost. This is more than two weeks earlier than last year. Threshing will be in full swing by September 10.

Veterans Give War Ambulance.

New York, Aug. 30.—Veterans of the Foreign Wars of the United States, at their eighteenth annual convention here, presented a fully equipped ambulance to the government. At the session it was announced that 7,200 members had been added to the roll during the year, and that the organization had been divided into 93 posts. A resolution making eligible for membership American sailors and foreign soldiers the moment they land on foreign soil went over.

The State In Brief

The opening of the state fair Labor Day brought out the largest first day attendance in the institution's history.

E. V. Willard, acting state drainage engineer, has been authorized to have the Minnesota drainage laws published in pamphlet form.

The young son of O. W. Nyberg of Stanley was kicked by a horse and it resulted in a rather severe injury, the leg being broken at the hip.

Severe weather visited Bemidji and vicinity one night recently, a heavy frost being reported and potatoes were badly wilted. Garden truck was in a similar state.

Mr. Brown of Elk River, the state potato expert, is spending the week investigating the condition of the crops in the various sections about International Falls.

A crowd of 5,000 people gathered in the Steele county fair grounds at Owatonna, when a loyalty mass meeting was held under the auspices of the Commercial club of Owatonna.

State Auditor Preus has been designated by the state drainage commission to inspect work on the Sand river ditch project near Beltrami, in Polk county, which is virtually completed.

Henry Bade, 23 years old, a farmer living near Arlington, was instantly killed by lightning while coming from the field and Henry Nagle, walking with him, was rendered unconscious.

Officials of the Interstate Mining company, operating the Lincoln mine near Virginia, stated late yesterday that the fire in that mine is under control and that mine is rapidly clearing of smoke and gas.

Edward F. Burns of Newark, N. J., one time campaign manager for W. J. Bryan, has been named state deputy for Minnesota for the Modern Woodmen of America. He will have 60,000 members in Minnesota under his jurisdiction.

Allen S. Broms of St. Paul, who was arrested at Lake Nuella August 19 for seditious utterances, has been released from the county jail on a $1,000 bail, signed by two farmers of Isanti county. Broms' case will be considered by the grand jury in December.

John Wilson of Winona, who has two sons in the service and another who is about to enter in the draft army, expressed the wish that he might do more for his country, now engaged in war. One of the boys, Frank Wilson, is in a military hospital after injuries received while packing mules at Fort Riley, Kan.

A Ford car, owned by Nelson Bros. of Deerwood, and a Maxwell owned by Charles Peterson of Cuyuna came together on the Deerwood road, the latter running into the former from behind and tearing off a wheel. Olaf Johnson drove along behind a short distance and while watching the accident drove into the ditch and wrecked his car.

Coal receipts at Duluth have been much more liberal during the last week, governmental interest causing better movement from mines to docks. A large fleet is reported to be on the way from Erie and Buffalo. For the season up to date bituminous coal receipts are 736,206 tons short of the similar period last year and anthracite is 165,596 tons ahead of last year.

Three thousand people gathered in Le Sueur in a loyalty meeting that was held in Stewart park. Daniel M. Lawler of St. Paul was the principal speaker on the program.

G. M. Ganzet, with two deputy nursery inspectors employed by the government, were in Deerwood and looked over all the white pine in the state for white pine blister rust. This disease has attacked the forests in the eastern part of the state, and an effort will be made to check it.

Recommendation that the hearing, before the Ethics committee of the Minnesota Bar association, of Albert Pfaender, city attorney of New Ulm, suspended by the State Public Safety commission for his participation in the anti-war meeting there, be a public hearing, is contained in a resolution passed by the bar association board of governors.

Head of the lakes grain elevators are "down to bin bottoms." Only a little more than 1 per cent of their storage space is occupied, and unless receipts hurry, with the dribbling shipments made recently, the whole supply will be wiped out. This is the first season, it is said, that the great elevator stocks have been so low at this date.

A campaign against the sale of bad eggs in Minnesota recently inaugurated by the State Dairy and Food department was made public following the first arrest under the state law prohibiting sales of decomposed eggs. Sam Olander, a merchant at Triumph, arraigned on that charge, paid $50 fine in justice court, according to a report to the department.

Police have been asked by authorities of the State Training school at Red Wing to locate eight boys who escaped from the school. The boys were all dressed in khaki shirts and trousers. It is believed that they made their escape during a slight rainfall at Red Wing.

The C. T. Welsh Construction company of Minneapolis, which has charge of the paving work now under construction on Fifth avenue south, in St. Cloud, and the city commission are still quibbling over the material to be used for the top dressing on the street.

MINES OF STATE ARE UNDER PROBE

VISITING STATE-OWNED PROPERTY TO SEE THAT PROPER REVENUES ARE DERIVED.

PREUS RECEIVES MUCH MAIL

Auditor's Office Overwhelmed With Inquiries Regarding State Land at $5 Per Acre Advertised in Southern Papers.

St. Paul.

James R. Finlay, an engineer in the Federal bureau of mines, arrived in St. Paul to confer witht State Auditor Preus regarding an investigation of state-owned mines to determine whether they are being properly operated and maximum royalties are being paid the state for ore removed. He left soon afterward with F. A. Wildes, state superintendent of mines, for Bemidji to begin the inquiry.

* * *

Swamped With Mail.

An erroneous announcement in many Eastern and Southern newspapers that Minnesota is offering state lands, partially cleared and improved, with a modest cabin on each 40-acre tract at $5 an acre under a 15-year deferred payment plan to attract settlers, late yesterday threatened to make the mail received at the office of State Auditor Preus heavier than that from the famous Minneapolis silk skirt chain letter fraud exposed recently by postoffice authorities.

Inquiries came from Pennsylvania, Ohio, Texas and other distant states and the majority contained the clipping from some newspaper of the erroneous announcement under a Minneapolis date line that Minnesota had adopted the extremely liberal offer to quickly settle its 40-acre tracts of fine farm land. J. F. Gould, superintendent of the land sales bureau, and a force of stenographers began an attempt to answer the replies to the free advertising, although the latter came faster.

"Unfortunately," said Auditor Preus, "these correspondents must be disappointed. The Legislature in providing for the administration of Amendment No. 1, providing for a limited amount of clearing on state land in advance of settlement, did not authorize the erection of the cabins which seem to appeal to the imagination of so many people."

The auditor explained also that $5 an acre is the minimum price for Minnesota land and there is little for sale at that figure.

* * *

Heavy Sales of Bottled Goods.

Heavy sales of "bottled goods"—liquor sold and carried away after nightfall—at the few saloons in the otherwise dry region covering many miles in Southern Minnesota and the employment of eight bartenders in one of the saloons which pays $8,000 license fee, were outstanding findings in a report received by the Minnesota Public Safety Commission from the special commission which investigated conditions in Martin and Pipestone counties after complaints were made by citizens in that section.

The report was placed on file, but probably will claim the commission's attention later.

The investigating commission was made up of Judge T. D. O'Brien of St. Paul, E. G. Hall of the State Federation of Labor and Senator E. P. Peterson of Litchfield, who recently conducted a similar inquiry at International Falls at the direction of the war board.

The saloonkeepers of this territory insist that they are complying with the laws and that they are not to blame for the increased sales due to other territories being dry, the investigators reported.

★ ★ ★

To Discuss School Plans.

Superintendent of Schools Hartwell has announced the program for the Teachers' Institute, at the Central high school auditorium.

The public is invited to hear Mr. Hartwell discuss plans for the school year. Special invitations to have representatives at the meeting were extended to the various civic organizations and parent-teachers' societies.

The sessions will continue to September 11.

★ ★ ★

Quane to Artillery.

Transfer of Major Oliver J. Quane, St. Peter, from the Second Minnesota infantry to the newly organized Second Minnesota field artillery proposed to end discord in the infantry regiment because of differences between Colonel W. T. Mollison, Faribault, and the major, probably will be effected within a few days, Governor Burnquist said.

★ ★ ★

Patrick J. Ryan and Ambrose Tighe, St. Paul attorneys, will represent the state in getting evidence before the commissioner to be appointed to hear testimony on charges of disloyalty which resulted in the recent suspension from office of Mayor A. L. Fritsche, City Attorney Albert Pfaender, both of New Ulm, and Auditor Louis Vogel of Brown county, following their participation in the New Ulm protest meeting. Governor Burnquist made the announcement and indicated that the commissioner will be appointed soon.

PAINS SHARP AND STABBING

Woman Thought She Would Die. Cured by Lydia E. Pinkham's Vegetable Compound.

Ogdensburg, Wis.—"I suffered from female troubles which caused piercing pains like a knife through my back and side. I finally lost all my strength so I had to go to bed. The doctor advised an operation but I would not listen to it. I thought of what I had read about Lydia E. Pinkham's Vegetable Compound and tried it. The first bottle brought great relief and six bottles have entirely cured me. All women who have female trouble of any kind should try Lydia E. Pinkham's Vegetable Compound."—Mrs. ETTA DORION, Ogdensburg, Wis.

Physicians undoubtedly did their best, battled with this case steadily and could do no more, but often the most scientific treatment is surpassed by the medicinal properties of the good old fashioned roots and herbs contained in Lydia E. Pinkham's Vegetable Compound.

If any complication exists it pays to write the Lydia E. Pinkham Medicine Co., Lynn, Mass., for special free advice.

TOO MUCH FOR LION TAMER

When It Came to the Question of Was He Afraid He Was Willing to Admit That He Was.

The proprietor of a wild beast show traveling the eastern counties of England recently made an offer of a silver medal to any local barber with sufficient courage to shave the tamer in the lion's den.

A knight of the razor, yearning for fame and glory, accepted the challenge and amid a chorus of cheers from the crowd entered the cage.

Although the lion betrayed very little interest in the proceedings, the barber was obviously nervous, and, having lathered his man, made several nervous dabs at one cheek with the razor, keeping a weather eye on the wild beast.

"Hold hard!" yelled the tamer at last, as he felt a fearful gash. "It's too risky!"

"I—I—I ain't afraid!" stammered the shaking tonsorial artist. "There ain't a lion living can scare me."

"Course you ain't afraid!" bellowed the tamer, as he wiped his wounded face. "Anybody can see you ain't. It's me who's afraid! I—I—I'm afraid of the barber!"

The German Way.

"The Germans, with their talk about exacting a war indemnity from their French and Belgian aggressors, reminds me of Smythe."

The speaker was Maj. Spender Clay, the son-in-law of Baron William Waldorf Astor, who recently spent some time in New York as a member of the English mission. Maj. Spender Clay continued:

"Smythe, you know, had a cow that was a great nuisance. One day the cow got into Jones' garden and ate all his grass. Jones asked Smythe what he was going to do about it. And what do you suppose Smythe did?"

Maj. Spender Clay laughed grimly.

"He sent Jones a bill," he said, "for using his cow as a lawn mower."

Described.

"What is a practical joke?"

"A fool's attempt to make a fool out of the other fellow."—Detroit Free Press.

Mental Hooverism.

"Reading anything of a substantial nature these days?" "No; I am conserving all food reflection."

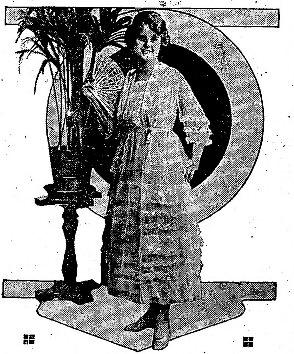
POSTUM

"There's a Reason"

Fads And Fancies Of Fashion

It is early in the season to predict what the party frock for young girls will be made of, but manufacturers so far have given the preference to nets and chiffons. The girl who must be outfitted early for fall can make a safe choice between these two always beautiful mediums for translating the designers' ideas into evening clothes. Filet net as well as the fine round-mesh nets, has been introduced along with new laces to help out the season's modes, while satin and taffeta, we know, will be depended on for petticoats and underslips.

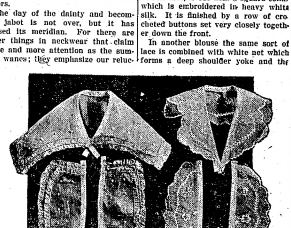
Nets embroidered in metallic effect in filet and Russian styles are introduced on the new models for grown people and dyed filet or colored Russian laces are to be reckoned with for them. Gold and yellow tones in evening gowns and in dress hats indicate that gold color has made more than a temporary success. It is recommended for the silk slip to be worn under a net frock. These slips, by the way, are not always of silk, but of materials that have an equally good effect seen through the net.



WHITE NET PARTY FROCK.

In the white net dress shown in the picture deep tucks and narrow ruffles take the place of lace or embroidery. Clever designing gives the frock the most valuable of all interests, its creator depending on net alone to turn out an attractive party frock for the young girl, deep tucks and narrow ruffles alternate on the plain skirt. The three-quarter length sleeves are finished with three little ruffles and a panel at the front of the bodice makes place for the same sort of youthful decoration. The bodice is extended into a peplum at the sides, edged with ruffles and at each side of the panel is finished with a border of narrow ribbon. Hanging loops of ribbon at the waist line provide a setting for little silk roses posed at the top of the loops. The ribbon is chosen to match the underslip in color, but the roses are usually in rose colors.

The day of the dainty and becoming jabot is not over, but it has passed its meridian. For there are other things in neckwear that claim more and more attention as the summer wanes; they emphasize our reluctance to part with it. Collars and collar and cuff sets have appeared and they will lighten up the frocks and suits that usher in fall and winter, and be replaced later on by accessories that suggest warmth.



NEW COLLAR AND CUFF SETS.

The new sets are in white and colored organdie, in white crepe and in net. Sometimes two materials are combined in them, and very often two colors are used together, as in the white organdie collars and cuffs with little ruffles of organdie and dots embroidered in blue silk, in one of the sets shown in the picture. White and pink, white and rose, white and tan are all favorites made up in this way. The little ruffles have picot edges and hemstitching contributes its share to the dainty finish of these new aspirants for favor.

White is not always part of the play in organdie neckwear. Pale shades of pink, blue, yellow, rose and tan are used for collars and cuffs, as well as white, and made up with little frills, hemstitching and picot edging with sometimes lines of chainstitching in white silk introduced. Tan appears to grow in the good graces of discriminating women, to be used in the place of white, where livelier colors are not desired.

But nothing can exceed fine, white organdie, daintily embroidered, and it appears in many sets. One of them is shown in the illustration made of Swiss organdie. Many small dots, exquisitely done scallops and a fine flower and leaf design contribute to the success of this rich bit of finery.

Julia Bottomley

ENTIRE BLOUSES OF LACE

In Some of the Most Attractive the Patterns Are Worked in a Lustrous Silk Thread.

Blouses made of real laces—filet Irish and the fine Bohemian lace are being shown. The filet blouses are particularly attractive, being made of soft, coarse lace in which the patterns are worked in a lustrous silk thread.

One blouse which is made entirely of this lace, is cut with a square collar which is embroidered in heavy white silk. It is finished by a row of crocheted buttons set very closely together down the front.

In another blouse the same sort of lace is combined with white net which forms a deep shoulder yoke and the upper part of the sleeves. This is also embroidered.

Heavy Irish crocheted lace is used for another blouse, which is cut with a smart high collar. The blouse fastens in front and is finished by a row of large crocheted buttons which form the sole trimming

KEEP TRUCKS IN SERVICE CONDITION

SUPPLY TRUCK CROSSING BRIDGE IN AISNE REGION.

American business houses and merchants may well learn a lesson from the military authorities in the care of keeping trucks in service up to their fullest efficiency, according to W. Owen Thomas, a well-known consulting automotive engineer of Detroit, Mich. Since trucks in war work face the severest tests known, and since they must be kept in the best possible condition all the time, in order that battles may be won, says Mr. Thomas, the men in charge of mechanical transport spare no end of pains in preventing trucks from falling by the wayside.

Features of Equipment.

"A first-aid truck and relief trucks accompany all truck convoys," says Mr. Thomas, who was head of the Canadian mechanical transport, in speaking of the method pursued in war service. "These trucks run the last in the train and stop and help any truck that falls out of the line. If necessary, a relief truck will tow the straggler or take its load so that the first-aid truck can work on it. The traffic is arranged so that one class runs on each road, and to a great extent in one direction only, in order that vehicles may pass one another just as seldom as possible.

"The ordinary motor truck route is from the railroad toward the front until the roads are too bad, and the loads are delivered to the smaller units of the horse transport. The truck then returns to railhead by another route.

"Rest Camps" Provided.

"After they are reloaded they proceed again toward the front, and somewhere on their route their rest camp will be situated. This location is chosen in as sheltered a spot as possible, and it is moved whenever German guns or airplanes become too friendly.

"Here the reserve first-aid truck, the workshop trucks and the stores trucks carrying supplies and repair parts are left working on the reserve trucks and units. The repairs done here are limited to those taking two days on any one unit. If engine bearings need scraping in slightly and tightening this would be done, but if parts are broken the unit is taken to a railroad, shipped to the advanced base and another drawn in its place. This work has to progress regardless of weather conditions."

AUTO FIRE CAUSES

Care and Cleanliness Counted Among Most Important Precautionary Steps.

BACK-FIRING IS DANGEROUS

Most Frequently Caused by Too "Lean" a Mixture of Gas, Starting When Engine Is "Throttled Down"—Keep Drip Pans Clean.

The most careful auto driver is likely to have a fire, for auto fires frequently are due to causes not under his control. Greater caution, of course, will mean a greater measure of safety, and it is only by close attention to details that seem trivial that one may be reasonably sure of safety.

Back-firing is the principal cause of auto fires, and this most frequently is caused by too "lean" a mixture of gas, starting even when the engine is "throttled down," says one motor expert. Most often this is in a cold engine, which is why most auto fires take place in winter.

In view of the danger of a "lean mixture" it is the part of wisdom for the operator to enrich it in winter especially. This will prevent the danger of back fire, and when the engine is warmed up the mixture can easily be readjusted.

Flame From Air Intake.

When the engine back fires there comes a sheet of flame from the air intake, and if there is any gasoline in the drip pan, as too frequently is the case, this usually starts blazing. There should be little or no gasoline in the pan, but supply pipes and connections will get leaky while often poor seating of the float valve may lead to an overflow of the carburetor. If this is the case the valve should be taken apart and cleaned, so the float will seat properly.

High Speed Starts Fires.

Running for a long time at high speed is another cause of fire. This sometimes raises the exhaust pipe to a red or even white heat, and when, as often is the case, this exhaust is placed too close the woodwork of the car it may be ignited, particularly if the woodwork has become greasy or oily. Thus the careful owner or chauffeur who keeps his car clean is in far less danger than the careless owner.

Occasionally fires are started by opening the muffler cutout in starting. If the car is in a garage this is particularly dangerous, for the presence of spilled gasoline and oil adds to the chance of the fire spreading. A slight gasoline drip under the car may lead to a serious fire from this cause. Gasoline vapor, being heavier than air, remains close to the floor and may be set off in this way.

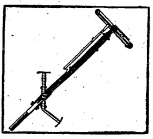
Short circuiting of the ignition or lighting wires is a cause that must be guarded against.

STEERING DEVICE FOR MOTOR

Column and Controlling Pieces Adjusted in Length—Wheel May Be Folded Into Plane.

The Scientific American, in illustrating and describing a steering device, invented by W. B. Thomas of Jacksonville, Fla., says:

This inventor provides a device wherein the column and the controlling devices for the motor are adjusted in length, and wherein the wheel may be folded into the plane of the column, and wherein the act of folding the wheel into the plane of the column will collapse the column and controlling mechanism, and wherein the moving of the wheel into a plane transverse to the axis of the column will lock the column in adjusted position.



Steering Device.

MOTOR DEATHS ON INCREASE

Largest Percentage for Any of Specified Causes of Accidental Mortality Last Year.

The mortality from motor car accidents and injuries showed by far the largest increase in the percentage for any of the specified causes of accidental mortality last year, according to a report recently issued by the Metropolitan from statistics of 9,000,000 policyholders. The motor car accidents were responsible for three-fifths of the increase in the total accident rate in 1916. The rate last year was 8.8 per 100,000, as compared with 5.7 per 100,000 in 1915.

FIXING GASOLINE FEED PIPE

Complete Loop Is Best Safeguard Against Crystallization and Consequent Breakage.

When a gasoline feed pipe is looped or otherwise bent in order to avoid the rigidity and liability to breakage of a straight pipe, air locks and consequent interruptions of flow of fuel are likely to occur after filling the tank unless sufficient gasoline is poured in to produce the pressure required to drive out the air that will be trapped if the loop or hand is made in a vertical plane. If the loop is turned so as to lie horizontal, however, there will be no such trouble. Incidentally a complete loop is the best safeguard against crystallization and consequent breakage of the pipe.

Sarcastic Beggar.

The lady of the house shut her lips tightly when she say who had rung the bell.

"No," she said, "you were here in January. I never give to a beggar twice. I know he is underserving of help."

"I wouldn't 'ave called, mum," said the tramp, seeing that he need expect nothing more from that house, "only I 'oped you might 'ave one of them little 'omemade cakes, left like you gave me at that time. I want to enlist, but I'm jest a stone too light, and one of your little cakes would have put me right."—London Tit-Bits.

Advice.

"If you have anything good to say, say it," said Robert Melz. "But if it's something mean and bad, why then say something else."

Men have a right to bet if they choose, but they should be careful how they choose.

Men are usually embarrassed when they propose—either financially or otherwise.

Getting Old Too Fast?

Late in life the body shows signs of wear and often the kidneys weaken first. The back is lame, bent and achy, and the kidney action distressing. This makes people feel older than they are. Don't wait for dropsy, gravel, hardening of the arteries or Bright's disease. Use a mild kidney stimulant. Try Doan's Kidney Pills. Thousands of elderly folks recommend them.

A Minnesota Case

Mrs. H. C. Hewett, 216 First Ave., Anoka, Minn., says: 'I was all run down and felt worn out. I couldn't do my housework and my back ached after the least exertion. I had dizzy spells and was nervous and restless. The first box of Doan's Kidney Pills made a great improvement and continued use fixed me up all right."

Feed the Fighters! Win the War!!

Harvest the Crops—Save the Yields

On the battle fields of France and Flanders, the United States boys and the Canadian boys are fighting side by side to win for the World the freedom that Prussianism would destroy. While doing this they must be fed and every ounce of muscle that can be requisitioned must go into use to save this year's crop. A short harvest period requires the combined forces of the two countries in team work, such as the soldier boys in France and Flanders are demonstrating.

The Combined Fighters in France and Flanders and the Combined Harvesters in America WILL Bring the Allied Victory Nearer.

A reciprocal arrangement for the use of farm workers has been perfected between the Department of the Interior of Canada and the Departments of Labor and Agriculture of the United States, under which it is proposed to permit the harvesters that are now engaged in the wheat fields of Oklahoma, Kansas, Iowa, North Dakota, South Dakota, Nebraska, Minnesota and Wisconsin to move over into Canada, with the privilege of later returning to the United States, when the crops in the United States have been conserved, and help to save the enormous crops in Canada which by that time will be ready for harvesting.

HELP YOUR CANADIAN NEIGHBOURS WHEN YOUR OWN CROP IS HARVESTED!!!

Canada Wants 40,000 Harvest Hands to Take Care of its 13,000,000 ACRE WHEAT FIELD.

One cent a mile railway fare from the International boundary line to destination and the same rate returning to the International Boundary.

High Wages, Good Board, Comfortable Lodgings.

An Identification Card issued at the boundary by a Canadian Immigration Officer will guarantee no trouble in returning to the United States.

AS SOON AS YOUR OWN HARVEST IS SAVED, move northward and assist your Canadian neighbour in harvesting his; in this way do your bit in helping "Win the War". For particulars as to routes, identification cards and place where employment may be had, apply to Superintendent of Immigration, Ottawa, Canada, or to

R. A. GARRETT, 311 Jackson Street, St. Paul, Minn.
Canadian Government Agent.

CHARGED TRACE UP TO PAT

Finnegan Probably Right When He Put Forward Thompson as Meanest of All Mean Men.

This one was told to Sam Bowers, the art salesman, by John Finnegan, train caller at the Union station at Sioux City, Ia.:

"Talkin' about mean men," said Finnegan, "one time I knew a man by the name of Pat O'Toole, who worked for a farmer, a few miles out from here, by the name of Thompson.

"Well, one night O'Toole wint out to the barn an' he found the farmer hangin' by the neck from a beam by a buggy trace an' he cut him down an' run four miles for a doctor, an' the doctor come an' the farmer got well, an' he said he'd never do it again.

"Well, at the end of the month, after the farmer had paid O'Toole his wages, Pat discovered that he was $3 short, an' he wint back to the farmer, an' ses, ses he, 'How's this? Me money is short to the extent of $3?' An' the farmer ses, ses he, 'Why, that's the price of that fine new buggy trace of mine that you spoiled by cuttin' a couple of weeks back.'"

JUST MATTER OF PRECAUTION

Patrolman's Tip to Sergeant Given in the Most Friendly Manner, and No Offense Meant.

Sergeant Sullivan and Patrolman Flaharty were on the warpath. It had been reported at headquarters that the soldiers at Smallville had been supplied with drink while on duty. The police officers had been sent forth to investigate the matter.

"Now, you wait outside," commanded the sergeant, "while I go in an' make inquiries. I shan't be a minute."

But he was several minutes. At last he appeared, a dazed expression on his face.

"Well?" queried Flaharty.

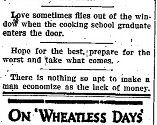
"No foundation whatever for the charge," replied the sergeant. "Don't believe the landlord of that inn could be guilty of such a crime."

"H'm!" grunted Flaharty, "that sounds all right, but if you take my tip, sergeant, you'll just put this peppermint lozenge in yer mouth before you tell it to the chief."

Love sometimes flies out of the window when the cooking school graduate enters the door.

Hope for the best, prepare for the worst and take what comes.

There is nothing so apt to make a man economize as the lack of money.



The Only Way.

"The Carnegie Foundation's recent resolution to the effect that the only way to insure a permanent world peace is to crush Germany," said Capt. W. E. Dame of the Rough Riders in his New York office, "remands me of the stocky, well-dressed chap in the police station.

"A big burly drunk had been brought in on a stretcher, and the sergeant said to the stocky chap rather sternly:

"'What have you got to say for yourself?'

"'Sergeant,' said the stocky chap, 'I have merely been acting the part of a peacemaker.'

"'But, good gracious,' said the sergeant, 'you broke six of this man's ribs.'

"'It was the only way,' said the stocky chap, 'to get peace.'"

Superfluous Equipment.

"I wonder why poetry has feet?"

"I wonder, too, when you consider that poetry never wins in a walk."

A small boy says the proper time to gather fruit is when the dog is chained.

A cross old bachelor says the proper way to bring up children is to keep them down on all occasions.

A GUARANTEED REMEDY FOR
HAY FEVER--ASTHMA

Your MONEY WILL BE REFUNDED by your druggist without any question if this remedy does not benefit every case of Asthma, Bronchial Asthma and the Asthmatic symptoms accompanying Hay Fever. No matter how violent the attacks or obstinate the case

DR. R. SCHIFFMANN'S
ASTHMADOR
AND ASTHMADOR CIGARETTES

positively gives INSTANT RELIEF in every case and has permanently cured thousands who had been considered incurable, after having tried every other means of relief in vain. Asthmatics should avail themselves of this guarantee offer through their own druggist. Buy a 50-cent package and present this announcement to your druggist. You will be the sole judge as to whether you are benefitted and the druggist will give you back your money if you are not. We do not know of any fairer proposition which we could make. [5]

TWO ARMY DIVISIONS GOING ABROAD SOON

Washington, D. C. — Two army divisions instead of one, comprising a total of at least 38,000 men, probably will make up the first contingent of the national guard to go to France.

Although no official confirmation was obtainable there are evidences that the composite Forty-second division, whose organization recently was announced, will be accompanied abroad by the Twenty-sixth, made up of New England guardsmen. No New England states are among the twenty-six having representation in the composite division.

The commander of the Twenty-sixth is Major General Clarence Edwards, now acting as commander of the department of the Northwest, and it is presumed he will go to Europe with the division. The Forty-second is commanded by Major General W. A. Mann.

GERMAN PRESS IS DIVIDED

Pope's Peace Proposal Not Teutonic Enough to Suit Some.

Amsterdam, Holland. — Despite the view of the allies' press that the peace proposals of Pope Benedict are German inspired it is not German enough to suit a portion of the German press.

The Lokal Anzieger warns Germany to remain composed.

The pope only mentioned one of Germany's essential terms, the paper states, that concerning her colonies, and that was unsatisfactory.

The Catholic papers congratulate the pope on his initiative. Others either make no comment, take a position similar to that of the Lokal Anzieger or advise that the pontiff's appeal be given careful consideration.

Americans to Train in Cuba.

Washington, D. C. — Cuba's offer to provide a mobilization and training ground for some American forces has been accepted.

JOHN W. KERN.

Former Indiana Senator Dies at Asheville, N. C.

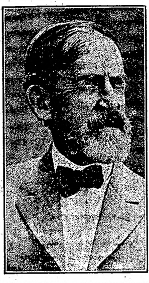

Photo by American Press Association.

KERN'S DEATH MARKS PASSING OF NOTABLE

Asheville, N. C. — Former Senator John W. Kern of Indiana, Democratic nominee for vice president in 1908, is dead here. He was sixty-eight years of age.

Mr. Kern, who came here a week ago to recuperate, died of uraemic poisoning. With him at the time of his death were Mrs. Kern and Mrs. George B. Lawson, a daughter, of Roanoke, Va.

In 1908 Mr. Kern was the Democratic candidate for vice president as a running mate for William J. Bryan. In 1910 he was elected United States senator from Indiana, defeating James E. Watson and participating in the Democratic victory which made Thomas R. Marshall, present vice president, governor of Indiana. In 1914 and 1915 he was Democratic floor leader in the senate.

He was defeated last November by Harry S. New, Republican.

BIG DAMAGE DUE TO FIRE

Norse Ship Sustains Loss of One Million Dollars.

New York. — The big Norwegian steamer Christian Bors, of 4,076 tons, was damaged to the extent of $1,000,000 by fire while lying at her dock in South Brooklyn. The steamer arrived recently from Buenos Ayres and had about completed the discharge of a cargo of hides. Several Brooklyn fire companies and three fireboats fought the blaze and had it under control two hours after it was discovered.

The origin of the fire has not been determined.

The Christian Bors was owned in Bergen and was under charter to the Prince Line.

COAL IS GIVEN RIGHT OF WAY

Shipments Take Preference Over Other Freight.

ORDER AFFECTS NORTHWEST

President Wilson Names Robert S. Lovett Director of Priority of Transportation.

Washington, D. C. — Government control of the coal industry moved a step nearer when President Wilson formally named Robert S. Lovett of the war industries board director of priority of transportation and approved an order issued by Judge Lovett directing that rail and steamship lines give bituminous coal shipments to the Northwest preference over all other freight movements.

Within the next day or so the president is expected to appoint a coal administrator on whom he will confer authority to control coal production and distribution, including price fixing powers, given to the executive in the food control act.

At an hour's conference with the federal trade commission he went over details of his plans.

There was no intimation as to whom the president will name.

It was said he probably would not select a member of the trade commission or give full powers to Judge Lovett, but would look elsewhere for a man.

Favors One-Man Control.

Officials familiar with the president's trend of thought said he appeared firmly convinced that a one-man control would work out better than to place supervision of the industry under one of the existing government agencies.

The man named would have at his disposal the services of the trade commission, which is in a position to suggest fair prices; the interstate commerce commission, which will administer the new car service law; the director of priority, who will place shipments of fuel where most needed, and the exports counsel, which, will control exports.

Of the several war coal control plans suggested officials believe the president most likely will adopt the one calling for government requisitioning of the entire output of the mines and government sale of coal to the public.

This program has the approval of the trade commission and of many other officials conversant with the coal situation.

CROWDED CAR RUNS WILD

Sixten Persons Killed and Forty Injured at Dover, Eng.

Dover, Eng.—At least sixteen persons were killed and forty injured when a crowded street car on a suburban line ran wild on a steep hill. It was wrecked at the foot.

The accident was due to failure of the brakes.

FRENCH LAUNCH TERRIFIC DRIVE

Capture German Positions on Twelve-Mile Front.

ITALIANS ARE AGAIN ACTIVE

Austrian Defenses in Plava Region Leveled, Isonzo River Is Crossed and Many Prisoners Taken.

London.—The armies of France in a desperate drive on a front of more than twelve miles have recovered Le Mort Homme (Dead Man's Hill), Avocourt wood, Corbeaux wood and Champneuville.

Italian armies in a movement in Plava region have leveled Austrian defenses, crossed the Isonzo river and are engaged with the enemy on a thirty-five mile front.

Both operations have already netted more than 12,000 prisoners and heavy losses have been inflicted on the Teutonic forces.

All French gains were held despite heavy counter attacks by the Germans.

The new territory taken by the French embraces positions that have literally weltered in French and German blood in battles that have waged to and fro since the German crown prince started his most costly enterprise, the attempt to take Verdun, which resulted in utter failure as a military maneuver and cost the lives of tens of thousands of his men.

French airmen materially aided the infantry in the press forward, swooping low over the German forces and emptying their machine guns into the ranks, and in fights in the air with German protecting machines, eleven of which were sent hurtling to the ground.

Italy Using Many Airmen.

Likewise, the Italian flyers are giving their infantry valuable support, more than 200 of them being engaged in attacking with bombs and machine gun fire Austrian troop formations behind the lines.

At last accounts the Italian guns were energetically proceeding with the work of destruction of the new positions taken up by the Austrians, endeavoring to blast a road through the defenses in order to make more easy the march of the Italian troops toward Trieste.

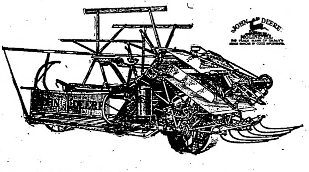
The situation in Flanders and in northern France is virtually calm as compared with last week, but both the British and French continue to make sallies at various points.

The Canadians around Lens are biting further into the German line and now have the coal center virtually surrounded except on the east.

The entente allied airmen still are carrying out raids on German positions in Belgium, many tons of bombs again having been dropped by them.

In Roumania the Austro-Germans have forced back the Roumanians on both sides of the Oltuz and Trotus valleys, according to the Berlin official communication.

John Deere Binders



JOHN DEERE BINDERS are built for the man who wants real visible quality. The binder is one of the most important machines used on the farm and a few dollars in price is of no consequence when saving a crop is a consideration. Four cars of stock were shipped from this point to South St. Paul Saturday. J. F. Athey, Even Ose and Mike Tunick being the shippers.

Everyone in town is figuring on accompaning the Goodridge base ball team to the Red Lake Agency next Sunday, where the boys will cross bats with the Indian team at that place.

Al Miller and A. Erickson have been in town the past week loading up the American Drainage Co's floating dredge on cars, ready to be shipped to Lincoln county where the company has a big drainage contract.

P. P. Palmer and Chris Wold have been busy this week putting in three more street lights. Two have been installed on the south side of the track and one on the west end of main street.

The Indian Fair at the Red Lake Agency will be held next week on Monday Tuesday and Wednesday, Sept. 17, 18 and 19. The Indian Fairs are well known thruout the country and it is expected that a large crowd will attend.

Ole Thompson, in response to a telegram, left Tuesday for Des Moines, Iowa, where he will report for military duty. Ole is the first one in this vicinity to be called for military duty under the draft system. We sincerly hope that Ole will be spared to return to his folks again

W. A. Holbrook, passed thru here Wednesday enroute to Grygla from Red Lake Falls with an auto truck load of live stock, which consisted of seven head of high bred Shorthorn bulls for Anderson and Ballard, the bankers at Grygla, who purchased them at the stock sale held at Red Lake Falls last week. They were a fine looking bunch and we would like to see more loads of such stock being brought into this country.

Farm For Rent—Inquire at the G. N. Depot, Thief River Falls, Minn. tf.

Nick Bundhund and family visited with friends and relatives at Germantown Sunday.

Mr. and Mrs. Steener of Lakefield, Minn., are visiting at the home of Mr. and Mrs. John Kusmak.

Rev. O. P. Stavaas of Thief River Falls will conduct Norwegian services in the old school house Sunday afternoon at 2:30. Everybody welcome.

Miss Elsie Bundhund came up from Thief River Falls Saturday morning to spend over Sunday with her parents, Mr. and Mrs. Nick Bundhund.

Will trade my unimproved 160 in Sec. 16 township 157 R. 39 E. Marshall Co. for 100 acres improved land.
R.L. Dunn, Little Falls; Minn.

Rosaire Morin was in town this week making arrangements for an auction sale which he will hold on his farm in the SW¼, Section 26, Township 155 Range 38, 7 miles east and 1 mile south of Esplee on Tuesday Sept. 25th. Mr. Morin has rented the Gunderson residence west of town and will move in as soon as the sale is over. It is his intention to go into the jewelry and watch repairing business here this winter. Mr. Morin, before moving up here on his farm was engaged in this business at Grand Forks and Crookston and is an expert in that business.

NOTICE.

Farmers are hereby requested to cut the weeds and brush and haul rhe stones away from the road and ditch side adjoining their land, within the town of Goodridge, by Oct. 1st, 1917, otherwise the town will do tse work and charge it against the land.

By order of Town Board,
Nicoly Urdahl, Clerk.

NOTICE.

Farmers are hereby requested to cut the weeds and brush and haul the stones away from the road and ditch side adjoining their land, within the town of Reiner, by Oct. 1st., 1917, otherwise the town will do the work and charge it against the land.

By order of Town Board.
T. Morken, Clerk.

Dance.

There will be a social dance in the Goodridge Hall after the show Saturday evening September 22nd. Good music will be furnished and a good time assured to all who attend. Make it a point to attend the show and then stay for the dance.

Red Cross Meeting.

A Red Cross meeting will be held next Tuesday evening in the school house at 8 P. M. for the purpose of organizing a permanent branch chapter of The American Red Cross. Chapter of Pennington, and to elect permanent officers. All are urged to attend.

The following have become members since we published the last list of members:

Otto E. Lee
Oscar Gran.

Peat Fires.

Peat fires are raging in this section of the country and a number of stacks of hay have been destroyed. The season having been exceptionally dry fires start easily and spread quickly.

Everyone is urged to be careful about setting fires for if it gets the least bit of a start it is liable to cause considerable damage.

Program at The Grand Theatre.

The following program will be shown at the Grand Theatre here Saturday and Sunday evenings:

Hippo Comedy, Love and Carnations, Sunset Drama, entitled Mother, and a two part Buffalo Western Drama, The Deserters Courage. Show starts at 8:30 P. M. Be on time and don't miss this show.

Blye-Halvorson.

Wednesday forenoon at 11 o'clock at the Brunkeberg Lutheran Church, occurred the marriage of Mr. Elmer Blye to Miss Hannah Halvorson. Rev. Bjornson performed the ceremony, Eddie Halvorson was best man and Miss Tillie Thompson was the bridesmaid. After the ceremony was over a reception was held at the home of the bride's parents, Mr. and Mrs. Henry Halvorson. The newly married couple will go to housekeeping right away on the groom's fine farm near Goodridge.

We wish to join their many friends in wishing them a bright and happy married life.

Star News.

Some of the threshers had a few days lay off twixt shock and stack threshing last week.

Prairie chickens seem to be scarce this fall, probably many of them have gone to join the Red Cross.

Mr. and Mrs. Knut Sunsdahl and children attended the basket social at Erie Saturday evening.

Mrs. Maren A. Iverson returned Friday from a business trip to Thief River Falls and Oklee.

Star was well represented in Goodridge by business callers last Friday, among whom were Oliver Tommerdahl, Even Sjulstad, Omond Bjorgufson, Willie Myers, Mrs. Mohn, Oluf Omlid, Tharald Tharaldson, Daniel Danielson and Kittle Vatne.

Mrs. Gustina Haga and children returned to their home a Northwood, N. Dak. Friday morning, after enjoying a week, visiting with relatives in S. E. Star. H. Iverson chaperoned the departing visitors as far as Goodridge.

Germantown News.

Miss Della Roller and Miss Freida Ristau left Wednesday for Thief River Falls where they expect to stay for winter.

Hans Clausen and Clarence Wayne were callers at Germantown Wednesday.

Mr. and Mrs. Carl Habedank and family were callers at Emil Ristau's Wednesday evening.

Nelson Wayne, accompanied by his mother, arrived here from Rollis for a few days visit at the homes of Clarence and Will Wayne.

Miss Freida Ristau was a caller at the Mrs. C. L. Wayne home Tuesday afternoon.

Miss Elsie Bundhund of Thief River Falls visited here with her sister, Mrs. Clarence Wayne for a short time Sunday afternoon.

Nick Bundhund and children of Goodridge were callers at the August Ristau home Sunday.

Clarence Wayne and his brother, Nelson were callers at the Emil Ristau home Sunday.

Henry Dau and John Clausen made a flying trip to Thief River Falls Saturday afternoon.

August Ristau was a Goodridge visitor Saturday morning.

Osmund Urdahl is busy plowing on Nick Bundhund's farm here.

Hans Clausen and son John visited at the Emil Ristau home Sunday.

Miss Bessie Roller went to Rollis to make a visit with Miss Alice Wayne.

Miss Lois Struble came home from Thief River Falls Saturday morning returning in the evening.

Willie and Henry Ristau spent Sunday with their folks.

Miss Rose Votava opened school here Monday in Dist. 76.

Everybody is busy fighting fire here.

The dance at G. Benson's store Saturday night was well attended and they all report a good time.

CHIROPRACTIC
(KI-RO-PRAK-TIK)
The Science That Makes People Well and Happy

You Need Not Be Sick

Nature is the Chiropractor's only aid—adjustments remove the pinch on the nerves and enable Nature to do her part in making and keeping the body well.

Ninety-five per cent of diseases are due to pressure upon nerves along the sides of the vertebral column. This pressure interferes with their functions; hence infiamation, unnatural action, pain and distress are manifested where these nerves end. All diseases are prolonged until pressure upon these nerves leadinf to the affected parts are adjusted. It is the business of the Chiropractor to release this pressure.

Investigation costs nothing and means health and happiness to you.

Hours: 10 a. m. to 12 m., 2 to 5 p. m. or by Appointment

DAIRY
FACTS

KEEP MILK COOL AND CLEAN

Warm Weather Is Trying on Dairymen, but More Especially on Women —Keep Vessels Clean.

The season is rapidly approaching when greater care must be taken of milk. Warm weather is trying on the dairyman, but more especially on the farmer's wife, who must care for the milk from a few cows. Preparations should therefore be made to keep the milk cool and clean.

The facilities for keeping milk on the average farm are very inadequate. Not enough cool space is available for the average farm woman, hence she has difficulties in saving the milk and ripening the cream evenly.

In the first place, the milk vessels are important. They should be of the right kind, with no seams in the pans, pails, etc., to harbor germs. There should be plenty of vessels and they should be kept scrupulously clean, aired, steamed and sunned occasionally.

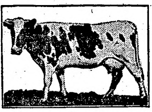
A refrigerator is almost a necessity on the farm these days. There are many perishable foods as well as milk to be kept. The cost of a refrigerator is not great when the utility and economy of keeping foods are considered.

DAIRY COWS RELISH SILAGE

Result Given of an Experiment Conducted by Pennsylvania Station—Decrease in Yield.

In an experiment conducted by the Pennsylvania station, according to a report received by the department of agriculture, two lots of five cows each were fed for three periods of four weeks. Lot 1 received silage alone for roughage during period 1 and 3 and mixed hay and silage during period 2, and lot 2 received hay and silage during periods 1 and 3 and silage during period 2.

The milk yield decreased with both systems of roughage, but the decrease was less with silage and hay. When silage and hay for roughage followed silage alone there was a slight increase in milk yield over the initial production. Except in one instance there was a decrease each period. When the cows received hay they consumed practically the same amount of silage as when no hay was included in the ration. Both lots consumed an excess of protein and net energy above that necessary for maintenance and milk production when based on Eckles' standard. There were no apparent undesirable physical effects from the feeding of silage alone for roughage with the grains used. There was very little difference in the cost of the two rations or in the feed cost of milk and milk fat. No perceptible difference was observed in the health of the two lots.



High Producing Type.

CLEAN MILK WINNING FIGHT

Making Gains Because of Demands of People—Takes Good Dairy to Score 75 Per Cent.

Clean milk is winning its fight slowly, and dirty milk is losing out—because—clean people buy clean milk.

It is a good dairy that will score 75 per cent on the government score card. The only milk that is better than certified milk is the milk the sucking calf gets from its mother. In scoring this milker we are obliged to give 10 per cent on method and equipment.

SWEDEN MUST GIVE STRONG PROOF OF HER NEUTRALITY

TO BE COMPELLED TO MAKE DEFINITE HER POSITION—GERMANY MUST NOT RECEIVE AID FROM NEUTRALS.

EXPOSURE AIDS ALLIES TO TIGHTEN EMBARGO

Washington Officials Say War Would Have Ended Six Months Ago But for Swedish Iron Exports to Germany and Retaliatory Measures Will Follow.

Washington, Sept. 12.—While the American government awaited development following Secretary Lansing's disclosure regarding the transmission of official German dispatches by the Swedish charge at Buenos Aires, Washington officials and diplomatists turned their attention to a study of their possible significance.

Two facts stood out clearly, Sweden will be compelled to make definite her position as a neutral and the exposure may be taken as indicating more exactly the Allies' intention that Germany shall cease receiving aid from northern European neutral countries.

Argument For Embargo.

Publication of the facts reveals that this government is fully cognizant of aid Sweden has been rendering the Teutonic powers and tends to cement opinion in support of the absolute embargo put into effect against Sweden along with the other neutrals, six weeks ago.

Sweden like other neutrals has contended it has the right to export to Germany any commodities produced at home, even though the goods are replaced by commodities imported from the United States. Some American officials say the war would be ended within six months if Swedish iron exports to Germany were stopped.

The Swedes it is declared have drained their country of foodstuffs by taking from the food producing industries vast numbers of men and placing them in the iron mines and the munitions factories which have sprung up since the war began.

Neutrals Need Argentina's Wheat.

Another phase of the situation is the possible effect if Argentina declares war. Argentina will have large quantities of wheat for export and as a neutral she might send much of it to the European neutrals under the operation of the British blockade. As a belligerent or with diplomatic relations broken, however, the Argentine government would carefully supervise all shipments to prevent any foodstuffs reaching Germany.

Likely to Explain to Argentina.

Secretary Lansing maintained his determination not to add comment to the disclosures. Officials believe that the Argentine government will demand soon, if it has not already done so, the withdrawal of the German diplomat who advised the sinking of Argentina ships with all on board and who characterized the foreign minister of Argentina as an "ass." Equal confidence was displayed that Sweden would offer an explanation to Argentina, perhaps without even waiting for the South American country to demand it.

ST. LOUIS COUNTY GOES "DRY"

Majority is 3,000 With Light Vote Cast in Duluth.

Duluth, Minn., Sept. 11.—St. Louis county swung into the dry column by a majority of more than 3,000 votes in the option election. As a result, the county will become dry March 25, 1918.

Duluth gave the drys 701 majority, as against 1,378 at the last municipal election, when the option question was voted upon locally. The total vote was only two-thirds that of the last election.

MAINE DEFEATS SUFFRAGE

Women Refused Franchise By Vote of Two to One.

Portland, Me., Sept. 11.—Equal suffrage for Maine women was defeated two to one at the special election, according to newspaper returns from two-thirds of the state. The total for 438 out of 635 election precincts, including all cities, was 17,035 for and 31,807 against.

Army Surgeon Is Drowned.

Phoenix, Ariz., Sept. 11. — Capt. Charles Bowker, an army surgeon of Bisbee, Ariz., was drowned in Roosevelt lake while trying to rescue a woman member of a bathing party.

Italy Takes 30,000 Prisoners.

Udine, Italy, Sept. 10.—About 30,000 prisoners have been taken to date by the Italians in their present offensive, while the total losses of the Austrians are estimated at 120,000. The Austrian plan now seems to be to remain on the defensive along the eastern ridge of the Bainsizza plateau, where their positions, about 1,000 feet high, dominate those occupied by the Italians by several hundred feet, at the same time centering the efforts of their best troops on the Carso in the hope of checking the march on Trieste.

ITALIANS PRESS AUSTRIANS

TAKE INITIATIVE AND PRESS HAPSBURG TROOPS HARD.

French Beat Off Five Successive Teuton Assaults—Effective Raids on German Trenches.

London, Sept. 12. — Italians and Austrians continue violently at grips all along the front, especially on the Bainsizza plateau, on the slopes of Monte San Gabriele and on the Carso. Rome officially reports that the Italians are in undisputed possession of the initiative, pressing the Hapsburg troops hard everywhere.

A Vienna war office statement asserts that Cadorna's forces have been unable to counter-attack Austrian "successes," on the Carso plateau. It says the Italians are shunning no sacrifices, attacking as often as 10 times in one day. All efforts to advance on Monte San Gabriele were defeated, it is declared. The statement adds: "Since August 19 we have captured altogether on the Isonzo 500 Italian officers and 18,000 rank and file."

French Beat Off Assaults.

On the Verdun front the French beat off five successive Teuton assaults, partly derimating the German storming columns. In Champagne Petain's troops made surprise attacks. Effective raids on German Trenches are reported by Sir Douglas Haig. Berlin admitted having lost positions to the British in the Hargicourt sector, but asserted they were repulsed by counter-attack.

SOUTH DAKOTA FORBIDS PEACE PARTY MEETING

Force to Be Used if Necessary to Prevent Gathering of "Pacifists" At Sioux Falls Convention.

Pierre, S. D., Sept. 10.—State Sheriff Shanks, acting upon instruction of Governor Norbeck, telegraphed Sheriff Carleton, of Minnehaha county, to prevent the proposed state meeting of the People's Council of America for Democracy and Terms of Peace, scheduled to open in Sioux Falls September 15.

Sheriff Shanks announced that the state constabulary would be ready to be drawn upon if necessary to use force in preventing the meeting of the council. The holding of such a conference, he declared, was considered as tending to embarrass the government and to incite rioting.

The governor has instructed the state sheriff to prohibit any gathering in the state of an unpatriotic character or which might cause rioting or other disturbances.

GERMAN PEOPLE WANT PEACE BY CONCILIATION

Chancellor Urged to Discredit Present Pan-German Maneuvers for "A Hindenburg Peace."

Amsterdam, Sept. 10. — The overwhelming majority of the German people are for a peace by conciliation, according to an article by Phillip Scheidemann published in the Vorwaerts. The article urges the imperial chancellor to discredit the present pan-German maneuvers for "a Hindenburg peace."

The Socialist leader says no one in Germany wants peace at any price, but that those who live with the people know the real feelings of the army and navy. They know Germany will defend herself to the last drop of blood and at the same time, they know also that Germany is ready today to sign a conciliatory peace. Therefore, Herr Scheidemann considers that the propaganda for conquest now being preached reaches the limit of consciencelessness.

REICHSTAG STRUGGLE SEEN

Crisis Expected When Wilson's Note to Pope Is Debated.

Stockholm, Sept. 11.—The shock of President Wilson's answer to the pope has revived the seemingly dead democratization issue in Germany with every prospect of a fresh crisis soon.

Political circles declare generally that the reichstag, which assembles Sept. 26, will be the arena of a supreme struggle between the forces of democratization and reaction, following the pope's peace proposal.

Crisis in Italian Cabinet.

Rome, Sept. 11.—A cabinet crisis is imminent. The press has opened a violent campaign against Minister of the Interior Orlando. The political controversy now raging has been precipitated by the bitter opposition of the Socialists against certain measures of the government.

Chicago Packers Raise Wages.

Chicago, Sept. 11. — All Chicago packers decided voluntarily yesterday to raise their employes' wages 2½ cents per hour and have so notified them. The increase involves 25,000 employes.

Why They Failed.

Berkeley, Cal., Sept. 11.—Many of the college men who attended the first reserve officers' training camp at the Presidio "were mentally and physically slouchy" and this prevented their obtaining commissions, according to a letter from Adjutant General Henry P. McCain at Washington, D. C. The letter further said that many of these college men had been spoiled because they had not been under proper discipline, that they could not stand up straight and could not give military commands.

TAMES WILD HORSES FOR THE ARMY

Copyright Underwood & Underwood

The most traveled army man would probably be an accurate description of James "Pink" Arlington, for he is constantly traveling around the country breaking in and taming wild horses for the use of the army. The photograph shows him on the job at Fort Sheridan, Ill.

SENATE PASSES WAR TAX BILL

TWO AND HALF BILLION DOLLAR MEASURE GOES THROUGH.

Gronna, Borah, La Follette and Norris Are Only Senators Voting Against Measure.

Washington, Sept. 12.—The two and a half billion dollar revenue bill was passed by the Senate last night by a vote of 69 to 4. Borah, of Idaho, Gronna, of North Dakota, La Follette, of Wisconsin, and Norris, of Nebraska, voted against the measure. Others who had fought for extreme taxation of wealth, such as Johnson, of California, Hollis, of New Hampshire, Reed, of Missouri, and Kenyon, of Iowa, all voted "aye."

In the last hours of the passage of the bill, the consumption taxes upon coffee, tea, sugar and cocoa were cut out of the bill. So were the postal increases on second class mail matter, which would have affected chiefly newspapers and magazines.

Operates Only During War.

At the last moment Senator Brandegee, of Connecticut, succeeded in having operation of the big bill confined to the duration of the war.

The bill now goes to conference between the House and the Senate where the differences will be threshed out. It is hoped that within a fortnight all matters of dispute will have been adjusted and the President will be able to affix his signature and convert the proposed taxation into law. Senators Simmons, Stone, Williams, Penrose and Lodge were appointed to represent the Senate in the conference.

ALL SOCIALISTS URGED TO BACK GOVERNMENT

Delegates to American Alliance For Labor and Democracy Issue Statement.

New York, Sept. 11.—All Socialists in the United States, organized and unorganized, were urged to "put all their energy, strength, ardor and enthusiasm at the disposal of the government so that the war may be carried to a rapid and victorious conclusion," in a statement issued by Socialist delegates to the Minneapolis conference of the American Alliance for Labor and Democracy on their return here.

South Dakota's New Wealth.

Pierre, S. D., Sept. 11.—South Dakota during the year of 1917 will produce new wealth to the amount of $568,094,000 of which corn, livestock and wheat are the principal factors. Mineral products are listed at $9,000,000. This statement was issued by the state immigration department.

Riot in Joliet, Ills., Prison.

Joliet, Ill., Sept. 11.—One convict was shot and three guards stabbed during a riot in the state prison here. The rioters numbered about 50, of whom 15 were ringleaders in the riots of two months ago.

Stock Market Opens Stronger.

New York, Sept. 10.—General strengthening all along the line following the passage of the committee's war revenue bill was evident at the stock market opening Saturday. United States Steel advanced three-eighths of a point at 107⅝, Bethlehem B opened at 104½, up an eighth of a point; Mexican Petroleum, 90, up five-eighths of a point; General Motors, 94½, up half a point. Rails trailed along with industrials, most of them registering advances, but Crucible Steel failed to respond.

THREE DIE IN ARSENAL BLAST

SCORE OF OTHERS HURT AT U. S. PLANT NEAR PHILADELPHIA.

Six-Inch Shell Explodes in Powder Room—Fire Spreads and Destroys Five Buildings.

Philadelphia, Sept. 10.—Three persons are reported dead, one is dying, and 23 others are in hospitals, more or less seriously injured as the result of an explosion at the Frankford government arsenal.

There were five explosions. Five buildings were destroyed.

Two hundred persons were at work in the various arsenal buildings and in the yards at the time of the explosion.

The first explosion is understood to have occurred in powder house No. 7, where six-inch shells were being filled.

Six-Inch Shell Explodes.

One of the shells exploded, according to early reports, igniting other explosives in the building, and the entire structure was soon in flames.

The fire then spread to other buildings in which powder fuses and guncotton are dried.

All the buildings were close together and the explosions as the flames spread to them came in rapid succession.

Work in the arsenal was ordered suspended at once by Colonel Montgomery, commandant, but later he rescinded this order and ordered the workers admitted as usual.

TWO GERMAN LEADERS SICK

Hindenburg Reported "Very Ill"—Ludendorff Hurt in Accident.

Rome, Sept. 11.—Reports received here declare Field Marshal von Hindenburg is very ill and that the injuries recently sustained by Quartermaster General von Ludendorff in a railway accident in Belgium were graver than at first supposed.

U. S. AIR SQUAD IS HONORED

Lafayette Escadrille's Record Admired by French Officials.

Paris, Sept. 11.—The Lafayette escadrille, composed of American fighting aviators, has been formally cited for bringing down a total of 28 enemy airplanes. The record was so unusual as to move French war officials to the highest admiration.

REDUCTION IN PRICES OF FOOD ARE DUE SOON

Washington, Sept. 11.—Promise of reduced retail food prices are made by the food administration to refute charges in Congress that no relief from higher prices had been experienced. A drop of $3 a barrel in the cost of flour is predicted. Lower meat prices will be discussed by packers and Herbert Hoover.

Editor May Be Deported.

San Francisco, Sept. 10.—Lawrence De Lacy, editor of a weekly publication, D. J. Harnedy, merchant, and William Mullane, a bartender, were found guilty in the United States court here of conspiring to effect the escape from an internment camp on Angel Island of Franz Bopp, former German consul-general, and Baron E. H. von Schack, former vice-consul. Federal authorities have intimated that conviction of De Lacy would lead to his deportation as an undesirable alien.

LOSS BY FROST TO CORN AMOUNTS TO SEVERAL MILLION

DAMAGE THROUGHOUT NORTHWEST IS GREAT THOUGH 60 PER CENT OF CROP IS STILL INTACT.

DAMAGE IN SOUTHERN MINNESOTA $10,000,000

Frost is Earliest in Ten Years and Damage Is Greater Than in Previous Years—In Many Cases Protection Given Saved Much of the Crop.

Minneapolis, Sept. 12.—Damage estimated at several million dollars was the result of heavy frosts in Minnesota, Wisconsin, Iowa and North Dakota. Reports from the weather bureaus of the Northwest indicate that the cold snap will continue for some time.

The frost is the earliest in 10 years, September 27, 1912, a heavy frost was reported in Minnesota, but the damage done to corn and other grains was not as large as the present one.

Southern Loss $10,000,000.

Southern Minnesota, according to reports, suffered the worst from the frost, in Washington, Steele, Dakota, Goodhue, Faribault and Freeborn counties the damage to corn is estimated at $10,000,000. Other counties that were affected as yet have not reported the approximate damage to their fields.

In northern Wisconsin, the damage to corn, cucumbers, tomatoes, beans, squash and pumpkins was placed at thousands of dollars. The temperatures in that vicinity ranged from 30 to 22 degrees. In some parts of northern Minnesota, it is reported, farmers covered their tomato plants with blankets and thus prevented the frost from killing the vines. Others say that the frost just killed the top parts of the corn and this will aid in filling out the ears, and did not affect the milk corn that was protected by the husks.

North Dakota Crops Suffer.

Fargo, N. D., Sept. 11.—Crops in North Dakota, especially in the northwestern part of the state, suffered heavily from frost, according to reports received here. In some instances vegetation turned black. Heavy losses were reported from Grand Forks county, where late flax and sweet clover were said to have suffered heavily. The thermometer registered 21 degrees in Grand Forks, while in Fargo a temperature of 27 degrees was reported.

NORWAY LIKELY TO GET FOOD FROM THIS COUNTRY

Gives Strong Guarantees That Supplies Will Not Be Allowed to Slip Through Into German Hands.

Washington, Sept. 12. — Norway is likely to fare better than any other neutral under the rulings of the Exports Administrative board. Dr. Fridtjob Nansen, head of the Norwegian economic mission, is understood to have made such strong guarantees that the United States is ready to deal liberally with his government in the matter of foodstuffs and other commodities needed.

Other neutrals probably will not receive the same consideration, it was stated authoritatively. For months the State department has known that certain of the neutrals outside of Sweden were not adhering strictly to their professed neutrality. Norway has received protests against some things of benefit to Germany that have slipped by Norwegian officials.

PAINLEVE IS TO HEAD NEW FRENCH CABINET

Socialist Party Withdraws Support From Government and Refuses Its Collaboration.

Paris, Sept. 12.—President Poincare has asked M. Painleve, minister of war, to form a new cabinet. M. Painleve accepted the offer.

M. Poincare's decision was reached after lengthy conferences with the presidents of the Chamber of Deputies and the Senate.

The Socialist party has definitely withdrawn its support from the government and refused its collaboration in the formation of a new cabinet.

The reason given by them is that they have not received sufficient guarantees either of a more vigorous prosecution of the war or of a more democratic policy.

To Treat All Alike.

Camp Grant, Rockford, Ill., Sept. 11.—Major General Thomas H. Barry, commander of the Eighty-sixth division of the national army, in welcoming the first, 2,000 selected men, declared that poor and rich would receive the same opportunity. "I look upon you as my son," said General Barry. "He preferred, as he expressed it, to enlist and win a commission without help from anyone. He won out, as many of you will, and now is an officer 'somewhere in France'—where, let us hope, we'll be ere long.

CRISIS OF WOMAN'S LIFE

Change Safely Passed by Taking Lydia E. Pinkham's Vegetable Compound.

Wagoner, Okla.—"I never get tired of praising Lydia E. Pinkham's Vegetable Compound because during Change of Life I was in bed two years and had two operations, but all the doctors and operations did me no good, and I would have been in my grave today had it not been for Lydia E. Pinkham's Vegetable Compound which brought me out of it all right, so I am now well and do all my housework, besides working in my garden. Several of my neighbors have got well by taking Lydia E. Pinkham's Vegetable Compound."—Mrs. VIOLA FINICAL, Wagoner, Okla.

Such warning symptoms as sense of suffocation, hot flashes, headaches, backaches, dread of impending evil, timidity, sounds in the ears, palpitation of the heart, sparks before the eyes, irregularities, constipation, variable appetite, weakness and dizziness should be heeded by middle-aged women. Lydia E. Pinkham's Vegetable Compound has carried many women safely through the crisis.

A GUARANTEED REMEDY FOR

HAY FEVER--ASTHMA

Your MONEY WILL BE REFUNDED by your druggist without any question if this remedy does not benefit every case of Asthma, Bronchial Asthma and the Asthmatic symptoms accompanying Hay Fever. No matter how violent the attacks or obstinate the case

SAW HIS ERROR TOO LATE

Misfortune Convinced Tommy He Had Used Salt Water on Wrong Portion of His Anatomy.

Tommy Tonkins was keen on baseball and particularly ambitious to make his mark as a catcher. Any hint, however, small, was welcomed if it helped on his advance in this department of the game. When he began to have trouble with his hands, and somebody suggested soaking them in salt water to harden the skin, he quickly followed the advice. Alas! a few days later Tommy had a misfortune. A hit at the bottom of the garden sent the ball crashing through a neighbor's sitting-room window. It was the third Tommy had broken since the season began.

Mrs. Torkins nearly wept in anger when Tommy broke the news.

"Yer father 'll skin yer when he comes home tonight!" she said.

Poor Tommp went outside trembling to reflect. His thoughts traveled to the punitive strap hanging in the kitchen and he eyed his hands ruefully.

"Ah!" he murmured, with a sigh. "I made a big mistake. I ought to have sat in that salt and water."

It isn't so difficult for one fool to convince another that he is a wise guy.

Perhaps a woman tells secrets because she is afraid of forgetting them.

The Best Sea Story of the War That Has Been Written

ROBERT HOLLIS MEETS THE MYSTERIOUS GIRL AND HAS LONG TALK WITH HER—WORD COMES THAT WAR HAS BEEN DECLARED

Synopsis.—Robert Hollis, one-time sea captain, who tells the story, is a guest on Gerald Carrington's yacht, Esmeralda, which, with a party of gay New York business men, is making her maiden voyage to the coast of Spain. It is supposed to be strictly "stag," and Hollis, wandering alone on deck at night is surprised to discover on board a woman who evidently wishes to remain unknown. The next night he succeeds in meeting her and having an interview.

CHAPTER II.—Continued.

—2—

Before the party finally broke up I had outlined my plan. I was in no haste to retire, having slept more or less during the afternoon; I would remain alone on deck, and see what happened. We were steaming right gallantly now, and stars were finding rifts in the clouds through which to silver the waves of the Sound. The first officer was still on the bridge, but Seeley would relieve him at twelve; there was nothing for me to do but wait until then.

I could better my position, however, and immediately did so. If the second officer really proved to be the accomplice of the girl, he would very probably take a rather careful survey of the deck aft before permitting her to venture forth from concealment. If his search disclosed my presence, the young woman would doubtless be ordered to remain below. My choice of position was easily determined. The flag locker was unusually commodious, as one of Carrington's hobbies was to dress the ship handsomely on every gala occasion, and display the colors of all nations. It was built directly against the after rail, and back into its protective shadow I silently drew a steamer chair, concealed myself beneath the folds of a rug, and lay there quietly.

Time dragged, but finally the bell forward announced the hour for the change of watch. I was sailor enough to comprehend the meaning of every sound. I heard someone walk hastily across the main deck, and descend through the companion—a seaman dispatched to call the second mate. The two came back together. Five minutes later, with no warning sound of approach, I became aware that someone had quietly rounded the end of the cabin. The mate passed me by within a few feet, so close, indeed, I could distinguish the buttons on his uniform, and the white cap he wore. Nothing, however, could have occurred to arouse his suspicions, for the man did not even pause in his slow walk, but disappeared along the port rail. Fearing he might return, I remained motionless, yet was doubly assured now that my suspicions were about to be verified. I dared not venture any exploration. Thus far my plan had worked nicely, and I could not now afford to risk discovery. She came so silently, like a gray shadow gliding out of the night, that she was actually beside the rail, gazing steadfastly out at the silvery water, before I was even clearly aware of her presence. I was scarcely willing to accept the evidence of my own eyes, yet arose slowly to a sitting posture to observe better, dropping the rug silently onto the deck. She heard no sound of the movement, and, with no suspicion of any other presence near, remained motionless, drinking in the soft beauty of the night, and breathing deeply the crisp salt air.

I could see her plainly, silhouetted against the sky, illumined by the stargleam which reflected upward from the water, her hands clasped on the rail, her form bent slightly forward, her skirts blowing lightly in the wind. She was slender and young, no doubt as to that, with a certain supple grace to her figure noticeable even in that quiet posture.

Helped by the support of the flag locker, I attained my feet noiselessly, only half determined on the course I had better pursue. However, I was left no choice. Something served to startle her, to make her vaguely aware of some other presence on the deck. She turned, still grasping the rail with one hand, and confronted me. I caught a glimpse of her face, white and youthful, her big eyes staring at me as though in sudden terror. She stepped back, then straightened slightly, her questioning eyes never leaving my face.

"I—I supposed myself to be alone," she said, the words uncertain, but the voice clear. "You are one of the passengers?"

"Yes; I chanced to be still on deck when you came."

"Where? You were expecting me?"

I indicated the chair in the shadow, but did not venture to move.

"I was lying here, covered by a rug, but did not see you until you appeared yonder at the rail. Why do you ask if I was expecting you?"

She hesitated just an instant, but answered frankly.

"There was a man here last night, after the engines stopped. I believed then he failed to see me. Was it you, and are you here again tonight to make sure?"

"You have guessed the exact truth," I confessed, almost regretfully. "Last night it was a mere accident, but tonight my presence here had an object."

"Indeed! What interest is it of yours?"

"None directly, except as I am a friend to Mr. Carrington, the owner of this yacht, and also his guest. He assured me only this morning that there was no woman on board, and laughed at me for even imagining such a thing. Naturally I desired to vindicate myself; then besides the mystery also had its attractions."

"No doubt! And now that you have progressed so far, what further do you purpose doing—turn me over to the authorities?"

"I do not know," I said honestly. "But I am in hopes you will trust me enough to explain your object in thus coming uninvited aboard. I should prefer being your friend, if that prove possible."

She did not answer, apparently hesitating in surprise at my unexpected plea, and doubtful as to my sincerity.

"What is your name?"

"Robert Hollis; I live in Chicago."

She nodded, and I imagined the expression of her eyes changed slightly. The merest semblance of a smile curved her lips.

"I am rather glad you are my discoverer," she said quietly, "for I know who you are. You are not altogether a stranger."

"I am not!" I exclaimed in surprise. "Oh! I understand; Seeley has told you of me."

"Has he indeed! Why Seeley?"

"Because I have some reason to believe that the second officer is your special friend on board: that through his aid you have found concealment. Am I altogether wrong?"

She laughed—the sound barely audible, yet evidence of her swift amusement.

"If I did not chance to know better, Mr. Hollis, I should almost suspect you of being a lawyer," she said cheerfully. "However, in spite of my present position, I am inclined to be a truthful person. I fear Mr. Seeley's interest in me is altogether, or at least largely, mercenary. I will confide in you, and confess that he has already cost me one hundred dollars, and heaven alone knows how much more will be required before we attain deep water, when I hope to be free from bondage."

"Good! I am encouraged; now you will tell me more?"

She shook her head.

"Not another word, sir. So far, as they say in New York, 'you have the goods on me,' and denial would be useless. Of course, I might have told a falsehood. I am perfectly capable of so doing, and had I been conversing with some others on board, I would have chosen to do so."

"Which would seem to imply that you possess a measure of confidence in me?"

"I do, Mr. Hollis," quietly.

"Seeley must have given me a most excellent reputation, and deserves reward."

"Mr. Seeley gave me your name as one of the passengers, nothing more. I cannot at present explain when, or how, I acquired my information regarding you. To you I am a perfect stranger, and must remain so, but, by some good fortune, I chance to know enough of you to trust you thoroughly as a gentleman. You understand what I mean?"

Her eyes met mine frankly; they were clear, honest eyes, and I felt that I read their direct challenge.

"Perhaps so," I answered with a feeling of disappointment. "You mean I am to ask no further questions? to forget, if possible, your presence on board?"

"Yes; can you do this?"

"Well, to be perfectly frank, I am not altogether certain that I can, or that I ought. I am Mr. Carrington's guest, and owe him a certain loyalty—you admit that?"

"Yes."

"Have I a right to conceal from my host the knowledge which I have discovered, that a strange young woman has been hidden on board his yacht by one of his officers?"

"That must depend altogether on your sense of duty to both Mr. Carrington and myself," she returned calmly. "Do I appear like a thief? a conspirator? or in any way a desperate character?"

"You appear a most charming young woman, whom I should be very glad to know."

"Thank you," and her lips smiled. "Then my case is not quite hopeless. As a 'most charming young woman' I unreservedly yield myself to your protection. I cannot tell you who I am, nor why I am on board the Esmeralda secretly, but I give you my word of honor that no harm shall result from my presence to any of your friends, and I only request you to remain silent for a few hours longer."

"You intend later to reveal yourself to others?"

"As soon as the yacht is safely at sea, beyond all possibility of putting me ashore."

I confess I was puzzled, uncertain; my duty to Carrington seemed clear enough, and yet there was that about the girl which gave me faith in her pledge. She read my hesitation.

"You still doubt me, Mr. Hollis?"

"No, it is not doubt, yet I know so little. You will at least trust me with your name?"

Her eyes fell, shadowed by their long lashes. For a moment she looked out across the rail, at the dark water beyond.

"So far as I can—yes," she answered soberly. "You may call me Vera."

CHAPTER III.

—

War, and a Copper Pool.

"Vera," I echoed, in some way vaguely conscious of a strange familiarity with the word, yet utterly unable to immediately recall the association, "that must be your given, not your family name?"

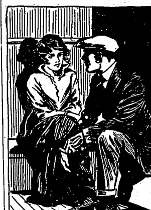
"And you are not even satisfied at this evidence of my trust?" she questioned lightly. "Usually it is considered quite a compliment to be permitted to call a lady by her given name—yet I grant you, a stranger, this privilege."

"To which I am not insensible; yours is not a common appellative, yet I have known someone so named before."

"Indeed! A friend?"

"Well, really, I cannot say; I haven't quite figured it out yet; only the memory haunts me oddly, as something I ought to remember."

"Or else forget," she interrupted quickly. "What do you say if we blot out all this mystery, and just be natural for a while? Have you the slightest knowledge of where we are, Mr. Hollis? What is that light flashing out yonder?"



Breathless With Interest, She Questioned Me.

"Montauk point," I answered, instantly recognizing the peculiar flash. "The eastern extremity of Long island. We shall be breasting the Atlantic by daylight if all is well. I have good reason to remember Montauk."

"Yes? You were there?"

"Once; why, it was sixteen years ago at the close of our war with Spain. I served on the St. Paul, and we came up from Cuba loaded with sick and wounded soldiers—Michigan troops mostly—and put them ashore at Montauk. I was little more than a boy then, and the suffering witnessed made a deep impression."

"You were a sailor?"

"I was twelve years at sea; my father was a large ship owner. I left the sea when I was thirty; I had arisen to command, my father died, and I decided I had had enough. I suppose I seem quite ancient to you?"

"Indeed you do not. I think it is wonderful for you to fight your way like that, when your father was rich. It was a man's work. Tell me about it. Your sea life, I mean."

The eagerness of her voice must have touched a responsive chord, for almost before I realized my purpose, I began speaking. I began at the first, relating my life as cabin boy, and as man before the mast, my first voyage as mate, and the experiences of my earliest command. I told of shipwreck in the South seas; of a battle for life in the Indian ocean; of strange peoples met in every quarter of the earth; of fighting windy gales off the Atlantic coast, and the silent desolation of tropic seas. Breathless with interest, she questioned me, and I answered, feeling the magic of her eyes on my face, the soft intoxication of her presence beside me. She was natural, wholesome, the very sort of woman I had dreamed about, as being somewhere in the world, yet had never met before. Her very presence was inspiration, but beyond this vague impression my dream did not go. Then I looked aside at her and laughed, realizing suddenly how loquacious I had been.

"Really, I must have nearly talked you to sleep," I said regretfully. "I do not know when I have before been guilty of such egotism."

"Do not say that. It was most interesting. It is nice to be spoken to as though one was an intelligent human being—it is quite an experience."

"Perhaps I do not understand."

"Doubtless not, for you are not a girl, and you tell me you never sought society. The very nature of your life has left you frank and straightforward. You talk to me just as you would to a man."

"If my frankness has interested you," I ventured, "can you not realize how much I desire to learn more—who you are, why you are here?"

"Of course; but I cannot tell you, Mr. Hollis—not yet."

She looked at her wrist watch, holding it out into a star-gleam, which revealed the white shapeliness of her arm.

"I dare not even remain here with you longer."

"But you will come again? This is not to be our last meeting?"

She hesitated, her eyes meeting mine almost kindly; then she held out her hand.

"The last—yes, in this way. You will meet me again, but not as we are tonight. I have truly enjoyed being with you, of hearing your story, but this meeting here alone was not my choice. You understand I could not avoid it, and after I was discovered, I had to remain and win your pledge to secrecy. You will not forget that?"

"Assuredly not. You will not return to the deck tomorrow night?"

She laughed softly, and withdrew her hand, which I still held.

"Tomorrow night! Oh, I cannot tell; we may be far enough at sea by then so I need no longer seek fresh air by night. I told you my concealment was only temporary. Good night, Mr. Hollis."

The gray dress she wore left upon me the impression that she faded from sight, her dim outline vanished so suddenly amid the shadows. I took a swift step forward, impelled by an irresistible desire to ascertain in what portion of the yacht she found concealment, yet paused almost as quickly. Who she was, and why she had chosen so unconventional a manner of joining us, was beyond my guessing. I essayed many a theory, yet one after the other, all broke down, and left me groping in darkness. Only one fact remained steadfast, to which I could cling with confidence—the girl was no mere adventuress, no criminal; she was doing nothing of which she was in the least ashamed, nor had she the slightest fear the consequences.

I slept so soundly as to be the last guest at the breakfast table the next morning, although as I sat there alone Fosdick returned from the deck to the cabin, seeking a raincoat, and reporting a heavy fog, through which the yacht was proceeding slowly. The vessel was still within easy view of Montauk, or had been before the mist shut down, but the really important news had come to Carrington by wireless—positive information of the outbreak of war. Russia and France were pitted against Germany and Austria in the death grapple. The German troops had already begun an invasion of Belgium on their drive toward Paris. It was still unknown what course England would take.

The nature of this news obscured all else, and left me unable to complete my meal. Other messages were momentarily expected, and I dressed hastily, and joined the little group on the deck, just as a cabin boy handed Carrington a new message. He read it, crashing his clenched hand down on the rail.

"It's all over with now," he exclaimed, holding the paper aloft, and gazing about into our eager faces. "England declares war, gentlemen. She will stand by her treaty with Belgium. Here is our opportunity; listen to me. This is going to be the greatest war in history; every nation in Europe may be involved before it is ended. Do you realize the commodity most in demand? the one metal those armies cannot get along without? It is copper. They must have it, and they must buy it of us. This morning, as soon as I received that first dispatch, I wired my agents to buy, buy. Now, with England in, the result is certain."

He paused, and studied the faces in the group.

"Gentlemen, there is wealth enough here on this yacht to control the entire copper output, if we work swiftly. The profit will be enormous. I have the campaign all mapped out; I know where to buy, and my agents are ready to execute my orders. I am going to say to you frankly that I had the thought in mind when I first organized this cruise. I believed this crisis was approaching, and prepared for it. By wireless we can operate surely and secretly, with no possible fear of betrayal. The only question is, are you ready to back me up?"

The expression on the faces of those gathered about him reflected the varied character of the men. They were alike startled by the unexpected turn of affairs, yet financial greed evidently predominated. Even the one German in the group had seemingly forgotten his nationality in view of the golden bait dangling so temptingly before his eyes. Fosdick, actuated by his lawyer instincts, and still cool and calculating, was first to question the proposition.

"You are perfectly assured of being able to control the market?" Fosdick asked.

"I already practically control," returned Carrington confidently. "With a little more capital the game is certain. In twelve hours, gentlemen, we can have the copper situation entirely in our hands. Here are my holdings individually. I need your help to close the deal."

They bent over the papers, eager to grasp the truth, but abundantly satisfied with a quick glance at the magic figures. It was evidently enough a master stroke, a business deal easy to comprehend, and all that remained for them to do was to take their profits.

"You—you return immediately to New York?" questioned McCann, his lips trembling.

"Certainly not; our game at present is to keep out of sight; permit no one to discover who is behind the movement. Your personal checks will satisfy me. I propose holding the yacht, say a hundred miles from shore, and conducting the entire business by wireless. That makes it safe and sure."

The group of financiers stared at each other, one waiting for the next to voice decision. Fosdick, as usual, took the initiative.

"I'm heartily with you, Carrington," he said frankly, "you can count on my check for a hundred thousand dollars right now."

"And I," "and I," echoed from lip to lip.

Carrington, smiling pleasantly, turned toward me.

"And how about you, Hollis? Coming in with us? We ought to have one Chicago representative, you know."

I shook my head, doubting my ability to produce the amount required offhand.

"Not today; give me a few hours to think it over. I should like to talk with you privately first."

"All right; we shall have enough without you, but I'll hold the chance open until you do decide. Let's adjourn to the cabin, gentlemen, where you can draw your checks while the steward opens a few bottles. This is an occasion to be celebrated."

We were upon our feet; not unwilling to escape from the raw air, when the voice of the lookout sounded muffled, but distinct, far forward.

"Sail ho!"

"Where away?" echoed the bridge.

"Off the starboard bow, sir—a big one."

We gathered at the rail staring out blankly into the smother. Then suddenly the mist seemed to roll asunder as though cut by a knife, and there in the rift, as if the fog were a frame, appeared one of the finest sea pictures I ever remember seeing. A huge iron warship, her funnels belching smoke at full speed, the white spray racing along her sides, swept into view. We had a glimpse of the black muzzles of guns protruding from forward and after turrets, of groups of sailors on deck, and in the fighting tops; a white-clad officer leaned over the bridge rail. There was no flag, nor did we need one to know for what she stood. Carrington pointed out into the blank mist.

"There goes one of your bulldogs now," he said. "That fellow has his orders already. In five hours more not a German liner will dare leave New York."

With the news of war and evidences of warlike activities on the sea, Carrington's party begin to think they will have some real adventure before they reach their destination.

(TO BE CONTINUED.)

Macedonia Country of Queer People.

Here in Macedonia we are so very far away. In actual distance we may be nearer home than if we were in Egypt, says a correspondent of the Manchester Guardian. We knew a lot about Egypt before we went there, but very few of us knew anything at all about Salonica, and the country which lies behind it, nor did that country know anything about us. Coming here you pass through that highly flavored town as through a gate, and enter a strange country, a country of queer people, queer animals and queer names.

Out of His Line.

"Who was the man that just stopped you on the street and waved his hands around so distractedly?"

"Oh, that was Stardust, the celebrated astronomer, who discovered and named 186 minor planets."

"What was his trouble?"

"He couldn't make up his mind whether to name his new baby Charles or William."

DADDY'S EVENING FAIRY TALE

BY MARY GRAHAM BONNER

EGRET MOTHERS.

"Two birds called the Egret birds were talking. They were very happy. One was named Mrs. Snowy Egret and the other was named Mrs. American Egret," began Daddy.

"Mrs. Snowy is one of the loveliest birds to be found anywhere and she is just like her name. She is white, pure white, and her plumage is very rich, very beautiful. Her beak and her legs are black, but all of her feathers are white, and there are glorious feathery white sprays of feathers in her costume which are called in the fashionable world, aigrettes.

"You see," said Daddy, "the fashionable world and the birdland world are often very far apart, and though now people are thinking more of birds and less of their hats, still I want to tell this story so that Nancy, when she grows up will remember to find out what kind of feathers she is buying.

"Mrs. American Egret is said to have fifty 'aigrette' plumes and they are at their best just when the little egrets have arrived. Now, Mrs. Snowy Egret was in a rookery talking of her fine little children. Mrs. American Egret was telling of her children, too. They both were comparing notes, as mothers will.

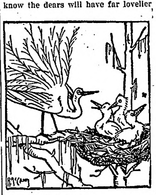
"'Mine are a hungry little brood,' said Mrs. Snowy.

"'Ah! so are mine,' said Mrs. American Egret. 'They will be beautiful birds, the dear little loves,' and Mrs. American Egret kissed her birdlings with her beak—oh, such a soft, sweet, motherly kiss.

"'Little birdlings,' she whispered softly to them. And off in the other rookery Mrs. Snowy was singing very gently to her little brood—little songs with very little meaning. But, ah! they were full of joy and of happiness and of the great, great love a mother bird gives to her young.

"Then both birds would realize that they hadn't said anything to each other for a long time, and Mrs. Snowy would say: 'I just forget to talk. I can't keep my eyes off the little dears. And oh! they are so sleepy.'

"'Sleep and food will make them lovely,' said Mrs. American Egret. 'I know the dears will have far lovelier plumage than their parents when the time comes for them to be full grown.'



"Little Birdlings," She Whispered Softly.

"'Yes, I can feel myself that the snowy children will be whiter and finer than I am,' said Mrs. Snowy. Which only showed how her mother love was making her think her little birdlings were a great deal more handsome than she was. As yet they were rather queer and featherless. But deep in their bird hearts each mother bird knew that the day would come when the birdlings would be gorgeous birds, though just now they were only dear little helpless things!

"'My little ones,' whispered Mrs. Snowy again. The little ones stirred contentedly. They need have no fear. Mother Snowy was there to care for them. She would never desert them.

"'My darlings,' said Mrs. American Egret. And the small, feeble birds knew they would be loved and looked after.

"When, bang, bang, bang! went the gun of a big man, and down fell Mrs. Snowy from her rookery. Again the cruel sounds echoed through the woods.

"Bang, bang, bang! Down fell Mrs. American Egret.

"The little birdlings turned uneasily in their nests. They were hungry! Where was mother? Oh, why did the world all of a sudden seem so cold, so friendless, so foodless?

"Two men were talking. 'This snowy bird is a beauty,' said one. 'Ever so many hats can be trimmed now. And such money as we will get!'

"'There are fifty aigrettes in this American bird,' said the other man. 'This was a good day for us.'

"Yes, a good day for the men who made the money, perhaps. A good day for the women who wore the beautiful feathers in their hats. But back in the woods two families of little birds were left to starve and die—because the world of fashion wanted their mothers. These birds have almost disappeared in the country, so many have been destroyed, and now they are not supposed to be killed. But never, never, Nancy, if you ever see an aigrette for sale when you are a big lady, never get it, for such cruel fashions should be stopped. No one should ever buy such feathers, for they are finest when the birds are young, and think of what that means! Hundreds of little birds left to die because of a fashion!"

ACTS OF HEROISM TO BE REWARDED

Men of National Army Will Be Accorded Same Recognition as Regulars.

MEDALS OF HONOR PRIZED

Changes May Be Made in Present Law—How Some Enlisted Men in the United States Army Won Medals for Valor.

By EDWARD B. CLARK.

Washington.—Young Americans who have been selected for service in the new National army should know that the same recognition for individual acts of personal gallantry in the field will be accorded them under the law that is now given to officers and men of the regular service.

There are enlisted men in the service today who have won medals of honor for conspicuous personal gallantry in the field, and it can be said that the possession of one of these metal tributes to courage is prized above all things else that the government can bestow.

By the time that the new American army troops in any numbers strike the Germans in France, it is probable that congress will have made some changes in the laws governing the giving of certificates of merit and medals of honor for high acts of courage on the field of battle.

There is a law governing in the matter today, but it is said that army officers believe it to be hedged in with so many requirements that some men who deserve certificates of merit are prevented from getting their earned rewards. The changes which probably are to be made will in no way aid the undeserving to secure prizes which are intended to go only to those whose conduct is of the highest in face of great danger. Young men who are about to enter the training camps should know that in this matter of recognition for courage, they will be on the same footing with commissioned officers. Gallantry in man, not gallantry in rank, is the thing recognized.

How Medals Have Been Won.

It is possible that men selected for service in the new National army, and perhaps others, may be interested to learn how a few of the many enlisted men in the United States army have earned their medals "for valor."

When Custer's expedition struck into the Sioux country in 1876, the commanding officer ordered Major Reno with his squadron of the Seventh to make the detour to the right. Custer then rode into the valley, where with his command he met his death. Reno striking to the right met a huge force of the Sioux and in a bitter battle which followed he lost many men.

While this engagement was at its height, a pack mule carrying a considerable part of the carbine ammunition of the troopers broke away and galloped toward the Indians. An enlisted man named Hanley knew what the loss of ammunition meant and he left his troop and circling round to the right he managed to capture the mule at a point directly in front of the Indian line.

Hanley threw himself on the animal's back and lashing it into a run, made straight back for his command. He was under the close and direct fire of the Indians. Hundreds of rifles barked at him, but he escaped unscathed by a seeming miracle. The ammunition was saved and congress, recognizing the enlisted man's devotion and gallantry, voted to give him the coveted medal of honor for his high service.

The bushwhacking war in the Philippines produced of heroes a hundred, but the world usually was given only the names of the commanding officers in the fights which made individual heroism possible. Who, on reading these lines, can remember ever before having seen or heard the name Louis Gedeon?

Escape Was Marvelous.

Not so long ago "G" company of the Nineteenth infantry went into action near Mount Amia, Cebu, Philippine Islands. The captain of the company was mortally wounded and the fortunes of the fight left him on the field defended only by Private Louis Gedeon. A force of the enemy advanced to give the captain his death stroke, but the private soldier faithful to his duty and to his officer faced the oncoming band, as army record hath it, "single handed and alone." Although exposed to a concentrated fire, Gedeon by his marvelous markmanship, aided materially by his coolness in the presence of what seemed certain death, kept the enemy back.

Private Gedeon might have escaped. He could have slipped into a ravine and have joined the main body of troops. In fact, it is said that the stricken officer, knowing that his own wound was fatal, ordered Gedeon to leave him, but the private soldier's answer was to kneel by his officer's side and to offer his body as a protection.

Gedeon's escape that day was as marvelous as anything ever set down in the pages of fiction. He held his own and help came before the private's wounded charge died. The officer whom the private had saved from the knives and the bullets of the enemy breathed his last, surrounded by the men of his command.

Congress recognized the bravery of George M. Shelton, who was a private of I Company, Twenty-third infantry. In giving the soldier his medal it was ordered set down in the records that the reason for the gift was "most conspicuous gallantry in action."

The Twenty-third infantry went into a fight at LaPaz, Luzon, Philippine Islands. A soldier of the command was wounded and left on the field. The spot where the infantryman fell was commanded by the rifles of the enemy. Private Shelton saw the plight of his comrade, and without waiting for orders he advanced alone directly into the open, his appearance being a direct and speedily accepted invitation for the enemy to concentrate its fire upon him. Shelton went on with the shots playing about him, picked up the wounded man and carried him back along a path of fire until he was safe within the lines.

Had a Soldier's Soul.

Augustus Walley of the Tenth cavalry was a cook. He was connected with Troop E of the Tenth. Augustus Walley, cook, had a soldier's soul. In the summer of 1881, Troop E was in the field in pursuit of hostile Apache Indians. The command arrived at the Cuchillo Negro mountains, New Mexico, and ran into a large band of the hostiles. A sergeant of the troop was shot by the first fire from the concealed reds and he fell from his horse at the base of a rock, which luckily protected him from further fire. The troop was compelled to fall back under the suddenness of the attack and the sergeant was left where he fell.

Walley, the cook, saw that while the stricken "noncom" temporarily was safe because of the shelter of the rock, he knew that if the Indians moved to either flank they could pick off the wounded man with their rifles, and so Cook Walley charged across the open without waiting any word of command, and ran along a zone of fierce fire to the side of the sergeant, picked him up, brought him back and dropped him inside the lines. For that action congress gave this cook whose spirit was that of a soldier a medal of honor, for he had upheld the best bravery traditions of the American army.

TRAIN STALLED BY BEARS

Held Up in Pennsylvania Woods for Half Hour by Bruins—Engineer Has Scare.

Johnsonburg, Pa.—A log train on the Dahoga & Highland railroad was held up for a half hour by two large black bears south of Highland.

The log train was moving slowly up the hillside when Engineer Johnson discovered the two bears, weighing about 300 pounds each, standing on the track a few hundred feet ahead of the train. As the train approached the spot they failed to move.

Johnson pulled the bell cord, but the clang of the bell or the blast of the whistle failed to frighten the bruins, who stood and gazed at the approaching train.

Knowing that it would be impossible to kill the bears at the speed his heavy train was moving up the hill, and fearing an attack if he injured them, Johnson stopped the train, and badly frightened, watched the bears for about half an hour, when they slowly wandered off into the forests.

WHOLE FAMILIES ENLIST FOR WAR

All Sons of These American Parents Serve With the Colors.

ELDERS DOING THEIR SHARE

Mother Gives Four Sons to Army Then Offers Herself to Red Cross and Is Accepted—Patriotic Women Give All.

Savannah, Ga.—After contributing her share to the military establishment of the United States and doing her full part in the Liberty bond purchases and contributing to the Red Cross fund, Savannah now offers the country two families of four sons each, all of whom are serving with the colors.

Bernard L. McDonald of the city health department, past sixty years of age, towers above all his sons. He is the father of 24 feet of men in Battery A, Chatham artillery. His four "boys" are Bill, Bob, Alex and Bee-Bee McDonald. Each is more than six feet in height and strong in proportion. They are all good soldiers. All four are noncommissioned officers.

Bob is the youngest and the shortest, being a scant six feet. Bill, next in youth, is the tallest, exceeding Bob in height by an inch and a half. Alex, the eldest, and Bee-Bee are just an inch shorter than Bill. Their father's height is six feet two inches, and the only reason that he is not with them is that they will not let him enlist. Besides the disadvantage of his age he has only one arm. All of these boys will accompany their battery to France.

Spartan Sacrifice.

The story of Mrs. A. W. Cook is that of Spartan sacrifice. Mrs. Cook has given four sons to her country, and she is proud, not sad, at this opportunity for service, even though she is dependent upon them for her support. The sons range in age from seventeen to twenty-five. They are Hurley, Frank, Le Roy and Calhoun Cook, all of whom are at the training camp at Fort McPherson. Frank and Hurley are privates in the First Georgia infantry and Le Roy and Calhoun are enlisted men in Battery A, Chatham artillery.

Scarcely had the call to the colors been made when the four elder sons offered their services. A fifth son, Wallace Cook, aged fourteen years, is eager for the time to come when he, too, may serve. Mrs. Cook says she hopes to be able to get along very well without her boys during their absence. At any rate, she is happy to make this sacrifice for the sake of her country. She has offered her personal services to the Savannah branch of the American Red Cross.

Another noteworthy example of Georgia patriotism is that of Mrs. Esther Gaddis of Atlanta, who, after giving three sons to the colors and her daughter to the Red Cross, is preparing herself to go to the Charleston (S. C.) navy yard to run a sewing machine for Uncle Sam. Mrs. Caddis is nearly sixty.

Offers Herself.

Several weeks ago her youngest son, Dewey, nineteen, enlisted in the marines, and is now in training at Paris Island, S. C. Shortly thereafter Elmer Perkins, aged thirty-two, son of Mrs. Gaddis by her first husband, enlisted as a shipwright and now is in training at Portland, Ore. Joe Perkins, aged twenty-eight, has been in the navy four years. When Mrs. Gaddis wrote her daughter, Dorothy, a vaudeville actress, the girl did not take time to answer by mail, but telegraphed her mother immediately:

"It seems to run in the family, so I applied today for enlistment in the American Red Cross."

GREETS AMERICANS IN PARIS

Princess Murat, formerly Miss Helena Stallo of New York, has just been appointed a member of the directing board of the Friends of France, the new international society formed for the promotion of closer social and intellectual relations between this country and France.

With other distinguished women backing the movement she has tendered the use of her salon to the society for the reception of Americans visiting in Paris.

Marshal Joffre is one of the honorary presidents of the organization.

A branch of the society is to be organized in the United States.

Princess Murat is well known in New York, where in her girlhood she was known as one of the most beautiful women of her set.

HIS FACE WAS "FAMILIAR"

Buffalo Man Did Not Recognize Brother Till Explanation Is Made.

Hopkinsville, Ky.—Vego E. Barnes is back from Buffalo, where he went to see a certain man and met him on the street. "How are you, Orville?" said Mr. Barnes, extending his hand. The Buffalo man, with the natural suspicion of an Easterner meeting a stranger, hesitated. "Your face is familiar," he said; "I'm sure I've seen it before, but who are you?" "Merely your brother," Vego explained. It was the first time they had met in twelve years

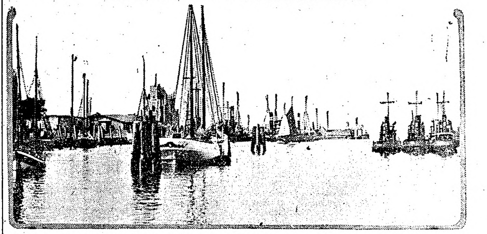
Dog Gave Life for Master.

Logan, Ia.—At the home of Sidney Pitt, Jr., the farm dog tried to prevent Mr. Pitt going into his garage. Mr. Pitt pushed his dog aside and then opened the door, when a mad dog sprang at him, but the farm dog grappled with the other and a desperate fight ensued. A gunshot dispatched the stranger dog, and the farm dog that had shown such devotion and unusual intelligence had to be shot because of unmistakable infection.

EXPLODING GERMAN SEA MINES IN PALESTINE

Many German sea mines have been found along the coast of Palestine, and the Australian soldiers there have great sport exploding them after partly burying them in sand.

ONE OF GERMANY'S SUBMARINE BASES



A view of the mouth of the Elbe river at Cuxhaven, the German submarine base.

AMERICAN KITE BALLOON

An American kite balloon and its hangar at the army balloon school at Fort Omaha.

JUDGED BY HER PERSONALITY

Physical Tests Are No Longer Employed in Making the Selection of a "Perfect Woman."

The British perfect woman has been discovered. She is forty and the mother of five children. There are no statistics as to height, weight or bust measurement. The physical features are not the most important part, though they are to be taken for granted from an array of social and spiritual qualities. Here is what makes her the perfect woman: She is in happy circumstances, living in a beautiful part of the country, a few miles from a big town. She is the center of a good home, in which there is a standard of cleanliness and comfort and where good taste is everywhere visible, in furniture, carpets, curtains, wall paper, ornaments and clothes. And then the description goes on to say:

"The ideal woman is sensible and businesslike and her home is a place of peace. She is patriotic and interested in politics. She takes walks, rides, bicycles, climbs, dances, skates, rows and plays games. She can ride a horse and drive a motorcar."

Thus it is the personality, not the person, that makes the perfect woman. One often sees where the grace and beauty break through the fashion and form and make even a plain person attractive. The latest test of the perfect woman is spiritual, not physical. —Columbus (O.) Journal.

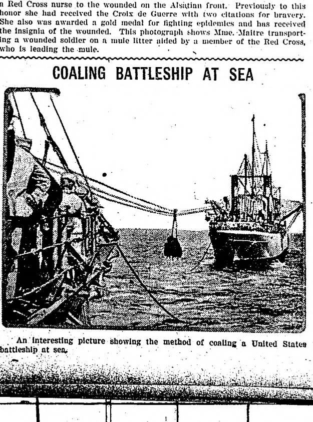
Bad Language.

"The kaiser is not much on spelling." [illegible] and when he uses the word '[illegible]' he is as far wrong on definition as he is on spelling."

FRENCH WOMAN HIGHLY HONORED

Mme. Charlotte Maitre, wife of the deputy from the district of Saone-et-Loire, has been made a chevalier of the Legion of Honor for her services as a Red Cross nurse to the wounded on the Alsatian front. Previously to this honor she had received the Croix de Guerre with two citations for bravery. She also was awarded a gold medal for fighting epidemics and has received the insignia of the wounded. This photograph shows Mme. Maitre transporting a wounded soldier on a mule litter aided by a member of the Red Cross, who is leading the mule.

COALING BATTLESHIP AT SEA



An interesting picture showing the method of coaling a United States battleship at sea.

DAIRY FACTS

EXPENSE OF SAVING CALVES

Cost Just as Much to Raise Poor Animal as a Good One—Dispose of Culls Early in Life.

Calf conservation looks like a good thing to many of the wiseacres, says the Farmer's Guide, but is it? Can the farmer afford to save the measly little specimens of bovinity that occasionally appear in the best herds? There are always some culls that cannot be turned to good account either as breeders or for beef. If every calf dropped were a high-class individual that could be raised and fed economically, the situation might be different. It costs just as much and sometimes more to raise a poor calf as a good one, and when you have it raised what is it good for? Let the conservationist go out into the open country and visit a number of farms where he can get next to the actual conditions; then let him study up on the economy of beef production and he may change his mind. Most certainly it is wise to save the good calves, the kind that can be raised into profitable breeders, milk or beef producers, but the other kind had better be disposed of early in life before they have time to become an expense.

SANITATION POINTS

1. Have the herd examined at least once a year by a competent veterinarian. Promptly remove animals suspected of being in bad health. Never add an animal to the herd until certain it is free from disease, particularly tuberculosis.
2. Never allow a cow to be excited by fast driving, abuse or unnecessary disturbance.
3. Clean the entire body of the cow daily. Hair in the region of the udder should be kept short by clipping.
4. Do not allow strong-flavored food, like cabbage or turnips, to be eaten except immediately after milking. Changes in feed should be made gradually.
5. Provide fresh, pure drinking water in abundance.

IMPORTANT FEATURE OF COW

Good Udders and Teats Are Often Overlooked by Dairy Cattle Breeders—Lack Wedge Shape.

There is so much real satisfaction in the milking and handling of cows that have good udders and good teats that it seems very strange that in dairy cattle breeding this important feature has been so much neglected and by this seeming neglect far too many cows have small udders and consequently small, short teats.

Part of Splendid Jersey Herd.

It will nearly always be noticed that sows with small udders, even in the best dairy breeds, usually carry too much flesh and lack that double-wedge shape which is so desirable in the eyes of the modern and progressive dairyman.

TAINT OF MILK AVOIDABLE

Unclean Utensils Are Common Source of Trouble—Particles Get Into Seams or Joints.

Unless some unusual food has been eaten, milk is delivered from the cow free from taint. It is also free from bacteria. Between the cow and the consumer it picks up a multitude of the latter and sometimes more or less of the former. The milk can is a common source of both. Minute particles of organic matter get into the seams or joints of the can, where they become the habitation of countless bacteria. Disagreeable odors arise as a result of the decomposition which ensues.

Put your nose into the mouth of an empty milk can after it has been cleaned and is ready to use. It is never entirely free from odor. But there is a distinct difference between a "clean" smell and a "foul" one.

HELPS GROWTH OF BACTERIA

Warm Milk Offers Splendid Medium for Growth of Organisms—Handle Milk Carefully.

The warm milk as it comes from the cow offers a splendid medium for the favorable growth of all kinds of bacteria that may gain access to it. To lessen this development milking should be done as carefully and quickly as possible and the milk should be strained and set away or separated.

AGRICULTURAL DEPARTMENT

This department of THE ELEVEN TOWNS is devoted to the interests of the agriculturists of Pennington and Marshall Counties. All the articles are by foremost authorities, including U. S. Government experts.

GRAVEL ROAD TYPES

Constitute About One-Third of Surfaced Roads in the United States.

BEST SELECTION OF GRAVEL

Quality of Material Is Next in Importance to Proper Drainage—Clay Is Poorest Cementing Material We Have.

Roads that are artificially surfaced with gravel, or with earthy material in the composition of which gravel predominates, are called gravel roads. This designation covers a variation in type which ranges from roads surfaced with a natural sand-clay mixture containing a considerable percentage of gravel to those having so-called "gravel macadam" surfaces, composed almost wholly of pebbles and constructed in practically the same manner as first-class macadam roads. Gravel roads constitute about one-third the total mileage of surfaced roads in the United States and are confined to no especial section of the country.

In the following discussion of gravel roads it is convenient to consider the subject under the two general heads, "Selection of Gravel" and "Construction Methods."

Selection of Gravel.

Ordinarily the selection of gravel for use in road surfacing must be confined to local materials which are or can be made suitable for that purpose. Because of high freight costs it seldom happens that road gravel of even the very best quality is transported by rail a greater distance than about 100 miles from the source of supply, and in the vast majority of cases it is hauled directly from pit to road in wagons. Since the quality of gravel varies to a considerable extent, sometimes in different parts of the same pit, it is essential that local road officials, who frequently are charged with the selection of such material, should have some knowledge of the relation between the physical characteristics of gravel and its wearing qualities when placed in a road surface. While such knowledge can best be gained by actual experience with different kinds of gravel, there are certain general requirements which may be stated for the guidance of the inexperienced. For example, the following excerpt from Bulletin No. 2 of the Michigan state highway department presents in very concise form the characteristics which gravel for road surfacing should possess, in the judgment of the state highway commissioner, in order to meet the Michigan conditions.

Gravels that come from the pit with the pebbles cemented together, even though they contain no clay, will recement in the road and become harder than they were in the pit. Tests of specimens of this kind always show that there is much lime present and usually some iron, both of which are excellent cementing materials. Briefly, the experience of the state highway department warrants the statement that there are few, if any, bank gravels in Michigan that do not contain enough limestone and other soft pebbles which grind up under traffic to furnish sufficient binder to cause them to consolidate in a few months' time, if separated from the surplus sand and earth, and properly treated after applying to the road.

In accordance with these suggestions, gravels are considered valuable for road purposes in the following order:

1. Almost in direct proportion to the percentage of pebbles constituting the mass.
2. In direct proportion to the value as road metal of the rock fragments constituting the pebbles.
3. In direct proportion to the value as a cementing material under all conditions of weather, of the finer particles of earthy matter constituting the filler or binder.

In general, the physical characteristics of gravel which determine its suitability for use in surfacing a road are:

(1) The durability of the pebbles or rock fragments, (2) the quality of the binder, (3) the grading of the pebbles, and (4) the proportion in which the binder material is present. While the influence each of these factors should exert in fixing the selection of gravel for a particular road depends upon local conditions and necessarily is a question for individual judgment to decide, nevertheless a few points in connection with each factor that may aid materially in reaching a decision will be summarized in the following paragraphs.

Durability of Pebbles.

The principal qualities which determine the durability of pebbles or stone of any kind when placed in a road surface are hardness, toughness, and resistance to wear. The extent to which pebbles possess these qualities depends very largely on the character of the parent stone from which they were originally produced and accordingly varies over a wide range. Since nearly all gravel deposits contain pebbles which have been formed from many different kinds of stone, it has not been considered practicable to apply the ordinary laboratory tests for determining hardness, toughness, and per cent of wear to gravel, and the matter of comparing these qualities, as possessed by the pebbles from different gravel deposits, usually depends on visual inspection. Not infrequently a very casual inspection will reveal which deposit, among a great number, contains the largest percentage of hard, durable pebbles. There are comparatively few cases where this point cannot be determined with sufficient accuracy by sorting out the pebbles contained in representative samples from the different deposits, testing the various kinds with a hand hammer, and determining the relative proportions in which the more durable materials are present in the sample by means of a weighing device.

The Binder.

No matter how durable may be the pebbles contained in a given gravel deposit, they cannot be used successfully in a road surface unless they can be well bonded together so as to present a combined resistance to the disturbing action of traffic. To accomplish this bond requires that the gravel contain some cementing or binding agent such as iron oxide, carbonate of lime, or clay. As already explained, certain pebbles, such as those composed of limestone, possess the property of becoming firmly bonded together by virtue of their own cementing value.

Grading and Proportions.

For gravel to make a satisfactory road surface, the stone particles should be graded in size so that the amount of binder required will be reduced to a minimum. The reason for this is that the binder usually is much less resistant to wear than the stone particles, and therefore it is desirable that the latter form as large a part of the wearing surface as is practicable. Most gravel deposits as they occur in nature satisfy this requirement in so far as grading of the pebbles is concerned, but they nearly always contain pebbles of a size larger than it is desirable to incorporate in a road surface. Natural deposits also not infrequently contain too large a proportion of sand or clay to produce satisfactory results. It is desirable, therefore, that specifications covering gravel for use in road construction should limit the proportions in which the fine and coarse materials shall be present and a maximum limiting size for the pebbles, as well as definite requirements regarding the quality of the pebbles and of the binder.

GRIT WILL AID INDIGESTION

Material for Grinding Purposes Alone Constitutes Small Part of Hen's Natural Foraging.

Fowls on range are constantly picking up bits of different materials which are often classified broadly as grit. Yet we must remember that true grit (for grinding purposes alone) is absolutely indigestible, and therefore constitutes a small part of the hen's natural foraging. What she picks up is more likely in the nature of ash or carbon or lime or charcoal.

In cases of indigestion caused by pasty mashes lumping in the crop, grit helps greatly. Where much soft, sloppy food is fed to fowls, they will sometimes consume grit ravenously because it helps to prevent the food from passing through the system too rapidly. The extreme necessity for grit in such cases would be somewhat relieved, however, by feeding more bulky food.

Every effort should be made to keep the coops and houses clean and sanitary.

CARE FOR YOUNG DUCKLINGS

When Chilled by Getting Wet at Fountain They Crowd Into Corner of Yard—Watch Them.

Little ducklings in brooders will sometimes be chilled by getting wet from the fountain and will then crowd in a corner of the yard instead of going into the brooder to get warm. For this reason they must be watched at feeding time, for they must have water then.

Keep Poultry House Clean.

Keep the poultry house clean and free from lice. At present prices chickens mean money and should not be neglected.

Prevent Crowding Chicks.

Care should be taken not to crowd the chicks by placing too many in any one house.

Keep Dogs Away.

Do not allow the dog to drink from the same water dishes that are used by the fowls and chickens.

ROAD BUILDING

SHADE TREES ON ROADSIDES

Nine-Tenths of Highways in New York Entirely Void of Vegetation—Plan to Improve.

By investigations just completed by the New York State College of Forestry at Syracuse, it has been found that nine-tenths of the roadsides in the rural districts of New York state are entirely void of shade trees. When this is considered along with the fact that last year New York state paid out of the state treasury about $30,000,000 for the construction and maintenance of road beds, it shows that the state is not yet awake to the great need and the great possibilities in rural roadside improvement.

A preliminary survey has just been made by H. R. Francis in charge of the landscape extension work of the College of Forestry.

During the survey, studies were made of such important features in rural roadside improvement and beautification as good and bad varieties of trees found along the highways, views and vistas obtained from the highways, the effects of the shade trees on crops in adjacent fields, the possibilities of the covering of barren embankments and the planting of some desirable sort of vegetation where overhead wires are in large numbers. One of the principal features studied was the condition of the roadbed as affected by the presence or absence of shade trees.

Shaded Road in New York.

Few people in the state will be able to visit the wonderful national parks of the West, but an increasing number of people will own automobiles and use the highways of the state. Many, if not all, of these highways may easily become state parkways of beautiful trees and shrubs. Trees grow like weeds under the climatic conditions existent in New York and with varied scenery of intense interest the highways of the state will eventually become as beautiful as those of any other state in the Union.—Green's Fruit Grower.

LOGGING TRUCKS MAKE ROAD

One Type of Car Used in Far West Has Front Tires of Ten Inches and Rear Ones of Twenty.

Powerful wide-tired trucks are now being used in logging regions in Oregon and Washington, which virtually make their own roads as they go. One type of these cars is described in Popular Mechanics' Magazine. It has front tires 10 inches wide. An experienced driver carefully selects his course as he goes over a route for the first time and the weight of his machine makes a road as it moves along. A few trips over the same line of travel serves to make a hard, smooth surface which will withstand considerable bad weather. Four-wheeled trailers are often used with these trucks.

GOOD ROADS ARE ATTRACTIVE

Thousands of Farmers Making Direct Profits by Catering to Passing Automobilists.

The use of the automobile by farmers has completely changed the rural attitude toward motoring, and tens of thousands of men are making direct profits by catering to the passing motorist. In order to attract him there must be a good road, and thus the lump of rural conservation is leavened to a surprising degree.

Cowpea Is Valuable.

If you haven't cowpea seed, buy it. As a food and feed crop, the cowpea should have a big place on nearly every farm.

Cream Grading.

Cream grading will be required in the near future. Why not start now to improve quality? It will pay in the long run.

Bond Issue for Ohio.

Ohio is talking of a $500,000,000 highway bond issue.

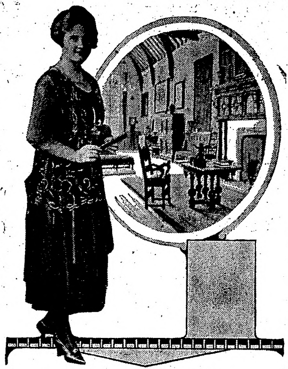
What Well Dressed Women Will Wear

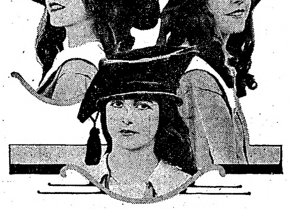


WITHIN HER OWN FOUR WALLS.

Next to the tailored suit the afternoon dress takes its place as the most important element of success in the wardrobe, to be assembled in the fall. It has been made in such variety that a selection merits a great deal of attention. It appears in satin and in wool, with satin preponderating, and is more or less elaborate (if one can call any of the season's styles elaborate) according to the uses it is to be put to.

Many of the new models are entirely of satin, with even the lovely and beloved crepe georgette in sleeves and bodice replaced by satin. But crepe is not entirely banished and is not likely to be. It is too valuable an asset to the designers of gowns and too becoming to their wearers to lose favor.

A satin gown appears in the picture made with a tunic partly of satin and partly of embroidery, which has the appearance of beading, made by applying a tiny silk cord wound with a minute silver band in a pattern to fabrics of any kind. It is particularly good on gray, taupe, black and dark blue.



SOFT VELVET HATS FOR MISSES.

A trace of the tonneau idea remains in the skirt of this gown, which is cut to flare out at the hips. The long sleeves are of plain crepe and the bodice and upper part of the tunic of satin and of crepe with the new embroidery. The lines are almost straight, with an inconspicuous and soft girdle of satin, playing hide and seek with the embroidered crepe on the bodice. Measured by present standards, this gown may be called elaborate. A cluster of silk and chenille flowers on the bodice do their part toward brightening its dignified color, which is taupe, but might be dark blue or gray or black with equally good effect.

Even the little miss of eleven (or more) years may be happy in the possession of a velvet hat this winter, for those who make it their business to look after her needs in headwear have gone in for velvet. The soft crowns and soft brims of the new shapes make just the kind of headwear for little girls; flopping brims and big puffed crowns that belong to youth.

Velvets in black, dark brown and other dark colors make up a large part of winter millinery for misses. For trimming, heavy ribbons, silk cord and tassels, fur ornaments and bandings, are featured with ribbon in the lead and used in many ways.

The three hats shown in the group printed above are representative types among velvet hats for girls. The picturesque model at the left is much like the familiar old favorites, in leghorn and other straws, with broad, floppy brims that have always belonged to youth. But the crown and brim are both softer than those of its prototypes. It is of black velvet bound with grosgrain ribbon and has a small fur ornament at the front.

The hat at the right is merely a large puff of velvet over a narrow drooping brim, bound with ribbon. It has a collar, and long ends at the back of grosgrain ribbon. The small hat at the center has a collapsible crown, mounted on a narrow, upturned brim. The head supports the crown, which is weighted at one side with a silk cord and tassel. The edge of the brim is bound with narrow grosgrain ribbon.

These hats represent the ideas of people who specialize in this particular kind of millinery. They seem very simple, but the hand and eye of the experienced designer is evident in all of them.

Julia Bottomley

Novel Designs.

If one wishes to represent the spirit of the day she may choose a pattern in which the flags of the allies appear as spokes, and, combined, form the "wheel of progress," the whole carried out in the correct colors against a delicate background.

Regular menageries appear on some stuffs—one in particular shows a leopard springing upon a defenceless lamb. But others carry out peaceful scenes and depict botanical gardens and butterflies.

Oil for Chamois Gloves.

To wash chamois gloves, put them on your hands and scrub them clean with a mild soap and warm water. Take them off and rinse. Into the last rinse water add a liberal tablespoonful of olive oil—that is, a tablespoonful to a basin of water. Dry in the shade.

Greek Influence in Evening Gowns.

A number of evening models show Greek inspiration, the two sides of the gown made in contrasting style. In some instances, draperies are caught up with embroidery.

The State In Brief

Mrs. Sophie Stuhr, 94 years old, Winona's oldest pioneer woman, died last week of the first sickness she ever had known.

Nine alleged slackers were arrested at Kinney by Deputy United States Marshal William Bradley. The prisoners were taken to Virginia for arraignment.

Winona coal distributors, while they are urging patrons to wait until the government fixes the retail price, began yesterday delivering coal "subject to government price regulations."

Twenty-two laborers were discharged by the city council of Buhl because they had failed to observe the order that all employes take out citizenship papers. Several other aliens quit before they were discharged.

Shakopee is to be included in new organization plans of the State Humane society, and Welcome W. Bradley, secretary and executive officer of the Minnesota Society for the Prevention of Cruelty, announces that he plans soon to arrange the work in that county.

Miss Alice Cynthia Archibald of Northfield, has been selected by the woman's bureau of the American Red Cross, to serve with Miss Katherine P. E. Lansing and Miss Emma Sterling Lansing of Watertown, N. Y., sisters of the secretary of state, on the first committee of 100 women to be sent abroad to take charge of the canteens and rest stations along the route to the French front.

Investigation by county officials following the discovery of the bodies of Mrs. Park L. Day and her two children, all victims of poison, developed a heart-rending story. Robbed of the husband and father, who is a victim of tuberculosis and confined to a sanitorium, herself ill and not able to supply the three children and prepare a home for the fourth, which was expected soon, the mother lost all hope. Purchasing some poison at a local store, she gave the three children the liquid mixed with food. Then taking the remaining portion she lay down and awaited death. One of the children recovered and going to the home of an uncle gave the alarm which resulted in the finding of the bodies of the mother and two little ones.

Miss Ella Laqua of Bemidji has left for Sykeston, N. D., where she has accepted a position as music supervisor in the public schools.

A. H. Clemens of Rochester, among those drafted, has been given a temporary discharge from service. He is principal of the high school.

Prof. A. N. Smith of Big Falls, C. N. Brown of Elk River and others spoke at a farmers' meeting at Spooner, when potatoes and other subjects were discussed.

The body of John Husmann of Cushing is to be exhumed and inspected by Coroner Trebby, Drs. G. M. A. Fortier and J. B. Holst. Husmann died in June and a request was recently made that the body be taken from its grave and examined, as it is thought possible that he met with foul play.

Cass county by capturing first honors in agricultural exhibits at the state fair for the northern section gains permanent possession of the challenge cup, having won it for three consecutive years. Beltrami county won second place, Kittson third, Red Lake fourth, Hubbard fifth, Cook sixth, Becker seventh, Mahnomen eighth and Lake ninth.

With St. Paul's first soldiers for the new national army already quartered at Camp Dodge, and with others on the way and more planning to leave, hundreds of requests have been made by drafted men throughout the city and state to be included in the next contingent of 40 per cent, leaving September 19, regardless of their order of liability.

Threshing is now going on in full blast all over the country around Hallock. The wheat yield is quite satisfactory, running from 10 to 40 bushels per acre, according to local conditions during the growing season, which either assisted or retarded its growth.

Wadena county romped away with first honors at the State Fair in the county agricultural exhibit contest. This county won first honors last year. Mike Holm, who is in charge of the agricultural exhibits, asserted that this year's exhibits surpass those of any other year. He says that the displays are more complete and the products of a better quality.

The hunting season for small game will open September 16, despite the recent ruling of the attorney general that hunting on that day would be in violation of the Sunday law, and consequently game could not be taken legally on that day, according to unofficial reports at the Capitol. Protests that enforcement of the Sunday law would operate simply to the advantage of sportsmen who can spare time to go hunting on business days gave rise to a report that state game wardens will not arrest violators of the Sunday law.

Dean Coventry, superintendent of the Wilcox mine at Woodrow, found ground glass in the sugar in his cup of coffee. He went to Brainerd for treatment and a stomach pump applied recovered more glass from his stomach. An investigation is being made of the whole incident.

Drafted men who leave Hibbing will have individual backers whose duties it will be to provide the soldiers with tobacco and reading material. Hibbing's drafted army will carry the title of "Iron men" with them so that they may designate the section of Minnesota they come from.

COUNTY FAIRS TO SPREAD LOYALTY

PATRIOTIC MEETINGS UNDER AUSPICES OF STATE PUBLIC SAFETY COMMISSION.

CAFES TO APPEAL LIQUOR BAN

Lack of Necessity of Restriction Principal Argument on Which Permission for Resumption of Sales Will Be Asked.

St. Paul.

County fairs will be utilized for the holding of loyalty meetings under the auspices of the Public Safety Commission and the Loyalty lyceum.

It is planned to have addresses by one or more prominent speakers at every county fair in the state.

In addition, the holding of meetings in towns where there is no fair will be continued.

Representative W. I. Nolan of Minneapolis will give an address at Motley this week; Judge A. E. Giddings of Anoka at Brooten Sunday; Senator George M. Peterson of Duluth at Mora, September 20; Frank M. Eddy at Willmar, September 21, and Judge Frank Wilson of Stillwater at Royalton, September 22.

Meetings for which no speakers have yet been assigned will be held at Roseau, Bemidji and St. Cloud this week.

Next week rallies will be held at Winona, Barnum and Wadena and on September 27 there will be a big rally at Grand Marais.

★ ★ ★

Cafes to Appeal Against Liquor Ban.

Cafes, hotels and cabarets are planning to make another appeal against the Public Safety Commission's ban on the sale of liquor after 10 p. m. and serving drinks to women.

Statements as to lack of necessity of such a prohibition will be sought from prominent Eastern men by F. E. Turgeon, owner of the St. Francis and Boardman hotels, St. Paul, who has gone for a tour of the large Atlantic coast cities. He also will sound popular sentiment on the subject among hotel and cafe people there.

Everything else being favorable, Mr. Turgeon says, a petition will be circulated and all influence brought to bear to restore conditions to normal in the Twin City cafes.

★ ★ ★

Second Warning to Hunters.

Commissioner Carlos Avery of the State Game and Fish department has issued a second warning against bringing wild game into Minnesota—especially from South Dakota—before the hunting season opens in this state.

"Sportsmen who expect to hunt in South Dakota or Wisconsin," Commissioner Avery said, "should bear in mind that they must dispose of their game without bringing it into Minnesota, until the season opens here, according to a recent opinion given by the attorney general.

"The hardship worked by this situation on Minnesota hunters will be cured next year when the Federal regulations fixing the opening date for migratory bird shooting September 16 will be in effect in all Northern states."

★ ★ ★

Urges Seining of Fish Pockets.

Pointing to the unusually profitable fishing on the Upper Mississippi this year, Earl Simpson, secretary of the Winona County Fishermen's association and a member of the commission appointed by Governor Burnquist to codify the fishing and hunting laws of the state for the next legislature, is calling upon fishermen's organizations and individuals, to aid the government in seining the pockets left by the receding waters.

"The Mississippi can be made the world's greatest fishing waters," Mr. Simpson said.

"Last year, when some of our members saw the fish perishing in the stagnant waters left by the falling river, we sent out a seining crew. The Federal government, through the Homer station, also worked a few crews. The results have been reflected in this year's fishing. Fishermen are agreed that no year has furnished better fishing on the Mississippi river.

"This year our plan is to urge the municipal and other authorities in various towns along the river to assist us. In Winona we will raise funds by subscription. A crew will start out in a few days. We should work as far south as Prairie du Chien, Wis."

★ ★ ★

Made Farm Adviser.

Francis Corniea, formerly agricultural adviser to the State Board of Control, and for the past three years in charge of the farm at the State School for Deaf and Dumb, Faribault, has been appointed agricultural adviser for Hennepin county to succeed K. A. Kirkpatrick.

★ ★ ★

Paralysis Epidemic Not Feared.

Minnesota virtually is free from infantile paralysis, Dr. H. M. Bracken, secretary and executive officer of the State Board of Health, said when asked about any steps that might be taken as a result of an outbreak of the disease in Chicago, Iowa and North Dakota.

He said there are only two or three cases in the entire state and no fear is held of an epidemic in Minnesota, particularly this late in the year.

The authorities will keep a strict look out for new cases.

ILLS OF MOTOR CAR

Noted Medical Adviser Tells Motorist of Many Things for Their Benefit.

CANNOT KEEP CAR TOO CLEAN

Sweetness and Purity of Its Appearance Intimately Associated With Length of Its Life—Don'ts for Caretaker.

The life and health of a motor car, like godliness in men, is closely akin to cleanliness, writes Dr. Leonard Keene Hirshberg of Johns Hopkins university in American Motorist. The sweetness and purity of its appearance is intimately associated with the length of its life, the friction and well being of its component anatomy. You cannot keep your car too clean or the sheen on its body too well polished.

Motorists ere now are familiar with the axiom, "Spread yourself in oil and save your metal." This is only the application to the motor car of the overworked and age-old allusion to medical advice, "An ounce of prevention will save a pound of cure."

Show me a dust-filled, dirty, soiled machine, and I will make the prophecy of a short shift and rapid depreciation of the car. Dirt, lack-luster and a dulled car body spell worse than rapid loss of value.

Don'ts for Caretaker.

Among the don'ts for the caretaker of a car are these:

Never run the car in the mud if a detour will permit you to escape it. Mud is the natural foe of machinery.

Never use rough cloths with which to wipe, clean or polish your car.

Never use an excess of oil or body polish. It collects dust and turns into grit.

Never use muddy or soiled water with which to wash your car.

Never fold a top down when it is wet.

Never allow mud to remain on a car one moment longer than is absolutely possible.

Never allow mud, if possible, to dry on the car. Wash off immediately with cold water.

Never dig, scrape, chisel or shovel mud from the polish. It destroys the varnish and paint.

Never use force for any purpose. A weak solution of soda will cajole the toughest mud and grease from the body.

Never dry the surface with soapy water on it. Rinse all soap and soapsuds off before drying.

Never employ a roundabout circular rotary motion in polishing the car. A straight out, back and forth, piston thrust is what should be used.

Polish for the Body.

Never accept Tom, Dick and Harry's "sure restorer" of the original factory sheen and luster. Mark Twain said that everybody has a "certain cure for colds." So almost every driver and garage keeper implicitly avows his body polish to be the best for the car. Dead men tell no tales; neither does the injured finish on a car.

Shun all such as Billy Sunday flees Old Nick. Instead buy some boiled linseed oil; never use the unboiled. It will not do. Also some furniture wax, and let elbow grease do the rest. The varnished part is first washed, cleaned, rinsed and dried, then the boiled oil is lightly applied and rubbed completely off. The lighter metal parts can be still further finished with the furniture wax massaged to a highly lustrous finish.

Rough, heavy soap, full of alkali, also eats into the varnish and coats of the body. You will avoid this in manicuring your car by heating a gallon of water into which is stirred a pound and a half of soap. This is your stock solution of soap for the chassis, body, and other parts. It should, of course, always be applied with a soft, silky sponge, rinsed off in clean, cold water, and dried with a chamois skin.

PUT BAN ON GASOLINE CARS

Vienna Authorities Consider Licensing of Electrics Only—Reason for Action Unknown.

The city authorities of Vienna are considering a policy of refusing licenses to gasoline cars which are to be used within the municipal area, says Power Wagon.

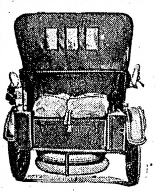
This drastic policy, should it be enforced, would probably succeed in putting vehicle transport on an all-electric basis for all time to come. It is not known whether the policy is receiving consideration because of the alleged superiority of the electric machine or because the gasoline machines and the fuel they require are needed for the army.

The city has splendid facilities for supplying electric current, so that the zone of electric vehicle operation could, if necessary, be extended at least twelve miles beyond the city boundaries by establishing charging stations at railway terminals, in garages and at other chosen points and by persuading the Austrian vehicle makers to adopt a standard type and size of battery so that batteries could be exchanged.

NEW MOTOR CAR ATTACHMENT

Steel Rack Can Be Used to Hold Tires or Carry Grain, Baggage or Other Articles.

A new motor car attachment having many uses is a combination tire holder and rack on which baggage, milk cans, sacked grain, etc., can be carried. It consists of a steel frame that is attached by two arms to the rear of the chassis and by two adjustable braces to the members that support the car's top at the rear. The tire holders are situated on the under side of the rack, and when the latter is not in use the entire attachment folds up against the body, bringing the tires into an almost vertical position.—Popular Mechanics Magazine.



Rack and Tire Holder.

DIM HEADLIGHT WHILE IDLE

Waste of Current Drawn Direct From Battery and Wasteful Use of Lamps—Glare Not Pleasant.

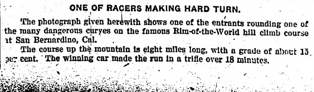
Wear and tear on the storage battery of a car is too much of an item to be ignored, and everything that tends to keep it down is worthy of consideration. One very good thing not to do is to leave the headlights burning at full intensity when the car is standing. Not only is it a waste of current, which is drawn direct from the battery, and a waste of the life of the lamps, but the glare is apt to have an unpleasant effect upon the eyes of people forced to face it.

DON'T NEGLECT SPRING CLIPS

Especially on New Cars They Should Be Tightened at Least Once Each Week—Metal Stretches.

The spring clips are, in nine out of ten cases, neglected car parts. Especially on new cars the clips should be tightened once each week for about ten weeks, as the metal stretches slightly when in use. It is well to inspect the clips once each month on old cars and take up as much as possible on the holding nuts.

FAMOUS RIM-OF-THE-WORLD HILL CLIMB



ONE OF RACERS MAKING HARD TURN.

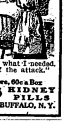
The photograph given herewith shows one of the entrants rounding one of the many dangerous curves on the famous Rim-of-the-World hill climb course at San Bernardino, Cal.

The course up the mountain is eight miles long, with a grade of about 15 per cent. The winning car made the run in a trifle over 18 minutes.

Back Given Out?

Housework is too hard for a woman who is half sick, nervous and always tired. But it keeps piling up, and gives weak kidneys no time to recover. If your back is lame and achy and your kidneys irregular; if you have "blue spells," sick headaches, nervousness, dizziness and rheumatic pains, use Doan's Kidney Pills. They have done wonders for thousands of worn out women.

A Minnesota Case



"Every Picture Tells a Story"

Mrs. Geo. P. Gillette, S. Main St., Zumbrota, Minn., says: "Attacks of rheumatic pains would come on and I would be laid up as long as six weeks at a time. My fingers became swollen and stiff and sometimes I couldn't hold a plate in my hand. I couldn't even fasten my dress, but had to have it done for me. My kidneys didn't act right at all. Doan's Kidney Pills proved to be just what I needed. Six boxes cured me of the attack."

Juice of Lemons! How to Make Skin White and Beautiful

At the cost of a small jar of ordinary cold cream one can prepare a full quarter pint of the most wonderful lemon skin softener and complexion beautifier, by squeezing the juice of two fresh lemons into a bottle containing three ounces of orchard white. Care should be taken to strain the juice through a fine cloth so no lemon pulp gets in, then this lotion will keep fresh for months. Every woman knows that lemon juice is used to bleach and remove such blemishes as sallowness, freckles and tan and is the ideal skin softener, smoothener and beautifier.

Just try it! Get three ounces of orchard white at any pharmacy and two lemons from the grocer and make up a quarter pint of this sweetly fragrant lemon lotion and massage it daily into the face, neck, arms and hands. It naturally should help to soften, freshen, bleach and bring out the roses and beauty of any skin. It is wonderful to smoothen rough, red hands. Adv.

Feed the Fighters! Win the War!!

Harvest the Crops — Save the Yields

On the battle fields of France and Flanders, the United States boys and the Canadian boys are fighting side by side to win for the World the freedom that Prussianism would destroy. While doing this they must be fed and every ounce of muscle that can be requisitioned must go into use to save this year's crop. A short harvest period requires the combined forces of the two countries in team work, such as the soldier boys in France and Flanders are demonstrating.

The Combined Fighters in France and Flanders and the Combined Harvesters in America WILL Bring the Allied Victory Nearer.

A reciprocal arrangement for the use of farm workers has been perfected between the Department of the Interior of Canada and the Departments of Labor and Agriculture of the United States, under which it is proposed to permit the harvesters that are now engaged in the wheat fields of Oklahoma, Kansas, Iowa, North Dakota, South Dakota, Nebraska, Minnesota and Wisconsin to move over into Canada, with the privilege of later returning to the United States, when the crops in the United States have been conserved, and help to save the enormous crops in Canada which by that time will be ready for harvesting.

HELP YOUR CANADIAN NEIGHBOURS WHEN YOUR OWN CROP IS HARVESTED!!!

Canada Wants 40,000 Harvest Hands to Take Care of its 13,000,000 ACRE WHEAT FIELD.

One cent a mile railway fare from the International boundary line to destination and the same rate returning to the International Boundary.

High Wages, Good Board, Comfortable Lodgings.

An Identification Card issued at the boundary by a Canadian Immigration Officer will guarantee no trouble in returning to the United States.

AS SOON AS YOUR OWN HARVEST IS SAVED, move northward and assist your Canadian neighbour in harvesting his; in this way do your bit in helping "Win the War". For particulars as to routes, identification cards and place where employment may be had, apply to Superintendent of Immigration, Ottawa, Canada, or to

IMPRESSIVE IN HIS SPEECH

Old Soldier Endeavored to Make Vocabulary Fit the Responsibilities of His Position.

An old soldier was for a long time curator of a certain public educational institution. In accordance with the duties of his responsible position it sometimes fell to his lot to remind the students of forgotten regulations.

"Gentlemen," he shouted, on one occasion, when a game of leapfrog was going on in a somewhat shaky gallery, "why this violent disturbance?"

"Well," was the reply, "what business is it of yours?"

"Gentlemen," he responded, indignantly, displaying his full height, "do you know that I am placed here by the governors of this college to conserve this building?"

At another time the prank was played upon him of being simultaneously summoned by two students from different ends of the corridor.

"Gentlemen," he cried out, "I really cannot be uniquitous!"

On another occasion, after heavy rains, there was dire disaster of malodorous flood in the cellars.

"Sir," reported Thomas, to the principal, "the rain has permeated the soil and has resuscitated all the drains to overflowing!"

He who advertises for a wife may get what he advertised for, but he seldom gets what he wants.

Philosophers are men who imagine that they have ceased to be fools.

I'm glad there's such a big corn crop—says
Bobby
MORE
POST TOASTIES
FOR ME!

Most people have a spice of goodness in them, but not all try to cultivate it.

WOMEN! IT IS MAGIC! LIFT OUT ANY CORN

Apply a few drops then lift corns or calluses off with fingers—no pain.

Just think! You can lift off any corn or callus without pain or soreness.

A Cincinnati man discovered this ether compound and named it freezone. Any druggist will sell a tiny bottle of freezone, like here shown, for very little cost. You apply a few drops directly upon a tender corn or callus. Instantly the soreness disappears, then shortly you will find the corn or callus so loose that you can lift it right off.

Freezone is wonderful. It dries instantly. It doesn't eat away the corn or callus, but shrivels it up without even irritating the surrounding skin.

Hard, soft or corns between the toes, as well as painful calluses, lift right off. There is no pain before or afterwards. If your druggist hasn't freezone, tell him to order a small bottle for you from his wholesale drug house.—adv.

Milk an Economical Food.

Milk is a fairly economical food as prices now stand. It contains no refuse and the food nutrients it furnishes are completely digested. However, the amount of water in proportion to nutrients is large. Even at a high price per quart, milk should be used as a staple article of diet.

The man who ridicules the ancestors of other people evidently considers himself the fruit of a special creation.

The man who earns the money isn't always the one who gets it.

DADDY'S EVENING FAIRY TALE

BY MARY GRAHAM BONNER

PARROTS.

"Now, Mr. and Mrs. Parrot," said Daddy, "are used to the tops of trees where they drink. They will shake off the moisture and drops of rain water and have a fine drink very often.

"Do You, Indeed?" Asked Mrs. Yellow Winged.

"After it rains they always go to the tops of the trees and many times when it hasn't rained they go up hoping it will.

"They will also shake the leaves on themselves and not only drink, but bathe at the same time.

"Mrs. Red Winged Parrot was talking to Mrs. Yellow Winged Parrot. They had been so named because one had more red wing feathers than any other color, and the other more yellow.

"'You know, my dear,' said Mrs. Red Winged, 'I do think some folks are very absurd.'

"'Do you, indeed?' asked Mrs. Yellow Winged, in her most polite squawk.

"'I don't wonder you want to know if I really do think so,' said Mrs. Red Winged. She didn't at all mind it that her companion doubted her word.

"'Yes, I want to know very much,' said Mrs. Yellow Winged.

"'It's so nice of you to take an interest,' shrieked Mrs. Red Winged.

"'Do go on with your story,' pleaded Mrs. Yellow Winged.

"'Of course,' continued Mrs. Red Winged, 'it would not be surprising if you wondered if I really and truly meant what I said, for so often we parrots get into the shocking habit of copying what anyone may say. We don't stop to consider at all whether we mean it or not. We just say it, and so we have gained the reputation of just talking without a great deal of sense—copying others who don't say such sensible things to us always.'

"'True, true,' said Mrs. Yellow Winged. 'But as you do mean what you just said, I am anxious to know why you think some folks are so absurd.'

"'For this reason, my dear. You see a great many people take baths at one time, and then, at quite another time altogether, they take their drinks of water. They don't save time as we do, and yet they are always rushing around as if they were trying to catch up with the time that they have lost.'

"'What you say is absolutely correct,' shrieked Mrs. Yellow Winged, shaking her head wisely.

"'Now we parrots can drink and have our baths at the same time. We can open our beaks for the drops of water to refresh us, and we can shake our feathers and get fine and clean.'

"'So we can,' said Mrs. Yellow Winged. 'There is certainly no mistake about that.'

"'Now, you take our cousins who live in people's houses,' said Mrs. Red Winged, 'they never get over that sensible idea and habit of ours. They may hear the rain on a tin roof and they spread their wings all in readiness to get their bath. Of course the tin roof keeps the water from falling in—which I think is most extremely stupid, but at the same time I must say that it is pretty smart of our dear cousins never to forget the ways of parrots who are wild.'

"'Isn't it splendid of them!' said Mrs. Yellow Winged, proudly.

"'And they do the same thing when they are kept in bird houses and hear the rain pattering on the glass,' said Mrs. Red Winged.

"'So they do, the sensible dears,' said Mrs. Yellow Winged.

"'Ah, yes,' said Mrs. Red Winged, 'for all the foolishness that people teach us, at least we don't forget our own ways and habits, no matter where we may be.'

"'No,' said Mrs. Yellow Winged. 'And now I must be getting my supper ready. Do you eat twice a day, Mrs. Red Winged?'

"'Yes, we have breakfast and supper.'

"'Ah, parrots are very much alike and if they want to they can copy people—but still we always stick to our fondness for catching the rain water before it all goes to the ground—catching it for our baths and drinks and saving valuable parrot time!'

They Spread Their Wings All Out.

"And as Mrs. Yellow Winged and Mrs. Red Winged were getting their suppers ready, far away in a glass birdhouse the parrots were spreading their wings as rain was falling on the roof."

Simply Exposed to It.

"I am delighted to meet you," said the father of the college student, shaking hands warmly with the professor. "My son took algebra from you last year, you know."

"Pardon me," said the professor, "he was exposed to it, but he did not take it."—Christian Register.

Canadian Farmers Profit From Wheat

160 ACRE FARMS IN WESTERN CANADA FREE

The war's devastation of European crops has caused an unusual demand for grain from the American Continent. The people of the world must be fed and wheat near $2 a bushel offers great profits to the farmer. Canada's invitation is therefore especially attractive. She wants settlers to make money and happy, prosperous homes for themselves by helping her raise immense wheat crops.

You can get a Homestead of 160 acres FREE and other lands at remarkably low prices. During many years Canadian wheat fields have averaged 20 bushels to the acre many yields as high as 45 bushels to the acre. Wonderful crops also of **Oats, Barley and Flax.**

Mixed farming as profitable an industry as grain raising. The excellent grasses full of nutrition are the only food required for beef or dairy purposes. Good schools, churches, markets convenient, climate excellent.

There is an extra demand for farm labor to replace the many young men who have volunteered for the war. The Government is urging farmers to put extra acreage in grain. Write for literature and particulars as to reduced railway rates to Supt. of Immigration, Ottawa, Canada, or

MARINES ALWAYS FIRST IN FIGHT

They Go Everywhere by Land or Sea in Defense of the American Flag.

MOTTO: "ALWAYS FAITHFUL"

The Recruit Entering Service Today Is Paid $30 a Month and the Opportunities for Advancement Are Numerous.

By EDWARD B. CLARK.

Washington.—"First in the Fight" is the war-time slogan of the United States marines, while "Semper Fidelis," "Always Faithful," is their motto in peace and war.

So it would seem that if good works, coupled with faith, secure a man's salvation, there must be some reason as well as rhyme in the last four lines of the Marine corps hymn:

If the Army and the Navy
Ever look on Heaven's scenes,
They will find the streets are guarded by
The United States Marines.

Recently Uncle Sam has ordered an increase in the number of his marines to a war strength of 30,000 men, which numerically means 4,000 more men than there are in a division of troops of the United States army. There is room in the marines, therefore, for any stalwart young American between the ages of eighteen and thirty-five who wishes to be a soldier and a sailor in one, to be first in the fight, and to be able to prove that he is always faithful to the ideals of humanity and the ideals of his country. In the present war the American belief is that the two are one.

When congress recently increased the pay of the army it also increased the pay of the navy and of the Marine corps. The recruit today who enters the Marine corps will receive $30 a month pay, an increase of $15 over the pay in the more or less piping times of peace. More than this, if he goes to sea, which unquestionably will be his lot, he will receive 20 per cent additional, and it is generally accounted that in this war time the 20 per cent increase will be continued while the marine is on land in a foreign country holding up his end for the United States.

What is the marine? This is one of the questions in a little catechism issued by the officials of the corps. The answer is that the marine is a soldier of the sea:

A Two-Fisted Fighter.

The marine is a soldier and a sailor, and yet he is neither. He is a sort of a two-fisted fighting rover. He goes everywhere by land or by sea to the last outpost of civilization and beyond if it is necessary for the service of protection of the American flag and of the upholding of the rights of American people.

The Marine corps is curious in a way in its formation. It has more men in its ranks than an army division, and yet in a way its organization is that of a regiment, although it has a major general commandant and several brigadier generals. Then, like the army, it has its colonels, its lieutenant colonels, its majors, and its captains.

The Marine corps, big as it is, with its 30,000 men in war time, keeps a peculiar organization, because its fighters necessarily are divided into comparatively small detachments.

Under the command of Colonel Doyen of the Marine corps 2,000 soldiers of the sea soon will be in the trenches in France. These men, it has been announced, were added to the preliminary force which it is intended to send into France because the government recognized the right of marines to live up to the meaning of their war time slogan, "First in the Fight."

Men Needed for Marines.

The United States government wants men for its Marine corps. It hopes that it will not be necessary to draw from the ranks of the selective service army the men needed to complete the complement of the soldier-sailor organization. It wants volunteers. The attractions of service in the marines are many. There are chances, and good ones, for the enlisted men to be recommended for a student course at Annapolis, there to be educated and trained and upon graduation to receive a commission either in the Marine corps or in the navy. The law also provides for the promotion of noncommissioned officers to warrant rank in the grades of marine gunners and quartermaster's clerk. Such officers receive from $1,125 to $2,500 a year, and are entitled to the same privileges of retirement as warrant officers in the navy.

There is a chance for marines to make money in addition to their pay. Mess stewards, mess sergeants, mess men, clerks, and men assigned to aviation duty receive amounts varying from $7.50 to $15 per month in addition to their base pay. There are provisions for increased pay for men who qualify as expert riflemen, as marksmen and as sharpshooters.

The Marine corps is the oldest army service of the United States, having been organized before the army and the navy. Every man who enters it is given his food, his clothing, his lodging, and his medical attendance.

The country needs volunteer marines for a service that is First at the Front and Always Faithful.

ABOUT THE STATE

News of Especial Interest to Minnesota Readers.

GATHERED FROM ALL SECTIONS

Happenings of the Week Briefly Told for the Convenience of the Busy Reader.

R. M. Russell, St. Paul painter, was killed in an elevator accident.

St. Paul policemen have formed a union with a charter membership of 125.

Lightning burned the Wild Rice church, one of the largest edifices in Norman county.

Dr. K. S. Kavanaugh, widely known woman physician, is dead at Minneapolis, aged sixty-three.

Total fire losses in Minnesota for July, 1917, were $384,559, compared with $274,443 for July, 1916.

Thomas Barten, a veteran of the Civil war, is dead at the Soldiers' home. He was seventy-two years of age.

Secretary Lane has authorized the establishment of a new mining experiment station at the University of Minnesota.

Mrs. Elizabeth Simpson, sixty years old, the wealthiest woman in Winona, is dead at Glenn Morris inn, Lake Christmas, near Minneapolis.

Peter R. Pampusch of St. Paul, delegate to the International Typographical convention at Colorado Springs, Colo., died suddenly in the latter city.

Peter F. Jurgensen, aged sixty-six, for thirty-five years a resident of Minneapolis and one of the stockholders of the St. Anthony Falls bank, is dead.

Charles H. Peery, Minneapolis pioneer and veteran of the Civil and Indian wars, is dead at Minneapolis. He had been a resident of Minnesota since 1861.

United States government war orders just booked will necessitate a material enlargement of the plant of the Minneapolis Steel and Machinery company.

All future trading in wheat on the Minneapolis chamber of commerce has been ordered stopped on Sept. 1 by Herbert C. Hoover, national food administrator.

That women are taking the places of men in the Northern Minnesota lumber camps was disclosed in a report just received by Labor Commissioner Houk.

John T. Wells, clerk of court of Wilkin county for twenty years, is dead at Breckenridge. He as a member of the Elks, Knights of Pythias and Masonic orders.

Miss Catherine A. Gillespie, ninety-two years old, a resident of Hennepin county for more than sixty-four years, is dead at her home in Minneapolis after a long illness.

The First Minnesota field artillery, to be known as the One Hundred Fifty-first artillery, is one of the units ordered to France with the first division of state troops.

C. D. Hayes, fifty-one years old, a pioneer resident of Minneapolis and for many years connected with the Minneapolis lumber trade, is dead following an operation.

Forty thousand persons participated in a patriotic demonstration at Minneapolis, arranged to answer pro-German activities throughout the state and New Ulm in particular.

Captain J. T. Rose, seventy-one years old, one of the best known vessel agents at the American Head of the Lakes and a member of the Duluth board of trade, is dead at Duluth.

Allen S. Broms, a St. Paul Socialist, is held in the Meeker county jail without bail on a charge of making seditious utterances at a meeting at Lake Manuela, ten miles from Litchfield.

Designation of Saturday, Sept 1, as dedication day, on which Minnesota will honor men chosen for the national army, is announced from the offices of the state public safety commission.

Uncle Sabin Rogers, residing near Anoka, a pioneer of Minnesota, cradled an acre of grain, tied and shocked it, all by the old hand method, in one day recently. He is seventy-six years of age.

James Crays, seventy-five years old, pioneer Minneapolis business man, is dead in the Mill City. During the Civil war Mr. Crays was captain of Company A, One Hundred Fifth Ohio infantry.

T. B. Rogers, seriously injured in a gasoline explosion at his home in Minneapolis, crawled to the second floor of the house after attempting to extinguish the flames, and rescued his wife and four children.

Captain Clark Keysor, ninety-one old, is dead at his home in Mankato. He was an officer in the Tenth Minnesota during the Civil war and was a member of the Mankato board of education for several years.

Henry Zaender, a German farmer living at Albert Lea, was arrested charged with insulting the American flag. He pleaded guilty to the charge and was sentenced to ninety days in jail, without option of a fine.

Arthur Benson, an attorney of St. Cloud, has been graduated from the aviation training camp at Columbus, O., with the highest honors. He has been ordered to New York and will sail for France soon to complete his training.

Pierre Schott, a St. Paul truck driver, turned his truck into a barn to avoid hitting a child who stepped directly in the path of the machine and is in the St. Paul city hospital with a broken leg as a result of his heroism.

Declaring that bloodshed and loss of life would result from continuance of anti-American demonstrations Governor Burnquist has announced that no more anti-draft and other like protest meetings will be permitted in Minnesota.

Enraged over the stabbing of a soldier by an alleged I. W. W. after the guardsman resented derogatory remarks about the government, members of the Third Minnesota regiment raided and demolished I. W. W. headquarters at Duluth.

William S. Conrad, president and general manager of the W. S. Conrad company of St. Paul, cigar importers and jobbers, is dead at his home in Stillwater. He was seventy-two years old and his health had been failing for the past year.

Minneapolis is $9,700,000 richer than a year ago, City Assessor G. L. Fort announced, following the completion of the annual city assessment by his office. The assessed valuation of all real and personal property in the city is estimated at $216,000,000.

Hibbing, the world's richest village, has begun negotiations for eighty acres of state land on which to erect municipal gas and garbage incinerator plants and public gardens and nursery, and also to include a site for a new municipal electric plant.

The state public safety commission, following a recent report by a committee sent to International Falls to make an investigation, has recommended that abatement proceedings be begun against fourteen alleged disorderly houses in Koochiching county.

F. W. and Charles H. Orth of Morton, who own an eighty-acre farm, sold eight cars of live stock at South St. Paul that brought $23,000. The check they received for the lot is said to be the largest ever issued on the South St. Paul market for a single shipment.

Walter J. Smith, former state treasurer, after serving about eighteen months of an indeterminate sentence for misappropriation of state trust funds, has left Stillwater prison under a temporary parole to go to a hospital for treatment for incipient pulmonary tuberculosis.

Ralph O. Van Lear, son of Mayor Thomas Van Lear of Minneapolis, has filed an exemption claim specifying that he is a member of the Socialist party, an "organization opposed to war," but deletes the word "religious." His claim was turned down and he was certified for service.

Gas poisoning killed Martin Nelson, aged seventy-five, found dead by neighbors at his home in Minneapolis. Coroner Seashore said he believed the case accidental, a jet feeding a gasplate being found partly open. Mr. Nelson had been dead two days before his body was discovered.

In a friendly scuffle with his cousin, Christian Estebo, Carl J. Monson, twenty-five years old, of Leon township, Goodhue county, suffered a broken neck and died. After investigation the coroner held the affair to be purely accidental and Estebo, who had surrendered to the authorities, was released.

Major Oliver J. Quane of St. Peter has been returned to the Second Minnesota infantry and Major Alfred C. Page of Austin, commissioned to succeed him, is automatically discharged through an odd tangle resulting from delay in official recognition for the new Second Minnesota field artillery regiment.

Alfred Jaques, United States district attorney, has issued a warning to Minnesota investors that they survey carefully titles to any so called railroad lands of Oregon and California. Mr. Jaques says certain unscrupulous persons, claiming to be locators, are exploiting certain lands in those states which cannot be disposed of at present.

Minnesota's drafted men must be ready to enter active military service as required by the government in installments of 30 per cent of the force on Sept. 5, 15 and 30, and the remaining 10 per cent soon afterward. This announcement was made by Adjutant General Fred B. Wood, state draft chief, following instructions from Provost Marshal General E. H. Crowder.

Red Cross Meeting.

A Red Cross meeting was held in the old school house Tuesday evening for the purpose of perfecting a permanent branch Chapter of the American Red Cross Chapter of Pennington County.

The following permanent officers were elected:

Morgan Vaughan, Chairman.
A. O. Halvorson Vice-Chairman.
M. J. Stephenson, Secretary.
H. B. Rockne, Treasurer.

The regular meeting nights were set for the last Wednesday in each month. The next meeting will be held next Wednesday evening. All are earnestly requested to attend.

School To Commence Monday.

The local school will commence Monday after being closed for the summer vacation. Although the fixing up of the school house is not yet finished it was thought that some of the rooms could be used as it is getting late. Pupils are asked to be on time. You have had a long vacation and should be in readiness to take up your school work with renewed vigor.

Program at The Grand Theatre

The following is the program at the Grand Theatre Saturday and Sunday evenings:

The Strength of the Weak, The Recoil, and Little Grains of Rice. Come and see the show and then stay for dance.

The Trip To The Red Lake Agency.

Last Sunday the Goodridge base ball nine met defeat at the hands of the Red Lake Indians at the Red Lake Agency, by a score of 4 to 0. The game was a fast one from start to finish and the Goodridge team played the snappest game they ever played. The Indians have a very fast team, having defeated teams in larger towns by scores of 19 to 0, and it was thought that they would clean up Goodridge to a similar tune but however the boys held them down to four scores, two of which they got on errors.

Dutch pitched an excellent game and had the heavy Indian sluggers guessing. The rest of the team played great ball and gave Dutch excellent support.

Eight automobile loads accompanied the team, leaving here at six o'clock in the morning and arriving at the Agency about noon, in time to enjoy a picnic dinner on the banks of Lower Red Lake.

The day was ideal for such a trip and was enjoyed by all, very few having made the trip before.

The trip was made without any very serious mishaps, engine and tire trouble was experienced by nearly all, but these were easily overcome and so did not cause very much delay. The only serious trouble you might say was that Pat Brick lost the nipple of his little daughters milk bottle on the way home and had to rout out the store keeper at Trail to get another one after which however everything went along smoothly.

Star News.

Ole Strande and H. C. Iverson called on their friend S. J. Hole last Saturday.

Mrs. O. K. Lien visited with Mrs. Tollef Hovet Monday and vise versa Tuesday afternoons.

Stephen Jordahl of Highlanding was a transient caller in these tracts one day last week. Rumors have it that "Old Steve" is feeling the pulse of the farmers with a view to running for office next summer or fall. Well, what of it? we all him to be a man with a "punch."

Halvor Syverson finished his haying operations last Wednesday, having put up 97 solid loads. Johnson and Tolley of Kenmore, N. D. arrived Saturday at the Syverson farm with their baler and are turning out the "big bricks" at full blast.

Carl Ellertson built a chimney in Zakarias Hole's new residence Saturday.

Henry Sunsdahl called on H. C. Iverson Wednesday on business matters.

Mrs. Jennie Iverson assisteg with the haystacking at the "Sub Urban Ranch" Monday and Tuesday afternoon. Tot Alfred" acted as Mascot.

Halvor Syverson installed his new phone last week.

Theodore Sunsdahl returned from the "Big Dick" harvest and threshing fields last Thursday.

Rev. Hoyum of Reiner delivered a fine sermon to the S. E. Star congregation Sunday afternoon.

John Clausen was a caller at the C. L. Wayne home Monday night.

Nick Bundhund was a caller at the Aug. Ristau home Monday night.

Chas. Struble has rented the Hans Clausen farm.

Luther And America.

(Contributed by Rev. O. C. Schultz).

1917 is the year of the four hundredth anniversary of the Lutheran Church Reformation. Once more the world is preparing to review causes and effects of this remarkable event. In the form of histories, biographies, popular narratives, works of fiction, the Reformation has been told by hundredths of authors. It is interesting to note what some of the prominant Americans have had to say in regard to Luther and the Reformation of the seventeenth century.

"The Reformation—which, at first, was only a return to liberty in the order of religious affairs, became—also a return to liberty in the political system. The establishment of the republic of America is a corollary of the Reformation p. 75 and 76 (Prof. Charles Francois Dominigue de Villers)

"The Reformation of Luther laid the foundation of the Rights of Man in Society. The Revolution of 1776 finished the superstructure of Religious Liberty."—Thomas Smith Grmike, member Literary and Philosophical Society of South Carolina.)

Luther fought the battle of civil and religious liberty for us and all men.

There are strong grounds for our American respect for the great name of Luther.

As a nation, then, we haye ample reason to revere the memory of Luther. He was the Reformer of all the reformers of his century. Without him they had not been. He has been our heroic Protestant as fully as if he had been born on our shores."—(Editor Buckley, N. Y. "Christian Adv.)

"No country has more reason than this Republic to recall with joy the blessings Luther assisted to secure for the world."—Hon. John Jay N. Y. Nov. 13, 1883.

"Luther can be regarded as the author of the civil liberty that is enjoyed today."—(Associate Justice Strong.)

"One consequence (of the Reformation) was an increase of civil and religious liberty in Europe."—(President Eliot of Harvard Feb. 7, 1915.)

"The Reformation of Luther introduced the principal of civil liberty into the wilderness of North America.' (Daniel Webster, at Bunker Hill June 17, 1842.)

"Our civil liberty is the result of the open Bible which Luther gave us."—(Henry Ward Beecher)

"Martin Luther," the majestic character who conceived the emancipation of conscience."

That the principles of Martin Luther are the fundamental principals of our American Republic there can be no question.

The life of Luther is one for which we find no parallel in any history."—Treadwell)

"Our Constitution still reads:

Congress shall make no law respecting an establishment of religion or prohibiting the free exercise thereof."

For this we must thank the Reformation.—Prof. Fr. Pieper D. D. President Concordia Theological Seminary St. Louis.)

So far the quotations. As a closing remark it can be stated that the Lutheran church is a typical American church. A Lutheran minister preached in America and died on American soil eight months before the Pilgrim Fathers landed on Plymouth Rock. Among the earliest settlers in a number of the thirteen states were Lutherans who furnished many Revolutionary soldiers, at least one eminant General, and the First Speaker of the House of Representatives. Historical Lutheranism is American, coming down from Colonial times. Americans are an amalgation of many nations, so is the Lutheran church, which today, while making the language of the country prominant preaches the Gospel of Jesus Christ in the land of Washington in at least 17 languages.

FRANCE RENEWS HER DEMANDS

No Peace Until Alsace-Lorraine is Restored to Republic, is Declaration Made.

STAND TAKEN IS FIRM

Proposal of Germany to Make Territory Independent Duchy Decried in Poincare Message Replying to Protest.

Washington, Sept. 19. — France's unalterable determination to restore Alsace-Lorraine to the republic was reiterated in a cablegram received here from President Poincare by Daniel Blumenthal, former Alsatian deputy to the German Reichstag, who recently came to this country at the instance of the French government to lay the Alsatian situation before President Wilson. The message said:

"The government of the republic firmly is resolved to obtain for Alsace-Lorraine her return to the French fatherland—a restitution fully justified by the sufferings endured for 46 years and the heroic sacrifices of her sons who have died gloriously for the cause of liberty."

President Poincare cabled in response to a protest of Alsatians in Hoboken, N. J., against the German proposal to make Alsace-Lorraine an independent duchy.

British Seaplanes Hit Teuton Base.

London, Sept. 19.—British seaplanes have struck an effective blow against Germany's naval base on the Belgian coast, the admiralty announces. The raiders dropped bombs promiscuously upon a fleet of Teuton destroyers and trawlers.

"One large destroyer was hit amidships and one, probably two, of a group of four trawlers was sunk," the statement says.

"On the same night British and German seaplane clashed on patrol cruises. One of the German machines was shot down in flames. Shortly afterward another German aircraft was 'bagged.'"

Italians Repulse Austro-Hungarians.

No spectacular operation on a large scale is reported in the official communications from belligerent capitals. On the Bainsizza plateau, northeast of Gorizia, the Italians have repulsed successfully four determined attacks by the Austro-Hungarians and captured 73 prisoners. Increased artillery activity is reported from the Carnia sector, northwest of the Isonzo fighting zone.

Field Marshal Haig's campaign of attrition during the breathing spells between major operations continues in raids at three points between Arras and St. Quentin the British entered the German trenches, inflicted casualties and destroyed mortar emplacements and ammunition dumps.

$2,000,000 IN LUMBER BURNS

Fire Sweeps Yards of Big Lumber Company.

Minneapolis, Sept. 19.—Fire, believed of incendiary origin, has destroyed 70,000,000 feet of lumber in the yards of the Red River Lumber company at Westwood, Cal. The Red River company has headquarters in Minneapolis. T. B. Walker is president.

The loss is estimated at $2,000,000. About 20,000,000 feet of lumber were saved. The Red River company is the largest in Lassen county, California. An investigation of the cause of the fire is already under way.

The Minneapolis office received telegrams bearing the news of the fire. According to A. D. Walker, secretary of the company, the loss is well covered by insurance.

LIBERTY LOAN FILM SHOWN

U. S. Picture Given First Rresentation in Gotham.

New York, Sept. 19. — The Liberty Loan film, "Three Billion Dollars in Four Weeks," produced by the Liberty Loan committee of this Federal Reserve district, received its first presentation here. President Wilson, Secretary of the Treasury McAdoo, Thos. A. Edison and other men in public life, are shown. Among the actors are De Wolf Hopper, Wilton Lackaye, David Warfield, John Drew, Ethel Barrymore, Billie Burke, Mary Pickford, Lillian Russell and Nance O'Neil.

No Need for Alarm, Says McAdoo.

Washington, Sept. 19.—Secretary McAdoo told a delegation of Southern congressmen there was no need for alarm over the prospective withdrawal of $110,000,000 of British funds now invested in cotton and farm lands. The government probably will ask Great Britain not to call for the money at the maturity of the loans now approaching.

German Plotters in Philippines.

Washington, Sept. 18.—That German intrigue has stretched out its talons into the Philippine islands and sought to create insurrection there is learned by the United States. Conrad Andre, German vice-consul for Cebu and other islands, was detained on a charge of trying to create a "disturbance," which was in reality an insurrection. Taken to Manila to escape an angry mob, Andre was held there for some time and then released for want of positive evidence, though he is still under careful government watch.

PRESIDENT LEADS NATIONAL ARMY MEN

© HARRIS & EWING

President Wilson marching at the head of the parade which was staged in Washington as a tribute to the first members of the National army.

COAST STRIKE COSTLY

$150,000,000 OF U. S. WORK IS TIED UP.

$4,000 Men in Shipbuilding Industry On Pacific Coast Out—Government May Take Hand.

San Francisco, Sept. 19.—This city is in the midst of the most serious strike in the history of the Pacific coast.

Following the walkout of 24,000 members of unions affiliated with the Iron Workers' Trade council, which tied up every shipbuilding plant in the San Francisco bay cities, 10,000 shipyard workers went on strike in Oakland and Alameda. Employes of the Standard Oil company in Richmond were also reported to be on the verge of a strike. This was denied by local Standard Oil officials.

Government contracts involving expenditure of $150,000,000 are completely tied up by the strike. As a result, direct intervention by the government is momentarily expected.

The strike spread to shops where machinists were employed. Laundry workers in 31 places walked out, sixty moulding plants were tied up, 12 boiler and garment factories partly suspended operation, and machinists in automobile shops quit, according to reports from strike headquarters.

Other Yards Affected.

Portland, Ore., Sept. 18. — Partial cessation of work in wood ship yards at Vancouver, Wash.; St. Helens, Ore., and Astoria, Ore., was reported as a result of the strike of approximate 2,000 union men for the closed shop.

ADVICE TO COAL CONSUMERS

Controller Garfield Cautions Against Getting Panicky.

Washington, Sept. 18.—Dr. Harry A. Garfield, national coal administrator, has given out this advice to coal consumers:

Don't get panicky.

Buy the coal needed for immediate use.

Prices will not go up.

As to whether prices will come down in any specific community I cannot say because I do not know the prices and conditions there prevailing. I do know this, President Wilson expects the price of coal generally to come down; I expect it to come down; the consumers believe it should come down and I feel sure they will do their part. Between us all I believe that the prices will come down.

GOMPERS WARNS UNION LABOR

Must Not Cripple U. S. in War Crisis, He Says.

Washington, Sept. 18.—Warning that organized labor must not take advantage of the present crisis to abuse its powers, was sounded by President Samuel Gompers of the American Federation of Labor at a meeting of federal employes unions.

Lack of wisdom in directing its forces might result in the collapse of the great labor structure, Gompers said, "just as the great military Prussia must fall and as the czar already has been tumbled from his throne."

Miss Jeanette Rankin, member of Congress from Montana, and Frank Morrison, secretary of the American Federation of Labor, also addressed the convention.

May Seize Northwest Wheat, Is Report.

Washington, Sept. 17.—That President Wilson is prepared to commandeer wheat held up by farmers of the Northwest was the statement of Representative Baer, North Dakota, based, he said, on a talk with Herbert Hoover. At Hoover's office confirmation of this was lacking. Baer said Hoover told him the action of farmers holding up wheat until operations of mills is threatened is "disloyal" and "the President will use his war powers to commandeer grain if the farmers continue to take that stand."

SWEDEN TO PUT MATTERS RIGHT

Foreign Office Pledges Itself to Settle Problem Disclosed by Exposure.

STOPS GERMAN NOTES

Swedish Government Had No Idea of Their Contents or They Never Would Have Been Transmitted, Minister Declares.

Stockholm, Sept. 18.—Foreign Minister Lindman has stated to the Associated Press that Sweden expects to take steps to put matters right, realizing the seriousness of the situation created by the recent disclosures at Washington regarding the transmission of German dispatches.

All transmission of German dispatches has been stopped, he said, and Germany has been asked for an explanation of the abuse of the privilege formerly extended.

Points Brought Out.

In his talk with the correspondent Admiral Lindman brought out the following points:

First—That the Swedish government it not, as alleged in certain quarters, taking the affair lightly, but intends to do everything possible to settle the problem.

Second—That transmission of dispatches on behalf of Germany has been stopped absolutely and under no circumstances will be resumed.

Third—That had the Swedish government the slightest idea of the nature of the dispatches which the German government was transmitting, the messages would never have been transmitted.

Fourth—That strong representations have been addressed to the German government on the abuse made of this practice, accompanied by a request of explanation.

GERMAN EDITOR IS INTERNED

St. Paul Man Taken South to Remain During War.

St. Paul, Sept. 18.—Fritz Bergmeier, editor of the Die Volks Zeitung, St. Paul daily German paper, has been taken by federal officers to Fort Snelling from where, it was announced, he will be taken to McPherson, Ga., where he will be interned for the period of the war.

Bergmeier was arrested in St. Paul on August 9 under orders from President Wilson. He was arrested under the proclamation of April 6 which states that "no alien enemy shall write, print or publish any attacks or threats against the government of the United States."

SENATORS ATTACK WILSON

"Willful Few" Talk at Eulogies of Late Harry Lane of Oregon.

Washington, Sept. 18.—Bitter attacks on the press, and indirectly on President Wilson, by members of the "little group of willful men," denounced by the executive for defeating the armed ship bill in last congress, were the predominating features of the eulogies of the late Senator Harry Lane of Oregon in the senate chamber Sept. 16.

Illinois Politician is Accused.

Chicago, Sept. 18.—Francis A. Becker, member of the republican state central committee, under indictment in the twenty-first ward graft cases, was dubbed "generalissimo of vice" by State Attorney Maclay Hoyne, following astounding disclosures in documents seized in Hoyne's raids on Becker's office and home. The thousands of documents found in Becker's files, it is claimed, showed he reached a powerful hand into almost every branch of city government, police, schools, civil service, taxing bodies.

SOLONS TO GO ABROAD

CONGRESSMEN PLAN VISIT TO WESTERN BATTLE FRONT.

Delegation May Make Trip to War Zone If Congress Reaches Adjournment Next Month.

Washington Sept. 19.—If congress adjourns next month, several congressmen will visit Europe and the western battle front. Members already are planning a trip either with or without official status. Should some of the official invitations be accepted, some members plan to go in a body at their own expense, asking Speaker Clark to head the delegation.

Progress of the conference on the war tax bills slowed down as the more important disputes were approached. House conferees stood out strongly for retention of second class mail rate increases, and the senate members apparently were disposed to accept some provision for a postage increase. As a compromise the conferees considered the so called Hardwick plan, indorsed by the postoffice department, to increase rates on advertising portions only of newspapers and periodicals.

It was reliably stated that the conferees have definitely agreed to eliminate the house provision for a general 10 per cent tariff increase and to strike out the house section, estimated to raise $6,000,000 from inheritances.

TO LEARN TO USE LIQUID FIRE

American Troops See New War Horror Demonstrated.

New York, Sept. 17.—The American Army in France, Sept. 16.—Next in the catalogue of war horrors which American troops will see demonstrated is the use of liquid fire.

Arrangements have been completed for a view by the Sammies very soon of how the Allies have turned the Germans' weapons against the Germans after perfecting the unquenchable flames.

Members of the famous Canadian-American legion have arrived to instruct the Sammies in general fighting tactics.

WANTS INSURANCE LAW NOW

President Insists That Bill Be Enacted at Once.

Washington, Sept. 17.—Plans for adjourning Congress without Senate action on the soldiers' and sailors' insurance bill were much disarranged by an authoritative announcement that President Wilson would insist that the measure become law before Congress quits. There is strong sentiment in the Senate for closing up business and letting the bill wait for the December session. The question will be taken up with the President when he returns from his yachting trip.

RECORDS 10,000 ATROCITIES

Minister Gets Proof of Kaiser's Crimes in Europe.

New York, Sept. 18.—Ten thousand atrocities committed on a 300 mile front by the kaiser's soldiers have been recorded in photographs and refugees' testimony by trained men following in the wake of the German armies, according to Rev. Newell Dwight Hillis, delegated by the American Bankers' association to conduct an investigation of German outrages in eastern France.

German Bombs Found in Norway.

Christiania, Sept. 18.—Two big bombs of German manufacture have been found at Narvik, Northern Norway. They were wrapped in a Swedish newspaper dated August 4 and were enclosed in carrying bags made of canvas. The bombs are similar to those sent some time ago from Germany to Christiania and there found in possession of Baron Rautenfels, a German courier, and which, it was said were to be used in Finland. Rautenfels at one time had helpers operating at Narvik.

RUSSIA IS NOW NEW REPUBLIC

Declared So by Proclamation Issued by the Provisional Government.

KERENSKY IS PREMIER

Freedom of Fatherland Again Declared to Be in Great Danger—Chief Peril Now Seen in Cossacks' Revolt.

Petrograd, Sept. 18.—A Russian republic has been proclaimed—the provincial government under date of September 14 issued a proclamation declaring that to strengthen the organization of the state, a change to a republican form of government was necessary. The proclamation follows:

"General Korniloff's rebellion has been quelled, but great is the confusion caused thereby, and again great is the danger threatening the fate of the fatherland and its freedom.

"Holding it necessary to put an end to the external indefiniteness of the state's organization, remembering the unanimous and rapturous approval of the republican idea expressed at the Moscow state conference, the prosional government declares that the constitutional organization, according to which the Russian state is ruled, is a republican organization, and it hereby proclaims the Russian republic.

(Signed) "Minister and president,
Kerensky.
"Minister of justice, Yaroudni."

The title "minister and president" affixed to Premier Kerensky's signature to the proclamation probably refers to his position as president of the ministry, rather than of the republic.

Chef Aim Accomplished.

The plan of a Russian republic has been one of the chief aims of the radicals and the councils of Soldiers' and Workmen's delegates, and was given approval by the recent Russian congress at Moscow.

A cabinet of five members, including Premier Kerensky, has been named to take care of all matters of state. The only party men are Premier Kerensky and M. Nikitine, minister of posts and telegraphs, both of whom are Social Revolutionists.

Although the position of the Kerensky government appears to be improving, the action of the grand council of the Don Cossacks in refusing the surrender of General Kaledines, their hetman, is ominous. The leaders of the Cossacks is accused of complicity in the Korniloff revolt.

TIGHTENS BAN ON FOOD EXPORTS TO NEUTRALS

U. S. Board Issues List of Articles Requiring License for Shipment—Scandinavia Hard Hit.

Washington, Sept. 18.—A list of articles for which export licenses will be issued only when shipments will contribute to actual war purposes, has been issued by the exports administration board.

Scandinavian representatives here—particularly the Swedish—pleaded that the new prohibition on wheat export will bring their nations to the brink of starvation. The Swedish representatives declared their nation will be the first to feel the pinch of famine.

BIG POTATO CROP PREDICTED

Will Amount to 462,000,000 Bushels, Says Vrooman.

Washington, Sept. 18.—America's potato crop will be a vital factor in winning the war, according to Assistant Secretary of Agriculture Carl Vrooman. "The country will have at least 100,000,000 bushels of potatoes in excess of the 200,000,000 bushel crop last year," says Mr. Vrooman.

In order to properly conserve this supply and release other foods for military use, Mr. Vrooman declares potato warehouses must be made available in every county in the United States. The crop to be harvested, it was stated, will total 462,000,000 bushels.

NOT TO SEIZE CANNED FOOD

Denial of Report Believed Started by Enemies.

Washington, Sept. 18.—The untraceable rumor that the government intends to take canned and dried foods from homes has spread to such an extent that the Department of Agriculture today placed an explicit and official denial in the hands of every county agent with instructions to give it widest publicity.

The persistency of the rumor leads officials to believe its basis probably may be found in propaganda to hinder food conservation and thereby continue high prices.

Seven Die in Train Collision.

Aurora, Ill., Sept. 18.—Seven Iowa stock men have been killed in a rear end collision on the Burlington railroad near Earlville, Ill., 45 miles west of Aurora. Ten were injured. The men who were killed and most of those injured were in two sleeping cars and a way car attached to the rear of the stock train. The merchandise train plowed through. The identified dead are: W. D. Dixon, Hamilton; Otis McCauley, Kellerton; T. Bender, Fairfield; W. Foulks, Charton, and J. Walker, Milo.

A PHYSICAL WRECK

Laid Up In Bed, Barely Holding Onto Life. Doan's Effected Marvelous Recovery.

"Without warning I was dragged to the brink of the grave by malignant kidney trouble," says Robert Wengatz, 114 Cypress Ave., Bronx, N. Y. "My kidneys seemed to stop acting and the pains in my back were terrible. Big, bloaty puffs came under my eyes and attacks of dizziness often blinded me. My limbs swelled twice normal size and I could press big dents into the flesh.

Mr. Wengatz.

"I was confined to bed and had convulsions several times a day. Despite the best of treatment, I grew worse and was taken to the hospital. I didn't improve, however, and was brought home again, barely holding onto life.

"Toward the last of 1913, a friend persuaded me to try *Doan's Kidney Pills* and I cannot put into words what they did for me. The first box helped more than all the other medicines and treatments I had taken. I continued and from an emaciated wreck of a man I have taken on good, solid flesh until I now weigh 225 pounds and am in the best of health. *Doan's* alone deserve the credit."

Sworn to before me.

DOAN'S KIDNEY PILLS
FOSTER-MILBURN CO., BUFFALO, N. Y.

His Family Tree.

A pompous man meeting a Mr. Moore at a dinner party, began boasting about his ancestors, and said: "And pray, sir, whom are you descended from?"

"Oh," said his neighbor, "I am a lineal descendant of Noah."

"How do you make that out?" said the pompous man, somewhat taken aback.

"In this way," said Mr. Moore, smiling. "Noah had three sons, Shem, Ham, and, one more!"

CLEAR YOUR COMPLEXION

While You Sleep With Cuticura Soap and Ointment—Trial Free.

On retiring, gently smear the face with Cuticura Ointment, wash off in five minutes with Cuticura Soap and hot water, and continue bathing a few minutes with the Soap. The influence of this treatment on the pores extends through the night.

Free sample each by mail with Book. Address postcard, Cuticura, Dept. L, Boston. Sold everywhere.—Adv.

Would Give Him Exercise.

Former Congressman George R. Smith of Minneapolis is fond of hunting and takes great pride in the ownership of a costly setter dog of noble birth. One day an old man, who was acting as guide for the hunt, came near making a lifelong enemy of Smith by criticizing the dog's technique in the field.

"The dog's perfectly all right," declared Smith, indignantly. "I wouldn't trade him for any dog I ever saw, only he doesn't get quite enough exercise. I'm busy and have to keep him penned up a good deal. He ought to have more exercise and that would improve his hunting."

"Has he got any fleas?" inquired the old man.

"Should say not," replied Smith, insulted. "That dog has his bath every week the same as I hope you do."

"Why don't you give him a few fleas?"

"What do you mean, give him fleas? Why should I want a fine dog like him to have fleas?"

"Well," opined the guide, thoughtfully, "they'd give him exercise."—St. Louis Republic.

Her Position Assured.

He—Her social position is fully assured, isn't it?

She—Dear me, yes. She told me the other day confidentially that she had now got to the point where she could snub her best friends without injury.

The Lost Words.

"I shan't waste any words on you."

"If you use any at all on me you will."—Detroit Free Press.

A War Sea Story Abounding in Adventure and High Romance

Copyright A. C. McClurg & Co.

THERE COMES A TERRIBLE ACCIDENT—HOLLIS AND FERGUS M'CANN RESCUE THE MYSTERIOUS WOMAN FROM DROWNING AT NIGHT

Synopsis.—Robert Hollis, who tells the story, is a guest on Girard Carrington's yacht, Esmeralda. It is supposed to be a "stag" party, and Hollis is surprised on discovering a woman, who evidently wishes to remain unknown aboard. Hollis, the next night, succeeds in having an interview with the woman. She merely tells him her name is Vera. Carrington tells his guests of the coming war, and that he is engineering a copper pool.

CHAPTER IV.

—3—

The Wreck of the Esmeralda.

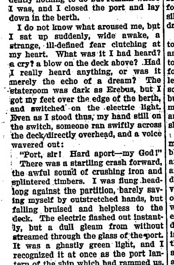
We passed the greater part of the day below, and long before night came, a heavy, sweeping rain set in and kept us there. I never recalled a more blinding, disagreeable storm at this season of the year, and in those waters, although there was very little wind or sea accompanying it. The smother, however, made it safer to proceed at half-speed, and the lookouts forward were doubled.

It seemed a long evening, as I was in no spirit for cards, and discussion was altogether about the war, and the projected copper pool. Carrington received several messages in further proof that the affair was already well under way, but he made no other attempt to arouse my interest. By ten thirty I had retired to my stateroom. Yet even there, and when partly disrobed, a temptation to explore the decks again assailed me. I unscrewed the port and glanced out, the cold rain driving hard against my face. Nothing could be seen; I stared into an impenetrable black wall. There was evidently nothing to do but remain where I was, and I closed the port and lay down in the berth.

I do not know what aroused me, but I sat up suddenly, wide awake, a strange, ill-defined fear clutching at my heart. What was it I had heard? a cry? a blow on the deck above? Had I really heard anything, or was it merely the echo of a dream? The stateroom was dark as Erebus, but I got my feet over the edge of the berth, and switched on the electric light. Even as I stood thus, my hand still on the switch, someone ran swiftly across the deck/directly overhead, and a voice wavered out:

"Port, sir! Hard aport—my God!"

There was a startling crash forward, the awful sound of crushing iron and splintered timbers. I was flung headlong against the partition, barely saving myself by outstretched hands, but falling bruised and helpless to the deck. The electric flashed out instantly, but a dull gleam from without streamed through the glass of the port. It was a ghastly green light, and I recognized it at once as the port lantern of the ship which had rammed us. Before I could get to my feet even, still dazed and trembling from the shock, the ghastly green radiance began to recede. Rage took the place of fear—the dirty murderer was backing off! was leaving us to sink! I clawed my way across the stateroom, seeking to gain view without, but could perceive little. The glass was dimmed with moisture, and through it I could see merely the circle of green light revealing the outline of a high bow. No other gleam was visible, but above me a man cursed hoarsely, and then screamed out some order, which I could not distinguish.



I Was Flung Headlong Against the Partition.

All this was the work of an instant. What had occurred was as clear to my mind as though I had actually witnessed the scene from the deck above. A great steel steamer, a tramp, no doubt, from its darkened decks, had plunged out of the blackness, and rammed her bow straight into us. The contact must have been well forward, near the bridge. We were going down by the head; already I could perceive the list, the deck underfoot was tilting; the engines had ceased to throb, as though the inflow of water had reached the boilers. Feet scrambled along the dack, overhead voices yelled, and I could hear the creaking of boat tackle.

Working desperately in the dark, scarcely able now to keep feet on the slanting planks, I hastily drew on what bits of clothing I could find at hand, and felt my way blindly to the door. It was jammed, but I kicked it open, and stumbled forth into the main cabin, clinging to the door frame in order to retain my feet. The stateroom doors stood wide open, but no living being was visible. All who survived that first shock must have fled to the deck in mad struggle to escape. Ay, and there was desperate need for me to join them. The Esmeralda was going down; already her forward hold was filled with water, the bulkheads alone keeping her afloat; once they gave way, she would sink like a stone.

I crossed the cabin on hands and knees, clawing my way desperately through the litter until I attained the stairs. These no longer led up, but forward. Beyond was utter blackness, silence; and through the shattered door drops of rain splashed.

It was not until I had made my way to the outer deck, and felt the night air and rain on my face, that I truly awoke to the danger. The tilt of the yacht forward was so sharp, I dare not release my grasp of the rail. I could scarcely see anything; not a light burned, not even a distant star glimmered; the driving rain blinded me, and soaked through my shirt to the skin.

I scarcely dared move, for to release my grip was to slide down into the black water, into the riffle of spars and ropes forward. It was all horror and death that way, but from aft, under the awning, a sound of excited voices reached my ears, and the rasp of boat tackle. No doubt all on board, who lived, were there, seeking to escape. They had sprung for the open deck at the first alarm, not even waiting to dress, and, if I would join them, there was not an instant to lose. The after bulkhead could not hold long; any moment, any unusual roll of the sea, would rend it asunder, and the Esmeralda would sink. Life hung on seconds; nor would those frightened wretches wait to learn the fate of any others on board.

Clinging to every projection of the cabin, I attained the port rail, but even as I attempted the first step, a voice called to me from out the black depths below, and I hung there, staring behind me, unable to perceive a thing, excepting a litter of tangled wreckage.

"Don't leave me! Give me a hand."

"Who are you?"

"McCann; you are Hollis, ain't you?"

"Yes; are you hurt?"

"No; bruised a bit, no doubt; my foot is caught under a spar."

"Alone?"

"The second mate fell with me; he's down below—dead, I guess."

It was no small job getting to him, using the slippery rail for a ladder, and I was knee deep in water when I finally found foothold in the riffle, and rolled the spar off the imprisoned limb. He was lying flat on the deck, his head barely free of the waves, but was able to clutch the nearest stanchion and haul himself up to the protection of the rail. His face was but a blurred outline, although I could perceive the glimmer of a white shirt. I stared beyond him into the black silence.

"You say Seeley is down there?"

"I fell on top of him," the words scarcely audible. "He was trying to get into the cabin, when he lost his grip. I tried to catch him, and he took me along. Say," he was breathing hard, "do you know if there was a girl on board?"

"Yes, there is. I met her night before last on deck. Did Seeley tell you where she was hidden?"

"In a storeroom, next to the steward's pantry; he said the door was locked."

Desperate as our own situation was, all thought of personal danger left me in a sudden realization of the awful horror fronting her, almost under our very feet. I gripped McCann by the arm.

"We must get her out of there," I cried. "Come on with me."

"Where? Down—down there?"

"Yes, of course; you are a man, I take it. The lantern is still burning, and we have a chance. Come now, wake up, McCann—we are Americans, and it is women first, you know."

If he was a coward, he had no wish to let it be known, although the suddenness of disaster had broken his nerve. The words spoken, the tone of my voice, touched his pride, his real manhood.

"Ah, you're right, Hollis," he said heartily, and the grip of his hand tightened. "I'm no seaman; I hate the sea, but no one ever called a McCann a quitter. I'll go as far as you, and we'll get that girl out, or drown together."

I was climbing the rail before he finished, reckless of all else except the task confronting us. The face of the girl whose hand I had held in mine under the light of the stars, seemed to rise before me, her eyes pleading for help. The vision urged me forward. I know not what strength or skill enabled me to swing from the rail and grip the cabin front, but I hung there with one hand, my feet finding slight support on the slippery slope of the deck, and reaching back, gave McCann support, while he also made desperate passage to the safety of the companion. An instant later I was beside him, and we crept together down the inverted stairs.

The frightfulness of our position became more evident as we advanced. The dead bodies, the smashed furniture, the horrid swaying of the hulk beneath us, suspended, we had to use the forward wall as a floor, crawling through the litter, made us feel that certain death must end the adventure. There was a hook in the deck below—for what purpose it had been placed there I do not know—but it gave me foothold, enabling me to kneel.

"Here, McCann, climb to my shoulders," I ordered, "and take down the lantern. Quick now; I'll hold you all right."

His face was ghastly, and he obeyed as though he moved in his sleep. Every muscle in me felt the strain, but I held him, straightening out my body, and balancing myself, until his uplifted hands gripped the light.

"Have you got it?"

"Yes; let me down slowly."

"All right; hang on to it for your life—now."

My arms gave under the strain, and a sudden surge of the sodden wreck, but he held to an end of the overturned piano, the light still burning feebly, threatening every instant to flicker out. I caught and steadied it, turning up the wick, and casting the faint glimmer along the passage leading to the steward's pantry.

I slipped down, gripping the lantern, the dim, smoky glow of which made the passage visible. The pantry door stood open; indeed, I doubt if it had a door, but everything else was closed. McCann was just above me, and I sung out to him to hold fast; then, the lantern wire gripped in my teeth, I lowered myself the full length of my arms. This brought the water to my knees, while the lodged chairs were a foot or two below. As I hung there, dreading the plunge, my eyes were directed opposite the pantry, and the gleam of the lantern glittered on the blade of a hatchet just inside the door. Never was a tool more welcome.

"Hold tight above there," I managed to ejaculate through closed lips.

"What are you going to do?"

"Swing in toward the door on the right—there is a hatchet lying there."

With feet braced against the opposite wall, I forced my way across, making three efforts before my fingers finally gripped the hatchet handle. Clinging with one hand, I thrust the tool into my belt, fully prepared now to let go.

CHAPTER V.

—

The Rescue of Vera.

"Take this lantern, McCann," I called, and held it up to him, "I'll need both my hands free. Hold it as low as possible. Now, here goes!'

I did not pray audibly, but a prayer was in my heart, as I released my grip on the rug and took the plunge. The first chair crumpled beneath my weight, but by good luck the second held just long enough to enable me to grip the latch of the door and cling tight. The slant of the deck gave one groping foot precarious purchase on the threshold, although water swept nearly to my waist, and for a moment I tottered there, helpless to do more than merely sustain my position. The noise made by this struggle must have been heard within, for I became aware of water splashing, and a fist pounded the door.

"Help! Is that you, Mr. Seeley?"

"No," I answered, nerved to new effort by the sound of her voice, and the knowledge that I had indeed located the right spot, and found her still alive. "This is Hollis. Is the door locked?"

"Yes, Mr. Seeley has the key; you must be quick—the water is already above my waist."

"No time for keys, then," I said. "Stand back until I cut a way in. Throw your light down, McCann—ay, that's better!"

The latch of the door was forward; I could cling to it, and have my right hand free with which to wield the hatchet, keeping both feet wedged on the threshold. The light was the merest glimmer, yet sufficient to reveal the paneling of the door, and I hacked at this fiercely, exerting the full strength of my arm. A dozen blows splintered the upper panel, and then I sent the keen blade crashing downward, gouging out great chunks and splinters until a jagged passage had been made, sufficiently large for the passage of a body. The water was deeper in the cabin than in the opening, drenching me nearly to the armpits. McCann called in warning, his voice cracked with a terror he could no longer control.

"Wait; I'll be there in a minute!" I shouted back, my only fear lest he desert us. The bulkhead still held; this torrent was water which had found other entrances; no doubt it would eventually increase in volume and sink the vessel, yet there was still ample time for us to escape. There would be no sudden plunge while that bulkhead held.

"Are you all right, Miss Vera?" I asked anxiously. "Where are you? Can you see me?"

"Yes; I am clinging to the berth." Her voice was excited but clear. "The water is up to my shoulders. Is the opening sufficient?"

"For you, I think, if you can make it alone. I should have to knock out another panel to get through myself."

"There is no time for that, and no need. I'm coming now; watch out."

Our two bodies so obscured the faint glow of the lantern dangling from McCann's hand above that I could see nothing, yet I managed to grapple her arm, and thus assist in dragging her into the jagged opening. The water, surging to the sodden roll of the doomed yacht, and now dammed by her body, poured over us both in suffocating volume, but the struggle was only for a moment, and then I had the girl safely clasped in my arms, her head elevated well above the receding flood.

"Now, grasp the rug," I ordered, as I thrust her light form upward. "It will help you creep up the slope of the deck. Creep on back, McCann, with the lantern; never mind me—I'll find a way out."

She possessed sufficient nerve and strength for the effort. There was no hesitancy, no word of protest. Silently, inch by inch, she fought her way aft, her feet slipping on the wet planks, but her fingers gripping desperately at the sustaining cloth. I could see only the outline of her revealed against the gleam of the lantern, as McCann clambered upward in advance. I could hear the groaning of the bulkhead to the strain, and realized that the timbers could not long hold against the immense weight. Suddenly the fear had come into my heart; not until then had I paused to think—effort had obscured all conception of danger; but waiting there in that black hell, the creaking of timbers in my ears, the water clutching my throat, the full horror of it overwhelmed me with sudden terror. My God! Surely we could not have accomplished all this, and still be doomed to die like rats in a hole. At least we must reach the open deck, and have a chance to fight for life under the stars.

Yet, once I had attained the cabin, all this left me. Ghastly as the wreck of that interior appeared, the wider space brought back to me the seaman's courage. There was hope yet, an opportunity to fight. McCann had dropped the lantern on the overturned piano, and was urging the girl forward toward the stairs. Terror made him oblivious to everything except a mad desire to escape, but she was glancing back, as though in search for me. I clambered to my knees amid the litter of furniture, and snatched up the light barely in time to keep it from smashing on the deck.

"I am all right," I called confidently. "Get outside both of you as quick as you can."

Never in all my life have I experienced the same sense of relief as when I stumbled out of that companion onto the open deck, and felt the night air in my nostrils; yet not until then did my brain truly grasp the desperate nature of our situation. The gleam of the lantern revealed the sharp slope of the deck, and the surge of water churning from rail to rail scarce a dozen feet away; the riffle of tangled spars and ropes to port under which I knew lay dead bodies; the smashed bulwarks, and a wrecked small boat hanging stern down from a davit, with a man's arm and head dangling. All about us the night and sea was black as ink—not a glow anywhere except a single white gleam far away to starboard like a distant star. It was not a star—it was far too close to the horizon—beyond doubt it was a masthead light on the steel monster which had run us down.

I held the lantern behind my body, and stared out through the void at the faraway spark—it was no more than a pin-prick, barely visible across miles of open water, and growing fainter each second. I read the whole meaning, despair clutching my heart. The vessel had waited and picked up the Esmeralda's boats; believing she then had on board all who lived, she had resumed her voyage. We were alone, deserted, in the midst of the dead, possibly without even a chance to save ourselves from going down with the sodden wreck.

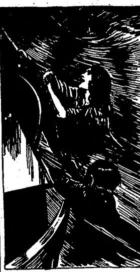
But if there should be a chance there remained not an instant to lose. I flashed the light about into the face of McCann and the girl, the man white and haggard, his eyes as dull as though he had taken an opiate, absolutely stupefied with fear. But the girl! In the gleam of the lantern her eyes met mine, full of questioning, but fearless. She must have seen, and understood also, for she called to me, clinging to the rail to keep her footing, her loosened hair flapping in the wind.

"They are leaving us, Mr. Hollis! Is not that the steamer out there?"

"Ay, the last glimpse we'll ever have of her," I answered bitterly, forgetting myself in anger. "The d—— brutes think more of a few dollars than our lives. But we'll make a fight just the same. Come, wake up, McCann! Aft with you—oh, yes, you can; crawl along the rail; once beyond the cabin there's good foothold. Now, my lady, I'll not let you fall—good! You are the better sailor of the two."

I held the lantern in my teeth, and clambered after them. It was a thirty-foot climb, but the rail stanchions made a fair ladder, giving good hand and foot hold, although occasionally the hulk beneath us rolled so heavily in the sea as to bring us to a pause, clinging grimly to the tarred rope in order to retain our balance. Twice I thought the doomed yacht was actually going down, as under the blow of some swell she leaned heavily to starboard, giving glimpse of the black water just below where we clung so desperately. Yet with sodden, sickening motion, like the last painful effort of a dying creature, she managed to right herself once more, every timber groaning in agony, the salt spume of the sea blown into our faces.

Once beyond the overreach on the cabin we found opportunity to stand erect, gripping the iron supports which had sustained the awning above the after deck. In the dim rays of the lantern the scene was one of utter wreck and desolation. There had been four boats hung in davits above the rails; two of them were gone; one hung trailing overboard, half submerged, with the bow still swinging to the tackle; the fourth had been smashed into kindling. I staggered across to where I could look down at the dangling craft, holding my lantern out over the rail. It was broken amidships and useless, but jammed under a thwart lay a man's body; the gleam of light rested on the upturned face, and I recognized with horror the features of Fosdick.



She Possessed Sufficient Nerve and Strength for the Effort.

Sickened, covering my eyes with one arm, I clung to the shattered rail, completely unnerved. The voice of the girl aroused me, brought me back to manhood.

"Mr. Hollis, the dory is still here!"

I swept the lantern about, confused, and unable to locate the sound. McCann was crouching against the cabin, but the woman, aided by the flag locker, had crept aft, and now leaned out over the stern rail and was pointing eagerly down into the black water. I worked my way cautiously forward to where she clung, the lantern swung overside, its small ring of light giving me view of the whole uptilted stern. The dory, which had evidently been left trailing astern, was actually afloat, although half filled, and her oars, jammed securely under a thwart, were still in place.

The position of the vessel, the waterlogged condition of the smaller craft, told me at a glance the whole story. What was left of the crew of the Esmeralda, together with those guests who had lived to attain the deck, had made their escape in the two missing boats—they would hold twenty each, and were strong and seaworthy. No doubt the smashed one there had been lowered first, but the tackle jammed, and in the wreck Fosdick had been killed. The others had clambered aboard the two left, leaving him crushed behind.

The two men and their charge manage to get away in the dory from the sinking yacht, but their troubles have only begun.

(TO BE CONTINUED.)

The Downhill Road.

A. J. Balfour, head of the British commission, told a pathetic anecdote at a New York reception about a young peer.

"He was dreadfully wounded at Mons," said Mr. Balfour, "and, though he lingered on a long time, he knew, as we all knew, that his hurts were mortal.

"I met him limping painfully on his crutches in Piccadilly one morning. He was the shadow of his former self.

"'You're walking very slowly,' I said.

"He gave a sad kind of laugh.

"'But I'm going very fast,' said he."

DADDY'S EVENING FAIRY TALE

BY MARY GRAHAM BONNER

NAUGHTY BUGS.

"It's a great pity," said the hard crusted June Bug.

"Dear Bright Little Bug."

"And what is a great pity?" asked one of the little bugs.

"Well, you see," my dear," said mother bug, "you were born under the ground. Ah, there it was we had our home, and such nice little bugs as you were. How proud I was of you. Yes, I used to say to myself, 'These little bugs will eat a lot, they will have good appetites.'"

"Then, what are you sad about?" asked the little bug.

"I am not sad," said mother bug. "I said it was a great pity."

"But you didn't tell me what was a great pity," said the little bug. "And now you say you are not sad. Oh, dear, I do not understand. I suppose it is because I am a little bug."

"It's this that is a pity," said the mother bug. "We aren't liked. No, I must tell you the truth, my bug child, we are not cared for in the least. When I was making my home I felt that we would not be liked. And now that the summer is well on, I know it to be true. It is only that we have been lucky."

The little bug still looked as if he didn't understand his mother, so she explained some more.

"We are called the hard crusted June bugs," said his mother. "That doesn't mean that June is the only month of the year for us. No, it simply means that we make our appearance in June, and we like to stay quite well into the summer. We like July and August very well, too. But June is when we first arrive and when we feel so happy and proud of our families."

"You mean us, don't you, mamma?" asked the little bug.

"Yes, my dear, I do."

"But you say we are not liked Mamma Bug?" asked the little one.

"That is so," said the mother bug "You see we have a great fondness for potatoes. And we like them when they are started and when they grow up—in fact, we are very fond of potatoes."

"Is that why we aren't liked?" asked the little bug. "Are we too fond of potatoes to please the farmer?"

"That is it exactly, dear, bright little bug," said mother bug proudly. "We eat so much potato—ah, we nibble at potato after potato, and soon we will be having all the corn we want.

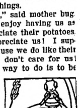
"Ah," she continued, "we are so much more sensible than grown-ups. They wait for everything to be ready for them. We start right in when the potatoes are growing—ah, growing potatoes are so lucious. Yes, and so is corn."

The little bug stirred, for it made him hungry to hear about potatoes and corn.

"You see," the mother bug said, "the farmers say they work so hard over their corn and potatoes and then we spoil the crop. Just think of the power we have. We are only little hard crusted bugs. And yet we do so much harm!"

The little bug looked happy. He enjoyed being told it was nice to do harm. Of course, he had such a queer bug mother that it is not surprising she told him such things.

"But it is a pity," said mother bug "that they do not enjoy having us as callers. We appreciate their potatoes but they don't appreciate us! I suppose it is just because we do like their potatoes that they don't care for us! Oh, well, the only way to do is to be cheerful, to go on eating and spoiling the potatoes and corn, and try not to get caught!"



"What a Fine, Healthy Family."

The little bug was growing restless. "Shall we try it now, Mamma Bug?" he whispered. "I am getting hungry. I think my brothers and sister are, too."

"What a fine, healthy, hungry family I have," said the mother bug.

They all began to nibble at the potatoes under the ground, and around about the ground. Such a meal as they had and little did they care for the poor farmer who had worked so hard.

For of all the little bugs, the hard crusted June bugs that go for the potatoes have about the worst dispositions, and they care for nothing in the world but themselves, potatoes, and corn!

Conservation.

"What have you children been doing?" asked mother.

"Planting," the twins together answered.

"Planting what?"

"Beets."

"And where did you get the seed?"

"Oh, we didn't plant seed. We planted the bunch of beets we found in the kitchen, and now mamma you'll have a whole lot of bunches of beets."

ITALIAN LEADER GREAT GENERAL

Intimate Sketch of the Man Who Has Beaten His Enemy's Military Machine.

LUIGI CADORNA'S BIG RECORD

He Has Molded an Army That Drives Austrians Out of Alps Mountains in Hardest Campaign of World Conflict During Summer.

Rome.—It is said in the little Italian water town of Pallanza on the border of the Lago Maggiore, away up toward the Swiss Alps, where Lombardy and Piedmont meet, that some years ago a learned German with a particular interest in heraldry paused at some length before a weather-beaten crest embossed in a quaint old-fashioned doorway, and observed to those in his company:

"Remarkable — most remarkable. The composition of this coat of arms points to a line of fate running in the same family from father to son, and to tremendous achievements to crown the family tree. I wouldn't care to be pitted against the star of that family."

And he marched himself off, growling:

"Remarkable, most remarkable!" But it never occurred to him to ask the name of the family who had once gone through the deserted gateway, nor, at the time, did his reflection strike his Italian host as anything but a freak of "kultur."

Time has proved that the German was right for once. The star and the oak tree and what not that had struck his fancy so are the crest of the Cadorna, who come from poor but unsullied provincial nobility, with two chief ideals running in the family: Faith in God and devotion to Italy. The present General Cadorna's grandfather was minister to King Carlo Alberto, who led the movement for Italian independence, granted the constitution to his kingdom (then restricted to Piedmont and Sardinia), abdicated in favor of his son when he thought that such a course of action would help the formation of new Italy, and died an exile at Oporto. General Cadorna's father, Gen. Count Raffaele Cadorna, led in 1866 the Italian advance on the Isonzo, which was cut short by diplomatic interference and the subsequent granting to Austria of the Italian lands beyond that same Isonzo and the Adriatic; an unjust and therefore unwise move which ultimately resulted in the war of today.

The "line of fate running in the family from father to son" is evident now, when Gen. Count Luigi Cadorna takes up the reshaping of history left unfinished by his father, as all Italy of today takes up the strand of fate ill-twined and distorted by the unfortunate events of 1866.

Luigi Cadorna himself was born in Pallanza on September 4, 1850, and he was barely 15 years old when he entered the military academy, graduating therefrom as a full-fledged lieutenant in 1870, and receiving his captain's commission in 1875 in an artillery regiment. Opportunity for experience in infantry work was afforded him by his appointment as a major in the Sixty-second infantry regiment in 1883; but since 1892, when he got his colonelcy, he has been identified with the Bersaglieri, the "wideawakes" of the Italian army.

All these years were spent by him in active study of general military problems, as well as of Italy's particular characteristics in the military line. To this day his essay on the Franco-German war of 1870 and his pamphlet about tactics and the proper use of infantry in legitimate warfare are consulted by the experts to advantage, as are his studies on the Italian boundary lands. These he knows to perfection, so that he hardly ever needs to resort to charts and maps for his plans; he has it all mapped out in his head, and the facility with which he draws from his memory the names and positions of intricate passes, valleys, mule paths and roads is nothing short of marvelous.

When he took command of the Tenth regiment of the Bersaglieri, he started to work on it after his own mind, and brought it out in the grand maneuvers of 1895 in splendid form, practicing, in fact, on the adversary forces that same type of outflanking and surrounding move that works so capitally on the Carso today. Again, in 1911, (he had attained his generalship then since some years), he led in the "grandes maneuvers," the Blue party against the Red, with all the strategic odds against his party, and astonished all experts by the working out of a capital plan first; and when this fell through on unforeseen circumstances, by the promptness with which he sized up the new situation and turned it once more to his advantage.

But nothing then seemed to point out the magnificent heights to which he was called. In fact, the breaking out of the European war in 1914 still found him a general on the list for the command of an army in case of war. And the Italian chief of staff was General Pollio, who, by the way, was blessed with an Austrian wife. His timely death was a good turn of fate for Italy, for the king appointed General Cadorna to his place.

General Cadorna, it may be frankly stated now, found the Italian army in practically desperate conditions of unpreparedness. The way he went to work and reorganized and equipped it was as remarkable and as brilliant an achievement as any of his most brilliant achievements in the fighting line; in fact, it was only the preparation of 1914 that makes victory possible in 1917.

He is the only commander in the allied world that has retained his position, we might say, kept steadily his job, throughout the war, without ever as much as a hint of a breakdown either in the wholesale confidence that his country, his king, his army—and the allies—have placed in him, or in the lively, energetic, all-around quality of his action and command. In fact, he seems to thrive on his work, and to gather new strength, as the days go and as time tests it, in the consciousness that it is good.

NEED PLENTY OF GRUB

Napoleon said, "An army fights on its stomach." No one has ever disputed his wisdom, so it must be right. If any further proof is needed, to convince "Doubting Thomases," a visit to any army camp at mess time will dissolve all contradictory opinions. All United States soldiers are real fighters, so it is little wonder that they are all great eaters. Uncle Sam's grub is good, but it must be plentiful and the supply must be on a huge scale to feed the million or more men Uncle Sam is to train and place on the battlefield in France.

His faith in God supports his faith in victory. For he is a deeply religious man, his favorite daughter, by the way, is a nun, and while such feeling means a good deal to human lives that are intrusted to him, it helps him to request of them all the sacrifice that the higher ideals may require.

It is his firm conviction that "to sacrifice one life wantonly is a crime; to use a hundred thousand if necessary is a duty," for the commander of a nation at war. "If necessary" is his condition; and "if necessary, let it be done," his slogan, just as the slogan of the officers with heavy responsibilities is: "When in doubt, go to Cadorna."

The particular characteristic of his mind is breadth of vision and the sweeping aside of all minor issues, not to speak of petty details. He is, above all, practical and simple. The fundamental law of his thought is "common sense and a remarkable clearness in seeing things as they are"—not as he might like them to be or as he might object to their being.

He even has gone the length of writing that "The art of war must be governed chiefly by common sense pure and simple." And by the study of war on this basis he has reached a deep knowledge of the world, on the principle that "there is everything in war, from geology to the human heart." Given his simplicity and directness of thought, the simplicity and directness of his written words are consequential, and it may fairly be said that since the "Commentaries of Julius Caesar" Italy had heard nothing to compare with the splendid simplicity and the Latin "line" of his war bulletins.

It is whispered among those who know that, in the early days of the war, the task of drafting the daily communique had been intrusted to a very brilliant Italian journalistic officer, whose headline ran, "Gran Quartiere Generale" (Chief Headquarters, or something to that effect, with obvious reference to the Germanic equivalent). General Cadorna, after having firmly established his men on the outer side of the Italian borderline and carried the war into the land of the enemy (a privilege which the Italian army alone of the belligerents has enjoyed since the beginning of the war), turned back and saw that the reports were not half so good as the work—literary, but not razor-keen. And this journalist was thanked (which, by the way, in the Italian war zone slang, is expressed by silurate (torpedoed), and this characteristically Latin headline was adopted: Comando Supreme (Supreme Command). From that day on, the communicato Cadorno has brought to the expectant Italy the daily word of her great general and the unspoken assurance of his faith in ultimate victory, every day made nearer and more resplendent, for the general believes in what might be called the contagiousness of faith, and the identification of the ideal with the reality in ultimate achievement. He believes that victory, before materializing as a fact, must be potentially blazing as an absolute certainty in the hearts of the soldiers and their leaders—in fact, must descend from the leaders to the masses as an irresistible, joyous flow of truth. He believes that discipline is the spiritual flame of victory. Never for one instant has he doubted the ultimate issue of the war; never once doubted his own power to win, not on account of personal conceit, but because he considers himself as an agent of necessity, an exponent of the inevitable march of history.

His will is inflexible, because he never seeks strength in the opinion of others. On the other hand, he never makes up his mind until every side has been considered and every item of the contention outweighed. After that his conclusions are drawn, and anything that may follow finds him unswerving. His strength lies largely in his absolute, naive unconsciousness of anything that might disturb it; that, in fact, would disturb another man. No useless anxiety in him; no nerve-racking impatience.

Once, away back in 1915, a mayor of an Italian city sent word that his constituents had an Italian flag ready for Goritz. Cadorna dismissed the subject with a whimsical smile.

"Tell him to put it away in a drawer for now."

But when, about one year later, Goritz was taken, the mayor received this rather cryptic telegram from the general himself:

"You may now send along that object. Cadorna."

Which rather reminds you of Dante's famous answer about the egg with salt, at one year's distance.

On New Year's day of 1916, an acquaintance sent him, with good wishes, the offering of a shaggy fur coat, and the general answered accepting "the fleece" as a good omen "for the conquest of our ideal golden fleece," and added: "But then, you know, in Jason's time there were no barbed-wire fences nor other infernal devices, and it was possible to step more lively." Which, by the way, is a mighty good hit at the closet-critics of the war.

It is characteristic of the general that such a gift he may accept with a smile; but he definitely waives any collective token or demonstration. Knowing his affection for his native place, and his regret at circumstances having compelled his father to part with the family homestead, it was proposed to purchase and present to him the house by national subscription. He stopped that, and desired the proceeds to be given to the home for mutilated soldiers and victims of the war. Other demonstrations were similarly thwarted, but it is believed that he will not refuse to accept a sword once owned by Garibaldi, since it is planned to present it to him "at the end of the war."

If a general proves unfit he is "torpedoed" on the spot; if a soldier shows the right stuff, he is rewarded. His constant preoccupation is: "Find the men who have the stuff. With such men as the Italians, first values must have been developed during the war; find them and put them up."

His ruddy, genial, open countenance, his boyish freedom of movement and gesture, interestingly contrasting with the whiteness of hair and mustache; his clear, forceful voice and the definite, resolute things that it expresses, with a breezy sense of vitality that is quite refreshing to the hearer, all come in for a share in the exceptionally attractive personality of this "gentleman warrior," who, as a young lieutenant in 1870 stood by his father and helped him give Rome to Italy, and as a mature leader of men may or may not give Trieste to Rome in 1917, but will forever stand in the eyes of Italy and the light of the world as the true representative of the righteous fight of Latin civilization against the barbaric brutality of the Huns.

PUTS OUT FIRE IN THEATER

Audience Cheers Soldier Who Prevented Building Burning in Texas.

San Antonio, Tex.—In the course of the "5-10-15-cent" theatrical performance in a Houston street theater Sunday afternoon, one of the actors had "died" and had been stretched out upon the "cooling board" with the conventional candles at head and feet. After the action, which was somewhat rapid, one of the actors, alone, stood before the audience and sang. Soon a candle fell from its position and lay burning on the sheet that lay over the "dead" person.

In the commotion that quickly followed, civilians whistled, called, stirred about and motioned to the singer to put out the flame. A soldier, however, mounted the stage and put out the fire with his bare hands, receiving a hearty cheer from the audience.

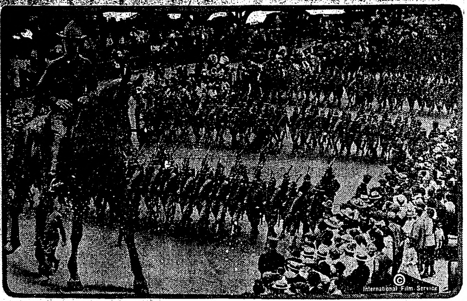
And the singer continued his song.

No Chance.

Dingus—By the way, Shadbolt, talking of those X-rays——

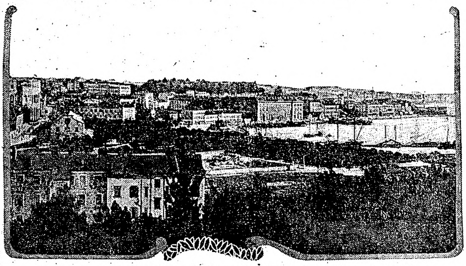
Shadbolt (sheering off)—No use, old boy. You'll make no x raise from me this time.

NEW YORK STATE TROOPS ON THEIR WAY TO CAMP



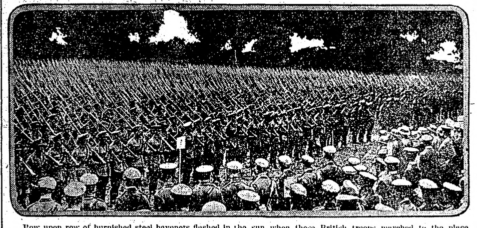
New York National Guardsmen, comprising now the Twenty-seventh division, U. S. A., parading down Fifth avenue before two million citizens, before going to the training camp. At the left Col. Cornelius Vanderbilt leading the Twenty-second engineers.

WHERE AUSTRIA'S NAVY IS BOTTLED UP



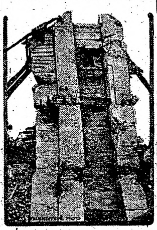
Bombarded by the combined Anglo-Italian naval forces operating in the Adriatic and the Gulf of Trieste, Austria's navy is in imminent danger of destruction. It is bottled up in the great naval base of Pola, part of which is shown in this photograph.

FOREST OF BURNISHED STEEL



Row upon row of burnished steel bayonets flashed in the sun when these British troops marched to the place where the great British field service to mark the commencement of the fourth year of war was held.

GERMAN OBSERVATION POST



This picture of a German concrete observation post at a point in France now in the hands of the French gives an idea of the elaborate manner in which the Germans make war.

THINGS WORTH KNOWING

Mt. Whitney is 14,602 feet high.

Arabs predominate in old Tunis.

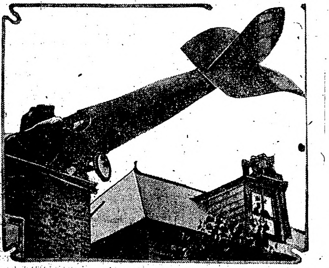
American glass is used in China.

Tunis is governed really by the French.

A windmill in Europe grinds grain into flour for a baker and then mixes and kneads it into dough.

Almost automatic in its operations is a new cabinet for quickly developing X-ray photographs for dentists' use.

SURPRISE VISIT OF AIRPLANE



The formality of knocking before entering didn't bother this airplane that recently paid a visit to the bedroom of a householder in Twickenham, England. But then it must be remembered that the visit was as much of a surprise to the airplane as to the householder. Something went wrong and the machine, getting out of the control of the pilot, crashed into the roof of this house. Fortunately neither the pilot nor the sleeper was injured.

Tree Growing From Telephone Pole.

New Orleans has a live oak tree growing out of a cedar telephone pole. The tree, which is probably four years old, is three or four feet long. It is believed that an acorn blew into a hole which had been made in the pole when the limbs were cut off.

Oils From Lemons.

A process invented by an Italian chemist for extracting essential oils from citrous fruits is said not to affect the chemical properties of the oils in any way; and it is predicted that it eventually will revolutionize the industry.

DAIRY FACTS

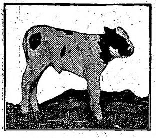
RAISE CALF ON WHOLE MILK

Various Supplements Which May Be Combined to Lower Cost of Ration —Skim Milk Economical.

(By R. S. HULCE and W. B. NEVENS, Illinois Agricultural Experiment Station.)

Raising the dairy calf on whole milk alone is too expensive. There are a number of supplements which may be combined with whole milk in order to lower the cost of the ration. The feeds most commonly used as whole-milk supplements are skim milk, home-mixed meals, commercial calf meals, and hay and grain.

On farms where skim milk is available, it may be substituted for whole milk in the ration of a healthy calf when the animal is three or four weeks of age, a few days being necessary to complete the change. If the skim milk is fed in a warm, sweet condition, ordinarily no difficulties will be experienced. The amount of skim milk fed may be increased as the calf increases in size, but it is rarely necessary to feed more than 15 pounds daily, provided grain and a good quality of legume hay is being used. Where the supply of skim milk will permit, it is advisable to continue its use until the animal is five or six months of age in the case of grades, and for a longer period in the case of purebreds. Skim milk is one of the most economical feeds known for producing growth in calves.



Whole Milk Age (Holstein).

WORK OF MILKING MACHINES

Test Made by United States Department of Agriculture in Dairy Regions of Many States.

The United States department of agriculture has put out a bulletin on milking machines. They made studies in dairy regions in New York, Michigan, Ohio and Illinois. They found that in herds of 15 cows or less the average time required to milk a cow by hand is a fraction over seven minutes, and by machine a fraction under five minutes. In herds of 50 cows the average time required is seven minutes, but by machine just a little more than four minutes.

The cost per year to milk a cow in a herd of 15 cows or less is $10.91 by hand, and $10.45 when the herd numbered 50 cows or more. With machines the cost was $11.75 per cow in herds of 15 cows or less, against $7.34 per cow per year with 50 cows or more in the herd.

In computing these figures, a total of 156 farms were investigated. Interest on the investment, the value of gas and oil, the cost of repairs, depreciation and labor were all considered.

SCOURS IN YOUNG ANIMALS

Generally Result of Overfeeding or Use of Unclean Utensils—Best to Reduce Feed.

Scours in our animals is generally the result of overfeeding or feeding from unclean troughs or buckets, or from feeding food that is stale. Milk fed to calves should either always be sweet, or always be sour. If it is one thing one time and the other the next, it will result in scours.

The buckets should be as carefully scalded out as are the pails in which the milking is done.

Musty or bin-burned grain should not be fed, particularly to young animals.

When the calf gets too much milk or the young pig gets too much feed, we have scours, possibly thumps in the pig.

The best remedy is to reduce the amount of feed, clean up the troughs and buckets, and give a good dose of castor oil. Two ounces is a dose for a calf, and from a teaspoonful to a dessertspoonful to a growing pig, according to its size.

DRYING OF DAIRY UTENSILS

Process Equally as Important as Thorough Cleaning, Especially in Summer Season.

Much emphasis has been laid upon thorough cleaning of dairy utensils, and rightly so, but the process of drying is equally as important in warm weather. Drying should not be done with a cloth, but by heating the utensils in hot water, steam or oven sufficiently to evaporate moisture.

AGRICULTURAL DEPARTMENT

This department of THE ELEVEN TOWNS is devoted to the interests of the agriculturists of Pennington and Marshall Counties. All the articles are by foremost authorities, including U. S. Government experts.

SURFACE OF ROADS

Methods to Be Employed in Construction Depends on Conditions to Be Met.

FOUR SETS ARE SUMMARIZED

Location, Design, Drainage, Grading, Etc., Are Important—Each Feature Described Separately and in Full.

The proper method to employ in constructing a sand-clay road surface depends on the conditions to be met. In general, there are four distinct sets of conditions, all of which may occur in the same locality, or even on different sections of the same road. These are:

Case 1, where the original roadbed is sandy and it is desired to construct the surface by admixing clay;

Case 2, where the original roadbed is composed of clay and it is desired to construct the surface by admixing sand;

Case 3, where it is desired to construct the surface of topsoil or other natural sand-clay mixture without admixing any of the roadbed material;

Case 4, where it is desired to supply the clay and sand separately and mix the two materials together in place to form the surface.

Before discussing the different cases separately, the general ends which all of the construction methods should aim to attain will be summarized briefly.

TYPICAL CROSS SECTIONS SHOWING METHOD OF CONSTRUCTING SAND-CLAY ROAD BY MIXING SAND OR CLAY WITH THE ROAD BED MATERIAL.

"W" should be at least 12 feet for single track road, and "S" generally not less than 5 feet, for double track "W" should be not less than 14 feet, and "S" not less than 3 feet. "H," crown, varies from ½" to the foot for level grade, to 1" to the foot for a grade of 5%.

Fig. 1

(1) The questions of location, design, drainage, grading, etc., are, if anything, more important in the case of sand-clay roads than in the case of earth roads.

(2) The amount of clay contained in a finished sand-clay road surface should be only slightly more than sufficient to fill the voids in the sand. Ordinarily about one part of clay to two parts of sand gives satisfactory results, though the proper proportion for any particular case can be determined best by experiment.

(3) For average country-road traffic and a stable roadbed, the depth of a sand-clay surface should be about eight inches after it is compacted. If clean sand and pure clay were used to make the mixture, the respective depths of the sand layer and the clay layer required would be approximately eight inches and four inches, measured loose. It is customary to decrease the surface thickness from center to sides, with a feather edge extending out over the shoulders, but this practice makes it necessary for most of the traffic to use the center of the road, and heavy vehicles using the edge of the surface are liable to break through the surfacing material.

(4) In constructing a sand-clay surface, the two constituent materials should be thoroughly and intimately mixed together in all cases. In making artificial mixtures, therefore, much plowing and harrowing are required.

(5) No matter what method is followed in constructing a sand-clay surface, traffic usually must be depended upon to puddle and compact the surfacing material, and the road never should be considered complete until after it has been subjected to traffic for a considerable period. During this period the surface should be kept in shape by repeated dragging, and if necessary additional sand or clay should be supplied at points which show weakness owing to these materials not having been mixed in proper proportions.

Other features of the construction can best be described separately for each of the four sets of conditions mentioned above.

Case 1.—To construct a sand-clay surface by admixing clay with sand from the roadbed, first grade the roadbed in the manner already described for earth-bed construction, but keep the crown flat on the portion to be surfaced. Then spread clay over that part of the roadway which the surface is to cover, to such depth that, when it is mixed with the sand of the roadbed, a surface about eight inches thick, after compacting, will be obtained. The loose depth of clay necessary to secure a finished surface eight inches thick usually will vary from four inches to six inches, according to the amount of sand the clay contains. After the clay has been spread, plow up sand from beneath in sufficient quantity to make the net proportion of sand to clay about 2 to 1. Ordinarily the plow furrows should extend down into the sand from four to six inches, depending on the compactness of the roadbed and the amount of sand originally present in the clay. But it is better to have too little than too much sand, because it is easier to add sand from the roadbed than to haul additional clay. Next harrow the surface with a disk harrow. Repeat the operations of plowing and harrowing until the sand and clay are mixed thoroughly and uniformly. Then shape up the surface with a grading machine or road drag and permit traffic upon it. After the first soaking rain, plow and harrow the surface again until the surfacing material practically becomes mud, after which shape up the surface and keep it in shape by repeated dragging until it has dried out and is thoroughly compacted. Watch the road carefully for several months after it is first constructed, to correct deficiencies of sand or clay and to keep the surface in shape.

Case 2.—To construct a sandy-clay road surface by admixing sand with clay from the roadbed, the process is exactly similar to that described for Case 1, except that sand is spread over the graded roadbed and clay is plowed up from beneath to mix with it.

The honey bee is probably of Asiatic origin. Wild bees are abundant in India and in the islands of the Malay archipelago.

MANURE FROM FARM ANIMALS

Great Source of Wealth Is Not Looked After as Carefully as It Should Be in Many Instances.

Some systematic experimenter has made the discovery that the manure from the farm animals, if carefully saved and utilized as a fertilizer, is worth annually as follows: That produced by the horse or mule, $27; that of cattle, $20 per head; the hog, $4, and the sheep, $2. This great source of wealth is not looked after as carefully on our farms as it should be or could be. The winter or feeding season could be made much more resourceful in the manure than it is on most farms. The manure should be closely gathered and hauled to the fields or grounds where it is to be used and spread by use of the manure spreader.

Work your horses moderately during very hot days and water them often; protect them from the flies and watch them carefully; keep their bowels loose by [illegible] or feeding laxative foods.

ROOTS FOR SEED PRODUCTION

By Following Plan Outlined Herewith Farmer Will Safeguard Against Famine in Spring.

Select this fall a number of the best roots, store them carefully through the winter and plant them next spring for seed production. By doing this, you will further your own interests and safeguard against a field-root seed famine. In addition, it will be found that the seed so grown will give just as good yields, or maybe better, than imported seed.

Growing mangels, turnips or carrots for seed is quite simple. It requires no special skill nor any outlay of capital, and the little labor involved is well repaid by the results.

Suppose each year one acre of mangels or turnips or carrots is grown for the stock. How many roots will it be necessary to select this fall and plant out next year to produce the quantity of seed needed?

A town of cement buildings is being constructed in Montana.

Highway Improvement

PATROLMEN TO REPAIR ROADS

To Keep Recently Constructed Highways in New Hampshire in Condition Many Men Are Employed.

Within the last ten years 442 miles of gravel roads have been built in New Hampshire at an average cost of $3,826 per mile. It is clear that auto travel would ruin them in a short time if they were not maintained in good condition all the time. To meet this necessity several hundred patrolmen are employed from the last of March to the first of December in patching every little run and hole that appears, in cleaning the ditches and culverts and in spreading oil lightly over the surface. Each patrolman has a section of road assigned to him and is required to furnish a one-horse wagon, a shovel, a rake, a drag and such other equipment as is needed for his work. If the road is not oiled it is smoothed with the drag after every rain; oiled roads do not require frequent dragging. The patrolmen are paid an average wage of $3.25 the day. In 1915 the total cost of maintaining these roads was $240 the mile. The road officers of New Hampshire reckon that well-maintained gravel roads cost about $250 the mile annually less than any of the more expensive types of road for the class of travel on four-fifths of the through routes in the state. On one-fifth of these routes the travel is too heavy to be carried by gravel and more expensive construction is necessary; no amount of maintenance of a gravel road will make it strong enough to carry more than a certain density of travel, particularly where automobiles are numerous.

PROBLEM OF ROAD BUILDING

Highway Official Tells How Great System Can Be Built—First Essential Equipment.

Thanks to the pushful, pervasive motorcar, American road building has "got a move on" at last. There is everywhere the cry for roads, for more roads and for better roads. The drawback has been that, as yet, there has been no co-ordination of these multitudinous enterprises. The president of the National Highway association, Charles Henry Davis, in a recent paper stated that we spent last year $249,955,967, or more than two-thirds of the total of money expended so far on the construction of the Panama canal—for road improvements throughout the country. Mr. Davis' contention is that good roads, roads that run for thousands of miles through state after state, are, properly, not the responsibility of the state, but of the nation, says Boston Transcript. He would have the federal government build a system of national roads joining the West with the East, the North and the South, connecting every part of the country, as is the case with the national highways of Europe, and, as history shows, such as was the essential equipment of every first-class power of the past.

Bituminous Macadam Road.

How would such an enormous construction be paid for and kept up?

"Suppose," asks this eminent engineer, "the government built 100,000 miles of properly planned roads, and at the same time purchased, say, 300 feet of land on either side. This land would so continually increase in value and in demand for leasing on long rental, that the cost of the road and the land purchase would soon be paid. A rental rate of $6.66 per acre would pay the interest on the cost of construction. But such would rent at vastly higher rates in cities and towns, high enough to give the nation an income equal to its total annual expenditure," from these national highways alone!

Most Delightful Place.

Make good roads, and the country will be the most delightful place in the world to live.

Money Wasted.

Thousands of dollars are wasted every year through the purchase of cheap woven wire fence. Only the best should be purchased.

Serious Farm Problem.

The fertilizer problem is one of the most serious confronting the farmer today.

Pure Water Supply.

Stop and think about the water supply. It should be secured from a source uncontaminated by impurities.

News of the State

Condensed for Busy Folks

Dan Driscoll was held to the November grand jury at Stillwater on a charge of arson. It is alleged he attempted to burn the South Side school building.

Charges signed by 50 persons have been preferred against Mayor J. J. Reiter of Rochester. The complaint against the mayor as yet has not been revealed.

Melvin Henderson received a broken leg and dislocated shoulder when he caught his arm between the belt and the flywheel of a gas engine and his body was thrown against a hay press at Foxhome.

Pinned under a locomotive for six hours, unable to extricate himself, was the experience of Thomas Dempsey, an engineer on the Mesaba railroad. The engine jumped the track near Hibbing and Dempsey was caught under it. He was unhurt.

Forty-two women patients at the state hospital for the insane at St. Peter have joined a movement begun by Mrs. B. Leverland, an employe of the institution, to knit garments for the Red Cross. Much difficulty is predicted in beginning the work.

While walking from the Olmstead county fair at Rochester five persons were struck by an automobile driven by Ambrose Kelly of Stewartville. Enos Daly, 17, was killed and Anna Jorgenson, Lester Weed, Helga Hanson and Lena Nelson were injured, two of them perhaps fatally.

Co-eds who will board at the girls' dormitory of Gustavus Adolphus college at St. Peter will eat cheese in place of meat one day each week during the school year, to do their share in conserving the nation's meat supply. This was the announcement made today by Dr. O. J. Johnson, president of the institution.

Word has just been received at Pipestone that Lieutenant Colonel Cecil Currer Briggs, acting lieutenant colonel of the Sixth King's East Lancashire regiment, has been decorated with the Distinguished Service Order. Lieutenant Colonel Briggs is the son of W. C. Briggs, state representative from the Pipestone district.

Red Lake Falls is now practically assured of a new hotel, as $12,000 of the $15,000 necessary stock has been subscribed and every effort will be made to bring the subscription up to the required amount. A loan of $10,000 or $12,000 will then be secured, which, with the $15,000, will be sufficient for building a 30 or 35-room modern structure.

Winona county farmers, facing heavy losses because of the frost damage to corn, are being aided to garner the salvage by soldiers. Captain J. D. Burke, responsive to the urgent appeal for men, permitted as many as possible of his members of C company to spend a day in the field assisting in filling silos with corn for fodder.

When the Northern Minnesota Development association holds its annual meeting in Brainerd December 6 and 7, the first gun in the campaign to boom that section of the state as a banner potato seed producing locality will be fired. The executive committee of the booster organization has voted to appropriate $200 to be used in providing premiums for the Minnesota Potato Growers' association that it might hold its annual exhibit in conjunction with the Boys' and Girls' potato show at Brainerd.

Word has been received of the death of Andrew Remark of Ada in an auto accident in Idaho.

A dispatch from Ottawa, Ont., says: The following Americans are named in today's casualty list: Killed in action, W. E. Campbell, Salol, Minn.; J. G. Malone, Austin, Minn.

The premium list of the Koochiching county fair, to be held at Northome on Sept. 18, 19 and 20, was issued yesterday by the committee and is an unusually attractive one.

On 40 acres of Wright's farm near Brainerd 2,140 bushels of oats were threshed. Although the cucumber crop this year has not been an extensive one, the Barrow's pickle plant has received about 2,500 bushels to date.

Northern lumber men forecast a serious labor shortage in the woods this fall and next winter and it is feared that the cutting of logs will be greatly handicapped for lack of men. Fewer men are available at this time than for many years.

E. G. Purssell of Minneapolis, meteorologist of weather bureau, was in Brainerd inspecting the local station and also gathering earthquake data, etc. From Brainerd, Mr. Purssell went north to Bemidji, Grand Rapids and other stations.

A fifteen years' contract has been granted M. D. Stoner and T. H. Crosswell to erect and operate an electric light and power plant in the village of Walker. The present plant at Walker has been unsatisfactory for some time, giving poor service, hence the granting of the franchise.

Toddling through the field to take his father some lunch, the little son of Mr. and Mrs. Charles William Rousu, living north of New York Mills, discovered the body of his father lying on the ground unconscious. The team was nibbling at the stubble a short distance away. It is believed that Rousu was overcome by a stroke of apoplexy.

Drafted men for the new National Army were honored at Silver Lake by a banquet that was attended by 500 persons. After the banquet the men were presented with a $5 safety razor donated by men of Silver Lake.

BOARD ORDERS AID OF $1,500,000 PAID

SUM TO AID SCHOOLS OF STATE MUST BE TAKEN FROM APPROPRIATION FOR 1918.

OFFICERS QUIT; PROBE ENDS

New Ulm's Mayor and City Attorney Resign, Putting End to Investigation of Charge of Disloyalty.

St. Paul.

The state high school board has voted to pay in full 1917 apportionments totaling nearly $1,500,000 in state aid to high and graded schools and teachers' training departments.

This action, following the board's order for payment of $1,070,921 deficits in high and graded school aid means, according to C. G. Schulz, state superintendent of education, that the latter payments, the legality of which is to be tested in the courts, must be drawn from the 1918 aid appropriation, which necessarily will be prorated at 40 per cent or less.

* * *

Officials Quit; Probe Ends.

Mayor L. A. Fritsche and City Attorney Albert Pfaender of New Ulm have filed their respective resignations with the city clerk there, following orders by Governor Burnquist suspending them from office pending an investigation on charges of disloyalty for having participated in an alleged anti-draft meeting at New Ulm.

Their resignations, Governor Burnquist said, will end the pending investigation on charges of disloyalty against those officials.

The inquiry will be conducted on a similar charge against Louis Vogel, auditor of Brown county and ex officio chairman of the local exemption board, the Governor said, in the absence of any report of his resignation from office.

* * *

Named Director of Children's Bureau.

William W. Hodson, Minneapolis, has been appointed director of the children's bureau, which January 1 will become a new active agency under the State Board of Control.

Mr. Hodson will begin his duties at once on preliminary work and an organization of perhaps twelve field agents and other assistants to administer the new law.

Establishment of the state children's bureau under model statutes exacted by the last Legislature, according to recognized authorities, is expected to make Minnesota the foremost state among those guarding the welfare of unfortunate children.

* * *

Mayo Proposal Accepted.

Regents of the University of Minnesota have accepted by unanimous vote the proposal of Drs. William J. and Charles H. Mayo for certain changes in the contract affiliating with the university the Mayo foundation for medical education and research.

By these changes the regents come at once into absolute possession and control of the foundation fund, amounting to $1,650,344.79. The trial affiliation period is also ended and the headquarters of the foundation may be moved from Rochester to the university, or any other place in the state, after 28 years.

* * *

Hygienists Cannot Do Dental Work.

"Dental hygienists" cannot be employed in Minnesota schools to supplement the work of regular licensed dentists in caring for the health of the teeth of school children, according to Lyndon A. Smith, attorney general, in his ruling given in response to an inquiry addressed to him by the Minneapolis school board.

So slight an operation as the pulling of a "baby" tooth with a string constitutes a "dental operation" under the laws of Minnesota, and may be performed for pay only by a regularly authorized dentist, according to the ruling of the attorney general.

* * *

New Secretary for Commission.

H. W. Libby of Winona has been elected secretary of the State Public Safety Commission, following acceptance of the resignation of Secretary John S. Pardee, Duluth, who has gone to Washington to take charge of publicity and advertising in the organization under H. C. Hoover, national food administrator.

* * *

Health Employes on Strike.

Four employes of the state board of health on the first strike in the history of the board have gone to secure more wages. Frank Cleve, Richard Saul, Howard Long and John Alver, all Minneapolis men, are said to have struck for an increase over their wage of $35 per month. They were employed to keep the laboratory clean.

* * *

Ask Temperature Rule Raise.

A petition by Minnesota railroads asking that the minimum temperature at which perishable freight will be handled be changed from 5 degrees below zero to 10 degrees above zero, was the subject of a hearing in the Minnesota Railroad and Warehouse commission. The railroads contend that under the 5-degree temperature rule they receive much frozen fruit and vegetables and there is no way of detecting at delivery whether or not it is frozen. The petition was made through the Moorhead inspection bureau.

The Smart Set in Millinery

Two-piece or three-piece matched sets in millinery are among the smartest things shown in the new displays for fall. The two-piece set is just right and designers have made it possible to select a hat and bag — a hat and collar—or a hat and cape or scarf, made to match; or, if they do not match in materials, some touch in trimming makes them kin. A silk hat trimmed with chinchilla, for instance, is bound for life to a high chinchilla collar by a veil that falls from the hat and is sewed to the upper edge of the collar.

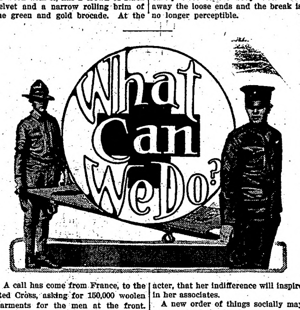
Leading the vanguard of matched sets came the hat and bag to match and this fancy is altogether so pleasing that hat and bag sets are quite likely to be found also in the rear of the fashion parade along about Christmas time. If you contemplate something unusual in Christmas gifts, that hat and bag set pictured here ought to prove interesting.

One of the smartest of smart sets is of brilliant green satin brocaded with gold and finished with green chenille tassels in the bag. The hat, to be worn with it, has a crown of black velvet and a narrow rolling brim of the green and gold brocade. At the back a flat tassel made of green chenille falls from the crown, and small, flat flowers, made of chenille are set about the crown.

A successful costume depends more upon handsome accessories like these than many of us realize. A plain, dark gown of satin in black or other color, is lifted into brilliancy by tricks of elegance, in hat and bag or hat and scarf, and is equal to formal wear by these means.

Small Breaks in Lace.

Where there are only a few threads broken in Irish or Swiss lace they can easily be repaired with a needle and thread the same size as that used in the manufacture of the lace. Place a tiny knot at the end of the thread on the needle and draw this through the place where the broken thread joins the body of the lace. Having done this, draw a succession of loop knots over the floating thread very tightly close to the base. Now follow with the new thread the course that the old thread has taken, and do the same with the other loose end, knotting it securely close to the body lace. Cut away the loose ends and the break is no longer perceptible.



What Can We Do?

A call has come from France, to the Red Cross, asking for 150,000 woolen garments for the men at the front. These include sox, mits, mufflers, sweaters, and they must be made by women. Everybody that is anybody is knitting, and everywhere milady goes her knitting—in a knitting bag of sorts—is sure to go, too—like Mary's lamb. People who never touched a knitting needle before have mastered the art of knitting sox and find the work fascinating.

When we contemplate the brief history of a pair of sox we realize that the task of furnishing them will never be through with until the war ends. Supplies of sox must be sent in relays, one after the other, because, sturdy as the knitted woolen ones are, they will wear out.

Mufflers are easier for the beginner, and the sort of sweaters required are not very difficult. They are sleeveless and are really chest and back protectors. All the knitted garments must be made according to standards, which will be furnished by the Red Cross to those who apply for them.

A luxury that can be made by women who do not knit—if there are any—will interest them. Feet that get sore in the trenches can be rested and helped to heal by felt slippers, and these can be made by women at home. As we care for the comfort of our men when they are at home working for us, so we must care for their comfort when they are away—working and fighting for us and for those that come after us. No woman can be indifferent now and keep the respect of her associates. Whoever she is she deserves the poor opinion of her character, that her indifference will inspire in her associates.

A new order of things socially may grow out of the banding together of women for war work. It will be an impossible and hopeless personality that is not benefited and uplifted by helping in the hour of need.

Julia Bottomley

Separate Waistcoats Now.

London and Paris have taken another step toward the masculine in fashions and makers are producing separate waistcoats, to be removed at will. They are made of the softest materials, with a striking pattern and and often they are knitted, and are cut roomy. Pockets at the sides with a watch fob hanging out of one of them are customary.

Under these waistcoats, of which plain shirtwaists are being worn, the jabot or fichu and the transparent sleeves are visible. It is customary with women wearing such waistcoats to remove the suit coat.

Use for Out-of-Date Blouses.

Blouses have a disconcerting way of looking out of date after any length of time. If there is a little girl in the family cut the waist down to make a long-waisted dress, using plain material for the tiny skirt.

Button Spats to Be Worn.

Buttoned spats promise to be as popular as ever for fall. The new spats fit beautifully and come in soft shades of gray and tan and in the new olive drab which is fashionable because it is the "soldier color."

One Hiding Place.

"This is a queer little hole of country of yours, Pat," said one of the Fly boys to our friend the other day.

"Begorra, an' as quare as it is," replied Pat, "there's wan thing ye can do in it that ye can't do in yer own country."

"And what is that?" asked the draft evader.

"Hide!" replied Pat.

Lemon Juice For Freckles

Girls! Make beauty lotion at home for a few cents. Try it!

Squeeze the juice of two lemons into a bottle containing three ounces of orchard white, shake well, and you have a quarter pint of the best freckle and tan lotion, and complexion beautifier, at very, very small cost.

Your grocer has the lemons and any drug store or toilet counter will supply three ounces of orchard white for a few cents. Massage this sweetly fragrant lotion into the face, neck, arms and hands each day and see how freckles and blemishes disappear and how clear, soft and white the skin becomes. Yes! It is harmless. Adv.

A Maniac in the Trench.

An officer writes about an incident which is probably one of the most gruesome that has been recorded of life in trenches:

One night as a working party under Lieutenant Rathbone was proceeding down a communication trench, they were fired upon from close quarters. On inquiry Lieutenant Rathbone ascertained that the shots came from a soldier who had run amuck, and had posted himself with loaded rifle and fixed bayonet farther down the trench. Lieutenant Rathbone borrowed a rifle, and, accompanied by Corporal Feldwick, advanced along the trench until in view of the mentally deranged man. They then advanced with rifles at the ready; the officer calling upon the man to surrender. Receiving no reply, they then dropped their rifles and rushed him, and after disarming him took him to the nearest dressing station. Corporal Feldwick, who is a prisoner of war, has also been awarded the Albert medal of the second class.

Horrid Man.

She—What is the correct translation of the motto of that lovely ring you gave me?

He—Faithful to the last.

She—The last! How horrid! And you've always told me before that I was the very first!

One or the Other.

Mabel—Don't you think that your husband would be happier if you let him have his own way more?

Tilda—He might be; but I wouldn't.

When a policeman hears a girl scream after dark he doesn't know whether she is being kissed or only assassinated.

Still Worse Punishment.

Weary William—This paper tells about a horse running away with a woman, and she was laid up for six weeks.

Boastful Ben—That's nothin'. A friend of mine once ran away with a horse, and he was laid up for six years.—Stray Stories.

LIFT YOUR CORNS OFF WITH FINGERS

How to loosen a tender corn or callus so it lifts out without pain.

Let folks step on your feet hereafter; wear shoes a size smaller if you like, for corns will never again send electric sparks of pain through you, according to this Cincinnati authority.

He says that a few drops of a drug called freezone, applied directly upon a tender, aching corn, instantly relieves soreness, and soon the entire corn, root and all, lifts right out.

This drug dries at once and simply shrivels up the corn or callus without even irritating the surrounding skin.

A small bottle of freezone obtained at any drug store will cost very little but will positively remove every hard or soft corn or callus from one's feet.

If your druggist hasn't stocked this new drug yet, tell him to get a small bottle of freezone for you from his wholesale drug house.—adv.

These Girls.

"Isn't it funny?" said Gladys, curiously, to her chum, Phyllis, "Father has promised to give me a pair of diamond earrings if I will stop having music lessons. I wonder why?"

"That's strange!" agreed Phyllis. "But you've never worn earrings, have you?"

"No. I shall have to get my ears pierced."

"That explains it," said Phyllis, an innocent smile curving her ruby lips. "He wants to pay you back in your own coin."

Too Willing.

Dora—I wonder why Harry broke his engagement with Miss Peckem?

Jack—According to my information, her father offered to lend him money enough to get married on.

Some men are about as beneficial to their fellow men as the hole is to the doughnut.

Not Very Good.

Mistress—I am not quite satisfied with your references.

Maid—Neither am I, but they are the best I could get.

This year's sweet girl graduate is on the war path.

Feed the Fighters! Win the War!!

Harvest the Crops—Save the Yields

On the battle fields of France and Flanders, the United States boys and the Canadian boys are fighting side by side to win for the World the freedom that Prussianism would destroy. While doing this they must be fed and every ounce of muscle that can be requisitioned must go into use to save this year's crop. A short harvest period requires the combined forces of the two countries in team work, such as the soldier boys in France and Flanders are demonstrating.

The Combined Fighters in France and Flanders and the Combined Harvesters in America WILL Bring the Allied Victory Nearer.

A reciprocal arrangement for the use of farm workers has been perfected between the Department of the Interior of Canada and the Departments of Labor and Agriculture of the United States, under which it is proposed to permit the harvesters that are now engaged in the wheat fields of Oklahoma, Kansas, Iowa, North Dakota, South Dakota, Nebraska, Minnesota and Wisconsin to move over into Canada, with the privilege of later returning to the United States, when the crops in the United States have been conserved, and help to save the enormous crops in Canada which by that time will be ready for harvesting.

HELP YOUR CANADIAN NEIGHBOURS WHEN YOUR OWN CROP IS HARVESTED!!!

Canada Wants 40,000 Harvest Hands to Take Care of its 13,000,000 ACRE WHEAT FIELD.

One cent a mile railway fare from the International boundary line to destination and the same rate returning to the International Boundary.

High Wages, Good Board, Comfortable Lodgings.

An Identification Card issued at the boundary by a Canadian Immigration Officer will guarantee no trouble in returning to the United States.

AS SOON AS YOUR OWN HARVEST IS SAVED, move northward and assist your Canadian neighbour in harvesting his; in this way do your bit in helping "Win the War". For particulars as to routes, identification cards and place where employment may be had, apply to Superintendent of Immigration, Ottawa, Canada, or to

R. A. GARRETT, 311 Jackson Street, St. Paul, Minn.

Canadian Government Agent.

THE KITCHEN CABINET

Every woman can render important service to the nation in its present emergency. She need not leave her home or abandon her home duties to help the armed forces. She can help to feed and clothe our armies and help to supply food to those beyond the seas by practicing effective thrift in her own household.—United States Department of Agriculture.

SEASONABLE GOOD THINGS

One never has too many good things in the fruit cellar for winter use. The following may be new to some and suggestive to many:

Apple Catsup.—Peel and quarter a dozen apples, stew them in a very little water until soft, then run them through a sieve. To a quart of the sifted apples add one cupful of sugar, one teaspoonful of pepper, the same of cloves and cinnamon and two medium-sized onions, chopped fine. Stir all together, add one tablespoonful of salt and a cupful of vinegar. Boil one hour and bottle while hot.

A cupful of apple juice added to two cupfuls of ripe grape juice will make a nice jelly.

Wild Grapes for Winter Use.—Carefully remove all the stems from wild grapes which have been picked after the frost has sweetened them and place them in a stone crock with layers of sugar between, until the crock is full. Cover with a double thickness of cloth and tie newspaper over the cover. Keep on the cellar floor in a cool place. The grapes cure themselves and keep their fresh taste. Huckleberries and blueberries may be treated in the same way.

Pear Preserves.—Pare the fruit very thin, make a sirup of a pint of water to a pound of sugar, and when it is clear, put in a pound of pears and stew gently until they are clear. Place a clove in the blossom end of each pear and add the juice and thinly pared rind of a lemon to each five pounds of fruit.

Peach Preserves.—Take three-quarters of a pound of sugar to each pound of the fruit. Put the sugar with a cupful of water and boil and skim. Pare the peaches and cut them in halves or quarters, then in the sirup for ten minutes. Take out the fruit carefully, placing it in the jar, boil the sirup for fifteen minutes or until it is thick, pour over the fruit and seal while hot.

Today may be all that is mournful—
Our paths cannot always be bright,
But tomorrow we'll somehow take courage,
And trustingly enter the fight.

A FEW SALADS.

A spoonful or two of cooked corn cut from the left-over vegetable added to a potato salad is a great improvement to the plain variety.

Corn Salad.—Allow half as much chopped celery and walnut meats as cooked, grated corn, season with onion, salt and pepper and dress with a French dressing. This may be served on lettuce leaves if desired.

Beet Salad.—Cut in small pieces six cooked beets, the same quantity of potatoes and celery. Mix the yolks of three eggs with olive oil, add vinegar, oil and seasonings to taste, stir well and serve poured over the vegetables.

Onion Salad.—Chop fine two Spanish onions and place on ice to chill. Arrange crisp lettuce in a salad dish and place the onion on this, sprinkle with chopped red pepper and olives, and serve with French dressing.

Watercress Salad.—Wash the cress, and when dry and crisp place in a salad bowl, cover with slices of cucumber, sprinkle with a teaspoonful of chopped onion and pour over a French dressing, using a little tarragon vinegar and three drops of Worcestershire sauce. Serve very cold.

Mixed Vegetable Salad.—Mix one cupful of cold cooked potatoes, the same amount of cooked peas, one-half a cupful of celery cut in dice and one cupful of tomato jelly, cut in cubes. Mix with French dressing, then arrange on a salad dish and serve with slices of tomato with mayonnaise dressing.

Tomato With Orange Salad.—Peel and slice six tomatoes and six oranges, arrange them in alternate rows in a salad bowl. Add oil and tarragon vinegar to the juice which escapes from the salad mixture; season well with salt and pepper, sprinkle with parsley and serve.

Chicken Salad.—Mix a cupful of cold cooked chicken with one cupful each of cooked peas and walnut meats, add mayonnaise to moisten and serve on lettuce with a garnish of olives.

Nellie Maxwell

Waste of Corn Fodder.

The loss to the farmers of the United States from the waste of corn fodder and grain straw is estimated at nearly $103,000,000 each year.

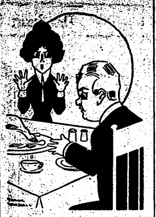
"Repairedness" Is Urged.

The farmer also should believe in "repairedness" and see that his fences are kept in good repair.

If Heart Is Out of Place.

No young man can succeed in farming if he has a gizzard where his heart ought to be.

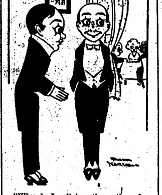
AGED



Landlady—Do you believe in old-age pensions?

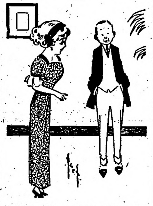
Boarder—Yes, I think this turkey is entitled to one.

WHAT'S IN A NAME?



"Why do I call 'em the cutlery family? Well, the daughter spoons, the father forks out the money, and the mother knifes the other guests."

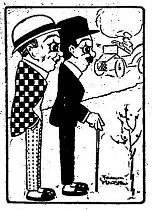
FORGOT HIMSELF



Hubby—Did you have many callers while I was away, dear?

Wifey—Every time I tried to bluff! I—er—that is to say, not many.

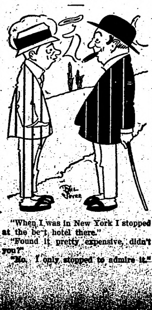
REAL HUMILIATION



"It must be rough to lose the roof over your own head."

"Yes, but think of having the mortgage foreclosed on your automobile."

THEN WENT ON



"When I was in New York I stopped at the be-t hotel there."

"Found it pretty expensive, didn't you?"

"No. I only stopped to admire it."

Not Such a Fool!

There is an amusing little story about Sir Eric Geddes as a boy which shows the new first lord of the admiralty possessed of resourcefulness at an early age.

He was somewhere about ten when, on being given $2.50 by his father as pocket money, he forthwith went and spent it all on a second or third hand bone-shaker. This earned him a severe reprimand from his parent for reckless extravagance, but the culprit rose to the occasion. Going out the next day he returned, having sold the bone-shaker for $10.

A bad boy seldom gets his badness from his father. The old man generally holds on to all he has.

A GUARANTEED REMEDY FOR

ASTHMA

Your MONEY WILL BE REFUNDED by your druggist without any question if this remedy does not benefit every case of Asthma, Bronchial Asthma, Hay Fever or Difficult Breathing. No matter how violent the attacks or obstinate the case

DR. R. SCHIFFMANN'S

ASTHMADOR

in either form (Cigarette, Pipe Mixture or Powder) positively gives INSTANT RELIEF in every case and has permanently cured thousands who had been considered incurable, after having tried every other means of relief in vain. Sufferers are afforded an opportunity of availing themselves of this "Money-Back" guarantee offer as through purchasing from their own regular Druggist, they are sure their money will be refunded by him if the remedy fails. You will be the sole judge as to whether you are benefited and will get your money back if you are not. We do not know of any fairer proposition which we could make.

Too Sick To Work

Many Women in this Condition Regain Health by Taking Lydia E. Pinkham's Vegetable Compound.

Convincing Proof of This Fact.

Ridgway, Penn. — "I suffered from female trouble with backache and pain in my side for over seven months so I could not do any of my work. I was treated by three different doctors and was getting discouraged when my sister-in-law told me how Lydia E. Pinkham's Vegetable Compound had helped her. I decided to try it, and it restored my health, so I now do all of my housework which is not light as I have a little boy three years old." —Mrs. O. M. Rhines, Ridgway, Penn.

Mrs. Lindsey Now Keeps House For Seven.

Tennille, Ga.—"I want to tell you how much I have been benefited by Lydia E. Pinkham's Vegetable Compound. About eight years ago I got in such a low state of health I was unable to keep house for three in the family. I had dull, tired, dizzy feelings, cold feet and hands nearly all the time and could scarcely sleep at all. The doctor said I had a severe case of ulceration and without an operation I would always be an invalid, but I told him I wanted to wait awhile. Our druggist advised my husband to get Lydia E. Pinkham's Vegetable Compound and it has entirely cured me. Now I keep house for seven and work in the garden some, too. I am so thankful I got this medicine. I feel as though it saved my life and have recommended it to others and they have been benefited".—Mrs. W. E. Lindsey, R. R. 3, Tennille, Ga.

If you want special advice write to Lydia E. Pinkham Medicine Co. (confidential) Lynn, Mass. Your letter will be opened, read and answered by a woman and held in strict confidence.

HIS OLD DREAM CAME TRUE

Miner Was Killed in the Manner That Was Foretold in Vision Twenty Years Before.

In a lecture at Blackwood Rev. M. Griffin of Cross Oak, a minister who, after forty years' preaching, is as vigorous as ever, referred to subconsciousness, the mysterious power that controls us even when asleep, says a Cardiff Mail writer. Outside the chapel one of his hearers narrated a curious incident which happened to a Blackwood man. He lived near the present railway station, and dreamed one night that while working on his stall as a miner a stone fell on him and killed him.

The dream was so vivid he gave up his work at once and emigrated to America. Twenty years later he returned to Blackwood and sought work in his old colliery. He was told that no one had been working in his old stall since he had left, and work was found for him in the adjoining stall. While engaged there his pick accidentally struck through the coal which divided him from his old stall, there came a fall and the twenty-year-old dream was fulfilled.

His Best One, Too.

There was a gathering of farmers in a little market town when in stalked one in a state of high dudgeon.

"Whatever's the matter, John?" inquired one of the others.

"Why, that bill collector has just been to my house and abused me."

"What did he say?"

"Oh, I remonstrated with him."

"How did that affect him?"

"I don't know—but I broke my best pitchfork handle."

Considerate Girl.

"Did you scream when he tried to kiss you?"

"No, there's a poor man in the next flat who is very sick."

For Safety's Sake.

Two brothers who live in an East Lancashire manufacturing town were noted for being exceptionally well-served with nasal organs.

One of the ring spinners at the mill where they worked invited them to a wedding, and promised to send a cab for them, says London Tit-Bits.

The cab duly arrived, and the two brothers entered and planted themselves down, one at each window.

In order to create an impression during the drive to the wedding, the two brothers were looking out of the cab, one on either side, so that the people could see them.

All went well until the cab came to a rather narrow railway arch, which our travelers had to pass through. The cabman looked back to take his bearings, and seeing the two brothers' noses sticking out of the windows on either side, shouted:

"Put them elbows in, please!"

The Plain Truth.

"We are going to entertain company tonight."

"Some people you like, I presume."

"Mercy, no! We would lose our social standing if we entertained people we like."

No quinine pill ever complains of its bitter lot.

HIGHLANDING NEWS

Mrs. Herman Larson and children Elmer and Helen returned Sunday from Iowa where she has been visiting her grandmother for the past month. Mrs. Larson left as a widow and came back with a husband. She is Mrs. Larson again now.

Mrs. Lore a sister to Mrs. Elo Sanders who came up from Liston, S. D. last spring and has been visiting her sister all summer, is the happy mother of a baby boy born Sept. 15th.

Mrs. Overum and children and Mr. and Mrs. Eliason and son Clarence and Davis Stixrud, Matt Erickson and H. Sorenson visited at Elo Sanders home Sunday.

Carl Lindstrom of Goodridge and Miss Ella Olson of High Landing autoed to the Red Lake Agency Sunday.

Mrs. Sever Nelson was called to Mrs. Elo Sanders sister. Mrs. Lore Monday, she was taken sick but is recovering rapidly now.

Matt Erickson and B. Stixrud and H. Sorenson autoed to Goodridge Sunday.

AIM FOR HIGHER STANDARDS

Achievements of Today to Become More Frequent and Production Will Be Raised.

In the future there will be higher standards of farming, whether it be a fruit farm or other branches of agriculture. The achievements that today read like the fairy tales of our childhood will become more and more frequent until the whole average of farming production will be raised.

FERTILIZER FOR GARDEN USE

Should Contain Three Chief Ingredients, Nitrogen, Phosphoric Acid and Potash.

For general garden crops a fertilizer should contain the three chief ingredients in the following per cents: Nitrogen, four; phosphoric acid, eight; and potash, ten. If for bulbs the potash content should be at least doubled.

CANVAS COVER FOR ALFALFA

With High Price of Hay and Frequent Showers Protection Affords Big Dividend.

This has been a year when the canvas covers for alfalfa have paid a dividend, with the high price of hay and the frequent showers. Stack covers will pay as well, as no one can afford to have any loss in quality of his hay.

SAVE LATE VEGETABLES

A cool, well-ventilated cellar under the dwelling offers good conditions for the storage of late vegetables. In cellars that are too warm on account of containing a furnace for heating the dwelling, a room may be partitioned off either in one corner or at one end of the cellar, where the temperature may be controlled by means of outside windows.

Barrels, crates, boxes or bins, may be used as containers for the various vegetables, but movable containers are preferable to built-in bins, as it is possible to remove them for cleaning. It is advisable to construct shelves or a slat floor to keep the crates, boxes, baskets, and other containers off the ground. This is highly desirable to insure a free circulation of air and to prevent the containers from harboring mice, rats and vermin. Shelves for canned goods along one side of the room need not be more than 6 inches wide.

Send for Farmers' Bulletins 847 and 879, United States Department of Agriculture, Washington, D. C. These give free of charge full information regarding storing.

SWISS CHARD FOR CHICKENS

Leaves Make Best of Green Food for Fowls, and Many Raise It Especially for That Purpose.

Swiss chard is fine if not allowed to get too large. It should be kept picked rather closely. The leaves make the best of green food for the hens and chickens, and many poultry keepers raise it especially for this purpose.

Ball game Sunday on the Goodridge diamond. Goodridge vs. Red Lake Indians. Come and see the fastest game of the season.

The Seperation of Church and State.

(Contributed by O. C. Schultz.)

The Lutheran church teaches that church and State are both of divine institution, that each has its proper functions and that they should be seperate, which means in plain language that neither should meddle in the affairs of the other. It is the function of the State to protect the inhabitants of the country, to make and enforce laws looking to that end, but the State has neither the duty nor the right to regulate the relations between man and his Maker.

It is none of the states business what we beleive or whether we believe anything, nor does it concern the State from which book we learn our doctrine, whether from the Bible or from the Koran. No church needs justify its system of religion, but each and every church or denomination should adopt its creed, conduct its services and practice its principals according to the dictates of its own conscience without interference from the State. The State should treat all churches alike—that is our portion in a nutshell. Special priveleges to one church mean persecution of the others. The State should enact no legislation which falls more heavily on some churches than on others. An instance: It must be a matter of entire indifference to the State whether the churches celebrate communion once a year or ten times a year, or never. If the State should hinder the Catholic church in its worship of Mary and all the other saints and in the free exercise of its mode of worship it does as great a wrong as when it officially accords that church or any other church prestige and favors by giving official recognation to a special mass or by other means.

The State knows no Jew nor Gentile, no Catholic nor Protestant. When the money of the unbelieving taxpayer is employed for the aid of some church, said taxpayer has a just grievance. The Catholic must not be compelled to support a Protestant institution and the Protestant taxpayer has a right to demand that his money should not be devoted to the maintenance of Catholic institutions.

Neither has the State the right to compel attendance at any divine worseip in the Army or Navy or in the public schools or anywhere else, nor to pay any minister of the Gospel from public funds. To make provisions for the spiritual welfare of the people is the function not of the State but of the church.

The church has but one function: to preach the Gospel, thereby to save sinners unto eternal life. It is the noblest, greatest, most soul satisfying work imaginable, a work which taxes all the resources of the church to the uttermost a work which is never completed as long as a single unconverted sinner inhabits the earth.

The Church has not been instituted to rule the world. It may have its doctrine concerning what is right and wrong, but it should not force its views upon the population, otherwise the strongest church will soon dominate the policies of the country in religious matters and will seek to oppress those who hold views contrary to its own. The history of the world shows that this has been the result whenever the Church has thus meddled in the affairs of the State by influencing legislation embodying its particular views of right and wrong. Social reform enforced temperance, the abolition of child labor systems of taxation, strikes, labor troubles are indeed great problems—for the State, but are not properly subjects in which the Church should concern itself or infiuence legislation. The Church is interested in the spiritual welfare of the people and only incidently seeks to allay physical suffering or supply education. Its one real function is to preach the Gospel.

Church and State, thus seperate, will be a great aid to one another. The State grants the church full religious liberty without favorites, and the Church aids the State by teaching submission to the laws of the land.

God's plan is best for both. Let therefore the State interfere in religious matters only if the practices of a religious sect are dangerous and harmful to good morals; and let the church do its own work and seek remedial legislation only in self-defence if the State should ever exceed its powers by enacting laws contrary to the principle of religious liberty.

That is Lutheranism and that—thank God—is Americanism.

Improve The Dairy Herds By Means Of Butter Fat Test. Co-Operative Cow Testing Assns.

The Popular Way.

By Ross P. White, Agricultural Director.

It is the constant aim of all progressive dairymen to improve their herds and this is quite largely accomplished by culling out and disposing of the low producing and undesirable annimals. This is the system being used at the present time by most of the farmers of Pennington County. This method involves a good deal of guess work. There is a system, however, which eliminates the guess, makes scientific dairying possible on the average farm with very little expense to the farmer.

We all know that there are certain characteristics of type, conformation, etc. which are desireable in a dairy cow and that a good judge can in a general way, tell whether a cow has those desirable characteristics and thus has a fair idea of the possibilities of a cow as a milk producer. The man who milks a cow during a lactation period also has a general idea of a cow's producing ability, but the milker or the judge cannot tell how much butter fat the milk contains. Neither knows by looking at the cow or the milk whether it contains 2.5 per cent butter fat or 5 per cent butter fat. The milker goes by the milk flow and the judge by the type, conformation etc. and at best both are misleading although they give us a basis on which to work when no better means are at hand. Even with the combined judgement of the judge and the milker we are unable to do much more than make a good guess as to the profitableness of the individual. There is only one accurate means of determing the economic value of a cow and that is by means of the butter fat test commonly called the Babcock Test.

When we realize that it is the opinion of the best practical dairymen in this country, that one-fourth of the cows kept on the farm for milk production are actually kept a a loss and that nearly one-fourth fail in producing an annual profit, we sometimes wonder why dairymen do not test their cows. The above proportions have in the main been born out by numerous experiments conducted by experiment stations and by extensive service of some of the leading dairy papers. In order to get the best result the testing should be done not as individuals but through co-operation with their neighbors and forming a Cow Testing Association which is a cheap means of determing the production of the cows which one is milking.

HISTORICAL

The first Co-Operative Cow Testing Association was formed in Denmark in 1895, where it had a remarkable growth, for within fourteen years there were 530 such organizations in that country alone and as a result they had doubled the average production of every cow in Denmark. The first organization formed in this country was formed at Fremont, Mich. in 1905. This association was the means of raising the average yield of butter fat for all the cows entered 49.5 pounds in four years. Wisconsin organized its first association in 1908 and had increased this number to 44 in July, 1916 and during the last year, 39 new associations were formed, thus nearl doubling the number of associations. The Wisconsin dairy farmer has found out the value of an accurate herd record.

MINNESOTA

Minnesota became active along this line in 1911, when four associations were formed and ever since that time there has been a rapid growth within this state especially in the southern half where it is more thickly settled. We were led to believe that there were not enough dairy herds in this section to warrant an association but a study of the checks paid the farmers of this section for their dairy products during the past few months would be enough to convince the most skeptical that the dairy cows of Pennington County must be reckoned with. This is essentially a dairy county and why not get together and give the cow a chance to show her worth by means of the Babcock Test and the milk scales and thus bring the cow into her own and eliminate the guess from dairying in this section.

THE PLAN OF ORGANIZATION.

Under the Co-opeative Cow Testing Association plan, twenty-five or six farmers agree to form an association, hire an official tester who conducts all tests, weighs all feed and does all of the figuring, leaving with the farmer a complete feed, milk and breeding record of all animals in his herd. Each member is furnished with a neat record book in which the tester records monthly the amount of milk produced, the per cent of fat, price of fat, total value of fat, the amount of each feed used, cost of all roughage, cost of grain, total cost of feed, cost of feed, profit, loss returns for one dollar's worth of feed, cost of producing one pound of butter fat, and the cost of one hundred pounds of milk. Besides this, a complete breeding record is kept by the tester and is recorded in the herd book. At the end of the year a summary of the herds record is made, also a summary for each individual. This enables the farmer tf thin out his low producing cows feed according to production, and properly build up his herd thru the selection of heifer calves from his highest producing cows.

Next week I will try to answer such questions as may be asked relative to the subject of Co-operative Cow Testing Associations, thru these columns. Address inquiries to U. S. Agricultural Department, Thief River Falls Minnesota.

Germantown News.

Everybody is busy digging potatoes.

Oscar Rambec is busy threshing for the farmers now.

Henry and Willie Ristau and Mrs. C. L. Wayne and son Lawrence made a flying trip to Thief River Falls Tuesday morning.

Mr. and Mrs. Emil Ristau and family and Hans Clausen made a short visit at Aug. Krause at Thief River Falls Sunday morning.

Nick Bundhund of Goodridge and Mr. and Mrs. C. L. Wayne and son Lawerence made a short visit at Mr. and Mrs. Leon Babcock at Thief River Falls Sunday morning.

A big fire here Monday and a good many hay stacks went.

Henry Ristau left us all here Thursday night for Warren where he intends to enter military service. We all wish him good luck.

Mrs. Strand of Thief River Falls is a visitor at the Hovelsos home.

Torgerson Farmers Club Holds Picnic Sunday.

Last Sunday the Torgerson Farmers Club held their annual picnic at the farm home of J. A. McEnelly. A large crowd was in attendance, a number of cars from Goodridge being present.

The first item on the program was a speech by C. L. Hanson of Thief River Falls, who talked on the benefits derived from Farmers Clubs and Commercial Clubf and stated that the two should work together. He ended up his speech with a little talk on the war, giving reasons for the present war. His talk was very interesting and [illegible] joyed by all.

Following the address a debate was held. Resolved: That cattle are Better than Shees.

Affirmative:

T. G. Hehe

Carl Wann

Negative:

J. A McEnelly

[illegible]

After a heated discussion the cow won out by a unanimous vote. Gunder Tweeten, Anton Knutson and Theo. Nelson were the judges.

After the debate a fine lunch was served which all present done full justice to.

Following the lunch, J. A. McEnelly spoke on how the farmers could dispose of their hay to the Dakota farmers at a reasonable price. After this the crowd dispersed for their respective homes feeling that they had spent a very enjoyable and profitable day.

Farwell Party.

Wednesday evening a farewell party was held in the Goodridge Hall for Miss Thelma Gilbertson who will leave for Warren where she will attend the North Star College. A large circle of her friends were present. Dancing was the main amusement of the evening. A fine lunch was served which was very much enjoyed by all. The party broke up about 1;30 having had a very enjoyable time.

WANTED!

GERMAN PLOTS ARE DISCLOSED

U. S. Gives Proof That Berlin Directed Violence and Intrigue in America.

COMPLETE SPY SYSTEM

Committee on Public Information Reveals Startling List of Teuton Underground Activties Against U. S. Government.

Washington, Sept. 24.—Further disclosures of far-reaching German propaganda, intrigues and plots in this country prior to the diplomatic break with Germany have been made by the committee on public information.

In a bulletin styled "official expose" the committee quotes the numerous letters and extracts from letters seized by the Department of Justice in April, 1916, in a raid upon the New York office of Wolfe von Igel. Von Igel, in carrying on his manifold pro-German and anti-American activities, the documents show, was in constant touch with the German embassy and with Count von Bernstorff, then the German ambassador to the United States.

Damning Evidence Found.

"In the form of letters, telegrams, notations, checks, receipts, registers, cash books, cipher codes, lists of spies and other memoranda and records," the committee says, "were found indications—in some instances of the vaguest nature, in others of the most damning conclusiveness—that the German Imperial government through its representatives in a then friendly nation was concerned with—

"Violation of the laws of the United States.

"Destruction of lives and property in merchant vessels on the high seas.

"Irish revolutionary plots against Great Britain.

"Fomenting ill feeling against the United States in Mexico.

"Subornation of American writers and lecturers.

"Financing of propaganda.

"Maintenance of a spy system under the guise of a commercial investigation bureau.

"Subsidizing of a bureau for the purpose of stirring up labor troubles in munition plants.

"The bomb industry and other related activities."

Holland a German Way Station.

The committee, of which Secretaries Lansing, Baker and Daniels are members and George Creel, chairman, has this to say concerning Holland:

"It has long been an open secret that Holland is merely a way station for shipments of contraband and into Germany. Here is official confirmation from the von Igel records which would seem to indicate a suspicious and confidential relation between the Holland commission and the German diplomatic officials accredited to this country, or possibly a belief by the Germans that they could not successfully get the munitions to their own country. The message in code with interlinear translation is entered as 'A 24993' and headed 'German embassy, Washington, D. C., April 6, 1916.' It runs as follows:

"Telegrams from Berlin by secret, roundabout way for Carl Heysen: Consent sale Holland three hundred thousand chests (cartridges) and two hundred tons powder. Please get in touch with Holland commission. Sender, war minister, foreign office, in representation.

"(Signed) Hatzfeldt."

Prince Hatzfeldt was an official of the German embassy.

Hamburg-American Lino Involved.

The Hamburg-American line's bureau of investigation, the committee states, an "Inocent pretending agency was at the outset the secret service of the Hamburg-American Steamship company. Under Paul Koenig, its manager, it became an adjunct of the German diplomatic secret service. A letter dated July 20, 1915, from 'O. R.', one of its operatives to '7,000' (characterized by the committee as Captain von Papen, former German military attache) tells of the payment of $150, to an unnamed person under peculiar precautions, after the recipient had made this statement:

"I intend to cause serious damage to vessels of the Allies leaving ports of the United States by placing bombs, which I am making myself, on board. These bombs resemble ordinary lumps of coal and I am planning to have them concealed in the coal to be laden on steamers of the Allies."

Money for Irish Rebels.

Money apparently went from German sources in the United States through embassy channels to Sir Roger Casement, the Irishman executed in London.

"Several lines of communication between the German diplomatic service and the Irish revolutionary movement are indicated in the captured documents," the statement continues. "John DeVoy, of New York, now editor of the Gaelic American, a violently anti-British paper, was one of the active agents of this connection. Significant entries appear here and there: references to messages from the German embassy at Washington and the German consulate at New York; mention of a secret code to be employed in communicating with him and of a 'cipher Devoy'; also a notation the details of which remains undiscovered, concerning 'communication remanufacture hand grenades.'"

Justice Cohalan Mentioned.

The following reference to Supreme Court Justice Daniel F. Cohalan of New York is contained, the committee states, in a letter found in the Von Igel papers in cipher with interlinear translation, dated New York, April 17, 1916, numbered 335-16 and ascribed at the top, "Very secret."

"Judge Cohalan requests the transmission of the following remarks:

"The revolution in Ireland can only be successful if supported from Germany, otherwise England will be able to suppress it, even though it be only after hard struggles. Therefore, help is necessary. This should consist primarily of aerial attacks in England and a diversion of fleet simultaneously with Irish revolution. Then, if possible, a landing of troops, arms, and ammunition in Ireland, and possibly some officers from Zeppelins. This would enable the Irish ports to be closed against England and the establishment of stations for submarines on the Irish coast and the cutting off of the supply of food for England. The services of the revolution may, therefore, decide the war.

"He asks that a telegram to this effect be sent to Berlin:

Addressed to Bernstorff.

This letter was signed "5132 8167 6230," and was addressed to Count von Bernstorff, "Imperial Ambassador, Washington, D. C."

A code message sent to Berlin was given as follows:

'National Germania insurance contract certainly promised. Executor is evidently satisfied with proposition. Necessary steps have been taken.

"HENRY NEUMAN."

Of this message the committee has this to say:

"Not so innocent and harmless as it looks, for what the message really means is this:

"'Irish agree to proposition. The necessary steps have been taken.'"

Prediction Far From Facts.

"Information carefully and extensively set forth in the secret documents of the German officialdom," the committee continues, "was sometimes wide of the facts. For example, a lengthy memorandum of March 1, 1916, transmitted by the secret agent, Capt. Boehm, dealing with the Mexican crisis, appears to have been largely the work of some fervid and projective imagination.

"It predicts that the President will attribute Mexico's anti-American activities to German money and incitement; that he will call upon Congress to support him in radical measures (the prophet even attempts to paraphrase the language to be employed in the message) that Congress will indorse the President's stand, following which upward of 150 German spies and agents provocateurs were to be arrested with the ambassadors of the Teutonic powers to receive their passports."

After citing an extract from Capt. Boehm's letter, the committee states that he was "too loose of tongue" for the good of his service and, citing a report of the German military information bureau of March 21, 1916, quotes the report as follows:

"Too great confidence in the silence of his fellowmen, especially the members of the American Truth society—was probably the cause of his becoming quickly known here."

"Pure War Expenses."

An entry entitled "Pure war expenses," from the Von Igel papers is made public by the committee as follows: "'Erwin Emerson, $1,000. Fair Play, (Mr. Braun), $2,000.

"'Fair Play, (Mr. Braun), $1,500.

"'Marcus Braun, $1,000.

"'J. Archibald, $5,000.'"

The statement continues:

"Concerning the identity of the last entry there might be room for doubt, but for a signed receipt from J. F. J. Archibald, acknowledging the sum of $5,000 from the German embassy for propaganda work."

The committee concludes its expose as follows:

"While chiefly concerned with military affairs in Europe the representatives of a supposedly friendly nation were keeping an interested watch on our own activities in that line. A secret code message of April 11, 1916, signed '13232 46729 46919' addressed Von Igel to this effect:

"'Herewith respectfully send an extract regarding the troops stationed in California and the armament of the coast fortifications.'"

Italians Give Jewelry for Country.

Rome, Sept. 24. — Nearly 1,000 pounds of gold has been donated to the treasury department during the past four months in the form of ornaments, old coins and family jewelry. The golden crown of Prince Amedeo, the father of the duke of Abruzzi, was one of the gifts originating in the city of Turin. Venice so far has led all the cities of Italy with 220 pounds of gold. Florence has given 90 pounds, Milan 200 pounds, Brescia 55 pounds, Rome 100, and Turn about 180.

Britain Treats Prisoners Best.

London, Sept. 24.—Admission that the treatment of German war prisoners in Great Britain was superior to the treatment received in any other country was made by the chief German delegate to the recent conference of British and Germans on war prisoners, according to a statement made by Baron Newton, one of the British delegates, in the house of commons. Virtually no complaint was made of the British methods of handling prisoners.

BRIBE CHARGES BASED ON RUMOR

Representative Heflin Says He Has No Proof That Solons Accepted Money.

PROOFS ARE DEMANDED

Congressman Norton Calls for Punishment of Accusing Solons If Assertions Are False—Bitter In Arraignment.

Washington, Sept. 26.—A resolution calling on Representatives Heflin of Alabama and Howard of Georgia to prove insinuations made in published interviews that members of the house benefited directly from the fund of $50,000 asked by former Ambassador Bernstorff to influence the American congress against war, is promised by Representative Norton of North Dakota, speaking on the floor of the house.

"The gentleman from Alabama says he can point out 13 or 14 members who have acted suspiciously, inferring that they received part of the $50,000 granted Ambassador Bernstorff," said Mr. Norton. "I don't know of any greater injury to our form of government than to charge that fellow members are corrupt and have taken money to influence their actions.

"I don't believe there is a scintilla of truth in the statement. If it is true no punishment is severe enough for those members.

Proof of Statement Demanded.

"If it is false, apologies won't correct the injury. If the gentleman from Alabama should go down on his marrow bones he could not undo the injury he has done.

"I know of no punishment severe enough to be dealt out to that kind of character. The gentleman from Alabama should be obliged to prove his charges or accept the punishment he so richly deserves."

Mr. Norton read an interview with Representative W. S. Howard of Georgia, in which the latter was reported to have said some members "look more prosperous than before."

"The gentleman from Georgia should be required to prove his statements. I shall offer a resolution calling upon them to submit proof. If they cannot prove them, they should take the consequences."

Mr. Heflin denied that he had charged that any member of the house had received any of the Bernstorff money.

"I have said that some members of the house have acted suspiciously," he said.

Admits Lack of Proof.

"Name them," shouted several members.

"I can't prove anything," continued Heflin, "but the Bible tells me that a tree is known by its fruit, and I judge men by their actions."

"If I had proofs I would name them." This brought cries of derision from all parts of the chamber, which were so vigorous that the speaker had to rap for order.

Howard Repudiates Interview.

Representative Howard told of his conversation with a reporter, which was to the effect that if Bernstorff expected to influence congress with $50,000 he was "a cheap skate." He was interrupted by Representative H. J. Moore of Pennsylvania, who read the purported interview in which Howard was quoted as saying that he believed he could pick out members who had acted suspiciously, and some of them looked more prosperous than they did.

"Did you use any such language?" asked Mr. Moore.

"I never said that nor anything like that," declared Mr. Howard.

TO GET AUSTRALIAN WHEAT

Excess of Crop to Be Sent to Relieve America.

Washington, Sept. 25.—Australia has informed the State department that it is encouraging in every way possible the exportation of flour and wheat to the United States.

Indications are that a greater part of that country's surplus of 135,000,000 bushels will find its way here in the form of flour before another wheat crop is harvested.

Swiss Foodstuffs Board Created.

Berne, Sept. 25.—Following the announcement of the American embargo the government has announced the creation of a commission of 12 members to control and apportion such foodstuffs and raw material as may be secured by Switzerland from any source.

Shipload of Beef Sunk.

An Atlantic Port, Sept. 25.—The British steamship Lanegra, on her way from Buenos Aires to Havre with a cargo of Argentine beef, was sunk by a German submarine September 3.

Engineer Killed in Smashup.

Belle Plaine, Sept. 24.—Martin Maloney of St. Paul, engineer on Chicago, Minneapolis, St. Paul and Omaha passenger train No. 10, was instantly killed when the train ran through an open switch near this place. Except for a broken wrist suffered by another railroad employe there were no other injuries. A freight train previously had occupied the side track joining the main line at the switch and it is believed possible the freight's crew left the switch open when their train left.

GERMAN PLANE BROUGHT DOWN IN FLAMES

FRENCH OFFICIAL PHOTO

French officers and poilus inspecting the ruins of a German airplane brought down in flames in the Aisne district.

KORNILOFF ABSOLVED

Exonerated From All Blame In Connection With Revolt.

Russian Embassy at Washington Issues Statement Asserting Uprising Came From Misunderstanding.

Washington, Sept. 26.—Absolution from all blame for the recent uprising against the Kerensky government in Russia is given General Korniloff by the Russian embassy here.

It was officially explained by the embassy that Korniloff's defection resulted from a "mutual misunderstanding" between him and Kerensky. This is taken as official forecast that Korniloff will not pay a penalty for his revolt.

In a lengthy statement the embassy explains that charges that Kerensky was behind the Korniloff uprising had their inception in negotiations between Kerensky and Korniloff and the later misunderstanding.

WHEAT CROP SHOWS INCREASE

World's Yield 3.3 Per Cent Greater Than Last Year.

Washington, Sept. 25.—The world's wheat crop this year for the principal countries which have reported, including the United States, is 1,665,489,000 bushels, an increase of 3.3 per cent over 1916, according to reports from the International Institute of Agriculture at Rome, made public by the Department of Agriculture.

The world's barley crop is 464,289,000 bushels, an increase of 2.4 per cent; the rye crop, 89,950,000 bushels, an increase of 10.7 per cent; the oats crop, 1,995,504,000 bushels, an increase of 19.9 per cent, and the corn crop, 3,273,996,000 bushels, an increase of 25.3 per cent.

Algeria, the latest country to report, shows wheat production of 29,715,000 bushels, an increase of 1.9 per cent over last year. Her oats crop is 18,946,000 bushels, an increase of 44.2 per cent, and her barley crop, 33,208,000 bushels, a decrease of 7.7 per cent.

GERMANS LOSE ON RIGA FRONT

Leave Dead on Field When Russians Take Offensive.

Petrograd, Sept. 25.—Russian forces on the Riga front south of the Pskoff high road have taken the offensive, and, after a fierce struggle, occupied the German positions in the sector of Silzene, the Russian war office announces.

"The enemy lost severely, leaving over 400 corpses on the field. We captured 60 prisoners and 10 machine guns," the statement reported.

The object of the Russian command in initiating this attack and other not dissimilar operations recently reported from the Riga-Dvinsk front, may very likely be the rectification of the line east of the Dvina at points where it is now weak.

GERMAN POSITIONS ARE TAKEN

British Take Offensive and Capture Many Prisoners.

London, Sept. 24.—British troops, after repulsing a German attack northeast of Langemarck in Flanders, attacked in turn and captured additional defenses from the Germans as well as a number of prisoners.

"Our airplanes," says the official statement, "carried out successful bombing raids and dropped during the day 134 bombs on hostile billets, hutments and airdromes. In the night three tons of bombs were dropped on the Roulers Menin and Wervicq railway station.

Wilson Gets Wheat Growers' Protest.

Washington, Sept. 22.—A delegation of Northwestern wheat growers and dealers presented to President Wilson their claim that wheat prices fixed by the government work a great hardship upon the Northwest, calling for some measure of relief. Because of the addition of a differential of about 30 cents a bushel to the Chicago price of $2.20, the President was told it is almost impossible to sell Northwestern wheat. Senators Chamberlain, Poindexter and Brady introduced the delegation at the White House.

DEMANDS STATEMENT

Argentina Sends Ultimatum to Germany.

Reply Awaited Pending Rupture of Diplomatic Relations or Declaration of War.

Buenos Aires, Sept. 25.—An ultimatum to Germany has been sent by the Argentine government.

In its note the government demands a formal statement from the German government of its attitude toward the behavior of its minister Count von Luxburg and a repitition of the promises made respecting Argentina shipping in connection with the Toro settlement.

The Argentine government has received no explanations from Berlin since the disclosures by the American secretary of state except a verbal statement from Baron von Dem Bussche-Haddenhausen, undersecretary of the German foreign office made through Dr. Molina, the Argentine minister to Berlin, which Argentina considers insufficient.

The government is anxiously awaiting Berlin's response before deciding on a rupture of relations or a declaration of war, and according to the foreign office, if the German government's reported appreciation of Von Luxburg is confirmed, Argentina will consider it an insult and declare war immediately. If no confirmation of this report is forthcoming only a rupture of relations is likely.

ASK EXEMPTION OF FARMERS

Spokesmen for Agriculturists Call on President.

Washington, Sept. 26.—Spokesmen for the nation's organized farmers asked President Wilson to order a more liberal application of the army draft law to farm labor in order that agriculture may do its part in the war. They urged that the government not only should exempt men who apply, but should make it its business to keep skilled farmers out of the military service and require them to remain at their posts as producers.

The delegation that called at the White House was headed by a committee of the Federal Board of Farm organizations and included the Legislative committee of the National Grange and members of the House and Senate from the great agricultural states. The Federal board's committee presented a memorial setting forth the farmers' situation and formally asking relief.

"The situation demands prompt and effective action on the part of the government. There is growing unrest and dissatisfaction on the farms, based in great part upon the well-founded belief that the purpose of the government is not carried out. The organized farmers of America look to you to set this matter right," the President was told.

MORE EXPOSURES TO BE MADE

United States has Further Sensasional Proof of Intrigue.

Washington, Sept. 25.—While there is no indication of what will be the state department's next disclosure of German intrigue in America or elsewhere it is known that disclosures as sensational as any yet published are being held in reserve and may be made at any time.

One of the things the state department has is a list of persons who received German money in the passport frauds, the munitions plots and practically all the other activities of German intrigue here which took place between the beginning of the war in August, 1914, and the entry of the United States into the conflict.

Ship Builders' Strike May Be Halted.

Washington, Sept. 25.—Shipping board officials felt encouraged that construction of government ships at San Francisco would not be delayed much longer by the strike of iron workers there following receipt of reports that union men have agreed to work if a temporary wage agreement can be reached. It was felt a temporary settlement should be comparatively easy and that some permanent basis is for a uniform wage scale in all Pacific coast shipyards would be developed within a few weeks.

BIG CUT MADE IN PRICES OF STEEL

Agreement Between War Board and Manufacturers Approved by President Wilson.

COKE PRICE TO BE CUT

Reduction Amounts to 62.5 Per Cent—Wage Scale Not to Be Affected, According to Schedule Which Is Subject to Revision.

Washington, Sept. 26.—President Wilson has approved an agreement between the war industries board and the steel men for figures on steel and its products, covering reductions of from 50 to 70 per cent.

Under powers conferred in the priority of transportation act the war industries board will supervise distribution of steel in a manner best calculated to win the war.

Prices Agreed Upon Announced.

Steel prices agreed upon between the government and producers were announced as follows:

Steel bars at Pittsburgh and Chicago, $2.90 per hundredweight. The recent price was $5.50. Reduction, 47.3 per cent.

Steel Plates—Prices agreed upon, $3.25 hundredweight; recent prices, $11 hundredweight. Reduction, 70.5 per cent.

Pig Iron—Price agreed upon, $33 gross tons; recent price, $58. Reduction, 43.1 per cent.

Steel Shapes—Basis Chicago and Pittsburgh. Price agreed on, $3 hundredweight; recent price, $6 hundredweight. Reduction, 50 per cent.

Other prices agreed upon, all subject to revision Jan. 1, 1918, but to become effective immediately, follow:

Iron ore, basis, lower lake ports, price agreed upon, $5.05 gross ton. No change.

Coke, Connelsville, price agreed upon, $6 net ton; recent price, $16 a ton; reduction, 62.5 per cent.

No Wage Reduction.

The announcement was accompanied by the following statement:

"It was stipulated, first, that there should be no reduction in the present rate of wages; second, that the prices above named should be made to the public and to the Allies as well as to the government; third, that the steel men pledged themselves to exert every effort necessary to keep up the production to the maximum of the past, so long as the war lasts.

To Facilitate Production.

"Measures will be taken by the war industries board for placing orders and supervising the output of the steel mills in such manner as to facilitate and expedite the requirements of the government and its allies for war purposes and to supply the needs of the public according to their public importance and in the best interest of all, as far as practicable.

"A spirit of co-operation was manifested by the steel men and no doubt is entertained that every effort would be made to bring the production as nearly as possible up to extraordinary demands resulting from the war."

COMMENTS ON DISCLOSURES

German Paper Says U. S. Expose Has Disagreeable Character.

London, Sept. 25.—In commenting on the latest Washington disclosures concerning the activities of Count von Bernstorff, former ambassador to the United States, the Koelnische Volkszeitung, according to an Amsterdam dispatch to Reuter's, says:

"This affair, if true, has a very disagreeable character and it is highly regrettable. The American government, God knows how, was able to get hold apparently of the whole collection of German diplomatic documents, which it is now exploiting against us and Sweden."

ARGENTINE NAVY MOBILIZED

Preparations for Contingencies Are Being Made.

Buenos Aires, Sept. 25.—Mobilization of the Argentine navy has been ordered at a rendezvous 37 kilometers from Buenos Aires. There is also unusual military activity in the republic. Although this is ostensibly due to the general strike, a high official said that the general staff has its eyes open to "other necessities." German influences are believed to be behind the strike.

If there is a declaration of war, it is declared Argentina will send two divisions to Europe and will not be content with a passive attitude.

"QUART A MONTH" DOES NOT VIOLATE DRY LAW

Huntington, W. Va., Sept. 25.—The West Virginia "quart-a-month" law, which permits the bringing into the state of one quart of liquor each month, does not violate the federal bone-dry act, according to a decision handed down by Judge Benjamin F. Keller in federal court here. The court held that the federal statute does not apply to the bringing in of liquor for personal use.

Recount in New York Primary.

New York, Sept. 25.—The application of Mayor Mitchel for a recount of the vote in the Republican primary last Wednesday has been presented in the supreme court here before Justice Cohalan, who said he would sign the order. Counsel for William M. Bennett, whom the mayor defeated by a small margin on the face of returns, and counsel for the board of election both entered formal consent to the recount. It is expected the work of going over the ballots and recounting them will begin at once.

"CONTRABAND"

A Romance of the North Atlantic

by RANDALL PARRISH

AUTHOR of "MY LADY of the NORTH," "MAID of the FOREST," ETC.

COPYRIGHT A.C. McCLURG & CO.

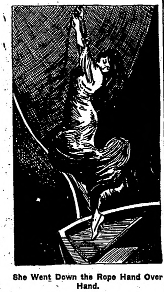
HOLLIS AND VERA BECOME VERY FRIENDLY, THOUGH HE IS UNAWARE OF HER IDENTITY—M'CANN MAKES TROUBLE AND REGRETS IT

Synopsis.—Robert Hollis, who tells the story, is a guest on Girard Carrington's yacht, Esmeralda. It is supposed to be a "stag" party, and Hollis is surprised on discovering a woman, who evidently wishes to remain unknown aboard. Hollis, the next night, succeeds in having an interview with the woman. She merely tells him her name is Vera. Carrington tells his guests of the coming war, and that he is engineering a copper pool. The yacht is sunk in a collision and Hollis saves McCann, millionaire, and one of the party. Hollis and McCann rescue Vera and leave the ship in a small boat.

CHAPTER V—Continued.

—4—

The sight of the little craft, stanch and buoyant, bobbing about just below us in the glow of light, brought back my courage. Ay, there was a chance here; we could get free of the doomed yacht; we were not to perish like drowning rats, helplessly. To be sure, the boat was a small one, a mere dinghy intended for use in smooth waters; why they had continued trailing it astern so far at sea was a mystery; yet it would bear the three of us unless a storm arose. There was no time to seek either blankets or provisions, nor was there any fresh water to be had—but at least we need not go down with the ship. We had still a hope of rescue, a fighting chance—God be thanked for that!



She Went Down the Rope Hand Over Hand.

My hand closed over hers as she turned and looked at me. Never in any eyes have I seen such glimpse of steady courage.

"The boat is strong, stanch; she will carry us, Mr. Hollis?"

"Ay! this is better than I dared hope. But there is no time to lose; the yacht is settling fast—see those bubbles of air! Why, I can almost feel the droop of the planks beneath my feet. Here, McCann, bear a hand! Pull yourself up by that flag locker; now get a grip here. Are you sailor enough to slide down that rope?"

He stared at the boat, bobbing up and down on the black water, with lackluster eyes.

"It—it will sink," he half sobbed, "it—it is almost full of water."

"Sink nothing!" my disgust rising beyond control. "It will hold twice your weight. Down with you, and bail. Then stand by to help the lady. Over you go, my lad, if I have to pitch you headlong; this is no time to argue the matter. Will you try it quietly?"

He stared up into my face, but his fear of me must have been greater than of the lapping water below, for the strands of the rope slipped through his fingers, and an instant later he clambered into the bow of the boat, and sank onto his knees in the water. To my relief the dory did not sink greatly beneath his weight, the water shipped proving scarcely ankle deep. It would support the three of us without bailing. The yacht rolled to starboard, fairly burying her rail. I thought she would never rise again, and my arms clasped the girl to hold her steady. Then the hulk rose slowly, painfully, like a giant struggling for one last breath. No words can describe the dead, sodden feeling of the sinking hulk under us.

CHAPTER VI.

Adrift in the Boat.

To cling there longer, to delay another moment, would be suicide. I leaned far over and looked down at the dinghy now rising and falling on the swell caused by the plunge of the yacht. McCann was upon his knees clinging to the gunwales, his face turned upward pleadingly toward the light.

"Catch this lantern, McCann," I called down to him sharply. "I will swing it to you on the end of a rope. Easy, man! Now throw off the lashing, and make the glim secure on the thwart behind you; better tie it to the lock. Good; you'll make a sailor yet. Now listen: work your boat over until you can get a grip on the rudder chains, and hold her steady—yes, to your right; use one of the oars. Now hang on—I'm going to send the lady down; stand by to give her a hand."

He did as I bade him in a fashion, but was so awkward about it, I wondered the boat kept upright. Satisfied, I glanced aside at my silent companion.

"Not a very easy gangway, but the best we have. Are you afraid?"

She smiled.

"Not in the least, Mr. Hollis; these skirts are a nuisance, but I can climb like a boy. Help me keep my balance on the rail."

She was over so quickly I can scarcely recall more than clasping her arm and she went down the rope hand over hand, as lightly as a sailor. By the time she reached the boat, her body was half submerged in the water, but McCann gave her his hand, and assisted in dragging her in over the side.

"I am all right, Mr. Hollis," she called in her clear, steady voice. "Now you come—come quick!"

"Just a second more," I answered. "Here is the line; haul it in. Get out your oars, McCann, and pull. Don't wait, or you'll be sucked down when the yacht sinks. Never mind me; I'll jump from the rail, and swim out to you."

I climbed onto the rail, gripping an iron stanchion for support, and poised myself for the plunge. The boat, surrounded by its little circle of light, drifted away, McCann awkwardly struggling with the heavy oars. The lantern rays fell full on the girl's upturned face, and once she held out her hands in pleading gesture. It could scarcely have been a minute I hesitated, yet suddenly beneath me came a sound of rending wood, a muffled explosion, and the deck reeled as though burst asunder. I leaped straight outward, and went splashing down into the sea.

I must have sunk deeply, for I felt no swirl of the waters, no suction, but when I came again to the surface, nothing was visible but the bobbing lantern on the dinghy. The Esmeralda had disappeared. A faint cry reached me, and I answered it, striking out strongly toward the guiding light. Five minutes later, dripping and a bit exhausted—for I had been ashore a long while—I managed to clamber in over the stern. Even as I rested breathless on the thwart, I realized that the girl had crept aft, and her hands sought mine.

"Oh, I am so glad," she sobbed, almost hysterically. "I was afraid; I—I thought you went down with the yacht."

"No such luck. I jumped just as her decks blew up. Is there anything in sight?"

"I—I haven't looked; but there is no sound, no light anywhere. Do you suppose the steamer has really left us?"

"I have no doubt of it," I answered, but stood up so as to see about more clearly. "They supposed all who lived had been picked up, and then continued on their course."

My eyes ranged the horizon, but I found nothing. We were alone on the great ocean in the grasp of the black night. I sat down again dazed for the instant by the immensity of the waters, the utter loneliness, and the sudden realization of the littleness of this cockleshell in which we floated. Her voice aroused me to a comprehension that I alone was a sailor, and that on me depended every chance for life.

"Do you know, Mr. Hollis, where we are?"

"Not exactly. I heard the captain state the position of the yacht yesterday noon, about one hundred and fifty miles east and south of Montauk; we have drifted some since."

"Are we in the steamer lanes?"

"Not of the north Atlantic liners; they would pass farther eastward. I cannot imagine what that fellow who rammed us was doing up in here so far out of his course. Yes, that was a liner; I could see the lights of her ports. The only vessel passing along here will be coasters, or, by luck, possibly some tramp bound Boston way. Now let's see what is on board; try the locker forward; and Miss Vera, you might examine beneath the stern sheet. This boat has never been inboard since we sailed."

They went at the task as though glad of the opportunity, McCann creeping forward on hands and knees.

"There's nothing here," he reported discouragingly, "but a roll of tarpaulin, some rope ends, and the splintered handle of a paddle."

"Well, what more do we want? That means a sail, if we can make a hole in one of the thwarts to step a mast. How much cloth is there?"

"Two or three yards."

"Pass it back here; good, solid stuff that. Now, Miss Vera, what are your discoveries?"

She looked up quickly, her eyes sparkling in the dim gleam of the lantern.

"A bag of sea-biscuit, a small beaker of water, insipid, but sweet, some strong cord, and a brad awl."

"Lord!" I exclaimed, "this is almost too good to be true. Why, we are outfitted for a voyage. However, there is little use endeavoring to rig up a jury mast before daylight, when we know in which direction to steer. McCann, you haven't been overboard, and, no doubt, your watch runs; what time is it?"

He fumbled about and found the timepiece, staring at it in amazement.

"Must have stopped, Hollis," he said. "No, by jove, the thing is running all right; the hands point to 1:30."

"That's about the hour. The collision occurred before eight bells, or else Seeley would have been on the bridge, instead of aft by the cabin. Have you any idea who was saved?"

"I heard the captain's voice back there under the awning, ordering out the boats, and after I was caught under that wreckage Carrington came up from below and climbed along the rail. I called to him, but he paid no attention; there was considerable noise then, and he might not have heard me."

Vera was leaning forward listening.

"Did Mr. Seeley leave in the boats?" she asked. "Was he hurt?"

I tried to stop him from answering by a gesture of my hand, but the man was gazing out over the port quarter, and saw nothing.

"Seeley—the second mate? No, he didn't get away. The same spar that got me, caught him, and he never spoke after that; seemed like a nice fellow, too."

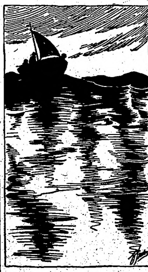
Her face was like marble in the lamplight.

"He was killed! Then it was because he was killed he did not unlock my door; I—I am glad I know."

She buried her face in her hands, and sat there motionless. There was nothing I could do, or say, for I had no conception as to what the man was to her—lover, husband, father, friend? Truly only the last relationship appeared possible, for seemingly there could be no closer ties between the two. They were clearly not of the same class, yet the girl's sorrow was evidently real and genuine.

To relieve my mind, I compelled McCann to pick up a panakin, which had lodged under a thwart, and bail out the boat. He crept about, grumbling to himself, but did a fairly good job. As no water oozed in through the seams, we were soon floating, with much greater buoyancy, the planking under foot rapidly drying.

The night was dark and thick, but without rain. My wet clothes clung to me in discomfort, yet I had no reason to fear evil results, as the air was warm, and the salt water had its own virtue. It was a gray, ghastly morning, the sky overcast, the great surges bearing down upon us, ever racing toward our little cockleshell, terrifying in their aspect. The sharp bow of the dinghy rose to them buoyantly enough, but the broad expanse of troubled waters stretching all about, the black, cloud shadows overhead, and the little boat in which we were tossed, combined to bring to me a feeling akin to despair. The only hope was the possible overhauling of some passing ship, but the lowering sky scarcely enabled me to see clearly a hundred yards, even in the light of the gray dawn. A rescuing vessel might easily pass us by within a quarter of a mile unseen, nor had we any means of attracting attention. I confess that, sitting there in loneliness, staring about into the grim expanse of fog and sea, I fell into a blue funk. Nor was I greatly heartened when the sun finally rose above the horizon, for it was no more than a sullen red glow, barely visible through the clouds of vapor, and only rendering more ghastly than ever the heaving leagues of ocean.



It Was a Gray, Ghastly Morning.

My glance turned downward to my companions in the boat. McCann still slept, with head pillowed on his arm, but the woman lay with her eyes wide open, looking upward at the drifting spume. Her eyes met mine, and she sat up, grasping the gunwale with one hand, and stared about her over the drear expanse of sea.

"There is nothing in sight?" she spoke wearily. "Are you sure Mr. Carrington made his escape?"

"As certain as I can be. I did not see him after I left the party in the after cabin last evening. But McCann insists that he came on deck, and joined the others in lowering the boats. Beyond doubt he got away safely, and was picked up by the liner."

She was silent for some time, her gaze on the man sleeping in the bows. He rolled over, revealing his face, gray and haggard in the dawn.

"Who—who is that man?" she questioned. "You call him McCann; is he a sailor?"

"No; he was one of the guests. He is a rich man's son, who occasionally takes a flyer on Wall street."

"Not—not Fergus McCann?"

"I believe that is his name, now that you recall it. Why? Did you ever know the fellow?"

"Only by reputation, which is not the best. He was involved rather unpleasantly in the Bascom shooting case."

"Aye, I remember. I read about the affair in a Chicago paper at the time, but failed to comprehend it was this McCann who was involved. Did Bascom die?"

"He will be crippled for life; of course his assailant may not have been entirely to blame—it was a drunken quarrel over a woman."

"Well," I said quietly, "the man is in for a job of sailor work here, whether it pleases him, or not. He acted a bit sullen last night, but I am in no mood just now to baby him. Have you ever steered a boat with an oar, Miss Vera?"

"I have done lots of canoeing, and last summer at Palm Beach," she stopped, laughing at the slip— "Yes, actually at Palm Beach, I steered some larger boats. I—I believe I could."

"You will find this somewhat different. Still, there is not much of a trick to it, and I am going to let you try your hand. Do you think you can hold her all right?"

"Of course I can," almost indignantly. "Really, Mr. Hollis, I have steered boats in worse seas than this. If the oar wasn't quite so heavy—"

"There is no steering paddle aboard. Well, if anything goes wrong, sing out. I'm going to rout out that fellow forward, and get at our work."

I cannot say that McCann was particularly pleasant about it; he had a way of showing that he rather resented my assumption of authority, and performed what I ordered with a deliberation which was almost insolent. However, he made no open revolt, and I thought it best not to anger the man unnecessarily. We worked steadily for an hour, the fellow proving practically useless, except to hand me the article required, or to throw his weight on a rope's end. Vera succeeded in holding the boat steady, although I thought the weight of the waves increased as though we were on the outer edge of some storm.

I lashed an oar upright to a thwart, bracing it securely by ropes to oarlocks on either side; then secured the broken paddle handle as a spar, notching the oar to give purchase, and rigged up the tarpaulin, being compelled to use rope-ends to secure it in position. It was a rough job, yet the stiff canvas bellied out in the wind, and I was conscious of a thrill of hope, as I crept back to the stern sheets, grasped the steering oar, and headed the boat into the southwest.

CHAPTER VII.

I Enforce Authority.

Scarcely had we taken this new course when the sun, now well above the horizon, a red ball of fire, burst through a rift in the clouds, and the waters in our wake became a trail of crimson. The encircling mist seemed rent asunder by some invisible power, whirling away like wreaths of smoke blown by the wind, and yielding us broad view to where sky and ocean met. Our straining eyes caught nowhere a signal of life or hope, no gleam of distant soil, no black shadow of smoke. We were alone in the drear waste of water, with not even a speeding seagull to break the dull vista of warring sea and sky.

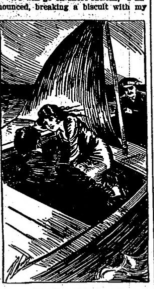
I forced myself to turn away from the grim fascination, back to the boat in which we floated. McCann had sunk down abaft the jury mast, and rested there hanging over the side, staring moodily down into the green water. His heavy face exhibited no interest and looked almost brutal in the garish light. Lord, how the appearance of the man had changed! Could this be the same fellow I had played cards with on the quarterdeck of the Esmeralda only two days before? Why, then he had been the life of the company, full of humor, a bit rough in speech to be sure, and drinking more than was necessary, yet apparently a good fellow. But now—why, he actually had the aspect of a brute; aye, and likewise the manners of one. A single night of danger and exposure had sufficed to bring to the surface his true character, had stripped off the veneer, and proven him a bullying coward, inefficient, and unwilling. I felt my teeth close tightly as I looked at him, but relief came when I turned toward the girl, seated near me. She must have felt the intentness with which I regarded her, for she turned suddenly, a flush sweeping her cheeks.

"Isn't it wonderful, Mr. Hollis, the way those clouds and waves blend yonder, such a marvelous massing of colors? Oh, there is no beauty like the sea!"

"But always a cruelty in its beauty, like that of a tiger cat," I answered. "Perhaps we had better breakfast, Miss Vera; let me see your bag of biscuits by daylight."

She brought them forth, together with the jug. A little sea water had seeped into the bag, and the outer layers were more or less mildewed, yet enough remained sweet and wholesome to give me hope of their sustaining us until we should be picked up by some passing vessel. The water jug, however, was only half-filled and must be sparingly used.

"We will go on short rations," I announced, breaking a biscuit with my knife. "Just enough to keep us from starving. Here, McCann, is your portion."



"He Has a Revolver."

He reached out and took what I handed him; then gave utterance to a curse.

"My God! do you mean I am to breakfast on this half biscuit?" he exclaimed angrily.

"On that, or on none at all," I answered, eyeing him sternly. "You haven't done so much work as to earn double rations. I give you the same as I take myself. All we have is what is in this bag, and heaven knows when we shall meet a ship."

"Ship, h——! We are not far from Long Island."

"Two hundred miles at least, and with this jury rig we should have to make some wide tacks on that course. Take what I give you, man, and be decent about it."

He grumbled something regarding his belief that I was keeping most of the food for myself, but I broke in, determined to end the discussion:

"That's talk enough. Eat your half biscuit the same as we do, and be thankful you have got that; and when you come to the water, one swallow each will be all we are entitled to. You hear me?"

"Yes, I hear you; but who in thunder are you?"

"The only seaman on board, McCann, and the life of this young lady, as well as your own, depends on my judgment. I am not seeking trouble with you, but you will obey my orders while we are afloat here, or take the consequences. That half biscuit is your ration; eat it, or leave it, as you please, but you'll cut out the profanity, and I'll not warn you again."

He was too great a coward to force the issue, and fell to munching his biscuit, one hand gripping the gunwale, as though he wished my throat was between his fingers. As I nibbled at my own small portion, watchful of his movements, and thinking of how best to keep the fellow at a safe distance, the girl leaned toward me, and whispered a word in my ear.

"He has a revolver. I saw the butt in his pocket, while he lay asleep in the bow. You will be careful, Mr. Hollis?"

"You need have no fear for me," I answered reassuringly, and ventured to touch her hand where it rested on the thwart between us. "I have been a bucko mate, my lady, and learned how to handle his kind. If he ever draws a gun on me out here, I'll teach him something he never learned yet in Wall street."

The hours of that day fairly dragged along, as we stared out dull-eyed on the same vista of sea and sky. The girl and I talked, avoiding as much as possible all reference to our situation, and the fate of the yacht, our conversation drifting here and there. We spoke of books, of art, of drama, and she exhibited even a wider range of knowledge on these subjects than I possessed, while her comments were keen and original—not pedantic, nor bookish in any way, but the outspoken frankness of young womanhood. Indeed, she was wholesome all through, her face a mirror of her nature, her eyes reflecting back each mood. Never before had I met one of her sex so deeply interesting, so unconventional and plain-spoken.

The castaways are sighted by a strange ship which takes them aboard. Then their real adventure begins.

(TO BE CONTINUED.)

Right One to Switch.

Irate Parent—I warned you boys, and now I'm going to switch you for making such a racket.

Bobby—Well, switch Johnny; we're playing train and he's the locomotive.

WOMAN SICK TWO YEARS

Could Do No Work. Now Strong as a Man.

Chicago, Ill.—"For about two years I suffered from a female trouble so I was unable to walk or do any of my own work. I read about Lydia E. Pinkham's Vegetable Compound in the newspapers and determined to try it. It brought almost immediate relief. My weakness has entirely disappeared and I never had better health. I weigh 165 pounds and am as strong as a man. I think money is well spent which purchases Lydia E. Pinkham's Vegetable Compound."—Mrs. Jos. O'Bryan, 1755 Newport Ave., Chicago, Ill.

The success of Lydia E. Pinkham's Vegetable Compound, made from roots and herbs, is unparalleled. It may be used with perfect confidence by women who suffer from displacements, inflammation, ulceration, irregularities, periodic pains, backache, bearing-down feeling, flatulency, indigestion, dizziness, and nervous prostration. Lydia E. Pinkham's Vegetable Compound is the standard remedy for female ills.

A Test of Friendship.

Andy Foster, a well-known character in his native city, had recently shuffled off this mortal coil in destitute circumstances, although in his earlier days he enjoyed financial prosperity.

A prominent merchant, an old friend of the family, attended the funeral and was visibly affected as he gazed for the last time on his old friend and associate.

The mourners were conspicuously few in number and some attention was attracted by the sorrowing merchant. "The old gentleman was very dear to you?" ventured one of the bearers after the funeral was over.

"Indeed, he was," answered the mourner. "Andy was one true friend. He never asked me to lend him a cent, though I knew that he was practically starving to death."—Harper's Magazine.

Sublime Orders.

Colonel Corki was, as colonels go, not a bad old stick to have about a regiment, says London Ideas. Recently he had three men of his company in to help him remove the grand piano, and, as this gift of Aunt Eliza's was of hefty build, he signed a blank order that the men might obtain beer from the canteen; leaving the amount thereof for the warriors to fill in themselves.

Here was a dispute.

"Put down six pints," suggested Private Dumps.

"More like a barrel!" growled one of the others.

But at last the sergeant came along with the right idea. He filled the paper up thusly:

"Please fill these men with beer."

Obviously.

"Come on," said the first flea, as he hopped from the brown bear's left foreleg; "come over and join me at a short game of golf."

"Golf," exclaimed the second flea, hastily taking a bite of hyena; "where in the realm of Barnum are we going to play golf?"

"Why," said the first flea, "over on the lynx, of course."—Jack O' Lantern.

An Art.

Woman—Have you no trade?

Tramp—No, lady; only my art—dis.—Exchange.

Political clubs are used chiefly to put opposing candidates out of business.

Sloth makes all things difficult, industry all easy.—American Proverb.

If
you never
tasted
Grape-Nuts
FOOD
you have
missed
one of the
good things
in life

SCENE CLOSE BEHIND THE FIRING LINE

This scene just behind the firing line in France shows wounded British soldiers coming in after receiving first aid. In the background is seen an observation balloon ascending.

ONE FORTUNATE TOWN IN FLANDERS

FRENCH OFFICIAL PHOTOGRAPH

This interesting and remarkable picture shows a view of a town in Flanders taken from a German airplane. Attention is called to the fact that it is one of the few towns in Flanders that has not been spoiled by the ravages of war. Its church, houses and green fields appear as they did before the conflict began.

Discipline.

There is not that thing in the world of more grave and urgent importance, throughout the life of man, than is discipline. What need I instance? He that hath read with judgment of nations and commonwealths, of cities and camps, of peace and war, sea and land, will readily agree that the flourishing and decaying of all civil societies, all the movements and turnings of human ocasions, are moved to and fro as on the axle of discipline. So that whatsoever power and sway in mortal things weaker men have attributed to fortune, I durst with more confidence ascribe either to the vigor or the slackness of discipline. And certainly discipline is not only the removal of disorder . . . but the very visible shape and image of virtue; whereby she is not only seen in the regular gestures and motions of her heavenly paces as she walks, but also makes the harmony of her voice audible to mortal ears.—Milton.

RESIDENCE DISTRICT OF CRAONNE

All that was left of the residences of Craonne after the latest and severest of the bombardments to which that French town has been subjected by the Germans and the allies who fought for its possession.

BUILDING A ROAD UP TO THE GUNS

English labor battalions making a road to the guns on the British western front.

MANY AMERICAN WOMEN ARE THE NATION'S ENEMIES BY MARRIAGE

Among the Most Prominent of These Is Gladys Vanderbilt Who Has Been an Angel of Mercy in Austria-Hungary and Who Now Finds Herself Arrayed Against Home Land and Family.

London.—American women who have been expatriated through their marriage to foreigners have a pathetic role, indeed, to play during these days that try the souls of humankind. Expatriation, always bitter to the patriot, becomes an overwhelming burden to the American in these times when their country, the noblest of them all, is about to strike the most tremendous and majestic blow ever struck by a nation at war. Even to be expatriated to a friendly ally may well prove rankling to an American who possesses a full measure of patriotic pride, and to be marooned from the civilized world in the ranks of our enemy is proving as bitter as hemlock to numbers of true Americans at heart. Among these the most poignant sufferers are the erstwhile American girls, now the wives of enemy aliens, who, in their distress, have, almost to a woman, identified themselves with the Red Cross of their husbands' countries. They feel that, at least in this one respect, they may conscientiously quiet their broken hearts with the thought that they do a work which the great United States in its honest myriads of hearts will heartily approve.

Among the more prominent of those who suffer thus appears the former Gladys Vanderbilt, who has been an angel of mercy in Austria-Hungary and who now finds herself unwittingly arrayed against her home land and family.

Her husband is a staff captain with General Dankl in that dangerous Galician region where the Russians once hoped to make the critical drive of the war. Her brother, Col. Cornelius Vanderbilt, is now in the field in the United States with the Twenty-second engineers, preparing to seek the European battlefields too, where it is within the realm of possibility that he will find himself directly and personally opposed to the dashing young man who married his sister.

So there is a sad young woman over in the far land, laboring for the Red Cross, the wounded and for a cause that is not that of her family and the friends of her childhood. Indeed, it was the death of her own brother, Alfred G. Vanderbilt, that had as much to do with molding American sentiment against the Teutonic powers as any one incident of the war. Whatever may be the fact of the real cause of the underlying break, the public mind holds most prominently the sinking of the Lusitania as an item of resentment, and the most prominent victim of that ocean disaster was her own brother, sent to a watery grave by a torpedo that came from a U-boat.

One brother dead as a noncombatant victim of war, another in khaki ready to fight, a couple of nephews wearing the uniform of America and scores of relatives and friends either in the ranks or in the councils of the republic, the position of this unfortunate young woman is indeed one of the most pathetic stories of the whole cataclysm that is shaking the world.

While she is by reason of these queer international complications the most striking figure in the marital horrors of Cupid, she does not stand alone. A score of titled women, a few hundreds without titles, but still women with hearts and loves, are in the same boat.

And the most pitiful phase of the whole situation is that their adopted countries do not trust them, in spite of any sacrifice they may make. Studying the records of ages, one finds that time and again some woman of high place and mind has cast to the winds love, personal wishes and even life itself to serve her own land.

There is a higher law that is not defined that says to every man and every woman that personal ties are secondary to the grand duty of patriotism, and it is this higher law that makes the officials of the central military powers fear and distrust any wife whose land is not their own.

Bismarck, the Iron Chancellor, put the thought into concrete form when he issued an order that no German diplomat in the service of his country might marry a foreigner. The order fell into disregard when the kaiser took the reins completely in his own hands until shortly before the European war, when it was revived. In the meantime there had crept into the German and Austrian diplomatic society a number of brilliant American women who are now under the ban of the old military law and who are alien enemies of their native land without being trusted friends of the one to which Cupid led them.

Thus it was Lillian May Langham, a beauty of Louisville, Ky., came to be the bride of the late ambassador to Washington, Speck von Sternburg, and likewise through the hiatus there came to Count Johann Heinrich von Bernstorff, his successor in this country, Miss Jeanne Luckmeyer, one of the fairest of the daughters of New York. And Miss Constance Hoyt was another of the rich Americans who went to the diplomatic court of Germany through her wedding to Baron von Stumm.

In many cases American girls with money and without married into the German army set and into the leading business circles of the country Germany, before the war, treated the American woman who came to her arms with great consideration. The touch of business did not rankle at the imperial court because the kaiser himself embarked in trade and was as proud of his pottery as he was of a new regiment.

But there was a sadly different story to be told in Austria, all of which adds to the predicament of the talented and beautiful women who are now forced by love to salute a flag that is arrayed against their own.

Under the rules of the Austrian court no person could be presented unless eight generations of nobility could be shown as a condition precedent. Coming from America, where titles of nobility are not recognized, these women found the imperial gate closed, or half-closed to them, while anything with the required armorial bearings might slide through the chink.

Notable among them was the Countess Sigray, who was Miss Harriet Daly, daughter of the late Marcus Daly. Her sister is Mrs. James W. Gerard, wife of the former ambassador of the United States to Germany. She married Count Anton Sigray, who had held many important posts in the service of the empire and whose position at the court was beyond any possible question. Love and the law also took her from the land of her birth and from the friends and relatives who are cheering for Old Glory while she nurses the sick and seeks the wounded under the imperial banner.

She has given a private hospital to the Austrian forces, and, with New York enterprise, has seen to it that the government also had a first-class X-ray outfit for the treatment of the wounded.

Making up more of the notable list of marooned Americans there is the beautiful Mabel Wright, now the Countess Zichy. She was one of the most striking beauties of this country and her face brought her fortune where many rich women of less charm failed.

A famous Italian sculptor used her as the model for a magnificent figure of an angel, and it is said that the Austrian emperor himself bought the work of art.

And among the women who must think of the Stars and Stripes as they regard their noble surroundings is Nora Iselin, now the Countess Colleredo-Mansfield. She is the daughter of C. Oliver Iselin, once one of the best-known millionaires in this country. His patronage of yachting and other sports made him famous. Her husband has held the secretarial post at the Rome embassy, one of the places that an Austrian nobleman covets most of all.

From one of the oldest Virginia families there comes Miss Agnes Carroll, who married Count Anton Heussenstamm. The daughter of the late John A. Stewart, Gladys Virginia Stewart, is the wife of Count Julius Apponyi, who is captain of hussars in the Austrian army.

There is the case. Dan Cupid, the traitor, has been convicted of betraying American girls to the enemy. He ought to be shot at sunrise.

HOSTAGE ON U-BOAT

Capt. C. M. Crooks of the American bark Christiane, to whom the German U-boat commander who ordered his vessel, destroyed on August 7, gave a receipt for the craft, has arrived in New York and told for the first time the complete story of his experience. Captain Crooks and his 16 men landed at an American port safely. They came from Ponta Delgada, in the Azores, where they landed after the U-boat destroyed their vessel.

SEVEN SONS FIGHTING KAISER

Mrs. Tisdall of New York, One of the Greatest "War Mothers" in Whole United States.

New York.—Clicking her knitting needles over a heavy gray sweater in Hoboken, just across the Hudson river, sits Mrs. W. J. Tisdall, one of the greatest "war mothers" in the country.

She has seven sons, all married, all with from two to six children, and all in military service. Another unusual thing, every one of the seven was an electrical engineer before he heard the call to arms.

But this is not all. Mrs. Tisdall has six daughters, two of whom are doing hospital work. "I can only sit home and knit for the army myself," modestly said Mrs. Tisdall.

The seven sons were born in Dublin of Scotch-Irish parents.

The eldest son, John, forty, and Edward, twenty-seven, having both lived some years in Canada, enlisted in the Canadian forces and have come through many months' service in France unscathed.

Victor, twenty-six, left his home in Hoboken, three months ago to join the gallant Canadian Scots. His wife is studying nursing and hopes to be sent across with a Red Cross unit.

Henry Tisdall, thirty-eight, has been in the British army five years and holds the rank of colonel.

Trevor Hastings Tisdall, twenty-five, is a member of the engineer corps of the Eleventh regiment, New York, which has been in France two months.

The two remaining sons, William, thirty, and Mark, thirty-four, both residents of Connecticut, were taken in the recent selective draft and have passed physical examinations. Both have families, but will not claim exemption.

"My father, Thomas McCurdy, fought in the English army with Wellington at Waterloo, when Napoleon came to such an ignoble end," said Mrs. Tisdall. "My brother fell in the battle of Aden in Egypt in 1870. My husband was an officer in the British army until his death 16 years ago.

"While I am glad, of course, that my sons have followed the precepts of their forefathers so faithfully, I am proudest of them for having risen by their own efforts to such positions that they are now able to leave their families well provided for; which is, after all, the greatest duty a man owes to his country."

Learning and Forgetting.

The sad defect about the progress of the human race is that while we are occupied in learning one thing we are almost always engaged in forgetting another.

GASHOUSE TEST FOR SOLDIERS

Portuguese soldiers waiting their turn at the gas school behind the British lines in France. The men go into this gashouse wearing their masks to see if they can endure the poisonous gas.

THE DAIRY

WARM WEATHER DAIRY HINTS

Cleanliness Is of Great Importance—Cream Separator Is Essential—Weed Out Poor Cows.

Unclean milk is especially dangerous during warm weather.

Remember that the sun is an excellent disinfecting agent. Sun the milk and cream utensils after washing.

No dairyman can afford to be without a good cream separator. A separator removes practically all the fat from the milk. By the ordinary skimming method from 10 to 25 per cent of the butterfat is left in the milk.

By carefully testing and weeding out the poor cows you can increase the average production of each cow by more than forty pounds of butterfat per year.

No animal that gets only feed enough to support life can produce a profit. Feed your cows a balanced ration.

When a farmer makes and sells butter and feeds the skim milk to poultry pigs and calves, he is not sending away a great deal of his farm's fertility. Keep the farm's fertility on the farm.

Some farmers would be better off if they sold their cows and bought milk and butter. Yet they don't realize that they are losing real money on every "boarder" in their herds. Test each cow.

VALUABLE DON'TS

In rearing and developing dairy heifers—

Don't overfeed. Twice as many calves are stunted by overfeeding as by underfeeding.

Don't change suddenly from whole to skim milk.

Don't leave calves in damp, dark, crowded, poorly ventilated barns.

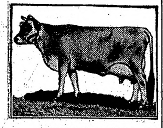
Don't feed milk in dirty pails.

Don't be irregular as to time of feeding, temperature or amount of milk.

DIGESTIVE ORGANS OF COWS

Large Consumer of Feed and Water Is Always Most Profitable Producer—Best Conformation.

There are few cows of consistent high production which are not amply provided with storage room for consuming immense quantities of feed and water. The large consumer is almost always the most profitable producer and must, therefore, be provided with a large capacity for digesting and assimilating feed as indicated by the following points: Great length from withers to hip bone; full crop; well sprung ribs that are broad, deep and wide apart.



Champion Jersey Cow.

When judging the capacity of a cow, it is important to notice the efficiency of her digestive organs by studying her handling qualities. See whether her hide is soft, loose, pliable of medium thickness, and covered with a soft, silky coat of hair, which indicates that the organs of digestion are in perfect working order.

PROVIDING COWS WITH SALT

One of Things Easily Forgotten While Animals Are on Pasture in Summer Months.

One of the things so easily forgotten in the summer months while the cows are on pasture is to provide them regularly with salt. The easy way not to forget it is to place rock salt where they can get at it every day, either in the stall while they are being milked or in a trough or box in the pasture where they can lick it whenever they have the desire to.

Studies made at the Wisconsin station by Professors Babcock and Carlyle showed that cows actually require salt to thrive properly, the amount required depending upon the character of the feed which they receive.

PLAN TO KEEP CREAM SWEET

Cool Immediately After Skimming and Before Mixing With Older Cream—Keep in Cold Water.

Set the separator to skim nearly 50 per cent in hot weather. Cool the cream at once after skimming, and cool it before mixing with older cream. Stir it well to prevent the forming of lumps or masses. Keep it in cold water, stir with metal ladle, and have pails, cans, separator parts and all utensils and surroundings clean and sweet.

AGRICULTURAL DEPARTMENT

This department of THE ELEVEN TOWNS is devoted to the interests of the agriculturists of Pennington and Marshall Counties. All the articles are by foremost authorities, including U. S. Government experts.

VEGETABLES FOR WINTER CONSUMPTION

Natural storage is the simplest and least expensive method of keeping vegetables for fall and winter consumption. Wherever practicable, this method should be made use of, especially this season when the conservation of food and the keeping down of food expenses is peculiarly important. Owners of home gardens are, in general, best situated for storing vegetables since they probably have surpluses of vegetables in the fall. It often is possible, however, for other householders to buy vegetables cheaply enough in the fall to justify the preparation and stocking of storage places.

Storage is especially successful with the root, tuber, and bulb crops such as carrots, potatoes, onions, etc. Cabbage, celery, pumpkins also winter squash, mature beans and peas, and a number of other vegetables also may be stored.

The successful storage of vegetables is not at all difficult; in fact, good storage facilities already exist in most homes, it being only necessary to make use of the cellar, the attic, a large closet, or other parts of the dwelling, depending upon the character of the product to be stored.

Storage Room in the Basement of the Dwelling.

A cool, well-ventilated cellar under the dwelling offers good conditions for the storage of vegetables. Many cellars are not well suited for storing vegetables because of poor insulation or lack of ventilation. Cellars containing a furnace for heating the dwelling usually are too warm and too dry for the storage of root crops. It is often possible, however, to partition off a room either in one corner or at one end of the cellar where the temperature may be controlled by means of outside windows. At least one window is necessary, and two or more are desirable for admitting light and for ventilation.

Construction of the Storage Room.

The size of the storage room should be determined by the space available and the amount of material to be stored. Natural earth makes a better floor than concrete or brick, as a certain amount of moisture is desirable. The walls of the storage room should be parallel to the walls of the cellar. Lay 2-by-4-inch scantling flat on the floor and secure them with pegs driven into the floor or by nailing them to the top of short posts set in the ground. Set 2-by-4-inch studding from this sill to the ceiling, spacing them 16 inches apart from center to center. Locate the door to the storage room at the most convenient point, making it large enough to admit barrels, than 6 inches wide. boxes, etc., 2½ feet wide by 6½ feet high being a good size. Set the studs on either side of the door 32 inches apart, which will allow for the door and the frame. Put a header over the door, allowing 1 inch for the frame and ⅞ of an inch for the sill at the bottom. Set the studs against the walls where the cellar walls and storage-room walls meet. Care exercised in making the frame square and plumb will enable the builder to get the structure tight with a minimum of labor. A good room is made by covering the studding on the outside with tongue-and-groove material, but a better way is to sheathe the outside with plain lumber, tack building paper on this, and side with tongue-and-groove material. This construction in connection with lath and plaster or wall board on the inside makes an excellent room.

Ventilation may be secured by opening one or more windows. An air duct constructed of wood, metal, or terra cotta and fitted in one of the windows, as illustrated in figure 4, is desirable, as it permits the cool air to enter at the bottom of the room. Two or more joints of 6-inch stovepipe, one with a damper, and an elbow may be used. A piece of board with a hole the size of the pipe is fitted in the window in place of one of the panes of glass. Another pane of glass may be removed from the sash and a small hinged door fitted in its place, which when open allows the heated air to escape. In cold weather both the hinged door and the damper in the stovepipe must be closed. The windows in the storage room should be darkened in order to protect the vegetables from the light.

Barrels, crates, boxes, or bins may be used as containers for the various vegetables, but movable containers are preferable to built-in bins, as it is possible to remove them for cleaning. It is advisable to construct shelves or a slat floor to keep the crates, boxes, baskets, and other containers off the ground. This is highly desirable to insure a free circulation of air and to prevent the containers from harboring mice, rats, and other vermin. The shelves for canned goods along one side of the room need not be more

ORGANIC MATTER IN STRAW

Three Dollars' Worth of Plantfood Contained in Every Ton—Should Be Applied to Soil.

Farmer, spare that straw stack!

"Three dollars' worth of plantfood goes up in smoke every time a ton of straw is burned," declares R. I. Throckmorton, associate professor of agronomy in the Kansas State Agricultural college. "Many Kansas farmers are overlooking the chief by-product of the farm.

"The soils in Kansas are becoming deficient rapidly in organic matter and straw is a means of increasing that content. Wheat fields produce quantities of available straw."

The best way to use straw is to bed stock with it. By this method the moisture content of the manure is absorbed by the straw. What straw cannot be used in this manner can be applied as a surface dressing to soil in the late fall or winter months. Straw should be scattered with uniform thickness at the rate of one ton per acre. The surface dressing acts as a soil mulch and thus prevents loss of water during rains. It also aids in holding the snow and in preventing winter killing.

FALL WORK ON RASPBERRIES

Prune to Remove Dead Wood Which Bore Fruit Preceding Year—Break Off the Tips.

The chief pruning for raspberries is to cut out the dead wood which bore fruit the preceding year. This may be done any time during the fall, winter or early spring.

As the young shoots spring up from the roots, and get to be about two feet high, it is often good practice to break off with the hand the tip, four or five inches back, thus causing the sending out of lateral shoots, and increasing the amount of fruiting-wood for the year following.

GENERAL FARM NOTES

In the humid sections distribute the poisoned-bran bait for grasshoppers early in the morning.

* * *

Join with your neighbors in buying spraying materials and thus get the benefit of wholesale prices.

* * *

Clear up Johnson grass, Bermuda grass, and salt grass in order to destroy the desert corn flea-beetles' winter quarters.

* * *

In the semiarid sections poisoned-bran bait for grasshoppers should be distributed in the late afternoon or early evening.

CAPITAL REQUIRED FOR BEES

Strong Point in Favor of Honey Industry Is Small Amount of Money Needed for Results.

The men who are engaged in honey production as an exclusive business are getting results equal to those derived from any other form of agriculture, with less capital invested and with less risk, according to Dr. J. H. Merrill, assistant professor of entomology in the Kansas State Agricultural college.

"The fact that it requires far less capital to engage in beekeeping than in general farming is a strong point in favor of the industry," commented Doctor Merrill.

"As an exclusive business beekeeping requires high-grade talent. It looks so simple and easy that those who engage in it are not willing to take the time to master the work in all of its details as they would in any other line of business. For this reason comparatively few persons succeed in making it profitable?

Fifteen years ago there were more beekeepers than there are today, but there has been an increase in the number of bees kept, Doctor Merrill pointed out. This plainly indicates that the beekeepers are becoming specialists.

BLANCH EARLY CELERY CROP

Special Paper Twelve Inches Wide Made for This Purpose—Two Weeks Time Is Required.

Early celery is best blanched with boards or paper, a special paper 12 inches wide being made for this purpose.

In warm weather it will blanch in about two weeks, when the boards may be removed along and so used several times in a season.

Blanching Celery Crop.

Celery may be blanched by placing boards, paper or dirt about it. A drain tile will do. Soil is likely to cause decay in the early varieties if put on during hot weather.

Use the poisoned bran bait to control grasshoppers.

PUBLIC ROADS

ROADS REDUCE LIVING COST

Make for Prosperity More Than Any Other National Undertaking, Says Alaskan Engineer.

"Good roads, more than any other national undertaking, make for the prosperity, happiness and contentment of the people," declared Col. W. P. Richardson, engineer in charge of highways in Alaska. "This is particularly evident at this time, when in every large city these is protest against the high prices of food. In my judgment, good roads, more than any other agency, will help to solve permanently the high cost of living. Transportation, of course, is at the foundation of prices. It is truthfully said that where there is inadequate transportation food prices mount high. We know that in cities prices are greatly in excess of those in rural districts and it is all a matter of transportation and distribution. If we have good roads, we can get our products to market. If we haven't, we cannot. Products on the farm are worth nothing if they cannot find a market. I am convinced that the most important governmental work is in the improvement of the roads. In this day of motor trucks it is much easier to haul products to the cities or to railroad terminals than it was a few years ago, but we must have good roads to do it. There is not the slightest doubt that good roads many times over pay for themselves. They are a fundamental economic necessity.

Good Road Over Rocky Mountains.

"The initial outlay in the building of good roads may seem large, but it is small in comparison with the benefits that accrue. In Alaska we have approximately 900 miles of improved roads, varying from the ordinary country dirt road to the best kind of macadam. In Nome there is a stretch of road over which in the summer time thousands of tons of products are hauled."

POOR ROADS ARE EXPENSIVE

Mistaken Idea That Improved Highways Are Solely for Benefit of Automobile Owners.

Poor roads are very expensive things for country communities. The farmer who thinks that improved highways are mainly for the benefit of those who drive automobiles should reflect on the results of a recent investigation by the department of agriculture, which finds that the cost of hauling farm produce over ordinary country roads is 23 cents a ton mile, whereas over hard-surfaced roads it is only 13 cents.—Youth's Companion.

OPERATION OF A ROAD DRAG

Use Pokiest, Laziest Kind of Team and Let Them Have Their Own Time—Just Keep Moving.

Do not wait for anything; build a drag and get out onto the road.

Drive very slowly. Use the pokiest, laziest team you own, and give them their time. Just so they keep moving they will be going swiftly enough. After you have used the drag a year, and have learned when to drive rapidly and when to drive slowly, you can carry a whip or drive a mettlesome team.

Vetch as Cover Crop.

An expert says that winter vetch does best as a cover crop if a little rye is seeded with it. One bushel of vetch to one-half bushed of rye per acre is about right.

Bad Habit of Cow.

Once a cow finds out she can get over an old fence there will be trouble perhaps for all time.

Rats Are Expensive.

Fifty rats on a farm will cost the owner $100 to $300 a year.

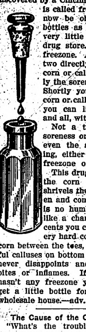
PAIN? NOT A BIT! LIFT YOUR CORNS OR CALLUSES OFF

No humbug! Apply few drops then just lift them away with fingers.



This new drug is an ether compound discovered by a Cincinnati chemist. It is called freezone, and can now be obtained in tiny bottles as here shown at very little cost from any drug store. Just ask for freezone. Apply a drop or two directly upon a tender corn or callus and instantly the soreness disappears. Shortly you will find the corn or callus so loose that you can lift it off, root and all, with the fingers.

Not a twinge of pain, soreness or irritation; not even the slightest smarting, either when applying freezone or afterwards.

This drug doesn't eat up the corn or callus, but shrivels them so they loosen and come right out. It is no humbug! It works like a charm. For a few cents you can get rid of every hard corn, soft corn or corn between the toes, as well as painful calluses on bottom of your feet. It never disappoints and never burns, bites or inflames. If your druggist hasn't any freezone yet, tell him to get a little bottle for you from his wholesale house.—adv.

The Cause of the Commotion.

"What's the trouble up there in front?" asked the cook of a rapid restaurant, addressing one of the waitresses.

"Aw, Heloise said that Claudine wasn't any better than she ought to be," was the reply. "And Claudine says she is, too, and if anybody thinks different she'll make 'em prove it. That's how the customer got hit with the ketchup bottle."—Kansas City Star.

CUTICURA HEALS ECZEMA

And Rashes That Itch and Burn—Trial Free to Anyone Anywhere.

In the treatment of skin and scalp troubles bathe freely with Cuticura Soap and hot water, dry and apply Cuticura Ointment. If there is a natural tendency to rashes, pimples, etc., prevent their recurrence by making Cuticura your daily toilet preparation.

Free sample each by mail with Book. Address postcard, Cuticura, Dept. L, Boston. Sold everywhere.—Adv.

The True Joy Rider.

"So you got a motorcycle?"

"For a starter."

"Couldn't you have more fun with an automobile?"

"You don't understand. The real way to have fun with an automobile is to get a motorcycle and get out on the road as a cop."

Highly Dangerous.

"Now tell the truth. Was my client's pistol loaded when he attacked you?"

"Yes, and so was he."

The offender never pardons.—Herbert.

Why That Lame Back?

Morning lameness, sharp twinges when bending, or an all-day backache; each is cause enough to suspect kidney trouble. Get after the cause. Help the kidneys. We Americans go it too hard. We overdo, overeat and neglect our sleep and exercise and so we are fast becoming a nation of kidney sufferers. 72% more deaths than in 1890 is the 1910 census story. Use Doan's Kidney Pills. Thousands recommend them.

A Wisconsin Case

"Every Picture Tells a Story."

August H. Wilkens, Eighth Ave., West Bend, Wis., says: "My back was in such bad shape I couldn't lie still long. When I took cold, the backache was worse, I got so dizzy at times I could hardly work and I had to pass the kidney secretions three or four times at night. I was nervous and run down. Three boxes of Doan's Kidney Pills restored me to good health after other medicines had failed. I haven't suffered since."

CAPITAL AGHAST AT LATEST PROOF OF TEUTON PLOTS

Plan to Use Money to Influence Congress on War Arouses Legislators.

BERNSTORFF SEEN UNMASKED

Disclosures Made by Secretary of State Lansing Regarded as Showing Ambassador Directed German Intrigue.

Washington.—Convincing proof that German diplomatic agents in the United States violated all rules of international courtesy and conspired to influence congress by the use of money to prevent this country from going to war to defend itself from the attacks of the German government is seen in the publication by Secretary of State Lansing of a note from Count von Bernstorff, former German ambassador to the United States, asking for authority to expend $50,000 for the purpose of influencing congress.

The publication of this note was a greater bomb-shell than any of the other revelations of German duplicity that have been made by the state department. Neutral diplomats, members of congress and others were literally astounded by the disclosures. It has been no secret that the German diplomatic representatives in the United States conspired in various ways to prevent this country from entering the war on the side of the allies but the proof that German money was used or was to be used for the specific purpose of influencing congress furnished an amazing climax for all the revelations that have gone before.

Telegram Sent by Bernstorff.

The telegram, exposed by Secretary of State Lansing, was sent through some secret channel to the Berlin foreign office on Jan. 22, 1917, by Count von Bernstorff, former ambassador of Germany. It was as follows:

"I request authority to pay out up to $50,000 (fifty thousand dollars) in order, as on former occasions, to influence congress through the organization you know of, which can perhaps prevent war.

"I am beginning in the meantime to act accordingly.

"In the above circumstances a public official German declaration in favor of Ireland is highly desirable, in order to gain the support of Irish influence here."

Some congressmen expressed the view that the money was spent in a campaign by telegraph just before the United States declared a state of war, when millions of messages were poured in upon members of both houses.

German propagandists used the telegraph wires freely to further their purposes.

The message of Count von Bernstorff which was revealed by Secretary Lansing was sent last January, at a time when there were no outward indications of a break between the United States and Germany. This, officials said, showed that Count von Bernstorff was fully aware of the kaiser's plans to launch ruthless submarine warfare, thus repudiating Germany's pledges to the United States.

Exposes German Deceit.

State department officials declined to comment upon the object hoped to be realized as a result of the publication of the Bernstorff message. It was believed, however, to have as its purpose supplementing the general policy of exposing to the world the malicious deceit that characterizes German diplomacy, the revelation of German inspiration of peace propaganda in America.

It was denied that there was any intent to reflect upon congress in making the dispatch public at this time. It could not be ascertained that there was any design in selecting any particular moment for the publication and it was asserted also to be a mere coincidence that the exposure occurred just after the arrival of Count von Bernstorff at Constantinople as German ambassador to Turkey.

Officials made it plain that the government had some information of Germany's policy of duplicity before Bernstorff requested authorization to continue his campaign to influence congress. There was gratification in official quarters that the ambassador did not presume to intimate to his government that any amount of propaganda could influence President Wilson.

Officials asserted that the government had an idea of the identity of the organization referred to by Ambassador Bernstorff, but, there being no absolute certainty, none would be named.

It was said to be unfair to draw the conclusion that the organization referred to by Ambassador von Bernstorff was an Irish institution, and from the remarks of officials it was gathered that the instrument used by the German government was one of several peace societies which, masking under the name of "peace," have actually served the interests of the central empires, and are still motivated by consideration of hostility to the policies of the United States.

A sensational feature of the Bernstorff note was that it was dated January 22, the date of President Wilson's "peace without victory" address to congress.

Prior to that time, however, in the latter part of December, Secretary Lansing, in interpreting President Wilson's peace note, made it clear that the United States might be drawn into the war, and indicated that one of the reasons impelling President Wilson to address the powers at war was to ascertain the objects for which they were fighting, so that this country, if it should be compelled to make a decision, might better be prepared to align itself with one of the two groups.

It is accepted that neither in December nor in January was the state department aware of the full connection of Ambassador von Bernstorff with the works of Captain Boy-Ed and Captain von Papen, the naval and military attaches, respectively, of the German embassy, but it is believed now that the government has complete proof of the direction by Count von Bernstorff himself of all the activities of German agents, official and unofficial, of German nationality and of American nationality.

Whether the state department is in possession of other evidence indicating the ambassador's activities has not been revealed, but the extraordinary disclosures already made have fixed the belief that agents of the United States government have collected and compiled the entire story of German duplicity and intrigue and that additional chapters will be added.

Knew Plan of "Ruthlessness."

The reference to averting war is taken as an indication that Ambassador Bernstorff had prior knowledge of his government's intention to proclaim a merciless widespread submarine warfare and that he was equally confident that the United States government could not be easily placated by mere promises. The German announcement of its intention to expand its submarine activities was not made public until January 31, when the world was startled not only by the determination to remove all restrictions, but by the statement that it would become effective on the following day. Three days later the United States government had expressed its disapproval by severing relations with Germany.

That the German ambassador knew of his government's intention was assumed by some officials, although at the same time he denied prior knowledge and those in close touch with the embassy were given to understand that he did not approve the course and worked to obtain modification.

Small Amount for Bribe.

It has not been assumed that the ambassador actually attempted to bribe or personally influence any member of congress, and doubt that such was his purpose is supported to some extent by the comparatively small amount of money he asked. Fifty thousand dollars, it was pointed out, would go but a short way toward buying the influence of any congressman. Judiciously expended, however, it might do much in compensating paid agents, such as are now known to have belonged to the elaborate machine Bernstorff had so carefully built up for the production of propaganda and for purposes of espionage.

Search Anti-War List.

As soon as news of the Bernstorff message reached the capitol members began a hasty search of the files to find the names of the men who voted against war. While there was no assertion from anyone that anyone of these members was influenced by German propaganda or money, yet it was pointed out that if such influence was exerted, and if it had any effect, the names of those affected would be shown in the lists of those who opposed the war resolution.

"I was forced to the conclusion some time ago," Representative Heflin said, in discussing the revelations, "that Germany thought we were a cowardly people and afraid to fight, but I did not know that we were a corrupt people and would betray our country for German gold.

"The telegram sent by Count von Bernstorff is an admission of the fact that Germany had a corruption fund in the United States for the purpose of carrying on German propaganda.

"If members have acted in suspicious fashion by the introduction of resolutions or bills or by speeches in congress or out of congress, that leads to the conviction that they are not loyal to this government at this time, they ought to be investigated, and, if found guilty, they ought to be expelled from the floor of this house and from the floor of the senate of the United States."

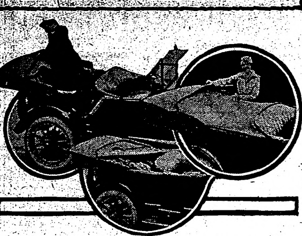
HOLLAND'S WINDMILLS.

It was at one time stated that there were in Holland at least 9,900 large windmills, of which the sails ranged from 60 to 100 feet long. At that time their yearly cost was reported to be nearly $10,000,000. The mills are used for many purposes—for sawing timber, beating hemp, grinding, but their principal use has always been to pump water from the lowlands into the canals, to protect the little country from being inundated.

TOWEL AND MEDICINE CLOSET.

A good idea for a towel and medicine closet or cabinet in two bathrooms which have a common wall is to divide the one closet space into thirds laterally. The upper third forms the two shallow medicine closets, back to back, with a mirrored door in each bathroom. The other two-thirds extend through the depth of the closet and are used for towels. Each of these divisions opens into one of the bathrooms.

COVER KEEPS AUTOMOBILE LUGGAGE CLEAN



INEXPENSIVE AND CONVENIENT DUST-PROOF COVER.

The luggage which you are carrying in the rear seat of your automobile need not be exposed to dust and rain if you use a cover recently designed by Arthur Paulson of New York city. It is inexpensive and convenient. When stretched over the rear of the car, covering the entire rear seat and the floor space in front of it, as one of the accompanying illustrations shows, it will protect everything that you carry from the dust of the road.

The cover consists of leather or rubberized canvas which has the shape of the rear portion of the car. Ordinarily, the cover is folded and is stored away in the cloth casing which surrounds the automobile top when it is folded away in the rear. One end of it is attached by fasteners to the edge of the casing. When it is to be used, one pull will suffice to bring it out from its position under the casing. After the luggage has been placed in position on the floor and on the seat, the cover is made fast by attaching it to fasteners placed on the cover top, the doors of the automobile and the back of the front seat.

In addition to keeping your luggage clean, the cover protects it from thieves.—Popular Science Monthly.

USE MOTOR TRUCKS

Trade Paper Discusses Highway Traffic as Supplementary to Train Service.

REGULAR DELIVERY OF MAIL

Probably Effect Genuine Economy in Post Office Department—Bring Producer and Consumer in Closer Touch.

According to American Motorist the post office department recognizes the possibilities of improved highways as trunk lines for the transportation of mails between distant points. This is indicated by the fact that it is installing motor trucks and operating parcel post and mail service over distances which formerly were considered practicable only for railroads.

With more than $50,000,000 annually expended for rural mail delivery; with tens of millions of parcel post packages to be delivered quickly and safely within a limited period of time, and with the manifest handicap on the part of the railroads incident to hauling parcels to the railroad stations, loading them on the cars and repeating these operations at the termini, it must be evident that the motor truck and the improved highway are destined to assume an importance in mail transportation comparable with that of the railway mail service.

Boon to Small Cities.

To the thousands of small cities and towns which have only local train service, the quick and regular delivery of mails from a distributing point by motor truck will prove a real boon, while at the same time, in all probability, effecting a genuine economy to the post office department in the operation of its mail service. Parcel post for the transportation of perishable products and for bringing the producer and the consumer in close touch can be tremendously developed by this trunk line service, thus promoting the welfare of the producer by developing a market for him, lowering the cost to the consumer by the practical elimination of the middleman, and increasing the food supply by making accessible large producing areas between urban communities.

In the rural delivery service it would seem that economy of operation could be secured by combining many of the circuitous routes through the establishment of through trunk lines traversed by motor trucks and attaching to the direct service a few motorcyclists or bicyclists to reach the outlying sections contiguous to the trunk line.

Importance of Highways.

The importance of the highways throughout the United States to the safety, economy, the welfare and the happiness of the people cannot be overestimated.

Military requirements and possibilities through the use of motor vehicles are paramount in this age as in no other. The operation of the parcel post and mail delivery now calls for the use of over 1,100,000 miles of public highway.

The United States government and the state governments are spending such large sums of money that, taken into connection with local expenditures, an aggregate outlay of over $300,000,000 is made annually for highway construction and maintenance. Over 3,500,000 automobiles make use of these highways for profit and pleasure.

The vast quantities of food produced on the farm and necessary to the existence of our city population and for export to our allies must move over the country highways. Great zones of suburban population are now extending out of our cities by reason of highway development. The millions of dollars formerly spent by tourists in European countries is now being spent by Americans in "seeing America."

Recent Traffic Census.

That the highway is an even more important factor in transportation than the railway is being shown day by day with increasing emphasis. Recently a traffic census of a highway leading out from Akron, O., showed that it carried considerably more tonnage than any of the main lines of railway leading out from the same point.

The post office department will serve the interests of the country to the very highest degree by developing a policy of through mail routes on highways as rapidly and as thoroughly as it is possible in these abnormal times.

DO NOT OVERHEAT RADIATOR

Good Deal of Trouble May Result During Summer Months If Necessary Precaution Is Not Taken.

The motor car is heir to certain seasonable troubles for which provision must be made in advance, if one is to ride in comfort. In winter the freezing of cooling water must be guarded against by using an antifreezing mixture. In summer just the other extreme, overheating, must be guarded against. There are a number of things that may cause this trouble, and to prevent it all the sources must be overhauled.

To begin with, the radiator ought to be drained, to see if the water runs freely throughout the entire length. By pouring water into the empty radiator it may be determined very easily whether or not the water is flowing through freely. Often enough there may be an obstruction, preventing rapid flow, which turns out to be simply some minor sediment around the drain-cock. In this case a match thrust upward will clear away the obstruction. If there is an overflow pipe, this is a possible location of trouble, as dirt often gathers around the lower opening. The rubber connections in the cooling system ought to be taken out and the inside examined. If the fabric is broken and hanging, renew the connections. The fan belt should be carefully looked over, given a dose of oil, and tightened up if need be.

VIRGIN ISLANDS UP TO DATE

According to Latest Register, There Are 24 Cars and Three Trucks Owned by Inhabitants.

Our new possessions, the Virgin islands, lying just east of Porto Rico, acquired from Denmark by purchase, have not been immune from the automobile, although cars there are not numerous. The latest register shows 24 cars and three trucks. The islands have an area of 83 square miles and a population of about 20,000. There are about 100 miles of good roads. All vehicles follow the European rule of the road, passing each other on the left when meeting and on the right when overtaking.

IN CASE OF GASOLINE FIRE

Water Should Never Be Used to Extinguish Flames—Smother Blaze With Sand or Sawdust.

If you are so unfortunate as to be the victim of a gasoline fire in your garage, or anywhere else for that matter, remember gasoline does not mix with water, and consequently water should never be used to extinguish such a fire. If a patent fire extinguisher is not at hand throw sand on the blaze, or use sawdust. The latter is not easily ignited, and when it does burn there is no blaze of any consequence.

Tell them to go ahead

You might as well have the use of that building you are planning—there is nothing to be gained by waiting. There is no prospect of prices going down for some time after the war is over. Go ahead and let your contracts.

When it comes to the roof you can make a real saving, and get a better roof by specifying

Certain-teed Roofing

CERTAIN-TEED Roll Roofing is not cheaper because the quality is lower, but because it is a less expensive roofing to manufacture. It is better, not only because it is cheaper, but also because it is light weight, weather-tight, clean, sanitary, fire-retardent and costs practically nothing to maintain.

CERTAIN-TEED Roll Roofing is guaranteed for 5, 10 or 15 years, according to thickness (1, 2 or 3 ply).

***Certain-teed* Slate-Surfaced Asphalt Shingles**

are supplanting wood and slate shingles for residences. They cost less, are just as good looking, wear better, won't fall off, buckle or split. They are fire-retardent and do not have to be painted or stained.

***Certain-teed* Paints and Varnishes**

The name CERTAIN-TEED on a can of paint or varnish is the same guarantee of quality and satisfaction it is on a roll of roofing or a bundle of shingles. Made for all uses and in all colors.

***Certain-teed* Products Corporation**

New York, Chicago, Philadelphia, St. Louis, Boston, Cleveland, Pittsburgh, Detroit, Buffalo, San Francisco, Milwaukee, Cincinnati, New Orleans, Los Angeles, Minneapolis, Kansas City, Seattle, Indianapolis, Atlanta, Richmond, Grand Rapids, Nashville, Salt Lake City, Des Moines, Houston, Duluth, London, Sydney, Havana

TWO VARIETIES OF HEROES

One Who Admits He Is of Make-Believe Class, Tells of Life in the Trenches.

There are real heroes and make-believe heroes; and they are not always easily distinguishable. I do not hide from myself that I belong to the make believes. And yet, it is remarkable that I did not find the second week at the front as terrible as the first. It is not so bad there as it seems, says a writer in the Atlantic.

When once you get accustomed to the idea that you may be dead in a day, or in an hour, or in a minute, and when you are clear as to your future, your mood is relieved from constant depression. Involuntarily you become kind and helpful to those about you, you do not get vexed over trifles, you are ready to make all sorts of sacrifices.

Of course, if, in the midst of such a condition, a grenade suddenly drops into your trench, if you see three or four of your comrades getting killed, your misery returns, no matter how good an outward appearance you may keep up. At least for a while.

But then again the thought comes that getting wounded means rest and safety, and good care. And death? that is still less terrible. One boast of reaching one's destination along the shortest road! Is not death every one's final destination?—Atlantic.

As Mitey Wise Understood It.

They were talking about aviation.

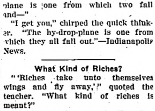
"As I understood it," said Mr. Mitey Wise, "the monoplane is a flying machine from which one falls, the biplane is one from which two fall and—"

"I get you," chirped the quick thinker. "The hy-drop-plane is one from which they all fall out."—Indianapolis News.

What Kind of Riches?

"'Riches take unto themselves wings and fly away,'" quoted the teacher. "What kind of riches is meant?"

And Johnny Jones said: "I reckon they must be ostriches."



I'm helping to save white bread by eating more
Post Toasties
WHAT ARE YOU DOING?

News of the State

Condensed for Busy Folks

The city hall, the only public hall in International Falls, has been condemned as unsafe for use. At the Red Cross dance recently, the floor buckled up, and upon investigation it was found that the sills of the building were decayed.

The county fair at Little Falls, which closed recently, was the most successful in the history of the association in many respects. The receipts were over $500 more than ever before, the attendance was greater, the attractions better and the exhibits good,

Practically the entire population of Jackson and several hundred farmers from the surrounding country turned out to say goodbye to Jackson county's first quota of drafted men who left for Camp Dodge. The men were joined at Fairmont by seventy men from Martin county.

The Northwestern fair, which will be held in Crookston for three days, beginning October 3, is expected to be a splendid success. The fair, which was formerly managed by local men, has been turned over to the farmers surrounding Crookston. They will run the fair on their own ideas.

Unswerving loyalty to the United States and staunch support of the government in its prosecution of the war, on the part of Norwegian-Danish Methodists was voiced in a resolution unanimously passed at the final session of the Northern conference of the Norwegian-Danish Methodist church in the Bethlehem Methodist church, Minneapolis.

The Tri-State and Bell Telephone companies won a partial victory over the State Railroad and Warehouse Commission when Judge Childress of the district court filed a decision on the appeal of the companies reversing the order of the commission that a 10-cent extra charge should be levied for all distance calls on the Tri-State through Owatonna.

One hundred dollars a minute for forty-five minutes for the American Red Cross was the record established at Heron Lake in a drive to provide the Jackson county chapter with adequate funds.

A campaign to raise $5,000 for the Nicollet county chapter of the American Red Cross will be made October 1. The county has been divided into districts and canvassing groups for each district appointed.

After a hearing, Mike Lugovich charged with bringing contraband liquor into Indian territory, was bound over to the Federal court by United States Commissioner W. A. Fleming, bonds being placed at $750. Car and liquor were confiscated.

L. A. Ickler, vice president of the American National bank, St. Paul, who spent a month near Drake, N. D., said today that the wheat crop is poor in that immediate vicinity but is better to the East and North.

"Conditions are much better in Minnesota, however," said Mr. Ickler.

There has been a reversal of opinion in many places in Southeastern Minnesota as to the extent of the damage by frost some days ago. The warm weather of the last few days, typical corn-growing weather, has convinced many farmers who took a chance by leaving their corn undisturbed that they have made no mistake. More than half the crop thought completely destroyed on the ridges in this territory will mature, experts said.

Only 43 tons of hard coal have been shipped into Thief River Falls since last spring—and that was received only after frantic appeals. Considerable alarm is felt lest winter comes without a further shipment. All the dealers have been trying for some time to get hard coal. Instead, soft coal in plenty has been shipped in until half of the usual supply has been received. Some uneasiness has also been felt over the fact that it has been almost impossible to get any cordwood.

Edward Fedel, a farmer residing in the town of Munson, two miles from Richmond, lies in the hospital with six shots in his body as the result of one of the first hunting accidents of the season. His condition is not considered serious. Fedel went out on the Sauk river for the purpose of fishing. Lucas Schroeder, a neighboring farmer, also went to the river in quest of ducks. Sighting a mud hen he fired. The hen happened to be directly in line with Fedel and a number of the shot hit him.

J. O. Bentall, former Socialist candidate for governor, has returned to his farm at Cedar Mills, after having been arraigned in Minneapolis before a Federal commissioner on a charge of interfering with the draft law. He was arrested and brought to Minneapolis charged with specifically "aiding, abetting and inducing his farm hand, John F. Kassube, not to register for the draft." Bail was fixed at $2,500. It was Bentall's second arrest in connection with anti-draft activities.

Joseph H. Gates, a pioneer resident of Rice Lake, was run down and killed by an automobile driven by Mrs. Jerry Fencl. Gates was riding a bicycle and ran directly in front of Mrs. Fencl's car and before she could stop the car crushed Gates underneath. Mrs. Fencl, who lives at Haugen, was exonerated of all blame for the accident.

Concordia college at Moorhead is open in all departments, the opening this year being delayed somewhat to allow the men students to finish up work on farms in consonance with the food conservation movement all over the country.

FARMERS URGED TO SHIP THEIR GRAIN

WHEAT CAN BE HANDLED BY RAILROADS MORE PROMPTLY NOW THAN LATER ON.

GERMAN TEXTBOOK PROBE

Will Soon Be Under Way by Committee of Nine Appointed by State Superintendent of Schools Schulz.

St. Paul.

Farmers are urged to ship their wheat and other food products as a patriotic measure. Secretary G. W. Murnane of the railroad war board's Northwest committee on car service, said:

"The roads can promptly handle wheat to storage centers now, and such movement will facilitate the manufacture of flour for domestic consumption and for export to our allies. That is why the railways are appealing to farmers for quick action. Later the demand for hauling soldiers and supplies will be an increasing burden which may hamper the movement of food supplies."

* * *

Probe of German Textbooks.

C. G. Schulz, state superintendent of education has announced the appointment of a committee of nine to investigate German textbooks used in Minnesota schools as requested by the State Public Safety commission. The investigation will determine, it is expected, whether the German texts tend to excite admiration of German ideals or principles. The committee members chosen as being competent and unbiased, Superintendent Schulz said, are as follows:

Chairman J. G. Norby, superintendent of schools, Fergus Falls; Prof. J. S. King, Hamline university, St. Paul; H. June Streeter, principal of the high school, Albert Lea; Amelia Weir, principal high school, Blue Earth; Peter Olesen, superintendent of schools, Cloquet; Augusta Zeigler, head of German department, Central High school, Duluth; Aleene Sherwood, teacher of German, Litchfield; Emma C. Freeman, teacher of German, Johnson high school, St. Paul; Hermione Koenig, teacher of German, North High school, Minneapolis.

The committee will meet at the capitol as soon as samples of the German texts have been received, probably within two weeks, Superintendent Schulz said.

* * *

More Wooden Bridges.

The construction and maintenance of wooden bridges in Minnesota will be revolutionized and in many places will be erected where concrete and steel bridges have been planned. The Minnesota Highway commission has been investigating every form of bridge construction in seeking to overcome the prohibitive prices of steel and concrete.

The chief objection to wooden bridges has been the annual cost of replanking. In Minnesota alone replanking has cost $375,000 on wooden bridges.

After an exhaustive investigation, the Highway commission has found a bituminous surfacing that will last as long as the average plank floor, and will cost only one-third as much. The bituminous surfacing is spread easily over the plank floor and becomes smooth in a short time.

* * *

Price Inquiry Postponed.

A week's postponement of the meeting of the state commission investigating prices of food, fuel and other necessities of life was ordered by the chairman, Colonel C. H. March of Litchfield. Information sought on various subjects is not ready for consideration, it was explained, and the commissioners had important business engagements elsewhere.

* * *

Consider Lid Tilting Charge.

Complaints that several Minneapolis cafes have violated Order No. 7, prohibiting sales of liquor to women and cabaret performances in cafes, were considered by the state public safety commission in executive session. No action was announced. A committee from the Minneapolis city council outlined municipal market plans before the commission.

* * *

Asks Protection for Sand.

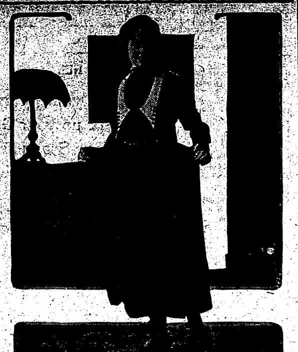
Charging that dredging companies have taken approximately $300,000 worth of sand and gravel from Lake Superior along the Cook county shore without state permission, State Auditor J. A. O. Preus, back yesterday from an investigation trip, asked the attorney general to restrain further operations and collect for the sand and gravel already taken.

* * *

Governor Boosts War Library Fund.

Governor Burnquist has appealed to the citizens of Minnesota to contribute to the national war library fund. The national war library council, appointed by Secretary Baker, is co-operating with the American Library association to supply reading matter for the soldiers and sailors of the United States. An appeal for a $1,000,000 fund for this purpose has been made. "I trust the people of this state will give liberally to this fund," said Governor Burnquist in discussing the matter.

Diversity in One-Piece Dresses



There is a wonderful diversity in one-piece dresses, and there must be. "We must have new things all the time or women will not buy," says one of those who sells frocks nearly all the days of the year. It is business that makes the world move forward, and so designers call upon the four quarters of the globe for ideas and inspirations. This fall there are Chinese and Russian and American Indian ideas interpreted in new suits and dresses, or discernible in their trimmings, along with clever inventions that are home grown and very modern.

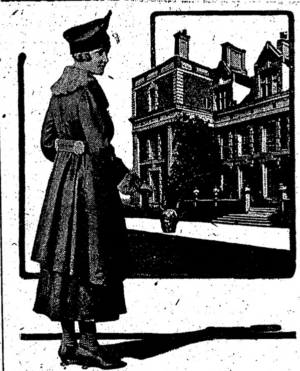
But with all this casting about for new inspirations there are almost no freakish dresses. Everything must bow to the decrees of the mode and manage to arrive at simplicity in effect, no matter how much elaborated in details of trimming or finish. The result is the prettiest and most wearable frocks that can be imagined, with the straight line models in great favor and the smart Russian blouse winning its way to the front.

But the straight line dress has no monopoly, as may be gathered from the clever model in a one-piece frock shown here. It follows the lines of the tonneau skirt, at a safe and sane distance, with the small, side drapery that holds its place in the season's styles. Just how its wearer gets in or out of it is a secret that lies between her and the dressmaker, but the belt is discovered fastening at the side and probably the bodice does the same thing, with fastenings along the underarm and shoulder. At the front and back of the belt embroidery finds a place in the sun of approval, and a row of misleading buttons down the front of the bodice have no duty other than to make a pretty finish for it.

It is the collar in this frock that bespeaks much thought on the part of its maker. It is of colored satin overlaid with white satin with little satin-covered buttons set in a row at each side, and is altogether independent of the high neck which finishes the bodice. The plain sleeves have small flaring cuffs with overlay in white satin.

Julia Bottomley

Furs Are Everywhere



Making a joke of deprivations is one phase of French fortitude in these times of trial. The Parisienne makes light of the scarcity of coal and says she will rely upon furs and exercise in the open air to keep herself warm this winter. This prediction seems to have influenced the mode, and furs are everywhere. On suits and frocks they appear in bands, sometimes continuous and more often in sections, on the bottom of skirts and coats. Collars and cuffs, fur-covered buttons, and narrow fur bands and fringes of fur find a place on all outer garments.

Deep cuffs, both close-fitting and flaring, and narrow collars that widen into broad revers are among the newest phases of fur trimmings. But with the broadest collars and the most generous cuffs are coupled very narrow bandings in pockets and about the bottom of coats. Collars are as luxurious and enveloping as those introduced last winter, those on suits of the convertible variety that may be brought up about the throat at will.

One of the new fall suits, trimmed with gray squirrel, is made of wool velour. Squirrel looks well on the wine, blue and green shades of the present season and combines beautifully with the soft "glove finish" of wool fabrics. The suit pictured is a conservative model with a straight-hanging coat, belted in at the waistline and trimmed to long points at each side. It is plain except for big patch pockets, also trimmed in points to correspond with the coat.

Julia Bottomley

New Belts.

The belt line of the new frocks is as diversified as one can imagine. There are belts of all degrees of width. There is still the beltless frock that has a girdle drawn loosely about the hips and there are occasional high-waisted belts. The tendency in the new frocks is to emphasize the normal waistline, however, and this probably means the persistence of the separate belt of leather or embroidered silk.

Japanese Influence.

Several of the French designers are turning to Japan for much of their inspiration this autumn. This probably means that we shall see Japanese motifs in embroidery, as much as we saw them last year, on the new frocks.

An Irish Comeback.

An Irishman employed in a large factory had taken a day off without permission and seemed likely to lose his job in consequence. When asked by his foreman the next day why he had not turned up the day before, he replied:

"I was so ill, sir, that I could not come to work to save me life."

"How was it, then, Pat, that I saw you pass the factory on your bicycle during the morning?" asked the foreman.

Pat was slightly taken aback, then regaining his presence of mind, he replied:

"Sure, sir, that must have been when I was going for the doctor."—Pittsburgh Chronicle-Telegraph.

Slighted.

"So you're leaving us, Mary. What's the trouble; don't you like the place here?"

"I did, but I ain't going to stay here no longer. You don't treat me like one of the family."

"Why, Mary, how can you say that?"

"It's plain as day. You were away for ten days, and you didn't even send me a picture postal card."

Can a man be said to be partial to a thing when he gives his entire attention to it?

The more a woman talks to a man the less he is inclined to sit up and take notice.

Lemons Beautify! Make Quarter Pint of Lotion, Cheap

Here is told how to prepare an inexpensive lemon lotion which can be used to bring back to any skin the sweet freshness, softness, whiteness and beauty.

The juice of two fresh lemons strained into a bottle containing three ounces of orchard white makes a whole quarter pint of the most remarkable lemon skin beautifier at about the cost one must pay for a small jar of the ordinary cold creams. Care should be taken to strain the lemon juice through a fine cloth so no lemon pulp gets in, then this lotion will keep fresh for months. Every woman knows that lemon juice is used to bleach and remove such blemishes as freckles, sallowness and tan, and is the ideal skin softener, smoothener and beautifier.

Just try it! Get three ounces of orchard white at any pharmacy and two lemons from the grocer and make up a quarter pint of this sweetly fragrant lemon lotion and massage it daily into the face, neck, arms and hands, and see for yourself. Adv.

One method of dodging popularity is to give your neighbors advice.

What is Castoria

CASTORIA is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is pleasant. It contains neither Opium, Morphine nor other Narcotic substance. Its age is its guarantee. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic and Diarrhœa; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep. The Children's Panacea—The Mother's Friend.

The Kind You Have Always Bought, and which has been in use for over 30 years, has borne the signature of Chas. H. Fletcher, and has been made under his personal supervision since its infancy. Allow no one to deceive you in this. All Counterfeits, Imitations and "Just-as-Good" are but Experiments that trifle with and endanger the health of Infants and Children—Experience against Experiment.

Genuine Castoria always bears the signature of Chas. H. Fletcher

Raise High Priced Wheat on Fertile Canadian Soil

160 ACRE FARMS IN WESTERN CANADA FREE

Canada extends to you a hearty invitation to settle on her FREE Homestead lands of 160 acres each or secure some of the low priced lands in Manitoba, Saskatchewan and Alberta. This year wheat is higher but Canadian land just as cheap, so the opportunity is more attractive than ever. Canada wants you to help feed the world by tilling some of her fertile soil—land similar to that which during many years has averaged 20 to 45 bushels of wheat to the acre. Think of the money you can make with wheat around $2 a bushel and land so easy to get. Wonderful yields also of Oats, Barley and Flax. Mixed farming in Western Canada is as profitable an industry as grain growing.

The Government this year is asking farmers to put increased acreage into grain. There is a great demand for farm labor to replace the many young men who have volunteered for service. The climate is healthful and agreeable, railway facilities excellent, good schools and churches convenient. Write for literature as to reduced railway rates to Supt. of Immigration, Ottawa, Can., or to

Pleasures of an Enthusiast.

"Does the price of gasoline bother you?"

"Not much," replied Mr. Chuggins. "I only run the motor a few miles. Then I get out and spend the rest of the day tinkering her up."

THIS DRUGGIST KNOWS BEST KIDNEY MEDICINE

Sixteen years ago I began to sell Dr. Kilmer's Swamp-Root and today I believe it is one of the best medicines on the market; and my patrons are very much pleased with the results obtained from its use and speak very favorably regarding it. Swamp-Root has been very successful in the treatment of kidney, liver and bladder troubles according to the reports received and I have no hesitancy in recommending it for I have great faith in its merits.

Very truly yours,
OWL DRUG STORE,
By R. F. Boies,
Oct. 3, 1916. Sedalia, Missouri.

Letter to
Dr. Kilmer & Co.
Binghamton, N. Y.

Prove What Swamp-Root Will Do For You

Send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample size bottle. It will convince anyone. You will also receive a booklet of valuable information, telling about the kidneys and bladder. When writing, be sure and mention this paper. Large and medium size bottles for sale at all drug stores.—Adv.

Working Under Difficulty.

Burglar—I hate to work a job alone. If I git pinched I can't turn state's evidence on nobody and git off.

The more good qualities a man possesses the less he has to say about them.

The Only Way.

Food Administrator Hoover said in Washington, during the filibuster against the food control bill:

"We must control food, or flour will rise to $20 a barrel and meat to fifty cents a pound.

"Why, look at prices already!

"I said to a haggard family man the other day:

"'See here, Jones, you'll ruin your health if you work all day on your books in the city and then go out and do night work on other men's books all the evening. My boy, you're burning the candle at both ends.'

"'I got to, Mr. Hoover,' said Jones. 'It's the only way to make both ends meet.'"—Philadelphia Bulletin.

Didn't Need It.

The young bride had clearly formed ideas on industrial questions.

"I will give you something to eat," she informed the tramp, "if you will get the ax—"

"Oh, I shan't need that," the tramp interrupted in a reassuring tone. "My teeth are quite all right."

A cynic is a person who knows the price of everything and the value of nothing.

Instead of counting the cost of experience consider what it is worth to you.

The young people of the Goodridge Lutheran Church and those who are interested in church work are cordially invited to meet at the home of Mr. and Mrs. H. A. Halvorson at 3:00 o'clock p. m. Sunday Oct. 8, for the purpose of organizing a Young Peoples' Society.

The Goodridge Lutheran Ladies' Aid will be entertained by Mrs. Gunderson and Mrs. Osmond Urdahl in the church next Thurday afternoon October 11th.

Ye Editor is all alone these days, the "devil" having left him to go and werk on a hay baler, consequently he has to get out the paper alone, so the readers will have to excuse him if the paper should not be up to standard.

Mrs. Morgan Vaughan will entertain Saturday afternoon, October 13th at her home a mile and a half south of town for the benefit of the Red Cross. All are cordially invited to attend.

German Lutheran services at the Esplee schoolnouse next Sunday at 3 p. m.

Don,t forget the show at the Grand Theatre Saturday and Sunday eveuipgs The second installment of The Girl and the Game will be shown, also two other features, namely, Ruffhouse and Hearts and Flowers. Dance after the show Saturday evening.

Mrs. Clara Gulrud left Thursday for Lemmon, S. D. to visit relatives.

P. P. Palmer made a business trip to Lancaster Tuesday.

Jay Payne returned Wednesday from a trip to the cities.

Rev .S. B. Binkley, has resigned his charge of the English speaking congregations here and at Grygla. He will probably accept a call to the Middle River field Rev. Binkley has only been in charge of the work here for the past three weeks and was well liked by all who knew him and was doing good work. A misunderstanding betwe n him and the superintendent of this field caused him to hand in his resignation.

A battalion drill of the Tenth Battalion of the Home Guard, consisting of companies from Crookston, East Grand Forks, Bemidji and Thief River Falls, is to be held in Thief River Falls Sunday Oct. 7. An interesting program of military maneuvers has been prepared. It is expeceed that Adjutant Genaral Rhinow will be present to review the Guard. No addmission fee will be charged. In case of unfavorable weather the drill will not be held. The drill will start at two o'clock according to present plans. A general invitation is extended.

Farm For Rent—Inquire at the G. N. Depot, Thief River Falls, Minn. tf.

Benno Menzel left Saturday for the Twin Cities to attend to business matters.

Four cars of stock were shipped from this place to South St. Paul. Out of this number the Reiner Shipping Assn shipped two cars of cattle and one car of sheep which came from the vicinity of Grygla.

J. Hardisty of Grygla shipped a car of stock from here to St. Paul Tuesday.

Mrs. M. J. Stephenson and family returned last Thursday from a two month's visit with relatives in Pelican Rapids.

The ball game scheduled be tween the local nine and the Red Lake Indians Sunday failed to materialize.

Mrs. Benno Menzel spent Sunday in Thief River Falls visiting with her daughter Mathilda and son Richard.

Hickory News.

G. Bonrud finished up threshing operations in this locality Monday. He certainly understands his business as he did a fine job.

Even Ose, the cattle buyer was seen in this vicinity last Sunday, also Mr. Early the hay man.

Huddleson and Shafer, the hay balers are now estalished and are baling the Rindal and Korstad hay here,

Miss Clara Florence has been assist- Mrs. John Lundblad during threshing operations.

Potatoes are not as heavy a crop as was estimated at first.

Mrs. Christianson is the wheat king in this neighborhood. Getting the biggest yield and we know excellent quality.

John Mostrom laid up his threshing rig for the season last Saturday.

Carl Clemenson is doing some good and fast threshing south of the river which will all be finished in about another week.

Theodore Rindahl of Lillo is working with the C. Clemenson rig.

Earl Orland, the infant child of Eli Stephinson and a grand child of Mr. and Mrs. Thom Florence, who died at Union, N. D. was brought here by auto route and burried beside its mother, who died and was burried here last July.

Second Liberty Loan.

The Second Liberty Loan has been launched. H. L. Melgard of the Citizens State Bank of Teief River Falls has been appointed chairman for this county. The chairmen of the township boards have been appointed on the committee for the disposal of bonds in this county. A meeting for the purpose of discussing ways and means of disposing of the bonds will be held in the commercial club rooms at Thief River Falls Wednesday afternoon Oct. 10th at two o'clock.

First Nnmber of Lyceum Course.

The first number of the University Course will be held in Goodridge Tuesday evening October 16th. The Metropolitan Trio will be the entertainers for that evening. The trio is made up of three talented young men, who will be well worth coming to hear.

Coming to Thief River Falls.

Mrs E. H. Erb of Minneapolis is to be Thief River Falls Saturday evening to discuss Red Cross needs and also to view various articles being mrds by the women of the country for the Red Cross. The members of the Goodridge Branch are asked to meet with them, also those who are not members are invited to attend. The meeting will be held in the commercial club rooms at 8 o'clock.

What Does The Lutheran Church Stand For?

(Contributed by Rev. O. C. Schultz.)

It stands first of all for the Bible, the whole Bible and nothing but the Bible. Says Thomas Carlyle: "The period of Reformation was a judgement day for Europe, when all the nations were presented with an open Bible." Since the time when Martin Luther discovered that dust covered copy of a complete Bible, chained to the wall of the library at Erfurt and learned its blessed truths, and brought it forth and gave it back to Christendom—ever since that time the Luther-Church has defended the Bible against all attacks from within and without Christendom.

The Lutheran Church believes the, the sacred writings of the Church, both of the Old and New Testaments, are not only certain, but are the inspired Word of God; that God not only suggested to the writers the thoughts or subjects on which He desired them to express their personal sentiments, but also prompted their very utterances, the holy men of God thinking and speaking as they were moved by the Holy Ghost.

For thus writes St. Peter concerning the Old Testament Scriptures which he terms "the sure word of prophesy"; The prophecy came in the old time by the will of man, but holy men of God spake as they were moved by the Holy Ghost." And St. Paul writes concerning the New Testament words: "Which things we also we speak, not in words which mans wisdom teacheth, but which the Holy Ghost teacheth". (1 cor 11 13.) The Lutheran Church believes and teaches that the sixty-six book of the Bible are the final revelation of God to a sinful world. As a result true Lutheran pulpits everywhere are proclaiming one and the same thing—the Bible.

The Lutheran Church also believes in the right of the Christian people to interpret the Scriptures. That does not mean the right of Christian people to put into the Bible their own thoughts and notions. That is not interpreting the Bible. It means that every Christian has the right to go direct to the Bible without interferance on the part of some higher authority, and let the Bible speak to him. It was to the people that Christ addrdssed the injunction, Search the Scriptures; and they they which testify of me."

To give unto the church or any human authorisy the right to interpret the Bible for the individual and to made this interpretation binding upon individual's conscience means but to fetter the Christians conscience. It means a blind faith which must accept a religion that someone else makes for him, It means a faith like that of the Bohemian collier, who, when asked "What do you believe?" answered "I believe what the church believes". "What does the church believe?" "The church believes what I believe" "Well what do you and the believe?" "We believe the same thing."

Nowhere in the Bible does Christ demand of His "free" children to obey any ecclesiastical authority as though their decrees were binding upon our conscience. Says our Lord Himself, "One is your Master, even Christ, and all ye are bretherin," And it is well it is so, for we know that even euhrches and councils and synods may err as they have erred in the past. We need only turn to the pages of history during the dark centuries preceeding the Reformation. And as the reader ponders over these pages of history he will turn away from them with deepened conviction. "The Bible, the dear old Bible, is the only safe guide and authority in Christendom; and every christian must stand up for his right to appeal direct to it."

And so the Lutheran Church uncomisingly stands for the plain, simple, sweet truths of the Bible and the right to go to it for light, for strength, for comforts, for guidence. Her pastors proclaim nothing but what God has spoken through the inspired writers. Her members decline to accept what cannot be substentiated from the Book Laymen and clergy unite their effort to raise up an intelligent membership which knows what it believes and why it believes it.

Illinois River.

The Illinois river was so termed from the Illini, a tribe of Indians on its banks. Another derivation is suggested in Isle aux Noix, island of nuts. Several derivations, more or less fanciful are suggested by the etymologists and geographers.

Answers to Questions On Cow Testing Association.

By Ross P. White, Agricultural Director.

It is gratifying to note that a great many of the dairy farmers are becoming interested in the possibility of an association in this county. In taking up the questions I have followed not special order but have only tried to give a complete answer to the question.

1. Does an individual cow vary in test during a lactation period to any considerable extent?

Yes, a variation is to be expected, usually milk will increase in per cent of butter fat as the lactation period advances. A variation of two or three per cent of fat is so common that it is almost to be expected. Variations of five per cent have been recorded.

2 What will it cost to test in an association?

The cost will depend upon the number of herds, their size, and the method of organization. There are two general plans of organizing, under the first each farmer pays from $1 50 to $1.75 per cow per year, under the second, he pays a lump sum for his herd regardless of its size. The latter plan does not seem to work as satisfactorily unless all herds are about the same size, for the farmer with the large herd would receive more benefit, for the money, than the man with a small herd. This would be against the principles of true co-operation. All the advantages of the latter plan may be secured in the first by establishing a minimum price for each herd or by requiring that a certain number of cows be in each herd. The same result will be obtained in either case.

3. How does the association plan of testing compare in accuracy of results, with testing every day?

The U. S. Bureau of Animal Industry, Circular No. 103, p. 9, states "Tests made once a month, or only ten times during the period of lactation, gave 96.4 per cent of the total milk and 97 per cent of the total production of butter fat." At the Minnesota Experiment station the herd records and and the New Jersey Station reports the results in Circular No. 16, p. 8, "The maximum variation, as determined by the Cow Testing Association method, was 5.1 percent, and the average variation 2 per cent. This shows that the method is accurate enough for all practical purposes, and that the dairyman would hardly be warranted to go to the expense of conducting a continuous test during the month."

4. What dees it cost to organize an association?

Usually the organization work is conducted, through a progressive group of farmers, a county agent, or H. S. Agricultural Department and is done for the good of the cause withou cost to the farmer.

5. How does testing insrease the butter fat production of a herd?

The increasing of the average butter fat production of a herd is very marked in many cases and at first is largely accomplished by culling out the low producing cows. An immediate inmediate increase is often secured through better feeding methods. Better and more inteligent breeding methods will also increase the butter fat production of a herd.

6. Why can't I do the testing my self?

You can, in fact several of the farmers of Pennington county are already doing it, but it will usually be more satisfactory to have it done through an association. I find that many farmers who do their own testing neglect the work during the rush of summer work and are very irregular at other times. Even where accurate records are kept by the farmer himself they are not as valuable as when the test is conducted by an official tester who is a disinterested party. It is sometimes hard to sell a cow on your own butter fat record and easy to sell her upon a record kept by a disinterested party.

7. If I join the association will I have to buy expensive feed for my cows?

No you will not have to buy feed unless you want to. The association does not dictate to its members. The purpose of testing is to determine the results of your method of dairying in the terms of profit and loss. It frequently happens however that a farmer will buy feed in order to get a balance ration and in such a case he should get enough more from his cows to pay for the extra feed and leave a nice profit besides.

ROOSEVELT IS CHEERED BY MANY THOUSANDS

HITS DISLOYAL HEAVY BLOWS

Roosevelt Routes "Huns Within Our Gates" in Twin City Speeches.

RECEIVES BIG OVATION

Colonel Flays La Follette as "Most Sinister Enemy Within Nation's Borders"—Gronna and Lundeen Also Scored.

THEODORE ROOSEVELT

Who Says of the Pacifists "Let Me at 'Em."

INTERNATIONAL NEWS SERVICE

Minneapolis, Oct. 1. — Theodore Roosevelt trained his heavy guns on "Huns within our gates" and put them to rout in his Twin City speeches.

From the time he arrived at noon and until he left, the former president, apostle of preparedness, kept up his fire. With the thousands upon thousands who heard him in Minneapolis and St. Paul he was stamping out all traces of disloyalty left by La Follette.

"Lesser Microbes" Denounced.

"While the men in khaki are warring against the Huns without our gates, let us war against the Huns within our gates," he said. And it was that purpose that guided him every minute of the time that he spent in the Twin Cities.

La Follette was called "the most sinister enemy of the United States within its borders." Senator Gronna of North Dakota, "Ernie" Lundeen and others of their kind were dubbed "lesser microbes" and "shadow-Huns."

The Nonpartisan league and its leaders, A. C. Townley and Congressman John M. Baer, were not spared. They came in for the most scathing denunciations for their utterances.

Man-handles La Follettism.

Mr. Roosevelt paid his respects to the conscientious objector. He would deprive him of a vote. He man-handled La Follettism and the "neo-copperheads" who advocated it. He wanted to see La Follette and the kaiser in close companionship because he "wished ill to both." He said America must become a great industrial democracy and he advocated compulsory, universal military service as the great requisite to make America really independent among the nations.

His hearers applauded him at every step. He drew the greatest demonstration, however, with a little personal reference out of the current of his speech:

"I am an old man," he said. "It is a matter of bitter regret to me not to be allowed to go abroad to serve in the army of the United States. I have made other sacrifices that were bigger, for I have sent my four sons."

House Is One With Speaker.

The house was on its feet in an instant, cheering and clapping and waving hats and handkerchiefs. It was one with the speaker.

"No father or mother here in my position, who understands, but would do anything honorable to avoid war," he continued. "I am not for war when war can be honorably avoided. I was president seven years and in all that time there wasn't a shot fired by us or an American citizen killed by a foreign power."

"We have heard much of the conscientious objectors to military service, the outcry having been loudest among those objectors who are not conscientious at all, but who are the paid or unpaid agents of the German government.

"It is certain that only a small fraction of the men who call themselves conscientious objectors in this matter are actuated in any way by conscience. The bulk are slackers, pure and simple, or else traitorous pro-Germans. Some are actuated by lazy desire to avoid any duty that interferes with their ease and enjoyment, some by the evil desire to damage the United States and help Germany, some by sheer, simple, physical timidity. In the aggregate, the men of this type constitute the great majority of the men who claim to be conscientious objectors, and this fact must be remembered in endeavoring to deal with the class.

"In some of our big cities, since the war began, men have formed vegetarian societies, claiming to be exempt from service on the ground that they object to killing not merely men, but slackers. Others among the leading apostles of applied pacificism are not timid men; on the contrary they are brutal, violent men, who are perfectly willing to fight, but only for themselves and not for the nation. These rough-neck pacifists have always been the potent allies of the parlor or milk-and-water pacifists, although they stand at the opposite end of the developmental scale.

Like Conscientious Polygamists.

"The peace people of the directly opposite type include the men who conscientiously object to all participation in any war, however brutal the opponents, and however vital triumph may be to us and to mankind. These persons are entitled to precisely the respect we give any other persons whose conscience makes them do what is bad. We have had in this country some conscientious polygamists. We now have some conscientious objectors to taking part in this war. Where both are equally conscientious, the former are, on the whole, not as bad citizens as the latter.

"If these men are sincere they will refuse to interfere (for moral suasion is not interference) with a white-slaver who runs off with one of their daughters or a black-hander who kidnaps and tortures a little child or a ruffian who slaps the wife or mother of one of them in the face. They are utterly insincere unless they decline to take advantage of police protection from burglary or highway robbery. Of course if such a man is really conscientious he cannot profit or allow his family to profit in any way by the safety secured to him and them by others, by soldiers, in time of war, by judges and policemen in time of peace; for the receiver is as bad as the thief. I hold that such an attitude is infamous; and it is just as infamous to refuse to serve the country in arms during this war. If a man's conscience bids him to act, then his conscience is a fit subject for the student of morbid pathology.

"Respect the conscientious objector's opinions, but let him abide by the full consequence of his opinions. Universal suffrage can be justified only if it rests on universal service. We stand against all privilege not based on the full performance of duty; and there is no more contemptible form of privilege than the privilege of existing in smug, self-righteous, peaceful safety because other, braver, more self-sacrificing men give up safety and go to war to preserve the nation. If a man is too conscientious to fight, then the rest of us ought to be too conscientious to let him vote in a democratic land which can permanently exist only if the average man is willing in the last resort to fight for it, and die for it.

For Universal Service.

"I wish to see the principle of universal obligatory military service established in this country precisely because it is the only democratic principle. We are in the war and we must do the best we can with the instruments that are at hand. Whether or not I have disapproved of the methods adopted, when once they were adopted I have loyally tried to help them work. But I emphatically protest against the failure to make permanent provision by preparedness in advance against the occurrence of disaster to this country, and the failure properly to democratize our army.

"What we need is the permanent establishment in this country of the system of universal obligatory military training for all our young men, and for making officers out of the best fitted among these young men, without the slightest regard to whether they or their fathers have money or do not have money.

"Under this as a permanent system, every young man so trained—sometime between the ages say of 18 or 19 and 21 or 22—will spend one year with the colors in the field. He would not be allowed to vote until he had performed this service, no matter where he was born. The son of the railway president and the son of the brakeman, the son of the banker and the son of the bricklayer, the son of the lawyer and the son of the farmer will all live on the same food, sleep in the same tents, do the same work, go on the same hikes. This would not only help from the military standpoint. It would also help to bring about in civil affairs a realization of what is meant by democracy and a chance for real understanding of one another by all our citizens. It would mean the drilling into every man of a sense of true devotion to the flag."

90 Perish on Slav Destroyer.

Petrograd, Sept. 29.—About 90 lives were lost when the Russian torpedo boat destroyer Ochtonik was sunk by a mine in the Baltic Wednesday. Ten members of the crew were saved. The disaster is officially announced by the admiralty.

DECORATION PRESENTED TO AN AMERICAN AMBULANCE CORPS IN THE MARNE DISTRICT

French officials decorating the flag of an American ambulance section at Mingen, in the Marne district.

MUST LET CHINA ALONE

Nippon Envoy Gives Policy of Japan Concerning Country.

Japanese Not to Attempt Aggression nor Will She Allow It by Other Nations.

New York, Oct. 2.—Viscount Ishii, head of the Japanese mission to the United States, proclaiming a Monroe Dostrine of the Far East, warns the nations of the world that no aggressions against China, its territory or independence, would be tolerated by his country.

At the same time he pledged Japan not to attempt similar aggressions on her part.

Speaking at a formal dinner in honor of the imperial envoys' visit to New York, the ambassador of Emperor Yoshihito outlined publicly for the first time since he set foot on American soil the policy of his government as it relates to China.

"Circumstances for which we were in no sense responsible gave us certain rights on Chinese territory," Viscount Ishii said, "but at no time in the past and at no time in the future do we or will we seek to take territory from China or to dispoil China of her rights."

Then with dramatic earnestness he expounded the "hands off" policy of his government.

While he boldly warned the world against any attempt to invade the rights of the republic of the Far East, Viscount Ishii promised with equal earnestness that the door to legitimate trade in China never would be closed by Japan. This declaration was cheered by the 1,000 public men, bankers, merchants and captains of industry who heard him.

"The door is always open. It always has been open, it always must remain open," he said, "to representatives of these vast commercial interests, represented so well in this great gathering of kings of commerce.

"Gentlemen, I assure you that a closed door in China has never been and never will be the policy of my government. The door is open, the field is there."

KERENSKY TO FORM CABINET

To Put Army and Navy in Fighting Condition.

Petrograd, Oct. 2.—The immediate formation of a new coalition cabinet is reported to be the decision of Premier Kerensky. This is considered a direct challenge to the democratic congress, which is expected to demand the right to name the government.

The premier has agreed to a program approved by the business, banking and manufacturing interests.

The principle points are the immediate adoption of measures to put the army and navy in fighting condition, the merciless suppression of anarchy, absolute independence of cabinet ministers from parties and the taking of measures to guarantee the selection of the members of the constituent assembly which is to decide on Russia's future form of government in such a way that the assembly will express the free will of the Russian people.

REBEL STRIKE IN ARGENTINA

Anarchistic Workmen Call on Federation Members to Quit Work.

Buenos Aires, Argentina, Oct. 1.—A general revolutionary strike throughout Argentina has been declared by the anarchistic workmen, the strike to include all unions belonging to their federation. The socialistic workmen's unions have refused to join in the movement.

Try to Poison Water at Fort.

Fort Sheridan, Ill., Oct. 2.—A double guard of regulars has been placed around the tower which contains the water supply for the Fort Sheridan reservation and extra guards were stationed at the pumping works. No reason was assigned for the action. Rumor is that attempts have been made to poison the post water supply. Post officials refused to discuss the matter. It is said the I. W. W. agitators from Chicago and confined in the guardhouse were at the bottom of the alleged attempt.

SENATE TO HEAR MANY DEMANDS

La Follette Case to Be Considered by Committee on Privileges.

TO DISCUSS DISMISSED

Stone and Gronna Also Included in Petitions to Body Asking Expulsion of the Wisconsin Solon.

Washington, Oct. 3.—Petitions demanding the ousting of Senators La Follette, Stone and Gronna will be considered at once by the senate committee on privileges and elections, to which they have been referred.

This announcement was made by Chairman Atlee Pomerene.

Vice President T. R. Marshall laid a number of additional petitions demanding La Follette's expulsion before the senate. Among them was a letter from W. E. D. Stokes, New York. He said:

"Our citizens demand an immediate secret investigation by patriotic committees of the senate and house of charges of treason so widely circulated against Senators La Follette, Stone and Gronna, and against Congressmen Britten, Mosan, Baer and others.

Shooting Advised for Guilty.

"If they are guiltless of disloyalty," he urged it be so announced "through the length and breadth of our country." If any are guilty, "let the guilty be shot at once, without an hour's delay. We need a few public examples. It means saving good, loyal lives.

"If something of this kind is not done at once, we are to wake up some morning and find some patriotic men, moved by impulse, have shot these men who disgraced the senate and congress. The whole country will rise as a man and acquit them—but this will only be the beginning of lawless acts and the blame will be laid at your door—so act at once."

Death Penalty Advocated.

U. S. Grant post, 372, G. A. R., Brooklyn, demanded immediate action to end disloyalty and to "warn all people living under the protection of our flag to refrain from disloyalty on pain of suffering the penalties of treason."

TWO INCREMENTS AT ONCE

May Be Sent to Camp Dodge October 20 to 30.

Camp Dodge, Iowa, Oct. 2.—Barracks here will not be ready for the third increment of drafted men until Oct. 20, it was announced by officers of the division late today. It is believed the third and fourth increments will be consolidated at the camp at the same time, probably between Oct. 20 and 30. The population of the camp at that time will be increased by approximately 25,000 men.

Sugar Prices Drop in West.

San Francisco, Oct. 2.—The price of beet and cane sugar has dropped from 8.20 to 7.25 cents a pound here. Virtually every state west of the Rocky mountains is affected by the reduction, sugar company officials here said.

Jumps Eight Stories to Death.

Detroit, Oct. 2.—Despondency over illness and business reverses in Atlantic City were said to have caused Harry S. Day, 52, to leap to his death from the window of his room on the eighth floor of the Addison.

Deny Connection With I. W. W.

Enid, Okla., Oct. 1.—Defense witnesses in the trial of 11 draft resisters here denied knowledge of connection between the I. W. W. and the Working Class union, of which they were members. The government has contended that the I. W. W. furnished funds to organize a demonstration against the draft. Opposition was confined to a petition asking congress to put the law to a popular vote, according to the defense. None of the defendants expressed any opposition, it was declared.

TEUTON PLOT EXPOSED

Arrest of Bolo Pasha Shows Scheme to Influence Press.

Warrant Issued for French Subject Who Founded Pacifist Paper at Madrid.

Paris, Oct. 3.—That an agreement was made under which $2,500,000 would be paid in installments to Bolo Pasha through the former Khedive for influencing the French press is the charge made by The Matin. Bolo is under arrest on a charge of having relations with the enemy. It is charged he met Abbas Hilmi, former Khedive of Egypt in Zurich, in March, 1915, and concluded such an agreement which was approved by Gottlieb von Jagow, then German foreign minister.

Warrant Out for Pacifist.

A warrant has been issued for the arrest of Gaston Reutier, a French subject, who founded the pacifist newspaper, La Paix, at Madrid, with funds supposed to have been furnished by Bolo Pasha. The publication aroused the indignation of the French colony in the Spanish capital because of its Germanophile tendency.

According to other information, money was furnished Routier by Von Krohn, the German naval attache at Madrid.

When the former khedive was driven from Egypt, he took an enormous sum of money and treasure, which soon was dissipated and his further operations against the French government were financed by Germany.

GREAT LAKES STRIKE IS OFF

Increase of Wages Granted by Shipping Board.

Washington, Oct. 2.—A strike of Great Lakes seamen set for today was called off here by union leaders when the Shipping board, serving as arbitrator in the dispute with the carriers, decided to grant the wage increases demanded. Other demands were waived pending investigation by the board.

The dispute was brought to the Shipping board when it appeared the carriers' refusal to deal with the seamen's union had defeated all hope of an adjustment.

Both sides agreed to abide by the board's decision in all except the demand for union recognition, which the carriers still refuse to meet.

U. S. COAST GUARD SHIP SUNK

Rammed by Vessel Whose Identity Is Not Announced.

Washington, Oct. 2.—A coast guard vessel on patrol duty off an Atlantic port was rammed and sunk, the navy department is advised. The name of the vessel ramming the patrol boat has not been announced.

Every effort is being made to ascertain the identity of the ship which crashed into the patrol boat.

The incident was officially announced as follows:

"A coast guard vessel on patrol duty off an Atlantic port was rammed and sunk by an unknown ship early today. The work of raising the sunken vessel will be begun at once."

PREDICTS PEACE BY SPRING

J. Ogden Armour Sees Hope in Speeches of Europeans.

Chicago, Oct. 2.—J. Ogden Armour, packer, predicts the war would be over by spring.

"Political leaders abroad are talking and thinking peace and one can read it in the speeches of statesmen of all countries," he said. "That, to me, is a strong indication that peace is near."

Duluth May Have Food Controller.

Duluth, Minn., Oct. 2.—As a result of Mayor Magney's investigation into alleged wholesale destruction of food at the city incinerator, the appointment of a food administrator is a probability. Mayor Magney returned from Columbus, O., yesterday. He said that he will "tackle the problem immediately and complete his investigation." When he first took up the investigation, he consulted with the Minnesota Public Safety commission. Commissioner March suggested a food administrator be appointed.

BIGGEST AIR RAID MADE ON LONDON

Germans Attempt to Attack City With Four Groups of Hostile Airplanes.

MEET STRONG DEFENSE

Roar of Battle Longer and Louder Than at Any Time During War —No Report of Casualties Received.

London, Oct. 3.—Four groups of hostile machines attempted the strongest air attack yet made on London and the east coast towns. Some of the machines got through to London and bombarded the southwestern district.

A terrific barrage was sent up from the defense guns and the roar of battle lasted intermittently for two and a half hours.

The Germans bombed coast towns as they passed over and proceeded toward London. Two of the groups succeeded in getting a number of machines through the sky barrage. Numerous bombs were dropped on the southwestern district, which is thickly populated with the homes of the upper and middle classes.

The fire from the defending guns was longer and louder than ever before. A rain of shrapnel fell in all sections of the town and the streets were virtually deserted save for a few police.

Report of Field Marshal.

Field Marshal French, commander-in-chief of the home forces, issued the following report dealing with the raid:

"A group of hostile airplanes crossed the Essex coast at 7 o'clock and proceeded across Essex toward London.

"This group of machines was followed at about a quarter of an hour's interval by a second group, which pursued the same course.

"First attack on London was delivered from the northeast about 7:45 p. m. Most of the raiders were turned back, but one or more of the machines penetrated the defenses and dropped bombs in the southwestern district.

"About 8:15 p. m. the second group of raiders attempted to cross the defenses at various points in Northeast and North London, but without success until shortly after 9 o'clock, when a few of the machines passed across London and bombs were again dropped in the southwestern district.

Did Not Get Far.

"Meanwhile a third group of raiders crossed the Kentish coast and dropped bombs at various places. This group did not penetrate very far west.

"A fourth group of enemy machines crossed the Essex coast at 8:50 p. m., and proceeded toward London, which was approached shortly before 10 o'clock. They did not penetrate farther than the eastern outskirts of London, where some bombs were reported to have been dropped.

"No reports of casualties or damage have yet been received."

COAL COMING TO NORTHWEST

Shipments to Canada Stopped to Supply Needs Here.

Minneapolis, Oct. 3.—In order to divert coal from Canada to meet the fuel shortage in the Northwest, Dr. H. A. Garfield, fuel administrator, ordered that all shipments of coal into Canada from American lake ports be stopped, according to special dispatches from Washington.

This order followed the unexpected appearance in Washington of W. H. Groverman of the coal dock associations, and a conference which followed between Senator Kellogg and Dr. Garfield.

The situation as reported by Mr. Groverman is regarded as serious. He maintained that of the quota of 17,000,000 tons of coal that should have been delivered at American lake ports for consumption this winter in the Northwest, only 6,000,000 had been delivered, while the remainder had gone into Canada.

I. W. W. PLOTS WERE SINISTER

More Indictments Expected as Result of Seized Documents.

Washington, Oct. 3.—The great harvest of indictments returned at Chicago, it is authoritatively stated is but a fraction of what the government will reap as the result of its nation-wide raid on Industrial Workers of the World offices September 5.

Only those regarded by the government as the chief figures in the alleged conspiracy to thwart the government in its war plans have been indicted. Tons of documents seized in the raid have yet to be studied, their disclosures catalogued and arranged for use in further proceedings.

Ready for Strike Riots.

Chicago, Oct. 2.—Police reserves and deputies were held in readiness Monday in anticipation of trouble following the announcement of Elgin, Joliet and Eastern railroad officials that they would employ strikebreakers to replace the switchmen who walked out from the Gary, Ind., and South Chicago yards. Mayor R. O. Johnson of Gary declared his intention of wiring President Wilson for federal intervention. Steel mills in the cities affected, which are working on war contracts, are hampered.

"CONTRABAND"

By RANDALL PARRISH

A Thrilling War Story of the North Atlantic

Copyright A. C. McClurg & Co.

THE CASTAWAYS ARE SIGHTED BY A SHIP, THE INDIAN CHIEF, WHICH TAKES THEM ABOARD—HERE THEY FIND CONDITIONS RATHER AMAZING

Synopsis—Robert Hollis, who tells the story, is a guest on Girard Carrington's yacht, Esmeralda. It is supposed to be a "stag" party, and Hollis is surprised on discovering a woman, who evidently wishes to remain unknown aboard. Hollis, the next night, succeeds in having an interview with the woman. She merely tells him her name is Vera. Carrington tells his guests of the coming war, and that he is engineering a copper pool. The yacht is sunk in a collision and Hollis saves McCann, millionaire, and one of the party. Hollis and McCann rescue Vera and leave the ship in a small boat. McCann refuses to submit to the authority of Hollis, and the latter enforces obedience.

CHAPTER VII—Continued.

—5—

However, our conversation lapsed at last, through sheer weariness on my part. I had been at the steering oar so long, staring out into that drear expanse of ocean and sky, that every muscle of my body ached, and my eyes could scarcely be forced to remain open. In the silence she must have noticed this, for she exclaimed suddenly:

"Why, I never thought! you must be nearly dead with fatigue. Let me take the oar while you sleep."

"I am afraid I shall have to," I admitted, "for I must keep awake tonight. You feel competent?"

"Why, of course; you saw me steer. If anything goes wrong I can call you easily enough. Please lie down for a few hours."

I looked about, permitting her to grasp the oar, and slip into my seat.

"Really I feel as if I must," I said regretfully, "and there can be no danger while things keep as they are. Call me, though, if there is a change in the weather, for that jury mast will never stand any weight of wind."

"I promise; but I am a better boatman than you think."

I must have slept for several hours undisturbed, for, when I finally opened my eyes once more the sky above us was beginning to turn purple with twilight, and the breeze had failed, so that the sail flapped idly against its improvised mast. This, perhaps, was the noise which had aroused me. I sat up wide awake instantly, and stared about me in the boat. There was little change noticeable; Miss Vera still clung to the steering oar, showing no outward signs of weariness, and greeted me with a smile and nod of the head; but McCann had moved forward, and sat playing idly with an open jackknife.

"I bear testimony that you slept well, Mr. Hollis," the girl said cheerfully.

"I did not realize until I lay down how weary I was," I replied, adopting her manner, "but really you had no right to let me lie so long. Why, I must have been sleeping three or four hours, and you will be tired out."

"Oh, no; it was no trick at all. The wind kept steady until just a few moments ago, and I do not feel in the least fatigued."

"And you have seen nothing? no smoke, no sail?"

She shook her head, her eyes grown grave.

"Not a thing; we seem to be absolutely alone in the immensity of the sea—just one great wave after the other. It—it gets on my nerves."

"It certainly does; such a sight has driven more than one insane. But what does this mean? Why is the biscuit bag out here?"

I pointed to the bottom of the boat, beyond her feet. Her eyes met mine, her answer made in a whisper.

"He—he crept back here while I was adjusting my oar, and took two."

"McCann?"

"Yes, he had the bag before I noticed, and I thought it best not to anger him then, for he held that open knife in his hand."

"You should have called me."

"The mischief was done before I had any time. Besides I knew you needed the sleep. What are you going to do?"

I smiled a bit grimly, glimpsing him beneath the sail.

"I am about to give Mr. Fergus McCann, late of New York, a little specimen of sea discipline which I hope may last him for the remainder of this voyage," I replied quietly. "Hold the boat steady, Miss Vera, and leave me to attend to this degenerate son of wealth."

I crept forward, scarcely jarring the frail craft, and was beyond the jury mast before the fellow had aroused sufficiently from his knife play even to note my approach. He stared at me insolently, leaving the keen blade trembling in the plank.

"McCann," I began, wasting no time in preliminaries, lifting myself on one knee, and facing him, "the young lady says you took advantage of my being sound asleep to help yourself to biscuits; is that so?"

"Well, what if I did? I was hungry."

"So am I; so no doubt is the lady, for the matter of that. Hunger is no justification for stealing. You were not starving; you received exactly the same share we did. More than that, I have assumed command of this boat, because I am the only one on board knowing the ways of the sea. I told you plainly what you were to do, and I propose to enforce my orders. Not another bite will be given you today, or tomorrow."

"Is that so?" he drawled, a wicked smile revealing his teeth. "You must think you are dealing with a foremast hand. It takes something besides threats to run me, Mr. Robert Hollis."

He half arose to his feet, but I forced him back onto the thwart none too gently. His face was red with passion, his eyes malevolent.

"D—— you! take your hands off me!" he snarled. "No blustering sea bully is going to make me jump at the crook of his finger. You touch me again, and I'll show you who I am, you big brute. Me take orders from you? Why, pooh; I've got more money in New York than you ever saw."

"If you owned the Bank of England it would mean nothing to me. You will do what I say, or I'll make you."

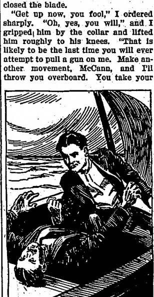
"You will? How?"

"No matter how; I've trained more men than you to obedience in my time, and always found a way."

"Huh! the bucko-mate business, hey?" he sneered. "Well, just try that on me, if you think it safe. I'll show you—"

His hand darted back toward his hip pocket, but I was looking for the movement, and ready. His fingers had barely gripped the butt of his weapon when my clinched fist crashed into his face. I have struck harder blows, for I was not poised to put my whole weight behind it, yet the man went over as though floored by an ax, and lay huddled in the bows quivering like a jelly fish. I jerked the revolver from the grip of his hand, dropped it into my pocket, wrenched the open knife from the wood in which it stuck, and closed the blade.

"Get up now, you fool," I ordered sharply. "Oh, yes, you will," and I gripped him by the collar and lifted him roughly to his knees. "That is likely to be the last time you will ever attempt to pull a gun on me. Make another movement, McCann, and I'll throw you overboard. You take your orders from me, and you must jump when I speak, or I shall take pleasure in breaking every bone in your body. Do you understand that?"



"Say Sir, When You Speak to Me."

I doubt if he could see out of one eye, but the other exhibited a terror almost pitiable.

"Y—yes."

"Say sir, when you speak to me."

"Yes—yes, sir."

"You'll keep to this end of the boat hereafter; whether I am asleep or awake, you stay forward of the jury mast."

CHAPTER VIII.

We Sight a Tramp.

The one blow, coupled with the loss of his weapons, had so completely cowed the fellow, that I scarcely gave him another thought. I crept back to the stern, and took the steering oar, the girl's eyes meeting mine questioningly.

"I could not see all that occurred, because of the sail," she said. "You disarmed the man?"

"Yes, I have his revolver in my pocket, and the knife also. He will make no more trouble. Come, we will divide a biscuit between us, and then it will be your turn to lie down."

"But doesn't McCann have any?"

"He has had more than his share already. I'll offer him a swallow of water—that's all. I imagine the way his head feels, he has forgotten all about being hungry."

"You had to strike him?"

"Slightly, a mere tap of sea discipline," and I glanced at my knuckles. "He was armed, you know, and I could take no chances. There is no harm done. Come; are you not tired enough to rest?"

She glanced up into my face.

"You will call me at midnight, if I fall asleep?"

"If I feel worn out then, and the sea keeps as it is, or no worse. There, take my coat for a pillow. No, really I shall not need it; this is an ideal summer night, but we are out of the track of ships."

"But do you still believe we will find one?"

"I have every faith in the world," I answered heartily, determined to conceal my doubts. "If the weather holds pleasant, we should be far enough south by morning to be in the north Atlantic lane between New York and Liverpool. Lie down, and rest, Miss Vera; there is no sign of any storm brewing, and tomorrow you'll probably have the deck of a liner under your feet."

I know not how much she may have believed of what I said, but she smiled me a cheerful good-night, and lay down in the bottom of the boat, my coat folded under her head. She rested there motionless, her face shadowed by one arm, and very soon her regular breathing convinced me she slept like a tired child. I looked at her shadowy figure; then forward to where McCann hung silent in the bows.

What if we should not overhaul a ship? What if some evil fate would permit of our floating on unseen? And there were few eatable biscuits left, and barely a cupful of tepid water. The thought of what the end might be nearly crazed me, as I sat there alone in the silence and gloom—I could picture those final hours of despair, as we lay starved and helpless in the unguided boat, the girl mercifully unconscious, perhaps, and McCann a gibbering idiot. My God! I must stop thinking! I must be a man for her sake; aye, and retain my self-control, so as to do a man's work to the end.

At midnight the wind was at its height, and I did not call the girl, as I dared not trust her to steer the craft through such rough water. She slept undisturbed, not even changing her position, a mere dim outline at my feet. Forward McCann had stowed himself away beyond the bow thwart, and I could see nothing of him under the bight of the sail. I was the only one awake in the leaping boat, fighting its desperate way through black waters under the dull gleam of the stars.

The sun had begun to show above the horizon before the girl finally awoke, and sat up in the bottom of the boat, staring about her with wide-open eyes, as though startled by the change in the aspect of the sea. Finally she lifted herself to the nearest thwart, and greeted me reproachfully.

"You have let me sleep all night, and lying on your coat. You must be tired nearly to death."

"Far from it; and we are to be blessed with another day of sunshine. Perhaps by afternoon the sea will have gone down, and I can get a nap. Are you ready for breakfast?"

My explanation did not satisfy her; I could read that in the expression of her face, but she made no further protest.

She drew out the biscuits from the locker, broke one in two, and handed the half to me. Still clinging to the bag, her glance fell upon the slouching figure of McCann in the bow, and then her eyes sought my face questioningly.

"You are not going to offer him any?"

"He deserves none; he has already had more than both of us together. How many are left?"

"Seven fit to eat. But—" she hesitated, yet went on bravely enough, "please, he is not accustomed to being deprived of food, and is really suffering. Let him have my share, for I am not at all hungry—truly I am not."

"I shall insist on your eating," I said, almost sternly. "Your share is little enough to sustain life. If it comes to a choice between saving you, and that miserable thing yonder, my course is taken. However, I grant your request now, although I doubt if he shows even gratitude. McCann!"

He lifted his head, and stared aft, but without changing attitude.

"Here is your ration. You do not deserve a bite, nor would you receive any through me. You owe this to the lady—catch it now."

He picked the half biscuit up from the bottom of the boat, where it fell at his feet, and began nibbling at it like a famished dog. There was no sign of thankfulness in his action, and he continued to glare at us with one eye open in sullen insolence.

The sun blazed down upon us out of a clear sky, glistening along the foam of racing waves, but, as noon approached, the southern sky became misty, the clouds increasing in density until we could see only a few hundred yards beyond our bow. It was not a storm cloud, and brought with it no fear of disaster, but completely blotted out the horizon, and gave a dark, sullen gloom to the surrounding waters.

It must have been three o'clock when McCann suddenly gave vent to a startled roar, straightening to his knees, and pointing straight ahead into the smother. I stared, but saw nothing except the grotesque forms assumed by the whirling mist, but Vera leaned out over the side, shading her eyes.

"What is it?" I asked sharply. "Make a report, man!"

"A ship yonder!" he shouted, but without turning his head. "I saw it plainly enough, but it has gone now."

"I see it, Mr. Hollis!" the girl cried excitedly. "Right out there through that lane of mist—it's a big steamer!"

"Straight ahead?"

"Just a little this way—there! you can see her now!"

I did, a mere glimpse, instantly obscured, but visible again a moment later. McCann was on his feet, gesticulating wildly.

"Now, d—— you!" he shouted, "put us on board there, and I'll show you who I am. You brute, I dare you to put us on board."

"Sit down!" I ordered. "Now, keep still, and stand by with that rope. I'll put you aboard all right, but until I do, you will obey what I say, or go into the water."

I took my eyes off him, and stared at the vessel, conscious instantly that something was wrong. She was apparently a big steel freighter, four thousand tons I guessed, her water line showing a heavy cargo, and her bows red with rust where the black paint had disappeared. The foremast was broken off at the tops, remaining a great splinter, and where the bridge and wheelhouse ought to be there was piled a mass of wreckage, showing black above the bulwarks. A wheel had been rigged aft on the poopdeck, and there alone I saw evidence of human beings on board. One fellow stood gripping the spokes, while another leaned motionless against the rail facing forward. Neither one saw us, although I swung my hat, and sent a hail across the intervening water. The girl glanced back into my face.

"What is the matter with them, Mr. Hollis?" she asked. "Is something wrong?"

"I am afraid so; their foretop mast is down, and it looks as though it had smashed the bridge and wheelhouse when it fell. They have rigged up an emergency wheel aft. Can you make out her name?"

"The Indian Chief of Philadelphia."

"No regular liner—probably a tramp. I never saw funnels painted like that before, and she shows no flag. However, any port in a storm."

I stood up, hollowing my hands.

"Ahoy there! Indian Chief, ahoy!"

The man leaning on the after rail turned, and gazed down at us, shading his eyes, and the heads of a half dozen others bobbed up above the forward bulwarks. I could see the fellow aft plainly now, a broad, stockily built man, with extremely red face, wearing overalls, and a woolen shirt, open at the throat. In appearance there was nothing of the officer about him, yet it was his voice which finally answered my hail, sending a deep, roaring note across the waters.

"Hullo, there. Who are yer? From some ship close by?"

"We are passengers from the American yacht Esmeralda, sunk in collision two nights ago, and have been afloat ever since. Can you take us aboard?"

"Passengers, you say? All of yer passengers?"

"Yes."

He turned, and spoke to the man grasping the wheel, a tall, loose-jointed fellow in straw hat and pink shirt. There was a moment's argument before he returned to his position at the rail.

"I dunno as yer would be much better off along with us than yer are thar in the dinghy," he called indifferently. "For, in a manner o' speakin', we're no more than a wreck. I reckon thar ain't no one among yer who knows how to navigate?"

I stood up, hollowing my hands to make my voice carry more clearly.

"That is not a very sailorlike speech, my friend," I shouted, yet striving to conceal anger. "But as you put humanity on those terms, I'll answer you. I have been in the merchant service, and commanded ships."

"Well? Is that so? Sail, or steam?"

"Steam—the old Atlas line. Do you take us aboard?"

He did not answer directly, but had lost his air of indifference, striding forward to the end of the poop, and giving orders to the men forward. The black heads adorning the forecastle rail disappeared, and a moment later the round, red face again appeared.

"Aye, we'll take yer, sir," he called down, a touch of deference in his hoarse voice. "Ye'll understand the trouble once yer come aboard. Yer all able to climb, I reckon?"

"We have a woman with us."

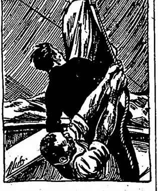
"It'll be quite a job to rig up a swing, sir."

I turned and looked at her; then up the straight steel sides looming before us, but before I could speak, she had made decision.

"I can go up the ladder, Mr. Hollis," she said firmly. "I am not afraid."

"All right," I called. "Lower away, and send a man down to steady it below."

The little dinghy swept in easily, and, under my directions, McCann awkwardly fended it off from scraping against the steel sides. As the rope ladder straightened, I caught the lower coil, and held it firmly. Down the ratlines, hand over hand, until he dropped sprawling into the boat, came one of the crew—a coal black negro. The fellow above, now standing on the rail and clinging to a backstay, roared down at him.



She Did Not Hesitate, Grasping the Rope Firmly in Her Hands.

"Haul her in, Simms; haul her in. That's more like it. Now hold all taut. Send up the lady first, captain; there'll be a hand to help her in the chains."

She did not hesitate, grasping the rope firmly in her hands as the negro and I lifted her high enough to get foothold.

"You are all right, Miss Vera?"

"Yes," she called down.

"Then go up, but hold tight; the vessel may roll."

McCann followed, too glad to thus escape me to refuse, yet plainly enough half dead with fear. As soon as I saw his legs dangling, while the seamen above dragged him inboard, I drew myself up to the lower ratline, leaving the negro alone to hold the line.

"Hey, above there," I shouted. "What shall we do with the boat?"

"Let her go; there is no room to stow it on deck. Come aboard, Simms."

We went up together, the ladder swinging dizzily to our movements. The voice of the man who seemed to be in command growled down from the poop:

"Haul in the ladder, and stow it; then go forward and get some o' that riffle overboard afore dark. This way, captain; I'd like a private word with yer afore yer go below."

There were perhaps a dozen men in view, a typical freighter's crew, I judged, mostly foreign faces, two of them negroes. They worked silently, and then shuffled forward, without exhibiting the slightest interest in my presence, or giving a glance aft. Evidently something unusual had occurred, but just what was the nature of the accident to the Indian Chief I was unable to decide. I climbed the few steps, and joined the red-faced man waiting me on the poop.

"I am very glad to welcome you on board the Indian Chief, captain—Captain—"

"Hollis," I answered shortly. "And your name?"

"Masters—Gideon Masters."

"In command?"

"Well, yes, in a way. I reckoned you'd want the whole story, an' thet things hed better be explained afore yer went below."

"Of course; but first a question or two, Mr. Masters. What has become of my companions?"

Hollis and Vera find their courage severely tested. The final decision is made by the girl in a manner that wins full admiration from her protectors.

(TO BE CONTINUED.)

DADDY'S EVENING FAIRY TALE

By MARY GRAHAM BONNER

THE KATYDIDS.

"Let's get a real automobile," said Fairy Princess Joy.

"What about an airship?" asked Fairy Ybab.

"An automobile would be the thing for the sort of trip I am thinking of," said Fairy Princess Joy.

"Oh, you're thinking of a trip, eh?" asked Ybab. "Well, if I had known that, I would certainly never have thought of suggesting anything, for I know full well that you have a great many ideas and most of the fun of the party all thought out."

Fairy Princess Joy laughed. "I have an idea," she said.

Just at that moment Princess Twilight-Bell came along. "Hello!" she called in her beautiful bell-like voice.

"Good evening, Fairy Twilight-Bell," said Ybab.

"How are you this afternoon, Princess Twilight-Bell?" asked Princess Joy. Sometimes Twilight-Bell and Princess Joy were called "Princess" and sometimes "Fairy." Both names belonged to them.

"Ah, it's a merry joke to hear one say 'Good afternoon,' and the other 'Good evening,' " laughed Twilight-Bell.

"We knew that would make you laugh," said Ybab, "and your laugh is just like music, so I always want to hear it."

Fairy Ybab is the leader of the fairies' orchestra, you know, and loves music above all things. She makes wondrous music for the little creatures of Fairyland, and they help her, too.

"Of course," said Twilight-Bell, "you are both right. It is quite as correct to say 'Good evening' as it is to say 'Good aftenoon,' at this time of the day."

"Good twilight," said Ybab, and Twilight-Bell laughed again.

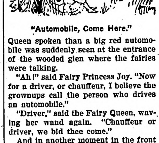
"I've never heard anyone say 'Good-twilight,' " she said, "but it sounds very lovely. Let us always say it at this time of day in Fairyland."

So all the fairies joined Twilight-Bell's club, in which all the members said "Good-twilight" every afternoon after the sun had gone to bed and before the night had quite arrived.

"Princess Joy wants to get an automobile," said Ybab to the other fairies.

"If she wants it she shall have it," said the Fairy Queen, and with a wave of the silvery-purple wand she was carrying she said:

"Automobile, come here!" Now, of course, Fairyland is the only place where an automobile will come in just that way, but no sooner had the Fairy Queen spoken than a big red automobile was suddenly seen at the entrance of the wooded glen where the fairies were talking.



"Automobile, Come Here."

"Ah!" said Fairy Princess Joy. "Now for a driver, or chauffeur, I believe the grownups call the person who drives an automobile."

"Driver," said the Fairy Queen, waving her wand again. "Chauffeur or driver, we bid thee come."

And in another moment in the front seat of the automobile the fairies saw a little round man dressed in green, wearing a flowing green cape and a tall hat of green, with silver bells.

"Come on, fairies!" shouted Princess Joy. "This is glorious!" They all climbed into the automobile. Some sat on the sides and some on the seats and one fairy perched herself on the shoulder of the little man, who did not seem to mind in the least.

"We are to have a twilight supper in honor of Twilight-Bell," said Princess Joy. "We must not start on our trip just yet."

So Princess Joy brought out two big baskets she had hidden away under two bushes and gave each fairy a little napkin made out of ferns.

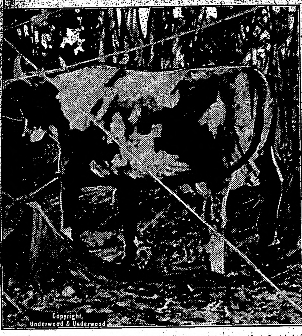
They had the most delicious supper, but soon it was dark and Princess Joy told the little old man to drive the car along a country road she wished to go.

They were instantly followed by a band of Katydids. "I had been told that they would follow an auto light, and there is one at the back of this and all other automobiles," said Princess Joy. To be sure, she was right. The Katydids flew along after the automobile, and as they flopped their wings up and down they sang. Such a concert as they gave, and all the fairies were so surprised and delighted, for they had not been able to guess what sort of a trip they were going to have with Princess Joy. So once again she was true to her name and gave joy, but this time she said it was owing to the kindly little Katydids!

Greatest Art in Life.

The greatest things in the world are pleasant thoughts, and the greatest art in life is to have as many of them as possible.—Bovee.

AMOUFLAGE COW DOES HER BIT IN THE WAR



This "cow," though it is only a fabricated creature of wood and painted cloth, is doing its bit to help win the war. A camouflage artist has done his work well and what appears to be an innocent scene of a cow peacefully grazing is really a painted lure to conceal a roofed-over battery. The cow is standing on the roof.

HARVARD MEN IN HAIL OF BOMBS

Show Rare Pluck When Hospital Is Attacked by German Airmen.

4 KILLED AND 32 WOUNDED

Major Murphy, Red Cross Commissioner, Cables Full Details of Disaster to H. P. Davison—Show Speed in Emergency.

Washington.—The manner in which the Harvard unit's base hospital in France was attacked by a German airplane, with the result that several Americans were killed and wounded, was described in detail in a long cable message received here by Henry P. Davison, chairman of the American Red Cross war council, from Maj. Grayson M. Murphy, Red Cross commissioner in Europe. The message follows:

"An American Red Cross inspector who has just returned to headquarters in Paris has brought from the United States army base hospital unit of Harvard university, one of the many similar institutions on the surgical supply list of the American Red Cross, a detailed narrative of the bombing of that hospital on the night of September 4 last, and of the characteristic pluck and promptness with which the emergency was met. Five bombs were thrown, the explosions instantly killing Lieut. William F. Fitzsimons of the Medical Officers' Reserve corps, United States army, and three army privates, and wounded Lieuts. Clarence A. McGuire, Thaddeus D. Smith and Rea W. Whidden, O. R. C., U. S. A.; six privates, a woman nurse and 22 patients from the British lines who were under treatment there for wounds.

Attack Occurred at Night.

"The airplane attack occurred at 11 o'clock at night. Just at that time fortunately no convoy of wounded was being received or the list of casualties would have been far greater, as one of the bombs fell into the center of the large reception tent to which the wounded are first borne for examination. Ten seconds suffered for the dropping of the bomb from the first flying plane, and within less than a minute afterward the surgeons of the hospital were at the task of collecting and attending those who had been struck down. And for 24 hours they were at work in the operating room, one surgeon relieving another when the latter, from simple exhaustion, could work no longer. The very next day, just as if nothing had happened, these same surgeons were called upon to receive and care for 200 wounded sent in from the trenches of the British expeditionary force.

"The hospital, which is on the French coast, has 1,800 beds, and is under canvas in a quadrangle 800 feet square. It is in a district in which there are many similar institutions, and is unmistakable as a hospital. At the time the German aviator flew over it most of the surgical staff was engaged in making rounds of the wards. Lieutenant Fitzsimons, however, was standing at the door of his tent. There had been a brief warning of the presence of a bombing airplane in the neighborhood, because a quarter of a minute before the sound of exploding bombs was heard from a point perhaps 200 yards from the hospital. This warning sufficed to cause all lights in the tents to be extinguished immediately, and those who had been under fire before threw themselves face down upon the ground.

"Then came five explosions in rapid succession in the hospital itself. The first two were directly in front of Lieutenant Fitzsimons' tent. He probably never knew what happened to him, as his body was torn to shreds. The next two fell a hundred feet beyond, in a ward in which there were many patients, and the last struck the reception tent. Overhead there was no sound. The German aviator flew too high to be heard, but he left his identity behind him, not only in the bombs he dropped, but in the derisive handful of pfennings he scattered upon the hospital as he whirled away. A number of these were found when light came.

Hit by Bomb Fragments.

"Lieutenant McGuire, who was in a tent adjoining that of Lieutenant Fitzsimons, was struck by three bomb fragments, but was not seriously wounded. His escape was narrow, as there were more than a hundred holes cut in his tent. Lieutenant Smith was struck in the knee and Lieutenant Whidden in the chest while in their tents in the office section of the quadrangle. The private soldiers injured were on duty as orderlies in the reception tent, and the bomb fell almost upon them. So severely was Private Aubrey S. McLeod injured that it was necessary to amputate both his legs.

"Although the explosion of the bombs caused horror in the hospital there was not the smallest sign of panic, and the work of discovering the wounded and collecting them was immediately begun. This was made doubly difficult by the darkness, but everyone sprang to it with a will. Many of the injured had been blown from their cots, some even outside their tents, where they were found tangled up in the tent poles. The American nurse, although struck in the face by a fragment of steel from the bomb, refused to be relieved, and remained at her task courageously to the end. A hospital orderly who worked untiringly was found later to have been struck in the head by a fragment and painfully injured. He had just tied up his head and gone on.

"In the operating room Capt. Horace Binnoy and Elliott with their assistants worked all night. Several delicate operations were performed and their task was made all the harder by the fact that in innumerable cases the patients were in serious danger of infection from the pieces of wood and nails and dirt which had been blown into their bodies.

"Lieut. Col. E. U. Pattison, U. S. A., commanding officer of the unit, and Maj. Harvey Cushing, head of the surgical force, the latter being at the front at the time of the disaster, have expressed the highest admiration for the manner in which the emergency was met. Latest reports are that the condition of the wounded is progressing satisfactorily."

INDIANS REFUSE CODDLING

Those Upon the Klamath Reservation Insist They Have Passed Tribal Stage.

Klamath Falls, Ore.—Indians on the Klamath Reservation have decided they have passed beyond the tribal stage and say they want to be allowed to conduct their business and be governed as individuals and not collectively.

At a recent meeting of the Klamath Indian Progressive club, the members passed resolutions asking that the government treat them the same as white residents. "Give us a chance," the resolutions read.

The Indians hope to have the tribal timber sold and the proceeds divided among the members. The Klamath Reservation in southern Oregon occupies a territory of about 50 by 60 miles and contains timber and water resources.

Silver Plate Periscopes.

New York.—Silver plating the periscopes of their U-boats is the latest invisibility promoting device of the Germans, it was stated by officers of an American liner just arrived at an Atlantic port. Covering the periscopes with a coating of silver renders them practically invisible.

WAR BRINGS BIG TRADE CHANGES

Resources of United States Searched as Never Before to Meet New Demands.

RIVER TRAFFIC IS INCREASED

Upper Reaches of the Mississippi Help Relieve the Congestion on the Railroads—Strontium Ore in Demand.

New York.—One of the most interesting and important developments in the United States at the present time is the manner in which commerce and industry are gradually adjusting and tensing themselves under the full load of the war strain; curtailing activities here, speeding up there, and reaching out at some points, under the pressure of new needs, to create entire new industries. In industry the resources of the United States are being searched as never before to meet the new demands, and mineral wealth which has always been there against the time of need, but never before called upon, is being developed, while in commerce new processes, new economies and new efficiency, involving no new discoveries, but latent possibilities in time of peace, are being permanently added to the wealth of the nation under the pressure of unprecedented demand.

The whole process is too vast and varied to be seen clearly at one time, but there are several means by which occasional glimpses can be gained. One of these is by the reports of the department of the interior on the mineral resources of the United States, which continually describe the development of new mining activities in metals and chemicals, whose deposits have been known for years, but whose possibilities had not been fully recognized. Another is in the pages of the various technical journals, in which, every week, there is at least one story of a new commercial or industrial idea which has been added to the national machinery.

On the Mississippi.

In new traffic channels it is Iron Age which reports that for the first time—only a short while ago, moreover—the upper Mississippi has been opened to ore and coal traffic on a big scale. The Mississippi has been big enough, for years, to carry far more heavy, slow traffic than its upper reaches, as far as St. Paul, the head of navigation, than ever, apparently, anyone thought of putting upon it. Ore trains and coal trains have moved along its banks for years, moving the freight at a cost per ton mile far beyond the demands of the river, but it took the war to make people realize the full value of the stream.

But now that war has come, and the railroads of the entire country are under such a strain as they never before had to bear, people in St. Paul and all the river towns as far down as St. Louis have suddenly perceived that the old Mississippi must do her share. And quite recently six new steel barges, carrying 3,000 tons of coal—the largest cargo ever hauled to the head of navigation on the river—arrived at St. Paul, the vanguard of a new fleet.

The development of an entirely new mining industry within the United States, under pressure of the war, is told in a recent bulletin of the Geological survey, on "Strontium in 1916."

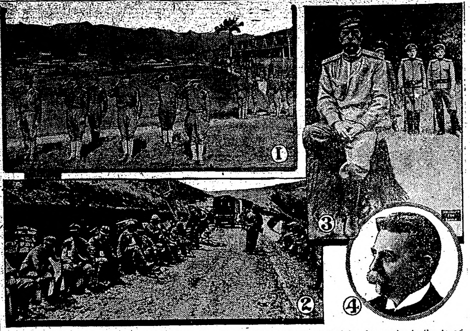
For many years large deposits of strontium ore, in the form of celestite crystals (strontium sulphate) and strontianite (strontium carbonate) have been known to exist, often beside beds of limestone which were being actively quarried, in Michigan and Ohio along the shores of Lake Erie, Schoharie county, New York, in West Virginia and Texas, and in California and Arizona. Strontium salts were used in beet-sugar refining, but far more in the manufacture of fireworks, because of the brilliant crimson flame they gave.

Market for Strontium.

Before the war, however, the market for strontium was so limited, and being confined, moreover, to the Atlantic seaboard, imports of strontium ore from Europe were cheaper than the freight rates from California and Arizona, the only deposits which had ever been worked commercially.

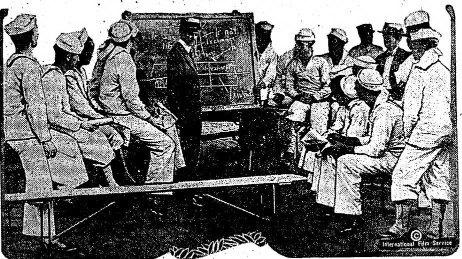
The war, however, changed all this in two ways. In the first place, it created a new and tremendous demand for strontium, magnesium, and barium, for vast quantities of signal rockets, flares, etc., both at the front and on the sea. Moreover, here at home the increase in freight traffic on our railroads, due to war demands, necessitated a considerable increase in the use of signal flares here also.

The new industry was getting on its feet in 1916. In 1914 about 2,000 short tons of strontium ore had been consumed by American fireworks manufacturers, the commonest form of the refined product being strontium nitrate at around 10 cents a pound or less. Of this 2,000 pounds, the proportion of domestic ore was so small as not to be worth reporting. In 1916 the consumption of strontium ores had risen nearly a 100 per cent; the price had caused the huge strontium deposits in California and Arizona to be opened and worked for the first time in earnest, and upward of 250 tons of strontium ore had already been shipped.



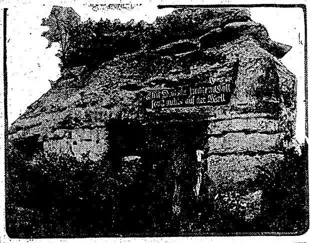
1—View of the encampment in Porto Rico where patriotic Porto Ricans are training for service in the American army. 2—Wounded Italians sitting by a roadside east of Gorizia, waiting for an ambulance. 3—Nicholas Romanoff, deposed czar of Russia, with a stump for a throne. 4—Hjalmar Branting, leader of the socialists of Sweden and editor of the organ of the labor party.

TEACHING FRENCH TO OUR JACKIES



If our jackies can't speak French almost as well as they do English, or salt water English, at least, it won't be the fault of some of the hard-working naval instructors. On board ship and in the navy yards, the jackies are wrestling with all sorts of French tongue twisters. Here is a typical French class aboard an American battleship tied up at a navy yard. The lesson for the day is on battleship nomenclature.

"WE GERMANS FEAR GOD, NOTHING ELSE"

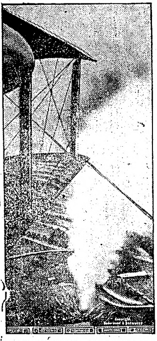


Inscribed on the rock above this artillery shelter is the avowal: "We Germans fear God, but nothing else in the world." The shelter is in the ravine of the Elephants, near Lyons.

READY FOR ATTACK FROM ABOVE OR BELOW

Scene on a French torpedo boat, showing how aerial quick-fire guns are mounted on the torpedo tubes, thus providing for defense against either aerial or submarine attacks.

BOMBING A MUNITION DEPOT



This remarkable photograph was taken inside the German lines from the airplane of an aviator who made a raid on a great boche ammunition depot. The daring aviator, starting out on the apparently reckless venture of getting by the German lines and successfully bombing the Teuton stores of munitions, flew to a point above the depot and dropped quantities of incendiary bombs while the Germans kept firing a terrific fusillade at him. Despite the danger, he kept at his task and earned his reward when he saw the munition storehouse burst into flames. The smoke from the burning depot can be seen ascending. The aviator returned to his own lines safely.

Her Choice.

Hazel was at a loss to make a choice between two young sprouts in her garden of love. She desired a hardy plant, one that would thrive in any soil and under any conditions. No shadow must prevent the sprout selected from growing.

Every day could not have its full allotment of sunshine. Which would she choose? Either was pleasing to the eye. Then came a day when the wind blew hard—a draft from one end of the country to the other.

One of the sprouts withered from the biting blast. The other thrived and grew as though it had been blessed with continual sunshine. Now Hazel is happy. Her choice has been made.

DAIRY FACTS

CLEAN UP TO CHECK DISEASE

Diseases of Calves Have Been Lessened at Ohio Station by Disinfecting Dairy Stables.

Disinfecting dairy stables checks contagious and infectious cattle diseases. A thorough clean-up followed by disinfection about twice a year with a coal-tar disinfectant is recommended by the Ohio experiment station.

Spraying a Dairy Stable.

Calf diseases have been lessened in the dairy herd at the experiment station by disinfecting the stables each spring and fall. Digestive troubles, particularly white scours, have not been troublesome and fewer deaths in calves have occurred after this practice was adopted. Less garget in cows has been evident. The same treatment will help to hold in check tuberculosis and contagious abortion in herds where these diseases are prevalent.

Thorough disinfecting is urged to kill all disease germs in every possible lurking place. Mangers, stalls and floors need special attention. Coal-tar dips are used at the experiment station. After disinfection the stables are whitewashed.

GENERAL CARE OF UTENSILS

Four Important Rules That Should Be Followed in Washing and Drying Milk Vessels.

General recommendation for the care of utensils are:

1. Rinse in lukewarm water as soon after use as possible.
2. Wash in hot water containing washing powder which will remove grease.
3. Rinse in clean hot water and place in live steam 15 seconds, drain and place right side up until steam evaporates.
4. Invert in a clean protected place when dry.

LOCATE CAUSE OF LAMENESS

Many Make Mistake of Not Making Careful Examination, Simply Applying Some Liniment.

Cows go lame. Instead of making a careful examination to find out the cause, we use a lot of liniment and think we have done all that is required. After much suffering on the part of the innocent animal we find perhaps that the trouble was due to a nail or something else in the foot.

It pays to watch for and guard against such accidents to live stock.

UTENSILS NEEDED FOR TEST

Outfit Can Be Procured From Any Creamery Supply House for Comparatively Small Sum.

The utensils needed for the Babcock test are a Babcock tester, a few test bottles, a pipette, an acid measure, some sulphuric acid and a pair of dividers. All this can be procured from any creamery supply house for from $5 to $10, according to whether a four or an eight bottle tester is wanted.

MILKING MACHINE IN FAVOR

Attention Called to Device on Account of Labor Shortage—Farmer Saves Time and Labor.

The labor shortage calls marked attention to the milking machine. It will pay to install one on farm where 20 or more cows are milked daily. You can get as much milk as by hand milking and can save time and labor.

AGRICULTURAL DEPARTMENT

This department of THE ELEVEN TOWNS is devoted to the interests of the agriculturists of Pennington and Marshall Counties. All the articles are by foremost authorities, including U. S. Government experts.

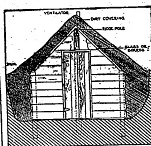
CELLARS OR CAVES

Particularly Desirable for Storage of Many Surplus Vegetable Crops.

SUPERIOR IN MANY RESPECTS

Outdoor Affairs Can Be Maintained at Uniform Temperature Over Long Period—Ventilators Add to Efficiency.

Outdoor storage cellars or caves are excellent for the storage of many vegetables. They are particularly desirable on the farm, as they afford convenient and inexpensive storage facilities for surplus vegetable crops that otherwise might be lost. They possess all the advantages of the storage room in the basement and are superior in many respects. The outdoor storage cellar can be maintained at a uniform temperature over a long period. It is possible to keep the cellar cool and quickly to reduce the temperature of the stored product to the desired point for safe storage by opening the door during the night and closing it in the morning before the air becomes warm. All ventilators should likewise be kept tightly closed until the outside air is again cooler than that within the cellar, when they should be opened, unless the outside temperature is so low as to be dangerous. This safeguards the product and adds to the efficiency of the storage chamber. Vegetables can be more conveniently placed in such a cellar than in the storage room in the basement of a dwelling.



End View of an Outdoor Storage Cellar, Showing the Frame of Posts Covered With Planks or Puncheons and With Dirt. Additional Protection May Be Given by Placing Manure, Straw, or Corn Fodder on Top of the Dirt.

When the chief use of the outdoor storage cellar is for storing turnips, beets, carrots, and other root crops commonly used as stock for food, it should be located near the stable, where the material will be convenient for winter feeding. When it is to be used for vegetables for the table the cellar should be accessible from the kitchen at all times. If apples or other fruits are to be stored in an outdoor storage cellar it is desirable to have a two-compartment cellar, one for vegetables and one for apples, with a ventilating apparatus in each compartment.

Construction of Cellar.

As the root cellar must be weather proof, that is, capable of being kept free from moisture and free from frost, its type and construction vary with the geographical location. In the southern portion of the country the structure is usually entirely above ground and protected by only a few inches of sod and with straw, leaves, etc. In Northern sections outdoor storage cellars are made almost entirely below ground and covered with a foot or two of earth.

Storage in Regions of Mild Winters.

An above-ground storage cellar, suited to conditions in southern sections of the United States may be built on a well-drained site at slight expense. A row of posts may be set 5 or 6 feet apart, extending 7 or 8 feet above the surface of the ground, with a ridgepole placed on top of them. Against each side of the ridgepole a row of planks or puncheons is placed, with their opposite ends resting in a shallow trench 4 or 5 feet from the line of posts. The ends are boarded up, a door being provided in one end of the structure and the room covered with sod to a depth of 5 or 6 inches. A good type of outdoor storage cellar built along these lines is shown in the illustration.

Storage in Regions of Severe Freezes.

In sections where low temperatures prevail it is necessary to insulate the storage house so that the vegetables will not freeze. An above-ground type of storage house much used in many sections of the North has thick walls filled with insulating material, such as sawdust or shavings. The construction is of frame and the walls are usually 10 to 12 inches thick. Both the inside and the outside walls are sheathed with matched lumber so as to make them airtight. The rafters are ceiled on the under side with the same material and the space between the rafters filled with dry insulating material. The use of building paper in the roof and walls of the storage house is of great assistance in insulating it.

A type of storage cellar much used in Northern sections of the country is built partly under ground. The walls are of masonry and extend to a point just above the surface of the ground. On these walls plates are set and a roof of frame construction erected. The roof structure is ceiled on the under side of the rafters and some suitable insulating material, such as dry sawdust or shavings, packed in the space between the rafters, and then the sheathing, paper, and roofing material are applied. This type of structure is preferable in many respects to the above-ground type, as it is easier to maintain the temperature at the proper point and its insulation is a comparatively easy matter.

Protection from freezing may be secured with a simpler type of structure by making it entirely underground. In order to avoid steps down to the level of the floor, with the consequent extra labor in storing and removing the vegetables, a sidehill location is desirable.

The excavation in the hill should be of the approximate size of the cellar, using the dirt for covering the roof and for banking the sides of the structure. A frame is erected by setting two rows of posts of uniform height in the bottom of the pit near the dirt walls and a third line of posts about 5 feet higher through the center of the pit. These posts serve as supports for the planks or puncheons forming the room of the structure, as with the above-ground type of storage cellar already described. The door is placed at one end and a ventilator put in the roof. The whole structure with the exception of the portion occupied by the door is covered with dirt and sod. The thickness of the covering must be determined by the location; the colder the climate the thicker the covering. The dirt covering may be supplemented in winter by a layer of manure, straw, corn fodder, etc. Outdoor storage cellars usually are left with dirt floors, as a certain degree of moisture is desirable. These cellars may be made of concrete, brick, hollow tile, stone, or other material.

Outdoor Storage Cellar Built of Concrete.

The type of outdoor storage cellar described above, while low in first cost, is short lived, as the conditions in the cellar are favorable to the decay of wood. The concrete storage cellar, although rather high in first cost, as compared with wood, is a permanent structure.

For detailed information in reference to the mixing and handling of concrete, the reader is referred to Farmers' Bulletin 461, entitled "The Use of Concrete on the Farm."

DEVELOPMENT OF HONEY BEE

Insects Pass Three Different Stages to Reach Maturity—Story Told by Entomologists.

Bees, like all true insects, pass three different stages to reach maturity, or a well-developed bee. The egg, which is a tiny little object about the size of a timothy seed, is laid by the queen in a wax cell. It hatches in about three days and then becomes a small crescent-shaped larva which must be fed. Nurse bees feed it with a mixture of predigested honey and pollen and this food is absorbed by the skin. It is some time later before the mouth parts and abdominal cavity are formed.

The larvae are said to moult very often, as the skin becomes too tight, so fast does the little creature grow. After about six days when it is much larger than the original size a porous cover is put on the cell and cocoons spun. Then a dormant state exists for 11 days. In about 21 days from the time the egg was laid the cell is broken and a full-grown bee emerges. This is the story entomologists tell of bees.

Cheapest Poultry Feed.

Oats is perhaps the cheapest feed we now have for poultry. It is also one of the best feeds we can give to the chickens, both the young and the old.

Value of Rape.

Dry rape leaves, according to chemical analysis, contain over 23 per cent of protein, as compared with 15 per cent in alfalfa and 16.5 per cent in cowpeas.

Garden Fair Exhibit.

Now is a good time to begin to plan an exhibit for the county fair. Only the finest material should be exhibited and it should be well staged.

Tie some of the leaves over the cauliflower heads as soon as they are formed. This will keep them white. Cauliflower is quickly browned by the sun.

ROAD BUILDING

ROYAL LINE IN A DEMOCRACY

"Roads Rule the World—Not Kings or Congresses, Not Courts, Nor Constables or Soldiers."

In an argument for good roads some wise man, whose name has been lost, made use of the following: "Roads rule the world—not kings, nor congresses, nor courts, nor constables, not ships nor soldiers. The road is the only royal line in a democracy, the only legislature that never changes, the only court that never sleeps, the only army that never quits, the first-aid to the redemption of any nation, the exodus from stagnation in any society, the call from savagery in any tribe, the high priest of prosperity, after the order of Melchisedec, without beginning of days or end of life. The road is umpire in every war, and when the new map is made, it simply pushes on its great campaign of help, hope, brotherhood, efficiency and peace."

The value of good roads may be better understood when it is known that the average cost to farmers of the United States to transport produce to market is more than 23 cents per ton per mile. These figures do not include the cost of breakage of harness or vehicles. The cost per ton per mile over hard-surfaced roads is less than half the present average.

GAINER BY IMPROVED ROADS

Careful Analysis Shows Greatest Gain Over Present Conditions Is Man on Branch Road.

The development of sentiment for issuing bonds to build permanent roads has brought to the surface many questions which require careful consideration and demand clearly stated and convincing replies. Of these, the one recurring most frequently is: "What advantage is there in a bond issue for the farmer who lives several miles from one of the improved roads?"

At first glance it would seem that the man living directly upon the improved road obtains the greatest benefits, but careful analysis proves that the greatest gain over present conditions is the man on the side road. With the limited road and bridge funds usually available in any township and the necessity of keeping the main highways at least in passable condition, little or nothing is left for working upon the less traveled roads. As repair expense practically ceases when permanent roads are built, the road and bridge funds formerly spent on main roads will be released for use upon the side roads.

Soil Road in North Carolina.

In addition, money spent upon these side roads will go five times as far, or do five times as much work, as when it was spent upon the roads where heavy travel quickly wiped out every trace of the improvement. A reasonable amount of road and bridge money used in ditching and dragging side roads will place them in condition to carry the comparatively light traffic that passes over them to the main highway. The man on the side road will have, in place of a continuous haul through the mud from farm to town, a much-improved surface from farm to the main highway and a highly improved road, maintained at much less expense to the township or county, the remainder of the way to his town or market.—Farm Engineering.

Drag After Rain.

Drag the road as soon after every rain as possible, but not when the mud is in such a condition as to stick to the drag.

Attention to Road Drag.

If we would pay more attention to the road drag, we would have better roads.

Powder for Cabbage Worms.

For cabbage worms: Mix one part of fresh Persian insect powder with four parts of air-slaked lime, and dust it on the plants at regular intervals.

Don't Pay to Scrimp.

It doesn't pay to go to the expense of cows, stables, land, utensils, etc., for dairy work, then scrimp the cows.

Don't Use Whip.

Don't use the whip too freely on a horse that shies. Patience and kindness will do better.

MORE WHEAT PRIZES

Honors for Western Canada Come Year After Year.

At the recent Soil Products Exposition at Peoria, Ill., in a keen contest for the coveted first prize for wheat, Western Canada has again carried off all the honors. Not only has she won the first, but also the second and third prizes. These were won by Mr. S. Larcombe, of Birtle, Manitoba. In past years the Province of Saskatchewan had the distinguished honor of carrying off the initial prize.

Harvesting and threshing are now completed in Western Canada, and while it is early in the season to give exact figures as to the average yield per acre of wheat, oats, barley and flax it is safe to assume that the former will yield about 20 bushels per acre. The price to the farmer will be about $2.00 per bushel, giving him $40.00 an acre of a return. When it is considered that the land upon which this wheat is grown averaged less than $30 an acre, it takes very little figuring to arrive at an estimate of the profit there is to the grain grower of Western Canada. The writer knows where a farmer purchased 160 acres of land in the spring of 1916, broke it up the same year, put it in wheat in 1917. His crop was harvested a few days ago. It yielded 4,800 bushels and he sold it at $2.05 per bushel, giving him $9,840. The land cost him $4,800, breaking, seeding, seed, cutting and threshing, $1,920. His profit was $3,120 after paying for his land and his costs of improving. He has now $3,120 to commence another season with a "paid for in full" improved farm.

Never has farming offered such profitable returns for labor as at present and nowhere is the large profit equal to that of the low priced, high yielding lands of Western Canada.

There has been a big rush during the past few weeks of renters and owners of high priced lands in many parts of the United States to investigate these 100% profit reports. No better season of the year could be selected by anyone desiring to better their condition and wishing to give Western Canada the "once over." Threshing is now completed and the grain being marketed. The weather is fine and will be pleasant for a couple of months and a visit now to personally investigate the conditions will be convincing and profitable. While old home ties and family associations are one of the first considerations in the mind of the reader, who feels that the old five or ten per cent return is sufficient, it behooves the modern and progressive farmer always to be on the alert to grasp the opportunities of the hour. Land in Western Canada that is annually producing a gross return of from $40.00 to $80.00 per acre is purchasable at from $15 to $30 per acre. It can be seen at a glance that such values cannot help but increase as they have done in the older agricultural districts of the United States. The new settler will find himself surrounded by same contented and prosperous neighbors. The expense of making one visit to look into Western Canada's opportunities is small—a special reduced rate is available and you owe yourself a holiday and a trip may do you good. You owe your dependents a right to better your condition and Western Canada offers that opportunity.—Advertisement.

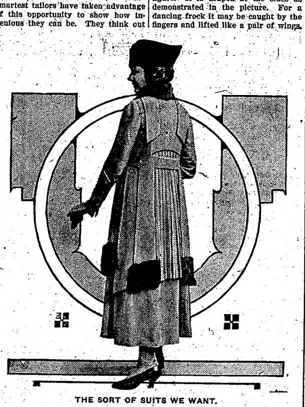
Fads And Fancies Of Fashion

The collection of suits presented for fall is really superb. Good taste dominates them in styles and color and in materials and trimming. They are wonderfully tailored. Most of the new wool goods have a soft, velvety finish, and certain fashionable colors appear at their best in surfaces of this kind, like tan, beige, castor, gray and wine.

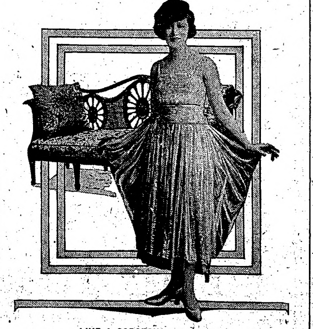
The quiet of the colors fashionable for fall makes room for all sorts of clever eccentricities of cut, and the smartest tailors have taken advantage of this opportunity to show how ingenious they can be. They think out the best lines for the slender figure and the best lines for the stout figure and proceed to work revolutions in the appearance of their patrons. The plump lady looks trim and the thin lady looks graceful, having lost her angles in a new and innocent-looking tailored suit which has been craftily designed to conceal them. They go on their way rejoicing after they have selected the styles made for them.



THE SORT OF SUITS WE WANT.

A study of the suit pictured above will reveal what the art of the tailor can do by way of achieving the unusual and interesting while preserving the simple, graceful lines demanded by the mode. The coat is cut with hanging panels, each finished at the bottom with a band of fur. Plaits, set in at the back, dispose of the waistline in the best possible way and concede the right of fashion to demand that backs be made interesting. There is a collar of fur, and deep plain cuffs of the cloth attract attention to their shapeliness with big bone buttons set in a row.

The skirt is plain, leaving intricacies of cut and making to the coat. After all, it contrives to escape being fussy and to preserve the clean lines that belong to the tailor-made.



LIKE A GORGEOUS BUTTERFLY.

This is one of those brilliant evening gowns that transform their wearers into the semblance of a wonderful butterfly. It is made of net, with a petticoat underneath of net and still another of thin and lustrous satin. The dress is almost incrusted with straight bands of mother-of-pearl sequins and little rhinestones that reflect the light with the radiance of pearls and diamonds. It is to be worn with a scarf of malines over the arms and shoulders.

Nearly always, with such splendid materials, the designer confines herself to the simplest methods of using it. The bodice in this instance appears to be a straight piece of the material wrapped easily about the figure. The skirt is very full, but the weight of the passementerie holds it close to the figure. It is draped at the sides as demonstrated in the picture. For a dancing frock it may be caught by the fingers and lifted like a pair of wings. The bodice is supported by strands of rhinestone over the shoulders and joined to the skirt by an easy girdle of the material that conforms to the lines of the waist.

Flat tassels of crystal beads finish the joints of drapery at the sides and at the bottom of the skirt. White satin slippers and white silk stockings, and a band of brilliants about the hair, are to be worn with this frock, and they should be without ornament. The scarf of tulle about the shoulders—not shown in the picture—veils the brilliance of sequins and rhinestones and adds beauty to the gown and to its wearer.

Julia Bottomley

Drawnwork for Undergarments.

Flat decoration continues to be the favorite trimming for the new French under apparel. In a shipment just arrived from Paris, both voile triple and linen have been treated in this way. There are many different stitches in this work, which is really drawnwork.

The one most commonly seen is the "filet" stitch, a kind of delicate punchwork that forms a lacy web and is an excellent background for the design, either in embroidery or more commonly of the solid material outlined in a fine white thread.

The designs are usually conventional flower patterns, rather large, or else merely geometrical.

News of the State

Condensed for Busy Folks

Internment of Robert M. La Follette, after his expulsion from the United States Senate, is urged in a resolution sent to Senators Nelson and Kellogg by Bemidji citizens.

Jess Dunning, ex-secretary of the I. W. W. local at Bemidji, convicted on a charge of sabotage, was sentenced to a maximum of two years in the penitentiary by Judge C. W. Stanton. An appeal will be taken and a new trial asked for, Dunning's attorney said.

The largest fair Redwood county has ever had has just closed at Red Lake Falls. Thursday was the biggest day, gate receipts showing that the attendance exceeded 9,000. An official count of the automobiles parked between the hours of 2 and 6 in the afternoon, gave the total of cars as 1,500.

In spite of two broken ribs, suffered when he fell from a ladder, and a broken arm, injured when a knife slipped, Joseph Stackmesser canvassed the city of Tower with a petition asking that Robert M. La Follette be officially muzzled until the close of the war. Only two men approached refused to sign.

With the river at the lowest stage in many years, the work of pulling snags is facilitated, according to the crew of the steamer David Tipton, in the Federal service. The boat was in Winona a few days since on its last trip of the year to St. Paul. Many of the dangerous ad hidden snags that have been revealed are being removed.

Necessity for public health nurses is to be emphasized at the sessions of the Mississippi Valley Conference on Tuberculosis, which are to be held in Minneapolis and St. Paul Oct. 8, 9 and 10. Delegates from thirteen states are expected and an elaborate program, including addresses and papers by physicians, nurses and public officials.

With the finding of a skeleton and gun in a swamp about eight miles south of Warba, the disappearance of George Johnson, a homesteader and trapper in Split Hen township, in 1913, has been cleared. The discovery was made by A. Leinonen, a farmer, who reported it to Coroner Plair. Positive identification was made possible by means of a gun with one empty shell in the barrel.

Nearly 1,000 crippled children have gone before the traveling poliomyelitis clinic of the State Board of Health for free treatment, according to Dr. W. P. Greene, epidemiologist of the board, who is in charge at Winona. The clinic drew many from outside points to Winona. There will be a follow-up campaign, it is announced, and six experienced nurses will visit all of the patients at intervals in the next two weeks.

Winona organized labor men are impatient with the delay of local retail coal dealers in reducing the price of coal. The Machinists' union, the largest in the city, initiated the protest by wiring Coal Administrator H. A. Garfield and Judge F. S. McGee of the Minnesota Public Safety Commission, urging that Winona dealers be forced to lower the price of coal in conformity with the government's Federal at-the-mine prices.

A convention of farmers and others interested in sheep raising in northern Minnesota is hereby called to meet at the Commercial Club Rooms in the City of Bemidji, October 8 and 9. The purpose of this convention is to form an organization of Wool Growers and to formulate and adopt plans for the co-operation of Minnesota and Federal Reserve banks, Farmers' Clubs, Livestock Dealers, Western Ranchers and Railroads to secure and place sheep on our idle Minnesota lands. Able speakers will be present to discuss the problems of the wool grower from a practical standpoint. This convention is called at the instance of the Bemidji Commercial Club.

The Minnesota Methodist ministers, in their annual conference held in Pipestone, listened to the reports of foreign and home missionary work.

Quarrying has started at the Little Falls Granite works and it is said that stone of fine quality is being removed in large quantities. Preparations are being made to build a sidetrack to the quarry.

Rain has helped check the forest fires which have been menacing Spooner and Baudette for the last week. All danger now seems over. An investigation of the origin of the fires may be made. Much property damage was done, including the destruction of a large sawmill and outlying houses.

Robert V. Johnson of Minneapolis has filed two suits against Peter J. Callahan, flagman, and the St. Paul road, asking for damages amounting to $84,150 on account of an accident to his son, Robert V. Johnson, Jr., 9 years old, who was run down by an engine on the short line in October, 1916. The boy's right leg was amputated below the knee and the left foot was amputated near the ankle joint.

Duane Searl, 80 years old, of Owatonna, and Mrs. Parmellia Hewes, 79 years old, of Lowville, were married at Lowville, N. Y. Searl met his bride there two weeks ago while on a visit. She has been engaged in the millinery business. Searl is a farmer living near Owatonna, where the couple will make their home.

Deputy Sheriff James Cahill and Charles Fisk of Bemidji have taken to Stillwater "Jack" Chisholm, who is to serve a term for robbery. While in the county jail, Chisholm gave a little farewell party, breaking everything possible in his cell.

DENY REPORT THAT U.S. WILL TAKE FOOD

NO TRUTH IN STATEMENT THAT GOVERNMENT WILL SEIZE SURPLUS CANNED GOODS.

GOVERNOR MAKES APPEAL

Asks Food Administrator Hoover to Name Price Committee on Wheat Grades Lower Than Number One.

St. Paul.

So widespread are the reports that the government is planning to take away the surplus canned goods put up by the housewives of the United States this summer that government officials at Washington are making special efforts to deny the rumor.

A. D. Wilson, state food administrator, has received word from Washington that there is absolutely no truth in these statements, and has been instructed to pass this word on.

The sole purpose of the Department of Agriculture and of the food administration is to get housewives to can and preserve all surplus fruits and vegetables so that households may have a cheap and plentiful supply of food.

★ ★ ★

Burnquist Appeals for Farmers.

Governor J. A. A. Burnquist has made a new appeal for the farmers to Herbert C. Hoover, federal food administrator, following the announcement that federal rules governing wheat grades will not be suspended as proposed. His message follows:

'If federal grades cannot be suspended, permit me to suggest that your price committee at the terminal market consist of men not interested in the grain trade directly or indirectly, and that said committee be empowered to act as a price committee to fix prices on all wheat lower than No. 1 in order that the producer may be paid for his wheat according to its milling value, and not as to its physical appearance and a small percentage of foreign matter which now enters into the grades and often lowers them below the actual milling value. To obtain this way the co-operation of the farmer is advisable in order to get him to market his wheat more freely and to insure a larger acreage for next year's crop.

O. P. B. Jacobson of the state railroad and warehouse commission commended Governor Burnquist's new appeal. He stated, however, that Commissioner Hoover was apprised of existing conditions some time ago.

Rhinow to Head Regiment.

Adjutant General W. F. Rhinow will take charge of the Fourth Minnesota infantry when the resignation of Major Frank B. Rowley of Minneapolis becomes effective.

The plan was adopted, General Rhinow said, to save the salary of $3,000 by leaving the office vacant in the newest Minnesota National Guard unit.

The new regiment has been referred to as the "plutocratic" regiment after an announcement that the privates will receive $3.75 a day and that it will be the highest paid military organization in the world.

It is being organized to relieve the First Minnesota infantry, now guarding public property, bridges, food warehouses and factories in St. Paul, Minneapolis and Duluth, when the First regiment is ordered to camp.

Although it was announced primarily as a stay-at-home organization, the regiment will be subject to call as are other National Guard units.

Governor Too Busy to Go.

Keeping in touch with the Public Safety Commission, rushed with the La Follette case and busy with plans in connection with Colonel Roosevelt's visit, Governor Burnquist was unable to lead the Minnesota delegation to the International Soil Products exposition at Peoria, Ill. The Minnesota delegation, which included many state officials, left in a special car over the Rock Island line.

Chief Justice Calvin L. Brown of the Supreme Court took Governor Burnquist's place on the program, delivering the principal address Minnesota day.

★ ★ ★

Not Proposed Yet to Close Saloons.

Fearing the Minnesota Public Safety commission would issue an order closing all Minneapolis saloons, the Minneapolis Trades and Labor assembly requested the commission to grant it a hearing before any such order should be issued. No proposal to close the Minneapolis saloons has been made in commission meetings, Secretary H. W. Libby said.

Plan to Move Regiment.

Colonel W. T. Mollison, Faribault, commanding the Second Minnesota Infantry, and Captain Minot J. Brown and Lieutenant Robert Deininger, both of Owatonna, of the quartermaster corps, conferred at the capitol with railroad agents, to arrange tentative plans for the movement of the Second regiment when it is ordered to entrain for Camp Cody, N. M. Colonel Mollison said that he had received no official advice indicating a departure date. The plans made provide for four special trains.

A GUARANTEED REMEDY FOR

ASTHMA

Your MONEY WILL BE REFUNDED by your druggist without any question if this remedy does not benefit every case of Asthma, Bronchial Asthma, Hay Fever or Difficult Breathing. No matter how violent the attacks or obstinate the case

DR. R. SCHIFFMANN'S

ASTHMADOR

in either form (Cigarette, Pipe Mixture or Powder) positively gives INSTANT RELIEF in every case and has permanently cured thousands who had been considered incurable, after having tried every other means of relief in vain. Sufferers are afforded an opportunity of availing themselves of this "Money-Back" guarantee offer as through purchasing from their own regular Druggist, they are sure their money will be refunded by him if the remedy fails. You will be the sole judge as to whether you are benefited and will get your money back if you are not. We do not know of any fairer proposition which we could make.

R. Schiffmann Co., Proprietors, St. Paul, Minn.

BLACK LEG LOSSES SURELY PREVENTED by CUTTER'S BLACKLEG PILLS

Low-priced, fresh, reliable; preferred by western stockmen, because they protect where other vaccines fail.

Write for booklet and testimonials.

10-dose pkg. Blackleg Pills, $1.00

50-dose pkg. Blackleg Pills, $4.00

Use any injector, but Cutter's simplest and strongest. The superiority of Cutter products is due to over 15 years of specializing in VACCINES AND SERUMS ONLY. INSIST ON CUTTER'S. If unobtainable, order direct.

The Cutter Laboratory, Berkeley, Cal., or Chicago, Ill.

ECZEMA!

Money back without question if HUNT'S CURE fails in the treatment of ITCH, ECZEMA, RINGWORM, TETTER or other itching skin diseases. Price 50c at druggists, or direct from A. B. Richards Medicine Co., Sherman Tex.

Though the world may owe us a living, only a few are preferred creditors.

With the Fingers! Says Corns Lift Out Without Any Pain

Sore corns, hard corns, soft corns or any kind of a corn can shortly be lifted right out with the fingers if you will apply on the corn a few drops of freezone, says a Cincinnati authority.

At little cost one can get a small bottle of freezone at any drug store, which will positively rid one's feet of every corn or callus without pain or soreness or the danger of infection.

This new drug is an ether compound, and dries the moment it is applied and does not inflame or even irritate the surrounding skin. Just think! You can lift off your corns and calluses now without a bit of pain or soreness. If your druggist hasn't freezone he can easily get a small bottle for you from his wholesale drug house.—adv.

Japanese Naval Maneuvers.

The grand Japanese naval maneuvers which will take place off Tosa will consist of the first, second and third fleets and several reserve vessels, says the East and West News. The 14-inch guns mounted on the Yamashiro and Ise will be put to practical test. All vessels participating will assemble at Hiroshima bay in the Inland sea, and the contending forces will use Kure as the base of operations. The sham battle will last ten days.

What He Wished.

Titles of books are confusing to those who study them, and even more so to the parents who have to buy them. A few days ago the Greencastle public schools opened, and S. C. Sayers of the store of Sayers & Hamilton, was stunned for a few minutes when a school patron asked for "Physic and Health and a Compound Arithmetic." He thought for a minute and handed the woman a "Physiology and Health and a Complete Arithmetic."—Indianapolis News.

Sure She Did Love Him.

June—Did she love him much?

Tell—Why, she married him in spite of her parents' urging!—Life.

Pride is the thing a political orator uses to point with.

Every woman in Cologne, Germany, is forced to work.

POSTUM has been adopted as the table beverage in many a home because of its pleasing flavor and healthful nature

NOTICE TO SICK WOMEN

Positive Proof That Lydia E. Pinkham's Vegetable Compound Relieves Suffering.

Bridgeton, N.J.—"I cannot speak too highly of Lydia E. Pinkham's Vegetable Compound for inflammation and other weaknesses. I was very irregular and would have terrible pains so that I could hardly take a step. Sometimes I would be so miserable that I could not sweep a room. I doctored part of the time but felt no change. I later took Lydia E. Pinkham's Vegetable Compound and soon felt a change for the better. I took it until I was in good healthy condition. I recommend the Pinkham remedies to all women as I have used them with such good results."—Mrs. MILFORD T. CUMMINGS, 822 Harmony St., Penn's Grove, N. J.

Such testimony should be accepted by all women as convincing evidence of the excellence of Lydia E. Pinkham's Vegetable Compound as a remedy for the distressing ills of women such as displacements, inflammation, ulceration, backache, painful periods, nervousness and kindred ailments.

A Fifty-Fifty P. M.

Postmaster Hanks ran the general store as well as the post office and one summer morning a lanky youth slouched in, removed his battered straw hat and said:

"Mr. Hanks, I un'erstand there's two letters here fur me—one wot come a month ago and one wot come last week. I'm afeared my folks must be sick, or else they wouldn't be writin' so plum often. Let me have them letters, will ye, Mr. Hanks?"

The postmaster glared at the youth.

"No, Peleg Anderson, I won't let ye have them letters till ye settle fur that lot o' groceries wot's been owin' so long!"

The young man took out some money.

"I kin settle half the account, Mr. Hanks," he said.

"Then," said the postmaster, in a milder voice, "I kin give ye one o' yer letters," and he did so. "Squar' up in full, Peleg Anderson, an' ye'll git yer other letter, but not before."

A woman's idea of economy is to have her husband waste $3 worth of time putting up a ten-cent shelf.

GAVE UP HOPE

Often Wished For Death to End Her Misery. Doan's Effected a Complete and Lasting Recovery.

"I was helpless with kidney trouble," says Mrs. Ellen Janis, 1404 N. Third St., St. Charles, Mo., "and began to think my case was beyond the reach of medicine. The pain in my back laid me up in bed and it seemed as if my back had been crushed. I couldn't sleep and was so nervous I was almost frantic.

Mrs. Janis.

"Flashes of fire came before my eyes and the pains in my head were terrible. My sight was affected and there were large, puffy spots beneath my eyes.

"How I suffered when passing the kidney secretions! I screamed in agony and I often wished I might die and be out of misery. I had night sweats and mornings on getting up I was so weak and numb I could hardly stand up. I grew so pale and emaciated I looked like death. *Doan's Kidney Pills* cured me completely and I have been as well and healthy since as any woman of my age."

DOBBIN HAS A DAY DREAM

Faithful Old Horse Will Have Regular Thrill When He Casts Off His Shoes.

When the automobile and the tin Lizzie shall at last have relegated the "hoss" to the limbo of things obsolete, will the noble animal degenerate and hark back to his ancestral type, or will he simply disappear like the dodo? asks "Zim" in Cartoons magazine.

It has taken a lot of time and patience to develop Dobbin from the primitive models such as the hydracoterium, the pachynolophus and the eohippus, to make him "whoa," back and "gitap" and take his meals out of a nosebag. In the process of civilization he has gradually lost his toes and has had to accommodate his feet to the horseshoe. Does he still dream perhaps of the delights of having toes—of sinking them down into the green sqush of the tertiary era and feeling the cool goo trickled up between them? If so, how glad he will be some day to look down and see his long-forgotten toes beginning to sprout once again! His will be the thrill of the small boy on the first warm day of spring when he can cast off his shoes and go barefoot.

When the "hoss" discovers for the first time that he can again wiggle his toes, he will doubtless radiate a smile of solid comfort.

LEMONS BRING OUT THE HIDDEN BEAUTY

What girl or woman hasn't heard of lemon juice to remove complexion blemishes; to bleach the skin and to bring out the roses, the freshness and the hidden beauty? But lemon juice alone is acid, therefore irritating, and should be mixed with orchard white this way. Strain through a fine cloth the juice of two fresh lemons into a bottle containing about three ounces of orchard white, then shake well and you have a whole quarter pint of skin and complexion lotion at about the cost one usually pays for a small jar of ordinary cold cream. Be sure to strain the lemon juice so no pulp gets into the bottle, then this lotion will remain pure and fresh for months. When applied daily to the face, neck, arms and hands it should help to bleach, clear, smoothen and beautify the skin.

Any druggist will supply three ounces of orchard white at very little cost and the grocer has the lemons. Adv.

Selective Draft.

Much amusement was caused in the house of commons by the official admission that "by a regretable clerical error" the national service department had notified the speaker that they proposed to transfer him to new employment at Wolverhampton at about one dollar per day, with a weekly war bonus of a little more than a dollar "on the ground that such employment was deemed of greater national importance than that on which he was now engaged."

When to Keep Still.

Nothing in the world adds weight to a man's words so much as keeping still when he has nothing to say.

At Times.

"Don't you like hot water in the house?"

"Not when I'm in it."

Need to Be Nagged.

If we were a woman and had to live with some men we know we'd nag them, too.

A lawsuit is the thief of time and money.

ASKED TO RAISE $175,000,000

That Amount of Second Liberty Loan Apportioned to Northwestern States.

SALE OF BONDS BEGINS

Amounts Assigned to Each District Are Computed on Percentage Basis, Considering Territory's Resources.

Washington, Oct. 2.—By the announcement of treasury department officials opportioning the forthcoming bond issue by districts, the Ninth federal reserve district, whose financial center is Minneapolis, is expected to subscribe $125,000,000 to the second Liberty loan.

The campaign to float the gigantic loan of $3,000,000,000 is in full sway. Virtually two-thirds of the loan is expected to be raised in the New York, Boston, Cleveland and Chicago districts, with only half apportioned to the first three-named districts.

Apportionments indicate only what each district is expected to do and may be entirely upset, as in the case of the first Liberty loan, by the actual subscriptions. In making the apportionments, officials used two bases of subscriptions, the minimum of $3,000,000,000, and an "expected amount" of $5,000,000,000.

Apportionment by Districts.

Here is the apportionment by federal reserve districts, as announced by the Treasury department:

District—	Pct.	Minimum.	Expected Amount.
New York.	30	$900,000,000	$1,500,000,000
Boston ...	10	300,000,000	500,000,000
Phil'elphia.	8¼	250,000,000	415,000,000
Cleveland.	10	300,000,000	500,000,000
Richmond.	4	120,000,000	200,000,000
Atlanta ...	2¾	80,000,000	135,000,000
Chicago ..	14	420,000,000	700,000,000
St. Louis..	4	120,000,000	200,000,000
Mpls.	3½	105,000,000	175,000,000
Kansas C..	4	120,000,000	200,000,000
Dallas ...	2½	75,000,000	125,000,000
San Fran'o	7	210,000,000	350,000,000
Totals...	100	$3,000,000,000	$5,000,000,000

In each case the announcement reads, "the amount has been computed on the percentage basis, and while the banking resources of each district—that is, the total resources of the national banks, state banks and trust companies—have been given large consideration, other factors have been taken into account, such as the income tax collected from each district, the assessed value of property therein, the subscriptions received from each district to the first Liberty loan, and the amount of bonds allotted on such subscriptions, the capital available for bond investment in each district and its population."

Governors of the federal reserve banks have been notified by Secretary McAdoo of the apportionments. The sums stated in the "expected amount" column are designated as "the amount which each district should subscribe in order to secure the result imperatively demanded for the defense and security of the nation."

McAdoo Opens Campaign.

Secretary McAdoo will open the campaign informally with a speech in Cleveland, Ohio, the first of many he will deliver in a trans-continental tour. More than 26,000 banks will co-operate in floating the huge issue. The entire press of the country which contributed so largely to the success of the first issue, will work for the success of the second.

BRITISH STOP TEUTON ATTACK

Two Advances Checked With Great Loss to Enemy.

London, Oct. 2.—Again the Germans have delivered violent attacks against the British troops in their newly won positions in the vicinity of the Ypres-Menin road and the Polygon wood. Two separate onslaughts were made, three hours apart and both with huge effectives moving in wave formations. Everywhere the attacks were repulsed with heavy casualties, except opposite the southeast corner of the Polygon wood where two British advance posts were captured.

Along both sides of the Meuse in the Verdun sector the French and the Germans are engaged in another terrific duel. Twice the Germans launched infantry attacks but both were stopped short by the French fire.

Banker Killed by Fall.

New York, Oct. 2.—Isaac Newton Seligman, aged 61, a member of the banking firm of J. and W. Seligman and company of this city, died here from a fracture of the skull suffered in a fall from a horse.

Swedish-Americans Pledge Loyalty.

Chicago, Oct. 2.—Five thousand Americans of Swedish descent and birth gathered at the municipal pier here to attest their loyalty to the government.

Another Shipbuilders' Strike.

Seattle, Wash., Oct. 1.—A long deferred strike of metal trades workers, including steel shipbuilders, was to begin Saturday, when approximately 12,000 employes in 98 plants were expected to walk out to enforce their demands for an increase in wages and the boycott on 10-hour lumber. The officials of the concerns affected said three of Seattle's largest shipbuilding plants, the Seattle Construction & Dry Dock, the Ames Shipbuilding, and the J. F. Duthie Shipbuilding companies, would cease operations.

A Combination.

"Are you going to fight or raise food?"

"Little of both, suh," replied Erastus Pinkley. "I's gineter git my chicken coop well populated an' den I's gineter hang right over it wif a shotgun."

Quite Appropriate Motion.

"Thrones are rocking these days."

"Quite right, too. A rocking throne is the cradle of liberty."

One can't always judge a woman's innate truthfulness by what she says.

Liquor Control in Bermuda.

Consul Carl R. Loop of Hamilton, reports that the Bermuda legislature has passed a law whereby "during the continuance of the present war the sale or supply of intoxicating liquor in all clubs and licensed premises is prohibited between the hours of nine o'clock at night and nine o'clock on the following morning."

Marriage is neither an earthly heaven or the other place.

The man who jumps to conclusions ought to watch his step.

What is CASTORIA

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is pleasant. It contains neither Opium, Morphine nor other narcotic substance. Its age is its guarantee. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic and Diarrhoea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep. The Children's Panacea—The Mother's Friend.

GENUINE CASTORIA ALWAYS Bears the Signature of Chas. H. Fletcher.

In Use For Over 30 Years

The Kind You Have Always Bought

THE CENTAUR COMPANY, NEW YORK CITY.

Compliments of the Day.

Soldiers have to do their own mending, when it is done at all, and it appears—although few persons would have guessed it—that the thoughtful war office supplies them with outfits for that purpose. Otherwise, this joke would be impossible.

Everything was ready for kit inspection; the recruits stood lined up ready for the officer, and the officer had his bad temper all complete. He marched up and down the line, grimly eyeing each man's bundle of needles and soft soap, and then he singled out Private MacTootle as the man who was to receive his attentions.

"Toothbrush?" he roared.

"Yes, sir."

"Razor?"

"Yes, sir."

"Hold-all?"

"Yes, sir."

"Huh! You're all right, apparently," growled the officer. Then he barked, "Housewife?"

"O, very well, thank you," said the recruit, amiably; "how's yours?"—Journal of the American Medical Association.

What It Does.

"What does golf do for a man?"

"Well, for one thing, it makes him decide to take his vacation in the winter, when he can go south."

Even though a man stops growing while young, he may grow old.

Bone Surgery Marvels.

A reserve officer in the United States medical corps who recently returned from Great Britain is loud in his praises of the work in bone surgery being done in British hospitals. He says: "They can take a rib from a man and use it to replace a crushed bone in his arm. Patients who in earlier times would have been considered permanently disabled are now fixed up in a few weeks so that they can go back to the front. In a single month, in one hospital, we had 1,350 bone cases, and 1,000 of them were ready at the end of the month to go back and fight again."

New Weather Words.

The esteemed weather bureau has sprung a new one. It is the word "smog," and it means smoke or fog. The bureau explains that very frequently there are times when the mixture is apparent in the atmosphere, and it considers the new word a great little idea.

Very well, "smog" let it be. But why end there? Let's call a mixture of snow and mud "smug," a mixture of snow and soot "snoot," and a mixture of snow and hail "snail." Thus we might have a weather forecast:

"Snail today, turning to snoot tonight, tomorrow snoggy with smud."—Builder's Guide.

It's up to a man to foot his bills after receiving a legacy.

A Wise Orang-Outang.

Prof. William T. Hornaday, the noted animal preceptor, cites this instance of ape sagacity:

"I once became quite chummy with an untrained, caged, menagerie orang-outang by the name of Dohong. He was a son of the jungle and intensely concerned in matters that came into his narrow life. All that he learned outside of his inherited instincts he learned himself. His cage contained a number of horizontal bars attached to brackets on which he took considerable solemn exercise. One day he concluded that the bars ought to come down. Bracing his feet against the solid wall of the cage, he pulled every bar from its fastening and flung it on the floor. Larger bars were substituted, which the ape vainly tried to remove. After straining his back in this futile effort, he walked up and down in his cage and was apparently intently studying the situation. Eventually he procured the crossbar of his trapeze and using it for a lever, he not only pried every horizontal bar from its brackets, but he likewise pried the iron bars of his cage apart so that he could stick his head through the opening and satisfy his curiosity regarding his neighbor in the adjoining cage."

A Lost Cause.

The man who would rather be popular than right usually winds up by being neither.

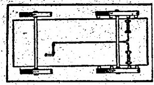
SAFETY DEVICE FOR WAGONS

Contrivance Arranged Which Makes It Impossible to Move Vehicle During Driver's Absence.

The following cut shows the bottom of a milk wagon provided with a contrivance which makes it impossible to move the wagon during the absence of the driver.

Attached to one end of the driver's seat and passing through the bottom of the wagon is a rod pivoted to a cranked shaft, hung in bearings



Wagon Locked.

writes C. J. Lynde in Farmers Mail and Breeze. This shaft is connected by cables to bolts sliding in housings between the rear wheels. These bolts are forced outward by springs, and when released fit into stops attached to the wheels and lock the wagon. The driver's weight on the seat draws the bolts back and releases the wheels.

VEGETABLE STORAGE

Out-door storage cellars or caves are excellent for the storage of many late vegetables. Vegetables can be more conveniently placed in such a cellar than in the storage room in the basement of a dwelling.

The proper type and construction of such cellars vary with the geographical location. In the southern portion of the country the structure is usually entirely above the ground and protected by only a few inches of sod and with straw, leaves, etc. In northern sections, out-door cellars are made almost entirely below the ground and covered with sufficient earth supplemented by straw, manure, etc., to prevent freezing.

Send for Farmers' Bulletins 847 and 879, free of charge, issued by the United States department of agriculture, Washington, D. C. These give full details of how to store in mild and severe climates, and how to make various types of out-door storage banks, pits, etc.

BE CAREFUL OF BROOD MARE

Farmer Should Be Cautious and Avoid Overworking and Overheating of Farm Animals.

Don't make a slave of the brood mare! This is the suggestion of Dr. C. W. McCampbell, associate professor of animal husbandry in the Kansas State Agricultural college.

Care should be taken to prevent overworking and overheating. The farmer should not allow his desire for immediate gain to overcome his judgment, and sacrifice a good colt crop next spring to save a few bushels of grain. Hard work is one of the leading causes of abortion within the first four months of pregnancy.

Three mares can do the work of two geldings and raise three colts besides and a well-bred draft colt will sell for $100 at weaning time.

LIME NEEDED FOR PASTURES

Best to Make Application Where Land Cannot Be Readily Plowed—Also Apply Manure.

In pasture lands that cannot readily be plowed the best procedure is to apply lime, if needed, and to encourage the grass to grow vigorously by a yearly top dressing of well-rotted barnyard manure and occasional light applications of commercial fertilizer that is rich in phosphates and nitrogen. In addition, all thin spots in the sod should be reseeded each year with a liberal quantity of good grass seed.

PICK FEATHERS FROM GEESE

Operation Should Not Be Performed Until Warm Weather Sets In, Usually About May 20.

Geese should not be picked until warm weather sets in, usually about the 20th of May. In handling geese they should always be grasped by the neck, not by the feet and held with the back toward the person in order to prevent them from striking with their wings.

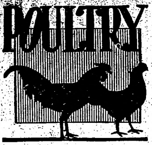
Draw a stocking over the bird's head while picking. Do not remove the feathers from the wings, shoulders and back as they are needed to protect the bird from the sun and rain.

LEGHORN IS MUCH IMPROVED

Tendency Has Been to Breed Larger Fowls and Still Retain Laying Characteristics.

The Leghorns today are a much better breed than they were years ago. The tendency has been to breed larger birds and still retain all their characteristics as producers of a large number of eggs.

With larger bodies also has come the production of larger eggs which is an added merit to the breed.

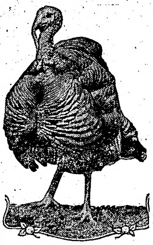


RAISING TURKEYS ON RANCH

Now Found Only in Unsettled Foothill Regions of California and Some Western States.

Turkey ranching is a new industry born of the decreasing production of turkeys on farms, according to an article in the recently published 1916 Yearbook of the United States Department of Agriculture.

Exclusive turkey ranching is now found practically only in the unsettled foothill regions of California and in certain sections of Arizona and other Western states. In these regions a few persons are engaged in raising a thousand or more turkeys a season. The establishments are located where the range is unlimited and the natural food of the turkey, such as grasshoppers and other insects, green vegetation, and the seeds of various weeds and grasses, is abundant. Advantage also is taken on these ranches of the turkey's relish for acorns, and where these are plentiful but little grain need be used for fattening in the fall.



Fine Type of Bronze Turkey.

The large flocks of turkeys are managed much like herds of sheep, being taken out to the range early in the morning, and brought home to roost at night. They are herded during the day by men either on foot or on horseback, and by dogs especially trained for the work.

When Plants Turn Yellow It Should Be Cut Immediately—Soil May Be in Need of Lime.

When for any reason alfalfa turns yellow it should be cut immediately and removed from the field. A careful examination at such a time may indicate a lack of effective inoculation, disease, or the need of lime. Yellowing sometimes occurs, however, when all of these conditions are apparently favorable to the growth of the alfalfa.

ORDER FRUIT CRATES EARLY

United States Department of Agriculture Urges Farmers to Make Necessary Preparation.

Fruit growers are again being urged by the United States department of agriculture to place their orders for fruit packages at the earliest possible moment in order to insure their delivery when needed. It seems that the supply is likely to be scarce and the price high. Shipments should be made early as there is likely to be a slow delivery of anything that looks like non-perishable freight.

LIGHTER SOILS FOR MILLET

Plants Are Heavy Feeders and Need Full Supply of Plant Food for Their Best Growth.

Millet does best on the lighter soils and those that are well drained, loams and sandy loams giving the largest yields. Heavy, poorly drained soils are entirely unfit for the crop. The plants are heavy feeders, and need a full supply of plant food for their best growth. On poor land, finely rotted stable manure should be plowed down before planting.

OATS AND PEA HAY MIXTURE

Rather Hard to Cure on Account of High Moisture Content—Handle Hay Carefully.

This mixture is rather hard to cure on account of its high content of moisture. It should be cut when the oats are in the milk and not later to make the best hay. The hay should be handled carefully and kept cocked if the weather is unfavorable. The less it is exposed to rain after being cut the better hay it makes.

CULTIVATE EARLY AND OFTEN

Constant Work Will Keep Soil in Ideal Physical Condition and Keep Out Harmful Weeds.

Constant cultivation should be the rule, for this will keep the soil in an ideal physical condition for the roots to grow in, besides keeping the weeds in check. Cultivate early and persistently and keep ahead of the weeds.

PREVENT DISEASE OF STOCK

Many Places Where Parasites and Germs Are Harbored—Danger in Feeding Green Corn.

Proper cleaning of the farm would largely eliminate sickness of stock. Many persons think their place is properly cleaned when in reality it has dozens of places in the lots and pastures which are harbors for parasites and disease germs.

There is scarcely a vicinity, where hogs are grown to any extent, that has not some disease. The same drastic measures that are used with foot-and-mouth disease, glanders, or any other fatal stock disease should be taken to free these vicinities from hog cholera.

There are only a very few herds that are not infected more or less with parasites. There is much danger from feeding green corn since it has a natural tendency to lower the vitality of growing hogs.

SOIL SERVES AS A STOMACH

Expression "Available Plant Food" Is Explained by Expert of Missouri College.

Every reader of a farm paper must have encountered frequently the expression "available plant food." As defined by R. R. Hudelson of the University of Missouri College of Agriculture, it means the plant food which will readily dissolve in the soil water so that the plant can take it up. In the animal stomach there are certain digestive fluids that dissolve the food so that it can be absorbed into the blood stream. The soil must serve as a stomach for plants and as the plant food dissolves in the soil water it is absorbed into the plant juices and moves up through the plant, where it can be used. The extra water evaporates from the leaves and moves up, giving a constant circulation. From this it can be seen that only dissolved plant food can be used. Almost all soil materials can be dissolved to a slight extent, but often the rate of dissolving is too slow.

Auction Sale

Having decided to quit farming, I will sell at public auction on my farm' the N. E. ¼ of Sec. 14, town of Clover Leaf, 1½ miles north and 3 miles west of Goodridge on Friday Oct. 19th, commencing at 10 a. m. sharp, Six Head of Horses, Thirty-one Head of Cattle and a complete line of farm machinery. Hot lunch at noon. Usual terms. W, J. LaBree, Auctioneer. Goodridge State Bank, Clerk. Benno Muezel-Owner.

Henry Halvorson.

Henry Halvorson, a prominent farmer in High Landing Township, passed to his reward last Friday, death being due to old age, he having reach his 78th year. In the passing away of Mr. Halvoason, this section of the country looses a man who was ever on the alert to speak a good word for it and a man who was an untiring booster for good reads.

The funeral services were held Monday afternoon at Brunkeberg church.

ASSISI IS REMARKABLE CITY

Shows How Influence of One Man With an Idea Can Persist Through the Centuries.

A remarkable city is Assisi, showing how the influence of a man with an idea can persist down the changing centuries. It is seven hundred years and more since St. Francis lived and died here, and yet today Assisi is little besides the city of St. Francis. His name lends it whatever fame and importance it may have, and something of his kindly spirit seems to hang about it still.

Assisi is a bare little Italian hill town, built of dull stone, with narrow, winding rocky streets, looking out over one of the fairest prospects in all Italy. Here St. Francis was born of rich parents, here he led an idle, spendthrift youth, and here he was suddenly seized with the idea of universal brotherhood and the necessity for poverty. Here he founded the Franciscan order, praying that its distinctive sign might be "never to possess anything under the sun and to have no means of living save by begging."

He carried out his rule in strictest practice, living in a hut of reeds built where now stands the church of St. Mary of the Angels. He felt a great love for all things created, so that he hailed the sun as his brother and preached to the fishes. All of these incidents in his career and many others are set forth in noble frescoes by Giotto in the Franciscan church at Assisi.

In Assisi, too, is the tomb of St. Francis, in a little chapel of the Franciscan monastery. The tomb is surrounded by beautiful marbles and rich work in beaten bronze. The world has loved St. Francis, but apparently it has never understood him. Else it would not in all reverence have surrounded his vault with the rich luxury of beauty against which his whole life and all his teachings were but one great protest.

CITY IS VEILED IN SMOKE

In Manchester, Industrial Heart of England, Flaming Furnaces Roar Night and Day.

Manchester is the industrial heart of England, the heart of the black, smoky North, which is to the pleasant London south like a foreign land. Under its veil of fog and smoke, the flaming furnaces of Manchester roar night and day, turning out steel and shells. The Manchester district is more impressive than anything of the kind America can show, because it is more concentrated. It is as if ninetenths of the American steel business were gathered into a single Pennsylvania county.

Baedeker says that on a clear day you can see 600 giant factory stacks at one time from a hill near Manchester. This statement has long been suspected as the solitary bit of humor in the 97 ponderous volumes of Baedeker. It may be true, but it has never been confirmed, because there are no clear days in Manchester. When all the 600 stacks are pouring forth smoke and the fog steals down, it is dark at noon. On a good average day you can see for several blocks, and only a few electric lights are necessary. The trolleys will probably burn their headlights, but that is force of habit on the part of the motorman.

Colors of the Rainbow.

The colors of the rainbow vary according to their size, and the size differs according to the bigness of the raindrops. Large drops produce narrow rainbows and bright, clearly defined colors. The colors are generally as follows: When the raindrops are in the average one millimeter in diameter we see a violet, pale blue, bluish green, green, yellow, orange, pale red and deep red rainbow; when the drops average three-tenths millimeter, the rainbow is violet, pale blue, bluish green, green, yellow and orange. Drops of one-tenth millimeter produce the succession of a very pale violet, violet, whitish blue, whitish green, bluish yellow and pale yellow. Drops of one-twentieth millimeter (fog) give white tinted with violet, a very vivid white, a white tinted with yellow and a very pale yellow.

HAD TO FIGHT DUEL OR WED

Young Man Surprised to Receive Challenge, But More Surprised to Find Foe a Woman.

William Kenrick, a Berkshire gentleman of a hundred years ago, left his property, which was considerable, to an only daughter. This young lady had a mind of her own and, finding none of her suitors to her liking, simply determined to wait until the right gentleman should come along.

It so happened that one day she attended a wedding at Reading, an exchange relates, where she met a young gentleman named Benjamin Child. He was a poor attorney. With this handsome young man the younger lady fell violently in love, but still she was cautious. She reasoned with herself for several days, trying to shake herself free of the sudden passion, but all in vain. Then, feeling that something must be done, but unable, from confusion of mind, to devise a proper course, she took the extraordinary step of sending the young man a letter demanding satisfaction for alleged injuries. She appointed a time and place for the hostile meeting. Mr. Child was much surprised, and quite at a loss to conceive who the challenger could be. By the advice of a friend, he decided to go to the dueling place. Here he was met by the young woman, who, much to his surprise, told him he would have to fight her or marry her. He naturally chose the latter, and, as the saying goes, they lived happily ever afterward.

FIRST STEAMERS ON LAKES

The Ontario and the Frontenac Launched 101 Years Ago, Were Constructed in 1816.

The first steamboats on the Great Lakes were launched 101 years ago on Lake Ontario. Two craft operated by steam were constructed in 1816 on the shores of the latter lake, one being the Ontario, built at Sacketts Harbor, N. Y., and the other the Frontenac, which was launched at Ernestown, Canada, on September 7, 1816. The Frontenac was one of the finest steamboats afloat at that time. It cost $75,000, and was of 700 tons burden, its length of deck being 170 feet. The Frontenac was placed in operation 100 years ago, making three round trips each month from Kingston to York and Niagara. Capt. James McKenzie, who had had experience in the British navy, was placed in command. The Frontenac was in service on Lake Ontario for ten years, and soon had several rivals for the lake trade.

A fare of $15 was charged from Kingston to Niagara for first-class passengers, but deck passengers were carried for $3.75 a head. The freight rate was "4 shillings per barrel bulk."

The first steamship on Lake Erie was the Walk-in-the-Water, which was launched at Black Rock, near Buffalo, in 1818.

How to Keep Your Friends.

It is almost impossible to be genuinely friendly with a person who insists on being too close to you, on knowing all your thoughts, feelings and affairs, and on claiming your time and attention on the excuse of affection alone.

The bonds of true friendship must be easy and its demands must be for something real and vital. The woman who calls on you perpetually because she has taken a sudden fancy to you is a blind and selfish egotist, in a mild way. Her calls may interrupt your work and bore you intensely, but if you are a polite and courteous person you bear with her until she directs her attention elsewhere. She will probably tell the new friend that you are "very unresponsive." Some women clutch at every new acquaintance and then complain that they have so few friends. The reason is that friendship is not built on trivialties and whims, but by giving such valuable things as true consideration, real interest and manifesting a decent reserve as to the other person's confidence and nonconfidings. —Woman's Home Companion.

Rats Sworn Enemies of Birds.

The number of useful insect-eating birds nesting on the ground or in low bushes which fall victims to rats is extremely large, and is one of the many kinds of injury done by these pernicious animals which cannot be computed, E. W. Nelson writes in the National Geographic Magazine. Probably few frequenters of the countryside have returned to look into a bird's nest to observe its condition without many times finding it destroyed and fragments of egg shells lying about. Unquestionably a large percentage of such nests located in the neighborhood of buildings have been raided by rats.

On one of the small Danish islands it has been authentically recorded that the progeny of a single pair of rats, which escaped from captivity, in two years exterminated a great colony of birds for which the island has been noted.

Buttons a By-Product of Beer.

The spent yeast which collects in breweries and distilleries is put through a process which turns it out in the form of buttons, door-bell plates and knife handles. Formerly this leftover material was considered to be a bothersome waste; now it is utilized, every bit of it. As it is gathered from the vats the yeast is of a dirty, graybrown color. The first operation is to dye it and then to work it over until it assumes the form of powder and can be hot-pressed into any form. In this stage it is called "ernolith." It may be sawed, scraped, filed, drilled, engraved, turned to an edge and polished.—Popular Science Monthly.

Raised Her Own Curls.

Elizabeth had accompanied her mother down town on a shopping trip. While mother was busy selecting her goods Elizabeth wandered over to the office quarters, which were on that floor, and stood looking into the window of the cashier's cage. Noticing the pretty golden curls of the child, the cashier asked: "Little girl, where did you get those pretty curls?" Elizabeth did not answer and the young man again asked, in a teasing way: "Where did your mamma buy them?"

In a scornful and emphatic tone Elizabeth answered: "She never buyed 'em: I raised 'em."

BUFFALO WAGES GAME FIGHT

Wounded Animal Gives Battle Royal to Huntsmen When He Is Poked in the Eye.

An exciting story is told of a party who went buffalo shooting in Zuzuland recently. During the course of the holiday a buffalo was shot early one morning. The party saw the animal drop, and as it did not move, decided to deal with it later in the day. Returning in the afternoon they saw the buffalo from a distance, apparently in the same position as they left it. One of the hunters went out to the buffalo, and on reaching it poked a stick in its eye. This had the effect of restoring animation in the animal, which was only badly wounded, and a warm time thereupon ensued for the gentleman in question.

The buffalo jumped up and tackled the hunter, who hung round the neck of the buffalo in the hope of tiring it out. When the other members of the party arrived the buffalo and his foe were whirling round at such a rate, that it was impossible to get a shot in without endangering the life of the latter. The buffalo tried to stamp the man to the ground with his forefeet, and at last lifted him with a terrible toss of its horns into a thorn-tree near by. This gave the other men the chance of a shot, and the buffalo's career finally terminated.

Origin of Order of Odd Fellows

Details of the origin of the I pendent Order of Odd Fellows are scure and probably will always rem so. From incidents attending the ex sion of Freemasonry in England, An ica and elsewhere in the period tween its arrival, in 1717, and 1740, and from similarity of embl and to some extent mechanical arra ment of ceremonials some investigat believe that the order of Odd Fell was an offshoot of Freemasonry. F recorded lodge was in England in 1 Its membership consisted of mecha and laborers. Provisions were m for comfort and recreation of memb and practices of contributing to re of needy and unfortunate brethren gan early.—Exchange.

An Unexpected Thrust.

He—It seems we have to econom on our wool, my dear.

She—Then you had better be with the lot of it that people are ways pulling over your eyes.

She Overheard Him.

"I didn't know golf was a gambl game."

"It isn't."

Jubilee Services Oct. 28

The Quadricentennial of the Lutheran Church Reformation will be celebrated in the

Auditorium at Thief River Falls
Sunday October 28th.

Principle Speakers: Rev. P. E. Ross of Fairmont, Minn. and Dr. P. E. Kretzman Ph. D. of St. Paul.

Large choir will sing

Dinner and refeshments will be served in the basement.

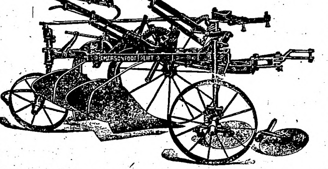
The Electric Car will leave Goodridge at 9 A.M. and return after services.

Everybody Welcome.

Attention Farmers

There never was a time when it paid the farmer to do good plowing more than today but good plowing cannot be done with a poor plow. POOR PLOWING invariably means POOR CROPS. Considering the fact that prices for all kinds of farm produce are bound to be high for a long time to come you cannot afford to use anything 2hort of the best plow to be had. In the Emerson Line, whether Walking Plows, Sulkies, or Gangs, we maintain we have the lightest draft, the easiest to handle and most durable plow line on the mar market Come in and let us tell you why.

A. C. TVEDT & SON,
Goodridge, Minn.



FAILS TO DEFEND ST. PAUL ADDRESS

La Follette's Reply to Disloyalty Charges in Senate General in Tone.

ACCUSED BY KELLOGG

Wisconsin Senator's Statements Not Based on Fact, Minnesotan Says in Reply—Charge That U. S. Wars to Protect Loans Denied.

Washington, Oct. 9.—The extraordinary session of Congress, which began on April 2, and is generally regarded as the most momentous in American history, was adjourned sine die at 3 p. m., after a day of thrilling debate on the alleged disloyalty of Senator La Follette of Wisconsin.

Vehement criticism of the Wisconsin senator and his own defense occupying virtually the entire day, marked the close of the war session.

The preliminary steps taken point to a careful scrutiny of the La Follette address in St. Paul, and will probably see the subcommittee taking testimony in St. Paul. It also indicates that at the next session, the effort to remove Senator La Follette will be taken up with real earnestness.

Senator La Follette took the floor to make a three-hour speech in answer to the critics who have petitioned for his expulsion because of his course and public utterances toward the war.

By prearrangement, two hours were reserved in which senators were to reply at the close of his speech.

House Members Present.

Members of the house, which only was marking time waiting for the senate, flocked to the senate chamber where galleries and floor were jammed in expectation of a spectacular finale to the session.

Standing at his seat in the front row before the vice president's desk, La Follette began his address, reading carefully and deliberately his manuscript, with senators giving close attention.

"Campaign of Villification."

Characterizing the attack upon him as a "general campaign of villification and attempted intimidation," La Follette shouted:

"Neither the clamor of the mob nor the voice of power will ever turn me from the course I mark out for myself, guided by such knowledge as I can obtain and controlled and directed by a solemn conviction of right and duty."

Course Defended.

Defending his course of opposing the declaration of war and subsequent attacks on war policies, La Follette declared:

"It is the citizen's duty to obey the law until it is repealed or declared unconstitutional. But he has the inalienable right to fight what he deems an obnoxious law.

"It is the suppressed emotion of the masses that breeds revolution. If the American people are to carry on this great war, if public opinion is to be enlightened and intelligent there must be free discussion.

Wants "Free Discussion."

"If we are to forestall the danger of being drawn into years of war, perhaps finally to attain imperialism and exploitation, the people must unite in a campaign for free discussion of the policy of the war and its conclusion."

Statement of Aims Demanded.

"Shall we ask the people to shut their eyes and take the entire war program on faith?" he asked. "The way to paralyze the German arm is to declare our objects in this war and show we are not seeking to dictate a form of government to Germany or render England's domination of the seas more secure."

Nowhere did Senator La Follette refer to the much discussed St. Paul speech, to be investigated.

KELLOGG'S REPLY TO LA FOLLETTE'S SPEECH

Following conclusion of La Follette's speech, Senator Frank B. Kellogg, who introduced the resolution of the Minnesota Public Safety commission demanding La Follette's expulsion, took the floor.

Kellogg discussed La Follette's speech at St. Paul on Sept. 20. It is because of statements attributed to La Follette in this speech that the Public Safety commission demanded La Follette's expulsion.

Kellogg Takes Exception

Kellogg took "emphatic exception to some of La Follette's statements." "I believe we should be extremely cautious and accurate in stating the causes of the war," he declared.

"I deny that we went to war to secure the right of American citizens to ride on ships loaded with munitions or loaded with explosives in violation of American statutes.

"I deny we went to war to protect the loans of Morgan & Co. to foreign governments."

Reviews U-Boat Sinkings.

Kellogg reviewed the history of torpedoing of American ships. Discussing the demand for free speech, Senator Kellogg said:

"I am as jealous of the right of free speech as any member of this body or any citizen of the land. But this is a question of erroneous statement of fact rather than free speech."

Kellogg's Speech.

Senator Kellogg's speech in full follows:

"A week ago I presented to the senate a petition from the Minnesota Commission of Public Safety, containing a copy of a speech purporting to have been made by the senator of Wisconsin in St. Paul on Sept. 20. The petition was referred to the committee on privileges and elections. At that time I made no comment thereon and should not have done so but for the speech of the senator today. I shall not now anticipate the action of the committee or of the senate upon this question or express an opinion as to what should be done in the matter. But I cannot allow this occasion to pass or this congress to adjourn without expressing my emphatical dissent from some of the views stated in that speech.

No Sympathy With Unjust Criticism.

"I have no sympathy with unjust and intemperate criticism of members of the United States senate or any other men for I realize that when the senate ceases to be a deliberative body the republic is in danger. I desire to discuss the reason which brought this country into this conflict and the duty public officials owe in such a time.

"The petition I presented contained a certified stenographic copy of the speech made by the senator from Wisconsin. It was not a pleasant duty. I performed that duty under the constitutional authority of the right of petitions to the senate.

Limits Remarks.

"I shall limit remarks to those parts of the senator's speech which discuss causes of the war, as the senator understood it. The speech was made 15 days ago. I have heard no denial of the parts of the speech I shall read, and hope they were not spoken. It is to the sentiment expressed and the reasons given that I shall dissent."

Reads From St. Paul Talk.

The speech is before the senate and is before the country. The parts I particularly wish to comment upon, I now wish to read.

"We are in the midst of a war. I was not in favor of beginning the war. I didn't mean to say we had not suffered grievances. We had, at the hands of Germany, serious grievances; we had cause for complaining; they had interfered with the right of American citizens to travel upon the high seas on ships loaded with munitions for Great Britain. We had right, a technical right, to ship munitions, and the American citizens had a technical right to ride on those vessels. I was not in favor of riding on them because it seemed to me when the consequences resulting from any destruction of life that might occur would be so awful. I say (a voice: "Yellow") any man who says that in an audience where he can conceal himself is yellow himself. (Cries: "Put him out.") I say this, that the comparatively small privilege of the right of an American citizen to ride on a munition loaded ship flying a foreign flag is too small to involve this country in a loss of millions and hundreds of millions of lives.

Against War for Morgan.

And, fellow citizens, it behooves a nation to consider well before it enters upon a war of that sort how much it has got at stake. If all it has got at stake is the loans the house of Morgan makes to foreign governments and the profits that the munitions makers will earn in shipping their products to foreign countries, then I think it ought to be weighed, not in a common hay scale, but in an apothecary's scale.

"Ah but somebody will tell you American rights are involved. What American rights? The right of some venturesome person to ride upon a munition laden vessel in violation of an American statute that no vesesl which carries explosives shall carry passengers. Four days before the Lusitania sailed President Wilson was warned in person by Secretary of State W. J. Bryan that the Lusitania had 6,000,000 rounds of ammunition on board. Besides explosives, and that the passengers who proposed to sail on that vessel were sailing in violation of a statute of this country, that no passengers shall travel upon a railroad train or sail upon a vessel which carries dangerous explosives. And Mr. Bryan appealed to President Wilson to stop passengers from sailing upon the Lusitania. I am giving you some history that maybe has not come to you heretofore—the grievances that carried this country into the war, into a war the results of which, as to the loss of life and burdens, financial burdens, that shall be laid upon us cannot be calculated by any mind."

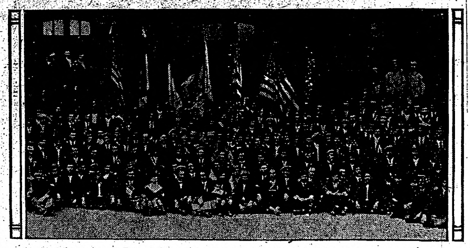
Pose As Police; Get Jewels.

Chicago, Oct. 8.—Three men staged a daring robbery at the home of Abraham Blackstone, a wholesale junk dealer, and escaped with jewelry valued at more than $1,100 and a small sum of money. About 6 o'clock the men went to the Blackstone flat. They posed as policemen and said they had a warrant for the arrest of Blackstone on a charge of receiving stolen property. Mrs. Blackstone and her niece, 17 years old, were alone. As soon as the robbers got in they drew revolvers.

Criticizes Roosevelt's Criticism.

Washington, Oct. 8.—Senator Lewis, Democratic whip of the senate, assailed Col. Roosevelt's statement that the United States has "broomstick preparedness." Lewis said we have "broomstick preparedness to sweep the earth clean of the foes of democracy." In a tribute to the way the war has been managed, Lewis said that while other nations had cabinet crises many times since the war began, there has not been a stain on the government of this nation.

JUGOSLAVS FROM THE UNITED STATES HAVE GONE OVER TO EUROPE TO FIGHT FOR SERBIA



At a port "somewhere in France" this group of Jugoslavs from the United States has landed on its way to fight for Serbia. They are Serbs and Croats, and most of them hail from Indiana. In the photograph with these volunteers are their French and Serbian officers. Also shown are the flags of the volunteers. These flags were consecrated in a Serbian orthodox church in Indianapolis before the departure last June.

SHELLS ITALIAN U-BOAT

Fired On by U. S. Warship When Signals Are Ignored.

One Officer and One Enlisted Man Killed—Navy Department Expresses Regret.

Washington, Oct. 10.—An American patrol vessel on duty at night in the war zone fired on an Italian submarine which failed to answer signals, according to a cable to the Navy department from Admiral Sims.

Secretary Daniels at once sent a message to the Italian ministry of marine, expressing the deepest regret over the unfortunate occurrence and tendering his and the American navy's sympathy. The Navy department has issued this statement:

"The Navy department has been informed by Vice Admiral Sims that recently an American patrol vessel, while on patrol duty at night, encountered an Italian submarine and that when the latter failed to answer the established recognition signals the patrol vessel opened fire, which resulted in the killing of one officer and one enlisted man before the identity of the submarine was established.

"Vice Admiral Sims is thoroughly investigating the unfortunate occurrence and reports will be forwarded later to the department."

While no details of the incident still are known here, the fact that an officer and an enlisted man were killed indicates that the American gunners landed a shot in the submarine's conning tower, the victims being the officer at the periscope and the bluejacket at the wheel.

FAST N. P. TRAIN KILLS FOUR

Hits Auto Driven by Inexperienced Owner.

St. Cloud, Minn., Oct. 9.—The Winnipeg Flyer, a fast Northern Pacific train, killed four people who were in an automobile driving to Little Falls for dinner. The party, four automobile loads, were driving across the tracks when the train smashed into one car. One of the others had passed safely.

The dead are: Octavius Longworth, 70 years old, driver of the car; Lottie Kickerbocker, Jennie Longworth, 68 years old, sister of the aged driver, all of Annandale, and Mrs. Hattie Davis of Clear Lake.

The deceased owner of the car was an inexperienced driver.

Civil Law Restored in Spain.

Madrid, Oct. 9.—Discontinuance of martial law throughout Spain is announced in a decree just issued.

German Minister Ousted.

Lima, Peru, Oct. 9.—The Peruvian government has handed his passports to Dr. Perl, the German minister. It was stated that, after turning the German legation over to the Spanish minister, Dr. Perl would proceed to Chile. The decision reached by the Peruvian congress to sever diplomatic relations between Peru and Germany came after a sensational debate. The vote was 105 to 6. The decision was the result of Germany's failure to give satisfaction for the sinking of the bark Horton.

German Reichstag Threatens to Compel Kaiser to Make Statement.

SPEAKERS ARE JEERED

Representatives of Michaelis Fail to Mollify Critics—Further Discussion Expected—Snow in Vosges—German Fleet in Baltic.

London, Oct. 10.—The issuance of a full statement of Germany's war aims is likely to be forced by internal conditions within the German empire. What the German leaders want if they are successful will be discussed in the Reichstag.

Fails to Mollify the Critical.

The imperial chancellor, Dr. Georg Michaelis, sent Minister of the Interior Helfferich before the reichstag Saturday to make a statement on his behalf. Helfferich failed to mollify the critical members of the reichstag and the sitting was adjourned after the vice chancellor's speech had been interrupted. General von Stein, the war minister, was jeered when he attempted to explain the army's side of the accusation that the high command was using strong methods to help the pan-German agitation.

Tirpitz Busy Since Defeat.

Former Chancellor von Bethmann-Hollweg some months before his resignation had a test of strength with Admiral von Tirpitz, the reputed organizer of ruthless submarine warfare and the chancellor won. The admiral since has been busy and the fatherland party, of which he is a sponsor, according to recent reports, has been very active in opposing the reichstag majority declaration for peace without annexations or indemnities.

WILSON PRAISES CONGRESS

Says Body Has Assured Effectiveness of American Arms.

Washington, Oct. 8.—Congress in its remarkable session has at once assured the "effectiveness of American arms" and safeguarded the rights of the people, President Wilson declares.

In a review of war legislation definitely completed when adjournment was taken at 3 o'clock Saturday, the President said America's legislative body "has left no doubt as to the spirit and determination of the country."

The President's statement, issued after the Senate had concurred in a House vote to adjourn at 3 o'clock subject to the call of the President, was issued just before the President went to the capitol to sign bills and formally end the session.

NEGRO RIOTERS CONVICTED

Ten Sentenced for Part in Killing of Policeman in East St. Louis.

Bellville, Ill., Oct. 9.—Ten of the negroes on trial here as alleged accessories in the murder of Police Detective Coppedge of East St. Louis, last July, have been found guilty, and the penalty of each was fixed at 14 years' imprisonment. Three negroes were acquitted.

James A. Farmer, special assistant attorney general, representing the state, after the verdict was read told the court that the state has other charges against the three negroes acquitted and Judge Crow ordered them remanded to jail.

Prepare Case Against I. W. W.

Chicago, Oct. 8.—Federal officials have begun lining up the evidence to be presented against indicted I. W. W. members when they are tried on various charges of conspiracy against the government. The work was directed by Frank C Dailey, of Indianapolis, special assistant attorney general, who prosecuted the famous McNamara dynamite conspirators. The work will be completed probably the last of this month, when Charles Clyne, U. S. district attorney, will ask immediate trial.

BAKER SEES VICTORY

Says Sunshine Will Bring Success in Flanders.

Secretary of War Receives Week's Events at Front—Great German Bases Seriously Menaced.

Washington, Oct. 10.—Slowly "but therefore the more irresistably" the British are sweeping forward into the heart of the German line.

Zeebrugge and Ostend, the great German bases, are seriously menaced. The canal system leading out of Bruges is threatened.

Air control and shell supply are enabling the British to crumple the German front at its strongest point and make the Flemish coast untenable for the kaiser's legions.

Sunshine Means Victory.

These are the outstanding points of Secretary of War Baker's official resume of the events at the front for the week ending Saturday in a lengthy review of the action in Flanders, prepared by the war college and general staff experts from official reports and confidential advices.

While it may be premature to assert that the British war machine has forced a decision over the Germans, Mr. Baker says, the victories of the last fortnight, threatening the German submarine bases on the Belgian coast, are conclusive indications of the Allies' superiority. With favorable weather, he thinks, these victories will be repeated and extended.

World Watches Flanders.

The Review makes no reference to the American forces in France or to the great preparations for war going forward at home.

"The attention of the world," it says, "is focused on the titanic struggle now going on in Flanders. The battle raging there is proving an engagement of wholly unprecedented scope and potentialities."

BIG YIELDS DESPITE LOSSES

Forecast Shows Record Production in Chief Crops.

Washington, Oct. 9. — Considerable losses were recorded in some of the country's principal farm crops as a result of conditions in September, but the last government report indicates there would be record crops of corn, oats, rye, white and sweet potatoes, tobacco and beans.

The loss was heaviest in corn, which showed a reduction of more than 3[illegible]000,000 bushels since September 1. Other losses were spring wheat, 7,909,000 bushels; barley, 180,000 bushels; buckwheat, 2,331,000 bushels; white potatoes, 8,985,000 bushels; sweet potatoes, 907,000 bushels; apples, 537,000 bushels; sugar beets, 113,000 tons; kaffirs, 4,329,000 bushels, and beans, 4,155,000 bushels.

Some crops, however, showed improved conditions, especially oats with a gain of 47,382,000 bushels, making it a record crop of 1,580,174,000 bushels, or 301,000,000 bushels more than that of 1915. Gains were rice, 1,091,000 bushels, and tobacco, 21,837,000 pounds.

MAYOR DISTRIBUTES COAL

Michigan Official Buys 50 Cars—Sells for $4.50 Ton.

Menominee, Mich., Oct. 8.—Marshall B. Lloyd, mayor of Menominee, has purchased 50 cars of coal and will sell it to the citizens at $4.50 a ton. Mayor Lloyd has received letters from scores of other cities in Michigan and Wisconsin and has written to these communities urging them to form coal clubs in their communities and appoint town chairmen.

Vouch for Heavy Teuton Losses.

With the British Armies in the Field Oct. 6.—The British bull dog is holding fast to the great bite on which his vise-like jaws have closed—close to the vital center of Germany's positions in Belgium. German counter-attacks failed. Hot fighting was still in progress as the Tommies consolidated their victories on the main Passchendaele ridge. Every man in the unending stream of German prisoners which flowed to cages vouched for the tremendous losses suffered by the enemy as the result of the British drive.

GREEK ARMY TO SUPPORT ALLIES

Almost Ready to Take Field in Co-operation With Allied Forces.

COUNTRY IS UNITED

Situation Becomes More Encouraging Every Day—Country to Throw Full Resources Into Struggle.

Washington, Oct. 10.—According to dispatches from the Athens foreign office to the Greek legation here, Greece is almost ready to put a large and effective army in the field to co-operate with the Allies. Through the aid of the Allies lack of equipment is being rapidly remedied.

Minister Roussos has given the following summary of the situation in his country as described in the legation's dispatch:

"The situation in Greece is being more satisfactory every day. The people are thoroughly confident of the efficiency of their government and they are willing to allow the present ministry to continue the work of reorganization of the resources of the country so that Greece may throw her full strength into the war.

No Pro-German Party.

"There is now no pro-German party in Greece. In fact, such a party never existed, save in the person of King Constantine, aided by certain members of his court. But he knew the real feelings of the Greek people, who were attracted by tradition and sympathy with the Western powers of Europe and he never dared to openly expound his pro-German convictions. He did his best, on the contrary, to conceal them, speaking always about his friendship for the Allies and trying to convey the impression that his attitude was that of benevolent neutrality.

"The Greek people had a real affection for their king and had confidence in his word, which accounts for the fact that his pseudo policy had many supporters. Finally certain acts of the king's entourage created a suspicion in the minds of the people and they backed Mr. Venizelos in his Saloniki enterprise which brought Greece frankly and loyally into the war.

People Realize Situation.

"The reasoning people of Greece had long realized that Constantine's policy was carrying the country to ruin, and relief was felt when he abdicated. Perfect order now reigns throughout the country and the malcontents have been disposed of.

"The French troops were received with great enthusiasm when they landed at Piraeus. Mr. Venizelos is cheered wherever he appears, as he is very popular with all the people. All events have proved that his policy was the only one Greece could adopt.

"King Alexander is in perfect accord with his people and with the government and his good faith is unquestioned. Greece will now use every effort to aid the common cause."

PUTS BAN ON TALK OF PEACE

Wilson Again Warns That Complete Victory Only Will End War.

Washington, Oct. 10.—There can be no talk of peace until German autocracy is crushed and the democratic ideals for which America is fighting once more restored firmly to the community of nations. The victory of the United States and the Allies must be complete.

Thus President Wilson summarized the war aims and purposes of America to a large delegation from the League for National Unity, headed by leaders in the church, business, professional and labor world, which called upon him at the White House.

Welcoming the members of the new organization, the formation of which was started yesterday at the capital, the President in a brief speech expressed the belief that American public opinion, although understanding the war's causes and principles, needs guidance to remember that the war should end only when Teutonic militarism is stricken from the face of the earth and the rule of might superceded by the ideals of democracy.

U. S. BOND CAMPAIGN OPENS

Local Committees Hold Sessions in Many Parts of Minnesota.

Minneapolis, Oct. 9.—The campaign to bring the attention of the public to the second Liberty Loan started in many parts of Minnesota Monday. While committees were holding sessions to complete organization plans, many local organizations all over the districts held public meetings to tell citizens what their part in the big bond sale is to be.

Destroyer Fleet Contracts Ready.

Washington, Oct. 9.—Secretary Daniels has before him contracts for the destroyer program arranged tentatively with the builders. The bill appropriating $350,000,000 for their construction was put through in the last hours of the war session of Congress. The navy has declined to publish the number of additional destroyers contemplated, but it has been stated officially that when the program has been completed the United States will have a far greater number of destroyers than any other power.

The Best Sea Story of the War That Has Been Written

THE INDIAN CHIEF HAS BEEN STRUCK BY LIGHTNING AND IS ALMOST A WRECK—HOLLIS MEETS THE OWNER AND LEARNS SHIP'S DESTINATION

Synopsis—Robert Hollis, who tells the story, is a guest on Girard Carrington's yacht, Esmeralda. It is supposed to be a "stag" party, and Hollis is surprised on discovering a woman, who evidently wishes to remain unknown aboard. She merely tells him her name is Vera. Carrington tells his guests of the coming war, and that he is engineering a copper pool. The yacht is sunk in a collision and Hollis saves McCann, Millionaire, and one of the party. Hollis and McCann rescue Vera and leave the ship in a small boat. McCann refuses to submit to the authority of Hollis, and the latter enforces obedience. The castaways are sighted by a ship, the Indian Chief, which takes them aboard.

CHAPTER VIII—Continued.

—6—

"The lady was sent into the cabin, sir, and given a stateroom where she could fix herself up a bit," he answered soberly. "The other feller had a heap of a lot to say, an' seemed to have some sorter grudge against you. I hadn't any time to listen to his yarn, so I naturally turned him over to the bosum, ter have thet eye dressed. He must have got a peach o' a swipe, sir."

"I had to hit him—yes; but we can talk of that later. Where is he now?"

"In the galley, sir, where they're heating some water. After they get him fixed up, is he to go aft, or forrard?"

"Aft, if you have room to spare; he is no sailorman, but a millionaire from New York; he has money to burn."

The fellow looked at me with his mouth wide open, his glistening eyes almost laughable.

"The devil you say, sir; he don't look the part to my notion. You was all part of a yacht party?"

"Yes, the Esmeralda, a steam yacht, owned by Gerald Carrington of New York. We were run down about a hundred miles east of Montauk by a big liner, which must have been out of her course. She cut us square in two, but, excepting us three, all living on board got away in the boats. By accident we were left, and escaped later in the dinghy."

"What became of the liner?"

"She picked up the boats, and, thinking they had all the survivors, went on. She was a mail boat, likely. The yacht went down five minutes after we left her; we've been afloat ever since. Now, Mr. Masters, that's our story in brief. What's the trouble here?"

"I'll tell yer enough to make it clear, sir," he said slowly, "although there is others on board who can explain more in detail. You're a seaman—or was once—so you'll see easily the sorter fix we're in. I'm the only officer left on the hooker, an' I couldn't navigate a ship if you'd give it to me. I'm only the chief engineer, an' my assistant is in the fo'castle with a broken leg. You see thet riffle for-rard, sir? Well, it wus lightning did that. Two bolts, so the crew says, fer I wus down below, an' never knew whut happened till the electrics all went out. Then I shut off steam, and clumb out on deck. Lord, but it wus a black night, raining cats and dogs, but no wind to speak of. It wus the rain what saved us, for fire started yonder—yer can see where it burned—but it died out of itself. When morning come we saw what we was up against; it looked a lot sight worse then than it does now. Them bolts of lightning hed knocked the foremast into smithereens, killed the wheelsman, and put the steering gear plumb out o' commission. Then the topmast an' spars just naturally wrecked the bridge, and charthouse, an' the whole mass caught fire. The second officer was in the wheelhouse, sir, an' never knew what hit him, an' both the captain an' the first officer wus a standin' tergether on the bridge. The top mast crushed the life out of 'em. There wus six sailormen hurt the same way, an' four of 'em died. It wus the darndest mess I ever saw at sea, sir."

"Bad enough, surely; when did this happen?"

"Night-afore last; we've cleaned up a bit since, but the crew won't work much under me' an' we're shorthanded. I rigged up this wheel aft, so as to keep an engine going, and hung on, waiting for something to turn up. There wasn't nothing else I could do."

"No, I presume not," and my eyes rested thoughtfully on the scene forward. "How is the hull—sound? You seem sunk deeply."

"That's cargo, sir; full to the hatches. The ship's dry as a bone; have had the well sounded every three hours."

"And what about the crew?"

"Jest so, so; a crimp brought them aboard drunk, an' we were not at sea long enough for the mates to whip them into shape when this thing happened. I'm no deck officer, Mr. Hollis, and they don't take orders from me very well. I call 'em a d——d hard lot."

I made no comment, endeavoring to turn all these facts over in my mind, and reach some decision. It was evident enough what was wanted, and how I could best serve; but would they be satisfied with the offer which I felt willing to make? It was far from my desire to assume command of the Indian Chief, and guide her destinies on a long outward voyage, to whatever port her cargo had been consigned. What that port was made slight difference, for my whole desire was to return as quickly as possible to New York. I would, however, assume temporary command, and consent to navigate the vessel to the nearest American port, where a competent skipper might be procured, and a new crew obtained. The Indian Chief possessed no wireless outfit, and whatever I did must be on my own judgment. These considerations flashed swiftly through my mind, and I attained decision before Masters again spoke. I would navigate the boat to the nearest port on the American coast, notify the owners, and then leave them to do as they pleased with vessel and crew. I cared nothing for the salvage; the presence of the disabled steamer in these waters had saved our lives, which was reward enough surely. All I cared for was to get myself and the young lady safe ashore. My thought was interrupted by the sound of Masters' voice.

"It sorter seemed to me, Mr. Hollis," he was saying, "that maybe it would be best for me to explain these things before you went into the cabin. You'll naturally want to know just the condition before you decide what to do."

"I have decided, Masters," I answered briefly. "There is only one thing I can do legally, and that is navigate the Indian Chief to the nearest American port, and surrender her to her owners. As a licensed captain of steam I have authority to assume command to this extent, but no more."

"I reckoned you would look at it that way, sir. I'm no sea lawyer, but I sorter figured it out about as you do. But that ain't the situation exactly."

"What isn't?"

"Why, this owner business, sir. You see, the owner of the Indian Chief, an' every pound o' cargo below hatches, is on board here."

"The owner is on board!"

"That's the gospel truth; that's why I took the trouble to keep you here, and tell you what I have, before you went down and met him, sir. It gives you a chance to think out your best course."

"But if the man is aboard, why did he not appear on deck to give us welcome? Surely our arrival must have been of interest?"

"Likely as not he hasn't even heard yet that you are aboard. You see, his cabin is on the starboard side astern, and he would see nothing from them ports. Besides, Mr. Hollis, he is lame, and it is a bit hard for him to get around on a ship without help. What do you say, sir? Shall we go down now, an' talk it over below?"

"The sooner the better," I said, with a glance over the port rail. "The fog is thickening out yonder, and we may have a rough night. The steamer would ride a heavy sea better with some more of that riffle overboard."

CHAPTER IX.

—

Contraband of War.

The knowledge that the owner was actually on board changed the entire situation. I would have to argue it out with him undoubtedly, for quite naturally he would object to any return to an American port. Well, I might be in for a disagreeable interview, but I had made up my mind, and it was not to be changed by any bluster or offer of high wages.

"Come on, Masters," I said brusquely. "Let's get this over with."

The after cabin extended from rail to rail, the door opening directly from the main deck. There were two cabins astern, occupying apparently the full width of the vessel, and the engineer rapped with his knuckles on the panel of the nearest door. There was no response, but a second attempt resulted in a voice bidding us enter.

It was a pleasant enough interior, lighted by two ports, but showing no attempt at decoration. A man arose from one of the chairs and faced us, the light from the stern port shining full upon him. He was tall, delicate looking, his features bearing marks of pain, yet certainly not over thirty years of age. He was not at all like what I had expected to see, and I faced him in surprise. He had taken a step toward us, limping slightly, but at sight of a stranger paused.

"Whom have you here, Masters?" he asked, his eyes on my face. "Is there another vessel near us?"

"No, sir," and the engineer stood, hat in hand, awkwardly shifting his weight. "We have picked up some castaways. This man here is Captain Hollis, late of the Atlas line."

"Indeed;" he held out his hand to me, his eyes looking directly into mine. "I regret your misfortune, sir, but your coming is a godsend to us. Your ship was wrecked?"

"Sunk in collision," I answered. "But it was not my ship; I have not been to sea for several years in any position of command. On this occasion I was a guest on board a steam yacht belonging to Gerald Carrington of New York. The name of the vessel was the Esmeralda. I need not relate the details just at present, but three of us have been picked up by this ship."

"Three—all passengers?"

"Yes—one was a woman."

"Yet, if I understand Masters aright, you have been in the merchant service?"

"In every capacity; when I retired, I was captain of the freighter Vulcan."

He stood silent a moment, thoughtfully considering me, and I could not determine whether or not he was altogether pleased. Finally, having apparently reached some decision, his gaze shifted to the face of the burly engineer.

"I will talk with Captain Hollis," he said quietly, "and perhaps you had better return on deck, Masters, and keep an eye out; the fog thickens, and we are in the track of ships."

"Very well, sir."

As the door closed behind the engineer's bulky figure, the owner motioned me to a chair, while he took another himself.

"I hardly know how best to approach my subject," he said soberly. "If you were merely a shipwrecked merchant captain, I could make you a rather attractive offer; but, as you have retired from the sea, that would probably prove no special inducement."

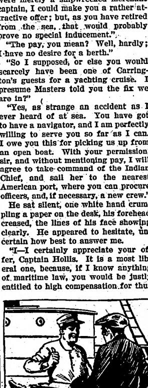
"The pay, you mean? Well, hardly; I have no desire for a berth."

"So I supposed, or else you would scarcely have been one of Carrington's guests for a yachting cruise. I presume Masters told you the fix we are in?"

"Yes, as strange an accident as I ever heard of at sea. You have got to have a navigator, and I am perfectly willing to serve you so far as I can. I owe you this for picking us up from an open boat. With your permission, sir, and without mentioning pay, I will agree to take command of the Indian Chief, and sail her to the nearest American port, where you can procure officers, and, if necessary, a new crew."

He sat silent, one white hand crumpling a paper on the desk, his forehead creased, the lines of his face showing clearly. He appeared to hesitate, uncertain how best to answer me.

"I—I certainly appreciate your offer, Captain Hollis. It is a most liberal one, because, if I know anything of maritime law, you would be justly entitled to high compensation for thus saving both ship and cargo. I had intended offering you—at least that was my first thought—the sum of three hundred a month to take command, the contract to remain in force after the conclusion of this voyage, if you so desired. This you will not consider? The money argument has no weight?"



"The Owner Is on Board!"

I smiled, but shook my head.

"Then there is nothing left me, except to appeal to your humanity," he went on, leaning forward, his eyes on mine. "You belong, I suspect, to my class, and I can give you my confidence; trust you with my secret. Is this not true?"

"I hope I am worthy of such faith," I answered wonderingly, as he paused.

"I repose that faith in you, and ask you to face this situation from my standpoint. I am the sole owner of the Indian Chief, and also of her cargo. Every dollar I possess on this earth is tied up on board this vessel. That is why I sailed as supercargo; I dare not trust the venture to anyone else. Under the hatches I have a cargo valued at nearly half a million dollars. It was purchased and shipped on the strength of a contract signed by a high official of one of the European governments, yet the responsibility of payment rests upon myself and a few intimate friends. If the Indian Chief safely discharges this cargo, within a designated time, at a certain port, or contingent thereto, I shall make a fortune, and retain my honor as a merchant. If not, then I am a ruined man, Mr. Hollis, and my reputation is gone also."

"What port?"

"Hamburg."

I leaned forward, deeply interested by now in his unusual story.

"Then I presume your cargo is largely munitions of war?"

"Of that nature—yes."

"From what port did you sail?"

"Baltimore, July 26th; we were held back within the capes for two days by a severe storm."

"Then you have not heard of the declarations of war in Europe?"

His eyes widened, his pale face grew whiter than ever.

"War in Europe; already declared!" he exclaimed. "Is that actually true? We carry no wireless, and have spoken with no vessel since we left the Chesapeake. What nations are at war?"

"The last message we received on the Esmeralda was that Germany and Austria were already pitted against France, Russia and England. The German troops had invaded Belgium in an effort to reach Paris. The night before our accident a great British battleship, racing toward New York, passed us. She was under orders to bottle up the German liners. May I see your manifest?"

He took the list from an inner drawer, and handed it over to me without a word, evidently stunned by this unexpected news, and unable to speak. I turned the typewritten pages slowly, glancing quietly over the various items. They were astounding.

"Why, really, I can hardly credit my own eyes," I exclaimed. "You tell me these goods were actually contracted for by the German government agent in the open market?"

"Not exactly in the open market, Mr. Hollis. It was all accomplished in my name; I alone am known in the transaction. Certain intimate personal relations won me the contract, my mother being a relative of a high official. The negotiations were conducted secretly."

"I should suppose so; yet such purchases would look as though war had been anticipated."

I arose to my feet, walked across to the port, and stared out into the thickening mist overhanging the water. The man did not move or speak, and I turned again to find him with head buried in his arms on the desk. His attitude of complete despair was full of pathetic appeal.

"I am no international lawyer," I said gravely, "but there is scarcely an item on that manifest which is not contraband of war. The getting of this cargo into Hamburg, or any other port of Germany now, will be almost impossible—a mere gambler's chance. English and French vessels are no doubt gathering along the coast like birds of prey."

"The German navy is strong."

"Yes; but not strong enough to cope with both Great Britain and France. For a while, however, they may succeed in keeping open a passage through the North sea. That would be your only hope, for the English channel will be closed already. The Indian Chief sails under the United States flag?"

"Yes."

"That might prevent a search, providing you had a good explanation ready, especially as you left port before war was declared. However, spies are everywhere, and the nature of the cargo aboard may be known. If so, every cruiser on watch has already been notified by wireless."

He arose to his feet facing me, his slender hands opening and closing nervously, his face white and drawn.

"I realize all this, Captain Hollis," he said, his voice trembling, "and also that there still remains a chance of success. I like your face, your manner of fronting things. I think you are the very man whom God has sent to me in this emergency. Listen: I tell you I am absolutely ruined unless I complete this voyage. I am a young man, not over thirty, but my health is gone. You can see I am practically a physical wreck, yet I am the only support of an aged mother and three younger children. Two years ago no one had brighter prospects in life than I; now I am struggling desperately for mere existence. A little more than a year ago I met with a serious accident; I need not go into details—the result you can see by looking at me. For eight months I was in a hospital in New York, lingering between life and death. There was no one to attend to my business affairs, and everything went to the dogs. When I got out again all that was left me was this vessel, a reputation for business ability, and a few thousand dollars. This contract came to me as a godsend; it was so arranged that I was able to carry it with a little help. If successful, it will put me on my feet again."

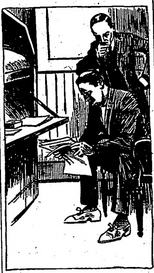
"You are not German?"

"Not a drop of Teuton blood is in my veins, so far as I know. I never dreamed of the possibility of war, or even asked the nature of the shipments."

"I understand. Of course it makes little difference where one's sympathies chance to be in a case like this." I put my hand on his shoulder, and looked into his eyes. "You have been perfectly frank with me; now I am going to be just as frank with you. I believe your story, and my whole inclination is to stand by and help you through."

"You will!" he interrupted eagerly, his eyes glowing. "You mean you are going to make the attempt?"

"No, I didn't say that, my friend; only that such is my natural inclination. If there was only my own peril, my own time, to be considered, I would shake hands with you instantly, and accept the adventure. But there is another on board this ship to be considered—a woman, whose comfort and wishes I cannot ignore."



They Were Astounding.

"But she could be transshipped!"

"Which would at once reveal our whereabouts and probable course. Any vessel speaking us would make report as soon as it reached harbor. Our only safe method of procedure will be to keep far enough away from any passing vessel during daylight to escape recognition, and to run the main European routes by night. If we so much as speak a ship, it will double our peril of capture; the wireless is our greatest enemy."

"Then what is it you propose doing?"

"Just this: I'll go out now and talk with the lady. I'll explain the whole situation to her fully, so that she will understand every detail."

"But is this fair to me?"

"Yes, perfectly fair. She is no weak-nerved creature to be awed by peril. She is a healthy, sensible girl, ready to do her part anywhere; her sympathy will all be with you. Anyway, I shall leave the affair entirely to her decision. I'll give you my answer in thirty minutes."

As I closed the door and stood outside in the main cabin, it suddenly occurred to me that I did not know the man's name. Masters had not mentioned it; I had not asked, nor did I recall noticing the signature on the manifest.

The next installment tells of Vera's old friendship for Robert Bascom, the steamer's owner, and of the new danger arising from the old and deadly enmity existing between Bascom and McCann.

(TO BE CONTINUED.)

Clipping With a Pin.

When you lose your knife or do not have a pair of scissors at hand for cutting the paper a common pin or needle of any kind serves the purpose admirably, says Popular Science Monthly. If it is a single sheet from which the clipping is to be removed, lay the part on another paper, hold the pin slantwise so that the point will follow around the clipping, just as if tracing its outline.

Pass back over the scratch with the point in the lead and you will be surprised how smoothly the pin cuts the paper.

Tropical Rains.

Tropical rains are of relatively short duration, the reason of the small number of cyclonic storms in the tropics, and this duration is fairly uniform throughout the year.

The heaviest general rainfalls in Porto Rico are associated with West Indian hurricanes. The historic hurricane of August 8, 1899, precipitated rainfall equivalent to 1,113 tons per acre.

No Exceptions.

He (scornfully)—A woman can't keep a secret.

She (bitterly)—Not with the mean military census taker making her tell her real age.

Back Lame and Achy?

There's little peace when your kidneys are weak and while at first there may be nothing more serious than dull backache, sharp, stabbing pains, headaches, dizzy spells and kidney irregularities, you must act quickly to avoid the more serious trouble, dropsy, gravel, heart disease, Bright's disease. Use Doan's Kidney Pills, the remedy that is so warmly recommended everywhere by grateful users.

A Minnesota Case

"Every Picture Tells a Story"

H. De Voice, Marshall St., Springfield, Minn., says: "For years I had a constant, dull pain in my back and kidneys. The attacks were so severe that it seemed as if a sharp instrument was piercing my kidneys, first on one side and then the other. Four boxes of Doan's Kidney Pills cured me and since then I have had no further trouble."

Every Woman Wants

Paxtine

ANTISEPTIC POWDER

FOR PERSONAL HYGIENE

Dissolved in water for douches stops pelvic catarrh, ulceration and inflammation. Recommended by Lydia E. Pinkham Med. Co. for ten years. A healing wonder for nasal catarrh, sore throat and sore eyes. Economical. Has extraordinary cleansing and germicidal power. Sample Free. 50c. all druggists, or postpaid by mail. The Paxtine Toilet Company, Boston, Mass.

W. N. U., Minneapolis, No. 41--1917.

The Omniscient Papa.

Again the Kid was delving into literature and again he sought from his father solution of his difficulties.

"Pa!" he said.

Father looked up from his paper in that kindly, patient way of his.

"Well, my son?"

"It says here in this literature lesson: 'At the age of twenty, Coleridge was graduated from the university and admitted to holy orders.'"

"Yes?"

"Well, what are 'holy orders?'"

"Holy orders? Why—er—the Ten Commandments, of course."

"But what does that—"

"Now go on with your book, and don't interrupt me again."

Help to Save Nation's Food Supply

In this time of high cost of living, everybody should use all possible means to prevent waste and to help save food. No one means can be more effective than a vigorous campaign to exterminate rats which destroy over two hundred million dollars worth of foodstuffs annually. Keep garbage in rat-proof cans, stop up their holes, and above all exterminate them with Stearns' Paste, which can be bought for a few cents at any store. A two ounce box will usually rid a house or barn of every rat. It destroys mice, cockroaches and waterbugs as well. Adv.

Surf Coasting.

The sport of surf coasting reached this country from Hawaii and promises in a few years to become a popular sport. In California it was much practiced this past summer, while a few surf boards might be seen on the New York beaches. American manufacturers have put on the market a special surf board which is a considerable improvement over the plank used by the Hawaiians, having an air chamber at one end. All we lack now is the Hawaiian skill in riding the big breakers standing up.—Exchange.

PETERSON'S OINTMENT BEST FOR ECZEMA

First Application Stops Itching of Eczema, Salt Rheum and Piles.

"Live and let live is my motto," says Peterson. "Druggists all over America sell PETERSON'S OINTMENT for 25 cents a large box and I say to these druggists, if anyone buys my ointment for any of the diseases or ailments for which I recommend it and are not benefited give them their money back.

"I've got a safe full of thankful letters testifying to the mighty healing power of Peterson's Ointment for old and running sores, eczema, salt rheum, ulcers, sore nipples, broken breasts, itching scalp and skin, blind, bleeding and itching piles."

John Scott, 283 Virginia St., Buffalo, writes, "Peterson's Ointment is simply wonderful. It cured me of eczema and also piles, and did it so quickly that I was astonished." Adv.

Cause of His Activity.

"That fellow Rastus Hambone seems to hunt for work with great pertinacity."

"I was surprised myself at his perseverance until I found he wanted it for his wife."

TO STOP WASTE IN ARMY CAMPS

War Department Prepares Plans to Enforce the Most Rigid Economy.

SOME USE FOR EVERYTHING

Effect of New Plan Is to Turn Into Large Profit What Hitherto Has Been a Very Considerable Expense.

Washington.—The war department has taken elaborate and comprehensive precautions to prevent waste in the army cantonments, which will soon contain more than 2,000,000 men, and in the embarkation camps. In the feeding of the men waste will be minimized through the fact that the food will be prepared under the direction of mess cooks, who will be trained by special courses in army cooking schools.

The officers' training camps have not been under the control of the war department so far as the food supplies are concerned, and the waste in those camps has been due to the lack of skilled management in the handling of food. A committee representing the war department and the United States food administration will also assist in dealing with problems of eliminating waste.

The food administration has received from the secretary of war an announcement of a thorough-going plan for conserving all the waste material of the National army camps, which will result in salvaging many thousands of dollars.

Collecting the Waste.

The army's first consideration in planning this work has been the sanitary and hygienic problem. At each cantonment the wastes will be collected and transported to a single "transfer station" under the direction of the sanitary inspector. Through the use of the two-can system, wastes will be tightly enclosed throughout their collection. Sterilized cans will be substituted for the filled cans at the kitchens, the nuisance of disagreeable odors and danger from flies being reduced to a minimum. Every step in the process of reclamation and utilization is carefully safeguarded and is under the absolute direction of a sanitary force, each contractor being placed under heavy bonds.

At the transfer station, the wastes are turned over to a contractor, who will remove them to a point at least three miles distant from the reservation. There the wastes will be completely sorted. Bottles will be sterilized and sold for commercial use. Tin cans will be baled and the solder, tin and iron reclaimed. Paper, which is estimated about five tons per day, will be baled. Bones will be kept separate and ground for fertilizer. The hides of dead animals will be removed and the carcasses "reduced" for grease and fertilizer.

The chief items of waste will be the garbage and the manure. It is estimated that there are 1,200 animals at each cantonment, producing 120 tons of manure per day. At the date of the report the manure from 11 cantonments had been sold for $240,900 annually.

Big Saving Through Garbage.

The greatest element of saving is through the garbage. This has been sold for an annual price of $446,394.57. The garbage from 13 of the cantonments will be used for feeding swine. It is estimated on the basis of experiments conducted at the Chillicothe cantonment, that the garbage waste from 10 to 15 men will feed one hog and enable it to add to its weight one pound per day. At this rate, the garbage from these 13 cantonments will produce 18,980,000 pounds of pork per year.

When not used for feeding, the garbage will be "reduced," that is, cooked at high temperature, the grease extracted, and the remainder ground and used for fertilizer or feeds.

By the method of incineration formerly in use, not only would all these valuable waste materials have been destroyed, but it would have cost approximately $700,000 for the installation of incinerator plants and an annual charge of approximately $595,000 for their operation. When we add to this saving the amount annually received by the government from these wastes, the net saving the first year amounts to $1,707,840.

The effect of this new plan, therefore, is not only to conserve large quantities of valuable food wastes, fertilizers, etc., but to turn into a large profit what has hitherto been a very considerable expense.

WORKS FOR LIBERTY LOAN

Copyright, Underwood & Underwood

A striking example of the value of women in helping America in the great fight is Miss Antoinette Funk, a member of the woman's committee of the council of national defense.

The photograph shows her hard at work in her office in the treasury building where she is doing wonderful work in the interests of the Liberty loan. She is executive vice-chairman of the women's Liberty loan committee, of which Mrs. McAdoo is the chairman. She was asked to take the post by Secretary McAdoo because of her powers of logical appeal, her ability as a speaker and her untiring activity in any work connected with the great cause for which America is fighting.

STEAL MORE CHINESE SEALS

Prominent Official of the Republic Disappears With the Presidential Stamps.

Peking.—Peking is much agitated over the disappearance of official seals. When President Li Yuan-hung was forced to give up the presidency, Gen. Ting-Kwan, the keeper of the presidential seals, took them to Shanghai. Another prominent official has now disappeared with the seals of the house of representatives. When the attempt at monarchial restoration had been defeated and Premier Tuan Chi-jui declared the republic had been restored, there was much consternation because of the disappearance of the seals of the republic. Gen. Ting Kwan was arrested in Shanghai, and after a hard legal struggle was brought back to Peking, together with the missing presidential seals, and is to have a hearing before a Chinese court.

RESIDENCE DISTRICT OF CRAONNE

All that was left of the residences of Craonne after the latest and severest of the bombardments to which that French town has been subjected by the Germans and the allies who fought for its possession.

NEW DEVICES CUT TOLL OF U-BOATS

Admiral Benson Tells of Methods Adopted to Foil Submarines.

EDISON INVENTION IN USE

Smoke Bombs and Smoke Screens Are Proving Effective—Camouflage Employed to Surprising Extent.

Washington.—An encouraging account of the success of the devices being used by American ships as a means of escaping or destroying German submarines is given by Admiral Benson, chief of operations of the navy. Several of the methods under trial at present, one of them the invention of Thomas A. Edison, the admiral regarded as inadvisable to describe, but he discussed without reserve the devices in general use on merchant ships and naval vessels.

It was admitted that the naval convoy furnished the most effective safeguard against the submarine. Admiral Benson thought that the number of convoyed ships sunk was even less than the average up to a month ago, when it was estimated that only one-half of 1 per cent fell victim to the submarine. The impossibility of convoying more than a small per cent of the merchant fleet leaving American shores, however, has made necessary the adoption of other protective measures.

Devices Employed.

Among those most in use on merchant ships, the admiral said, were "smoke bombs" and smoke screens. Camouflage also is being employed to a surprising extent, but particularly on naval vessels. The smoke bombs are merely containers filled with chemicals which when cast overboard throw off a dense black smoke, obscuring the ship from an attacking submarine.

A great variety of experiments in camouflage have been tried on naval vessels. They have been painted every hue of the rainbow that might tend to merge the ship in its background and make it indistinguishable to investigating periscopes. Admiral Benson said many of these devices had been demonstrated to be of great merit. Warships, too, are equipped with detectors which indicate the proximity of other ships.

More and more of the merchant ships, of course, are being armed so as to be able to give a good account of themselves in encounters with the U-boats, and experiments constantly are going on in the navy to improve the weapons of offense employed against the submarine. A special endeavor is being made to perfect the operation of depth charges so that it may be possible more frequently to "pot" the U-boats as they submerge or as they run along with only their periscopes showing.

Balloons are employed on the ships for observation purposes, but their use is not at all new.

It was said today, in contradiction of a recent interesting story, that no invention had been perfected in the United States navy which would enable an attacked ship to deflect the course of a torpedo once it was fired. This report, according to Admiral Benson, had no foundation whatever.

Bigger Submarines.

Another report which has been making the rounds is that German submarines recently have been making it a practice of sparing all passenger ships they encounter. The only basis for this belief, it was said, is the fact that fewer passenger ships have been sunk. They have been attacked, however, but in most cases have escaped.

There have been no German submarines near the American coast since this nation entered the war, so far as the navy department has learned. A submarine has been sighted nearly in mid-Atlantic, but that is the nearest approach one is known to have made.

The navy department has evidence that Germany is increasing the size of her submarines nearly to the proportion of small cruisers. This evidence was obtained by ocular observation, in part, and also from the fact that the submarines now are mounting guns of nearly six inches in bore. Fragments of shells falling on merchant ships have disclosed the size of the guns.

HAS PERFECT BRAIN; BECOMES AN AVIATOR

Boston.—Thomas James Abernethy of West Pembroke, Me., whom the late Professor Muensterberg found to be mentally perfect, is one of 999 New England candidates selected for instruction as aviators. He heads the list—but it is arranged alphabetically.

Anomalies of War Prices.

Kansas City.—It is a rather extraordinary fact that in some parts of the Southwest wheat is fed to hogs, being cheaper than corn—which is now $2.05 a bushel, and scarce at that. This practice is not general, however, as there is a sentiment against using wheat for such purposes.

1—England drinking the health of France where the allied lines meet on the western front. 2—Argentine sailors at land practice with rifles and small field pieces. 3—Byron R. Newton, assistant secretary of the treasury for five years, who has been appointed collector of customs of the port of New York.

Would Be a Money Maker.

"Everything he touches turns to money."

"If I were troubled in that way, I'd keep my hands on something all the time."

It's Often So.

"Tom has a regular hatchet face."

"He may be sharp in the face, but he is dull in the head."

"A Train of Thought."

"I like to imagine myself in various places."

"Travel around the world on a train of thought, so to speak."

The Modern Way.

She—He stole the livery of heaven to serve the devil in.

He—Livery nothing! He made his getaway in a six-cylinder.—Judge.

GERMAN WHO IS PESSIMISTIC

General Baron von Freytag-Loringhoven, chief of the supplementary general staff of the German army, has declared that the general political and economic situation of the war works only in favor of the allies and that Germany's soldiers will be defrauded of the fruits of her victories. General Loringhoven believes trench warfare a great mistake and thinks that only an aggressive attack would have brought success. He adds, however, that the German offensive was not strong enough to overthrow the allies. He is shown, at left in photograph, talking with a member of his staff.

But One Ideal.

Ideals of beauty differ where the body is concerned. One person prefers blue eyes and another brown. "What a pretty girl Bessie is," one will say, and another will answer: "Why, I never thought Bessie particularly pretty, but her sister Mary—" and so on.

But when beauty of character is concerned, there is no such disagreement. Everyone realizes that unselfishness is beautiful, and selfishness ugly, that kindness is charming and hate hideous. There is no danger of your becoming confused by a double standard. There is but one ideal for the beauty of the spirit.—Girl's Companion.

His Age.

Allan, on his second birthday, was told by his mother that he was two years old. That same day his mother weighed him, and as she lifted him off the scale, she said:

"You weigh just thirty pounds."

That evening, when the little boy's father came home, he said:

"Well, Allan, how old are you?"

Allan hesitated a few seconds and then replied:

"Two years and thirty pounds."

DAIRY

GOOD BUTTER-MAKING RULES

Best Churning Temperature Is 58 Degrees on Ordinary Thermometer —Care for Cream.

(Clemson College Bulletin.)

Cream is made up of little fat globules floating in milk. In making butter the fat globules are brought together into a mass and the milk is removed as buttermilk. These fat globules will stick better when they are just the right temperature than they will if either too warm or too cold. A good temperature for churning is 58 degrees on an ordinary thermometer. When the cream is the right sourness it churns better than when sweet or too sour. The cream should be kept at 50 degrees or lower till the day before churning. Then warm it up to 70 degrees, or room heat, which will bring about the souring by the next day.

When the barrel churn is used, allow gas to escape every few minutes at first. When the butter begins to come keep a close watch and stop churning when the butter granules are the size of wheat kernels. Draw off the buttermilk and wash in the churn repeatedly with cold water till the buttermilk is all removed. Then remove the butter from churn and work it with a paddle. Add an ounce of salt per pound of butter.

MANNER OF HANDLING SILAGE

When Time for Feeding Top Layer, Which Has Molded, Should Be Removed—Heap Top Level.

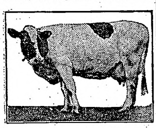
(Clemson College Bulletin.)

When the time comes for feeding silage the top layer, which will be found to be molded, should be removed. The molded part usually extends for several inches below the surface. At least two inches of silage should be fed each day in order to prevent the formation of the mold. The top of the silage should be kept level so as to expose the smallest surface possible to the air. Only enough silage for one feeding should be put out, as it soon dries out if not fed at once.

ROUGHAGE OF HIGH QUALITY

Average New York Cow Credited With $66.09 Yearly Income—Scrub Cows Responsible.

Success in dairying is based on the production of high quality roughage. The truth of this basic principle of dairy farm management finds support in estimates recently made by the New York State college of the average dairy cow's product in that state. The average New York cow is credited with only $66.09 total income yearly. The cost of maintaining her is estimated at $61.85, not including the cost of labor. The difference amounting to only $4.25 a cow, would give to the man who cared for 20 cows a yearly wage of $85 which is less than the lowest wage paid to ordinary farm labor. Scrub cows are largely responsible, it is said, for this poor showing in New York and the college advises that they be weeded out if dairy herds are to be profitable to the farmer. These herds may be improved greatly by better breeding methods and by eliminating the culls. Behind the cows lies the farm on which they are kept. If the farm is not properly managed, the cows are laboring under a severe handicap.



Splendid Type for Milk.

FIRST FEED FOR YOUNG CALF

Skim Milk Is Given Soon as Practicable and Continued Until Animal Is Six Months Old.

At first the calf is fed whole milk, the quantity being gradually increased. Skim milk is substituted as soon as practicable and, if cheap, is continued until the calf is six months old. Ordinarily the maximum quantity of skim milk that can be fed economically is 20 pounds a day. When the calf is two weeks old, grain and bright, clean hay should be offered; the quantity fed should be increased as the calf's appetite demands.

COMMON CAUSES OF SCOURS

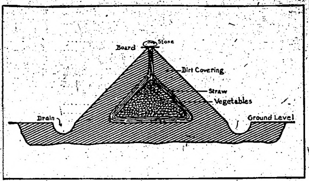
Overfeeding, Milk That Is Cold or Sour, Dirty Pails, Troughs or Stalls Are Blamed.

Indigestion is the cause of common scours. This generally occurs when the calf is from two weeks to a month old. Prevention is the best remedy. The common causes of indigestion are overfeeding, feeding milk that is cold or sour, feeding sweet milk one meal and sour the next, dirty pails, troughs or stalls.

AGRICULTURAL DEPARTMENT

This department of THE ELEVEN TOWNS is devoted to the interests of the agriculturists of Pennington and Marshall Counties. All the articles are by foremost authorities, including U. S. Government experts.

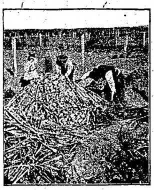
STORING VEGETABLES IN BANKS OR PITS



STORAGE PIT CONTAINING IRISH POTATOES.

(Prepared by the United States Department of Agriculture.)

Outdoor banks or pits are used very generally for keeping vegetables. The conical pit is used commonly for such vegetables as potatoes, carrots, beets, turnips, salsify, parsnips, and heads of cabbage and is constructed as follows: A well-drained location should be chosen and the product piled on the surface of the ground; or a shallow excavation may be made of suitable size and six or eight inches deep, which may be lined with straw, leaves, or similar material and the vegetables placed on the litter in a conical pile. The vegetables should then be covered with straw or similar material and finally with earth to a depth of two or three inches. As winter approaches, the dirt covering should be increased until it is several inches thick. The depth of the earth covering is determined by the severity of the winters in the particular locality. It is well to cover the pits with straw, corn fodder, or manure during severely cold weather.



Pit Containing Sweet Potatoes.

The amount of ventilation necessary will depend upon the size of the pit. Small pits containing but a few bushels of vegetables will receive sufficient ventilation if the straw between the vegetables and dirt is allowed to extend through the dirt at the apex of the pile. This should be covered with a board or piece of tin held in place by a stone to protect it from rain. In large pits ventilation may be secured by placing two or three pieces of rough boards or stakes up through the center of the pile of vegetables so that a flue is formed. This flue is capped by a trough formed of two pieces of board nailed together at right angles.

Vegetables keep very well in such pits, but it is difficult to get them out in cold weather, so that when a pit is opened it is desirable to remove its entire contents at once. For this reason it is advisable to construct several small pits rather than one larger one, and instead of storing each crop in a pit by itself, it is better to place a small quantity of several kinds of vegetables in the same pit, so that it will be necessary to open only one bank to get a supply of all of them. In storing several crops in the same bank it is a good plan to separate them with straw, leaves, or other material. The vegetables from the small pit may be placed temporarily in the storage room in the basement, where they will be easily accessible as needed for the table.

VARIETIES OF SWEET CLOVER

White Is Considered to Have Greatest Value for Hay and Pasture—Plant Is More Leafy.

(North Dakota Agricultural College Bulletin.)

Two kinds of sweet clover are commonly grown, the white and the yellow. The white is considered to have the greatest value both for hay and pasture. It grows larger than the yellow and is more leafy. The seed of the white sweet clover is of a bright olive green color and about the same size as alfalfa seed. The seed of the yellow sweet clover is much the same size, shape and color, except that under the microscope it has a mottled appearance not unlike a turkey egg.

WHEN VEGETABLES ARE HIGH

Surplus Truck in Home Gardens Comes in Handy Later on if Canned and Preserved.

Surplus fruits, beans, tomatoes and other vegetables, produced in home gardens are allowed to spoil on the vines or rot on the ground. A morning's work would can and preserve such surplusage for use when fruits and vegetables are scarce and high in price.

ERADICATE ALL LATE WEEDS

Few Cockleburrs or Other Noxious Plants Left at Last Will Cause Trouble Next Year.

Weeds that are left in the corn are the ones that do the damage. A few cockleburrs or other weeds left at the last will grow up and, by going to seed, scatter over the whole field. This will make matters next year just as bad as before. Every effort to get out the late weeds from the corn ought to be made, even if it is necessary to use the hoe on the worst spots in the field.

MUCH MILK SPOILS QUICKLY

Reason Is That It Is Kept Uncovered in Warm Kitchens—Keep Covered in Cool Place.

Much milk spoils quickly because it is kept uncovered in warm kitchens. Close observance of the doctrine, "Keep perishable food, especially milk, cool, clean and covered continuously," may make a striking difference in the food bills of many families.

INCREASE IN GRAIN YIELDS

Lull in Farm Operations After Harvesting Is Best Time to Prepare for Next Season.

(By W. M'FARLANE, Oklahoma Experiment Station.)

Just after harvesting the small grains there is generally a lull in the farm operations. Then is the time for the farmer to prepare for the next year.

Disking up the stubble as soon as possible after harvesting has been found by experiment and common experience to be profitable. It prepares the soil to absorb and retain a maximum amount of moisture and also kills many weeds. Just as soon as sufficient moisture is in the soil the farmer should plow the land at least six to seven inches deep.

Both the Oklahoma and the Kansas stations have found early and deep plowing give profitable increases in yield. The Oklahoma experiment station found as an average of five years with Fulcaster wheat, seeded September 15 to October 1, the following results:

Plowed 7 inches deep, July 15, yield	27.1 bu.
Plowed 7 inches deep, August 15, yield	24.2 bu.
Plowed 7 inches deep, September 15, yield	22.0 bu.

SWARM CONTROL BIG FACTOR

Swarming Is Not Desired by Beekeeper Who Is Keeping Bees for Production of Honey.

Swarm control is an important factor in beekeeping, asserts Dr. J. H. Merrill, assistant professor of entomology in the Kansas State Agricultural college.

"The standard of successful beekeeping was formerly set by the number of swarms that issued during the year," said Doctor Merrill. "Now, however, it is known that one colony will produce more honey than will a colony which by swarming has been separated into two, or possibly more. Thus, while swarming may be the natural way for increasing the number of bees, it is not desired by the beekeeper who is keeping bees to produce honey.

"The exact cause for swarming is not known, although there are several conditions which are known to stimulate it. If these conditions are remedied a large proportion of swarming will be controlled."

The KITCHEN CABINET

If there is any one point which in six thousand years of thinking about right or wrong, wise and good men have agreed upon, or successively by experience discovered, it is that God dislikes idle and cruel people more than any others.—Ruskin.

PALATABLE COLD THINGS.

These are always favorites at all times under most circumstances and conditions.

Oatmeal Beverage.—This is a drink which is especially cooling, and a great favorite on the farm. Take a quarter of a pound of oatmeal, one cupful of sugar and the strained juice of two lemons. Add a half cupful of boiling water to the oatmeal, mix the other ingredients and pour into a gallon of boiling water, stir well, put through a sieve and chill before serving.

Apple Water.—Core, pare and cut four apples in small pieces, then put them into a pitcher, adding the lemon rind from a small lemon, a quarter of a cupful of sugar and four cupfuls of water, boiling hot; cover the pitcher and let it stand aside to cool.

A tablespoonful of ginger mixed with three of sugar stirred into a pint of iced water makes a fine drink.

Boston Cream.—Take three quarts of boiling water, one and a half pounds of sugar, two teaspoonfuls of lemon extract, two ounces of tartaric acid and the whites of two eggs. Boil the water and allow it to get cold, then stir in the other ingredients, beating the whites until stiff. Mix well and pour into bottles and keep in the ice chest. When serving, put a pinch of soda in a glass and half fill the tumbler with ice, pour in enough of the cream to fill the glass and drink immediately.

Chocolate Sirup. — Take three squares of chocolate, one ounce of cocoa, one and a half pounds of sugar and a pint of water, one and a half teaspoonfuls of vanilla. Boil the cocoa in a double boiler ten minutes with a half-cupful of water; grate the chocolate and mix it with one-third of its measure in sugar; add this to the boiling cocoa, stirring constantly, then add the remainder of the sugar and boil for ten minutes. Remove from the fire, strain, cool and add the vanilla. This will keep in the icechest until it is used. A tablespoonful of the sirup added to cold milk or icewater topped with a marshmallow or whipped cream makes a most inviting drink.

He is great who is what he is from nature, and who never reminds us of others.—Emerson.

LOW-COST DISHES.

While the corn season lasts there are many most appetizing dishes which may be made from it or in combination with other foods.

Fried Corn.—Cook bacon for the family, then into the hot bacon fat turn in corn cut from half a dozen ears, stir and mix well; then add a half-cupful of water, cover and cook slowly until tender. Season with pepper and more salt if needed.

Corn and Tomatoes.—Cut the corn from the cob and stew until nearly dry, add a third as much stewed tomatoes as corn, and season, using a teaspoonful of vinegar, a teaspoonful each of butter and sugar, and salt and pepper to taste, to one pint of tomatoes. Serve hot. This is a favorite combination with some cooks to put up in cans for winter.

Economical Cake.—Sift together one cupful of flour, two-thirds of a cupful of sugar, one teaspoonful of baking powder and a little salt. In a half pint measuring cup put a tablespoonful of melted butter, drop in one egg, and fill the cup with milk. Stir into the dry ingredients and beat rapidly two or three minutes. Flavor as desired. Bake in a loaf.

When baking cake, fruit juice may be used in place of milk, which will result in a moist, finely flavored cake.

Corn for the table, if cooked over steam is much better flavored than that allowed to cook in water.

Add peanut butter when cooking fried potatoes, using a tablespoonful to the fat in the pan. It adds variety, and where the flavor is liked makes an appetizing dish.

Puree of Summer Squash.—Slice three onions and cover with two quarts of cold water; when boiling, add a large summer squash cut in thin slices. Let simmer slowly for two hours, then rub through a sieve. Mix one tablespoonful of ground rice or corn starch with a cupful of milk or tablespoonful of butter and seasonings; cook until smooth and add to the soup. Serve hot.

Nellie Maxwell

Greatest Joy in Life.

Life would not be worth the living, worth the pain and struggle, were it not for joy, the joy of loving and being loved.—F. L. Ogden.

A wire frame to hold a cup securely on the edge of a plate has been invented for use where refreshment are served informally.

Camphor is now grown in Florida and Texas, the trees forming attractive hedges.

COL. HOUSE WILSON AID IN PREPARING FOR INEVITABLE PEACE CONFERENCE

President's Unofficial Counselor Undertakes Unusual Task at Request of Chief Executive—Not Sign That Government Expects Early End of War.

New York.—Col. E. M. House, intimate friend and counselor of President Wilson, has assumed an unusual and complex task in accepting the commission of the president to gather information which will be greatly needed by the United States government when it enters the peace conference which will end the present great war. President Wilson, in making this move, was cognizant of the fact that for nearly three years the European governments have been making similar preparations for the inevitable peace conference.

Colonel House already has begun to carry out the wishes of the president. As his chief assistant in the work he has selected Dr. John H. Finley, New York state commissioner of education, who recently returned to this country from Europe after making an extensive investigation of conditions in several countries.

The selection of Doctor Finley is indicative of the sort of experts with whom Colonel House will confer. No man or woman with a preconceived opinion which might tempt one to color circumstances so as to prove the correctness of a personal point of view will be permitted to participate in a work where open-mindedness is a prerequisite to the arrival at conclusions that will enable the government to determine upon a correct policy.

Emphasis is put upon the unalterable determination that neither professional pacifists nor confirmed militarists can be in the slightest degree useful in preparing statistics for governmental guidance, which must be without taint of bias.

In an interview Colonel House made it plain that his appointment does not indicate any thought of immediate peace is now being entertained by the United States government. He agrees with Lord Northcliffe in his message delivered before the American Bankers' association in Atlantic City that peace seems far off and America should beware the trickery and treachery of such propaganda. The truth is that this effort on the part of the United States to analyze war conditions and evolve a plan of proceedure when hostilities end is a belated one, just as our military preparations lagged for a period. But now it is "full steam ahead and damn the torpedoes" with our army and navy with not a thought of let-up in mind, so from now on there will be urgent prosecution of search for material, historical and informative, concerning the world war. This quest of data will keep pace with an energetic prosecution of the contest, but will not halt it in any way. To pause now in any phase of belligerent endeavor might make the prospect of peace even more remote than it seems at present.

No Sign of Early Peace.

The government sees nothing whatever to indicate the early approach of peace, nor will Colonel House have anything to do with ascertaining the point of view of either the Entente belligerents or the central powers, or possible terms upon the basis of which they might be willing to enter into negotiations. He will remain in the United States. It is possible that the state department will be able to afford him aid in the work he has undertaken, but he will not work with the department nor in a diplomatic capacity, formal or informal. He will have no title and will receive no salary.

The appointment of Colonel House affords another illustration of the expanding position of the United States in world affairs. Heretofore the state department has been equipped with virtually all the information that was necessary to the solution of international problems in which the United States has taken a direct interest. The war has brought new problems and projected this country into a field of international activity which it has seldom entered before.

The questions which will come before the peace conference at the end of the war will be multitudinous. The freedom of the seas, the neutralization of seaways, the political homeogeneity of peoples who claim the right of self-government and the disposition of territorial possessions involving economic, historical and political questions, will be some of the many subjects to be considered, and the information upon which conclusions may be based and policies decided must be at hand.

With exclusive European problems, it is not expected that the representatives of the United States at the peace council will be concerned. But in the disposition of general questions, relating to economic intercourse and political development which will affect virtually all the nations of the world, the United States will have a potent voice. In accordance with the policy that has been consistently followed since the outbreak of the war of holding aloof from European combinations except in the prosecution of the war, this government probably will not attempt to aid in the settlement of traditional Euorpean quarrels, except possibly as a matter of friendly interest if opportunity arises.

House Likely to Be Delegate.

It was said unofficially that when the time comes to organize a peace conference, Colonel House, by virtue of his present assignment, would in all probability be selected as one of the delegates from the United States.

It will be a part of Colonel House's task to gather intelligence relating to commercial, economic and political situations abroad. He will keep abreast of developments in all non-military affairs.

Colonel House will have associated with him, as has been stated, several experts, probably college professors, economists and specialists in commercial and financial affairs. The work he is to perform will not be connected with similar undertakings in any of the countries with which the United States is associated in the war.

The United States government isn't getting ready to enter into peace negotiations with Germany, isn't going to meddle in strictly European questions relating to the war, and isn't negotiating just yet on the problems of peace with the Entente, as has frequently been surmised.

Must Have Data in Advance.

It is important for the United States government now and will be even more important later on to have a so-called "who's who and what's what" in the war in order that all phases involved may be properly understood by reference to data compiled in advance.

In time of war the government that fails to prepare for peace will ultimately be at a disadvantage, says the Philadelphia Public Ledger in an editorial. The representatives of Great Britain, Austria, Russia and Prussia, found this out after the fall of Napoleon when they met Prince Talleyrand at Vienna. Talleyrand, sent by France, had learned enough of the situation as it concerned all of the smaller European powers and as it concerned much of the opinion of Europe to turn the tables upon the four great powers and to stand as the champion of the public rights of Europe.

Prince Talleyrand maneuvered, and successfully, according to the rules of a secret diplomacy. He really worked in behalf of selfish and nationalistic interests. The partitioning of Europe by the congress of Vienna was the outcome of arbitrary compromise; it was prolific of future wars. The knowledge which the great diplomatic exponent of France displayed was more comprehensive than that of his foes, that is all. Excepting that he recognizes the need of precise information, President Wilson acts upon a principle different from that which guided Talleyrand. He will urge this nation into no alliance, even with the nations with whom it is associated in the common war against the Teutonic powers. He proposes simply to equip himself with knowledge pertinent to the rights of all nations in common with America as they may be concerned by the proceedings of the peace conference.

To Show War Aims.

In this spirit the president has asked Colonel House to survey the field of military, naval and political conditions in the countries of our enemies and our friends; to get at the economic, political and emotional state of things in every country, and to tell frankly to Great Britain, Russia, France, Italy and the neutral powers the things that we are doing and that we intend to do in the war. Moreover, an attempt will be made to lift the heavy curtain of censorship in Germany and Austria-Hungary, in order to spread among their peoples a comprehension of American war aims and potentialities.

Officials are anxious that no impression should be created, as a result of Colonel House's appointment, of any intention to start peace negotiations in the near future. So far as the attitude of the United States is concerned, the president's reply to the pope still remains the unaltered view of the government here.

The appointment of Colonel House is recognition by the government of the fact that the adjustment of peace terms will be a very complicated proceeding. Many points of dispute must be settled. Questions of all sorts, economic, political, and historical, will come up for discussion.

Difference in Insignia.

A young lady is grieved and disappointed to learn that an eagle displayed on the shoulder or the collar of a military person means that he is merely a colonel. In her opinion so splendid a decoration ought to be reserved for a full general at least. She finds it difficult also to distinguish at anything but the closest range between the oak leaf of a major and the star of a brigadier. And after you learn the meaning of stars in the army it is frightfully upsetting to find that stars in the navy do not always signify the same thing. The young lady says that every theater program ought to print a key to the rank of officers of the army and navy.—Exchange.

Sorry He Asked.

Anxious Father—Now, that you've heard my daughter sing, what would you advise me to do?

Music Master—Well, I hardly know. Don't suppose you could get her interested in settlement work or horseback riding, or something like that?

WHAT CITIZENS MUST GIVE TO WAR REVENUES

Conferees of Senate and House Report as to Expenditures Made Necessary.

TAX IS DIVIDED IN EQUITY

BURDEN EQUITABLY DIVIDED AS SEEN WISE BY COMMITTEE APPOINTED.

Corporations Will Pay Commensurate Share for the Protection of the Country—Statesmen at the Capital Well Satisfied With the Efforts They Have Put Forth.

Washington.—The joint conferees on the war revenue bill completed their draft after two weeks of deliberation.

As revised by the conferees, the measure has been raised from the levy fixed by the senate of $2,416,670,000 to an aggregate of approximately $2,700,000,000. Chairman Simmons of the senate finance committee estimated that the increase made by the conferees would approach $275,000,000.

Profits Tax Modified.

The excess war profits tax, as agreed to by the conferees, is a modification of the senate bill, the principal changes being in the maximum and minimum rates of exemption upon which the tax is to be determined. The senate graduated scale of exemptions ran from 6 to 10 per cent, while the house exemption rate was 8 per cent. The conferees adopted the graduated rate of from 7 to 9 per cent.

The definition of capital, which was a point upon which the conferees argued for days, was modified so as to provide that the actual value of tangible property paid into a corporation or partnership or individual business before January 1, 1914, shall be taken as of that date. The proviso as to good will and other intangible property has been somewhat liberalized.

As to "Invested Capital."

In calculating war excess profits the terms "invested capital" of corporations and partnerships was declared to include "actual cash paid in, actual cash value and other tangible property paid for stock or shares at the time of payment or January 1, 1914, but in no case to exceed the par value of the original securities; paid in or earned surplus and undivided profits used or employed in the business, exclusive of undivided profits earned during the taxable year."

The allowance for intangible assets includes "actual cash value of patents and copyrights paid in for stock or shares at the time of payment .... good will trademarks, trade brands, franchises ... if for bone-fide payments not to exceed the cash value."

It stipulates that such intangible assets exchanged for securities before March 3, 1917, not exceeding 20 per cent of the total, shall be included at a value not exceeding a fair cash value at the time of purchase.

Postal Increases.

A flat increase on reading matter of ¼ cent per pound until July 1, 1919, and ½ cent thereafter was provided. Advertising matter exceeding 5 per cent of the total space would be taxed from ¼ to 2¼ cents additional until July 1, 1919, and from ½ to 4½ cents more until July 1, 1920; and from ¾ to 6¾ cents to 1921 and from 1 cent to 9 cents thereafter.

An additional tax of ⅛ cent per pound until July 1, 1919, and ¼ cent thereafter, on religious, agricultural, fraternal and similar publications was adopted.

The 1 cent tax on letters, excepting drop letters and postal cards, was restored by the conferees. A 1 cent additional tax on postal and private mailing cards was added. The first-class mail increases are estimated to raise $90,000,000 and are effective 30 days afetr the passage of the act. The senate provision exempting from postage leetters written by soldiers and sailors abroad was retained.

Railroad Tickets Hit.

The conferees levied 8 per cent in lieu of the senate rate of 5 and the house rate of 10 per cent on passenger transportation, estimated to raise from the compromise levy abouot $60,000,000 instead of $37,500,000 under the senate plan. The 3 per cent tax on freight transportation was retained and the tax on express transportation was increased so that 1 cent would be levied on each 20 cents paid instead of each 25 cents. The house 10 per cent tax on Pullman accommdations, cut to 5 per cent by the senate was restored and is estimated to raise $5,000,000.

In lieu of the house 5 per cent tax on sales of automobiles by manufacturers and the senate federal license tax on owners, the conferees adopted a 3 per cent tax on all motor vehicles, including trucks, payable by manufacturers, producers and importers.

Taxes of 3 per cent of manufacturers' sales of musical instruments and jewelry also were written in, with a tax of ¼ cent a foot on motion picture film.

New Inheritance Tax.

A new system of graduated inheritance taxes was written into the bill in lieu of the house plan and despite the senate's rejection of such taxes. The new rates on inheritances, with those of Americans in military service exempted, range from one-half of 1 per cent on $50,000 estates to 10 per cent on estates of $10,000,000 and more.

The bulk of the increases of between $250,000,000 and $300,000,000 made by the conferees in the senate bill was secured from the postage, public utilities and manufacturing sales section and the new inheritance taxes.

With but few exceptions, the new taxes are effective with the passage of the act.

Senate Version Stands.

The income tax section was adopted virtually as written by the senate. The new 2 per cent normal tax on incomes of more than $2,000 for married persons and $1,000 for single persons is in addition to the present law exempting incomes of less than $3,000 for single persons and $4,000 for married persons. Thus those between the new low exemption bases and the present exemptions will pay only the 2 per cent tax, but single persons having an income of $3,0.0 or more and married persons whose income is $4,000 or more would pay the full 4 per cent normal tax.

The senate income provision allowing an additional exemption of $200 for each dependent child to heads of families subject to the present law was retained. The exemption for children, however, does not apply to those subject to the new reduced taxes with the $2,000 and $1,000 exemptions, respectively, for married and single persons.

Surtax Is Agreed Upon.

Surtaxes were agreed upon as follows:

One per cent on income over $5,000 and less than $7,500; 2 per cent between $7,500 and $10,000; 3 per cent between $10,000 and $12,500; 4 per cent between $12,500 and $15,000; 5 per cent between $15,000 and $20,000; 7 per cent between $20.000 and $40,000; 10 per 18 per cent between $80,000 and $100,- per cent between $60,000 and $80,000; 18 per cent betwene $80,000 and $100,000; 22 per cent between $100,000 and $150,000; 25 per cent between $150,000 and $200,000; 30 per cent between $200,000 and $250,000; 34 per cent between $250,000 and $300,000; 37 per cent between $300,000 and $500,000; 40 per cent between $500,000 and $750,000; 45 per cent between $750,000 and $1,000.000, and 50 per cent on incomes exceeding $1,000.000.

Increased Tax on Whisky.

Increased senate rates on whisky and beer were virtually retained, and that on wines somewhat reduced. The tax on distilled spirits was made $2.10 per gallon when for beverage use and $1 less for industrial purposes, estimated to raise $135,000,000. The amendment prohibiting importation of distilled spirits for beverage use was retained. Floor taxes to reach withdrawn liquors were approved. Beer was taxed $1.50 per barrel additional, to raise $46,000,000, an increase of 25 cents per barrel over the house rate.

Present wine taxes were doubled.

Taxes on nonalcoholic beverages were compromised. On prepared sirups and extracts the taxes graduated from 5 to 20 cents instead of from 3 to 12 cents a gallon were adopted. Grape juice and other soft drinks are taxed 1 cent per gallon, as provided by the senate in reducing the original 2-cent rate of the house.

Senate rates on cigars and cigarettes were retained, but those on snuff were increased from 4 cents to 5 cents a pound.

Stamp Taxes Fixed.

Stamp taxes agreed upon are:

Bonds of indebtedness, 5 cents on each $100.

Indemnity and surety bonds, 50 cents.

Parcel post packages, 1 cent for each 25 cents of the cost of transportation.

Capital stock, original issues, 5 cents per $100.

Sales and transfers, 2 cents per $100.

Sales of produce on exchange, 2 cents for each $100 value in merchandise.

Drafts, checks payable other than on sight or demand, promissory notes, except bank notes for circulation, and renewals, 2 cents for all sums below $100 and 2 cents for each additional $100 or fraction thereof.

Conveyance papers, 50 cents between $100 and $500 and 50 cents for each additional $500.

Customs house entries, from 25 cents to $1; entry for withdrawal from bonded warehouses, 50 cents.

Passenger vessel tickets for ports other than those in the United States, Canada and Mexico, between $10 and $30, $1; between $30 and $60, $3, and above $60, $5.

Voting proxies, 10 cents.

Power of attorney, 25 cents.

Playing cards, decks of not more than 54 cards, an additional 5 cents on the present rates.

Taxes on life insurance, eliminated from the house bill in the senate, were amended and reinserted, raising about $5,000,000. Effective November 1 the new taxes on new insurance policies issued are 8 cents per $100 or fraction thereof on life insurance and 1 cent per $1 on the premium charged on marine, casualty, fire and inland insurances.

Amusement taxes agreed upon provide that all persons entering places of amusement free, except employees and officials on duty and children under twelve, would pay a tax rate of 1 cent on each 10 cents or fraction thereof of the admission charge. This tax also would apply to cabarets and similar performances where the cost of entertainment is included in other costs, such as service. Holders of annual box seats would pay 10 per cent of the annual rental. Nickel theaters and shows, rides and other outdoor park amusements with a maximum admission of 10 cents and benefit entertainments and agricultural fairs were exempted.

After November 1, 1917, members of all clubs, except fraternal orders, paying more than $12 annual dues would be subject to a 10 per cent tax.

Exemptions Are Allowed.

On excess profits the conferees agreed upon a minimum deduction of 7 per cent and a maximum of 10 per cent, instead of the 6 to 10 per cent fixed by the senate. Other exemptions are $3,000 for corporations and $6,000 for individauls. Corporations, partnerships and individuals having no capital stock would pay a flat rate of 8 per cent on net profits in excess of $3,000 for corporations and $6,000 for individuals and partnerships.

Miscellaneous income tax amendments inserted by the senate were generally adopted, including the so-called Jones amendment for a tax of 10 per cent on corporations' indistributed surplus, without allowance for income taxes paid. The 10 per cent tax would not apply to undistributed income actually invested or employed in business or invested in federal securities after September 1, 1917, and 5 per cent penalty for surplus retained but not employed is provided.

In making provision for administration and collection of the new and existing taxes the conferees provided that the special tax of 12½ per cent on war munitions manufactures shall be reduced to 10 per cent, but retained to January 1, 1918. It now yields about $29,000,000 annually and the senate had proposed its repeal.

MAIN FEATURES OF NEW REVENUE BILL

Washington.—The war revenue bill, as finally agreed on by the house and senate conferees provides for the raising of approximately $2,606,320,000, as follows:

Income tax	$ 842,000,000
Excess profits tax	1,110,000,000
Distilled spirits	135,000,000
Rectified spirits	5,000,000
Fermented liquors	46,000,000
Wines, etc.	10,000,000
Soft drinks, sirups, etc.	14,000,000
Cigars	10,000,000
Cigarettes	20,000,000
Tobacco	25,000,000
Snuff	1,500,000
Cigarette papers	200,000
Freight transportation	77,500,000
Express and parcel post	16,000,000
Passenger transportation	56,000,000
Pipe lines	4,500,000
Seats and berths	2,250,000
Telegraph and telephone messages	7,000,000
Insurance policies (new)	5,000,000
Automobiles (sale of)	40,000,000
Musical instruments (sale of)	4,300,000
Motion picture films	3,000,000
Jewelry (sale by manufacturer)	4,500,000
Sporting goods	1,200,000
Pleasure boats	500,000
Perfumes and cosmetics	1,900,000
Proprietary medicines	3,000,000
Cameras	750,000
Admissions	50,000,000
Club dues	1,200,000
Schedule A, including playing cards	30,000,000
War estate tax	5,000,000
Virgin Island products	20,000
First class mail matter	60,000,000
Second class mail matter	14,000,000
Total	$2 606,320,000

GARFIELD FIXES COAL PRICES

Fuel Administrator Announces Final Decision, Which Will Be Binding on All Dealers.

Washington.—Fuel Administrator Garfield announced regulations, effective at once, for the limitation of the retail prices of bituminous and anthracite coal throughout the country.

The fuel administration has fixed, in the conclusions arrived at, not the specific price which the retail dealer will be allowed to charge the consumer, but the gross margin which the retail dealer will be allowed to add to the average wholesale cost of his coal in making retail prices.

SEEKS NEW LIBERTY LOAN

Secretary of the Treasury McAdoo Formally Opens Campaign to Raise Needed Funds.

Washington.—The campaign for the second Liberty loan of $3,000,000,000 was formally opened at Cleveland by Secretary of the Treasury McAdoo.

Ten million subscribers to the new loan will be sought, and it is possible that the ultimate issue of bonds may be $5,000,000,000.

Secretary McAdoo issued the following appeal:

"There is now offered to the American people a new issue of $3,000,000,000 of bonds to be known as the second Liberty loan. They will be issued in such denominations and upon such terms that every patriotic citizen will have an opportunity to assist the government by lending his money upon security of the government bond.

"It is essential to the success of the war and to the support of our gallant troops that these loans shall not only be subscribed, but oversubscribed. No one is asked to donate or give his money to the government, but every one is asked to lend his money to the government. The loans will be repaid in full with interest at the rate of 4 per cent per annum. A government bond is the safest investment in the world; it is as good as currency and yet better, because the government bond bears interest and currency does not. No other investment compares with it for safety and ready convertibility into cash."

"You can cut down that item"

and have a better roof

There is no use in putting on an expensive roof when you can get a better roof and save real money by using

Certain-teed

Roofing

CERTAIN-TEED is the best roof, not only because it costs less to manufacture, but also because it is weather-tight, light weight, clean, sanitary, fire-retardent, and costs practically nothing to maintain.

There are many roll roofings on the market, but only one CERTAIN-TEED. It pays to get the best. It costs no more to lay a CERTAIN-TEED roof than it does to lay a poor roof, but there is a vast difference in the wear. You can't tell the quality of a roofing by looks or feel. Your only safety is the label. Be sure that it is CERTAIN-TEED—then you are *certain* of quality and *guaranteed* satisfaction.

CERTAIN-TEED is guaranteed for 5, 10 or 15 years according to thickness (1, 2 or 3 ply).

Certain-teed Slate-Surfaced Asphalt Shingles are supplanting wood and slate shingles for residences. They cost less, are just as good looking, wear better, won't fall off, buckle or split. They are fire-retardent and do not have to be painted or stained.

Certain-teed Products Corporation

Apology Accepted.

There is a good story of J. M. Barrie in Douglas Sladen's "Twenty Years of My Life."

It appears that the talented author of "The Little Minister," having promised to be present at a dinner of the Authors' club was late, for which he apologized.

He had, he explained, been to the wrong club. He had never been to the Authors' before, he said, so he asked a policeman the way.

From the way he pronounced the word, the policeman thought he meant Arthur's club, and to Arthur's accordingly Barrie was directed.

When he got there he found it a very grand place. The club porter looked him up and down, and said:

"The servants' entrance is round the corner."

It took the normal courage of a Scotsman (adds Mr. Sladen) to tell that story; but it was inimitably funny, told in Barrie's broad Doric.—Exchange.

Classic Poses.

"About our tableaux."

"Yes?"

"Mrs. De Style has consented to pose as Minerva."

"There's one bit of news we'll have to break to her gently."

"What is that?"

"Minerva didn't use a lorgnette."

Many a convincing political speaker can't get a hearing at home.

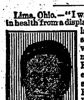
BROKEN DOWN IN HEALTH

Woman Tells How $5 Worth of Pinkham's Compound Made Her Well.



Lima, Ohio.—"I was all broken down in health from a displacement. One of my lady friends came to see me and she advised me to commence taking Lydia E. Pinkham's Vegetable Compound and to use Lydia E. Pinkham's Sanative Wash. I began taking your remedies and took $5.00 worth and in two months was a well woman after three doctors said I never would stand up straight again. I was a midwife for seven years and I recommended the Vegetable Compound to every woman to take before birth and afterwards, and they all got along so nicely that it surely is a godsend to suffering women. If women wish to write to me I will be delighted to answer them."—Mrs. JENNIE MOYER, 342 E. North St., Lima, Ohio.

Women who suffer from displacements, weakness, irregularities, nervousness, backache, or bearing-down pains, need the tonic properties of the roots and herbs contained in Lydia E. Pinkham's Vegetable Compound.

"What's the remedy, Senator?"

"When a member gets tired let him continue his speech by means of a graphophone."

GREAT PRAISE FOR GOOD MEDICINE

Eight years ago we commenced selling Dr. Kilmer's Swamp-Root, and during this time it has found many friends among our customers who speak in the highest terms regarding the benefits obtained from the use of Swamp-Root. We have never heard a single criticism.

Very truly yours,
MEIGS DRUG STORE,
June 15, 1916. Centerville, Ala.

Letter to
Dr. Kilmer & Co.
Binghamton, N. Y.

Prove What Swamp-Root Will Do For You

Send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample size bottle. It will convince anyone. You will also receive a booklet of valuable information, telling about the kidneys and bladder. When writing, be sure and mention this paper. Large and medium size bottles for sale at all drug stores.—Adv.

An Alteration.

"China and Brazil sever diplomatic relations with Germany, while Holland and Denmark and Spain accept Germany's sea murders with a polite protest. Holland is nearer than China to the Hun, and circumstances alter cases."

The speaker was Richard LeGallienne. He resumed:

"Circumstances alter cases—often for the worst. A bride once said to me:

"'Marriage makes such a big difference, doesn't it? I notice that when I sit on George's lap now, his foot goes to sleep ever so much quicker than it used to.'"

A Puzzler.

The preacher was visiting in Tommy's home. Tommy was just three years old and loved above all things to sit on the preacher's lap. This day when they were enjoying a romp the preacher shook Tommy's head and clucked much as one would to a horse. Jumping down from his lap Tommy ran across the room and shook his head vigorously, then looked disappointed. He ran back to the preacher for another shake and cluck, then away again. He repeated this several times, each time looking puzzled. Finally he ventured:

"Say, are you loose or am I?"—Indianapolis News.

The Real Thing.

"I heard a report that you had an execution in your house."

"That probably started from the fact that we were hanging some wall paper."

Many more men would buy heavenly shares if they could be had on the installment plan.

News of the State

Condensed for Busy Folks

The Riverton school board will authorize bids for the erection of a handsome schoolhouse to cost approximately $115,000 at its next meeting.

More than 200 East Grand Forks women have signed the Food Administration's pledge cards, in a campaign conducted by Miss Julia Zanger, of the domestic science department of the local high school.

The school board of Independent School District No. 40, at Chisholm, by a unanimous vote, established a minimum wage of $80 per month for teachers in the local schools and a minimum of $100 a month for janitors.

Mirroring the scarcity of teachers in Minnesota this year is the announcement made at the office of President G. E. Maxwell that every member of the class of 1917 of the Winona state normal school now, either is employed as a teacher, or is studying in an institution of higher education.

Frank Bucholtz, 35, of Goodhue, was fatally injured; George Wolf of Belle Creek suffered a badly lacerated leg, and Henry James of this city escaped injury when a scaffolding on which the three men were working at Red Wing collapsed and fell forty feet to the ground. Bucholtz's skull was crushed. He is survived by his wife and two children.

After slaying his mother and fatally injuring his sister with a large sledge hammer, William Timjan, a young farmer residing in Mount Pleasant township, near Lake City, blew his own brains out with a shotgun. The tragedy was learned when another brother drove out to the farm. The sister died from her injuries later. It is believed Timjan was insane.

Something of a sensation is on in the vicinity of Blue Earth over the sudden departure of a former exemplary farmer, Herman O. Steinhauer. There appears little or no cause for his sudden leave-taking. So far as the public is aware, his domestic relations were in no wise strained. He has held nearly every office in the township and discharged every public duty capably and honestly.

Removal of Oscar E. Smith as postmaster of Lester Prairie for disloyalty has been announced by the post-office department. Federal and state officials are investigating other occurrences at Lester Prairie, brought to a head in this village by a disloyal demonstration against Former State Senator Herman J. Heneman, who has been prominent in loyalty meetings. Heneman was hanged in effigy and the fact exultantly described in a newspaper. He has sold his interests in Lester Prairie and left the place.

There has been a "shake-up," locally speaking, in slot machines and similar games which started around Kelliher, so that all slot machines are supposed to be out of commission, according to the order of the council.

Fighting until every stitch of clothing was torn from his back, Peter Ertz of Bluffton was arrested on the charge of introducing liquor in Indian territory. His wife came to his assistance and threatened to use a gun before she was overpowered.

The Little Falls Civic league's tag day was the most successful the league has had since it adopted this method of raising funds. The sale of tags on the streets netted $291 and this does not include the receipts from the schools of the city.

Joel Thompson, who left Baudette last spring to join the army, has been made a sergeant at Fort Benjamin Harrison, Ind., and George Huntington, who is stationed at Fort Douglas, Utah, has been made a corporal, according to letters received from them this week.

James H. Drew, who holds the unique record of being the oldest rural mail carrier in point of service and in age in the United States, celebrated his eightieth birthday at Red Wing. Despite his four score years, Mr. Drew is still in the harness and covered his thirty-two-mile route, the same as any other day. He has been in the service since the rural mail delivery was established in Red Wing.

Merrill and Hoyt Chase, 19 and 21 years old, left their work on a farm near Dakota when they went to Winona to see C company of the Second Minnesota infantry entrain for Camp Cody. They did not return to the farm. Instead, the brothers left in the evening for Jefferson barracks to join the army. The fires of patriotism were kindled anew when they witnessed the local demonstration and they could not resist.

Charles Jacobson, arrested at Virginia on an indictment returned by the Federal grand jury in Chicago a few days ago in its investigation of the I. W. W., was brought here by a deputy United States marshal and arraigned before United States Commissioner James A. Wharton. He was bound over to the Chicago grand jury under bonds of $10,000 and was taken to the St. Louis county jail in default of the bonds.

The bears are raising havoc among the settlers in the northern part of Kanabec county and under the law passed by the last legislature they are defenseless against them. Fourteen miles north of Mora W. C. Dalby has already lost fourteen sheep, Nels Brumberg, four, and Hugo Johnson, one. The settlers think they should be allowed to hunt and kill bears.

Authorities have begun a general clean-up of blind pigs and bootleggers in the vicinity of Fergus Falls. Seven arrests have been made, and it is understood that more than twenty additional warrants are out.

TRIP OF INSPECTION BY COMMISSIONER

STATE HIGHWAY OFFICIAL AND DEPUTY COVER 650 MILES OF ROADS IN STATE.

100 NEW BANKS IN STATE

That Many Financial Institutions Apply for Charters Since January 1 Last—Does Not Include National Banks.

St. Paul.

C. M. Babcock, state highway commissioner, and J. H. Mullen, deputy commissioner of highways, have returned from a trip of inspection of state roads on which they covered 650 miles, finding the roads in good condition, and especially noticing that the counties are paying more attention to maintenance than ever before.

The two road officials visited St. Cloud, Alexandria, Fergus Falls, Breckenridge, Moorhead, Detroit and Long Prairie. They took up with the county commissioners of Stearns, Douglas and Ottertail counties the levy of a special tax, the proceeds of which will be applied to giving a first class surface to the road between St. Cloud and Fergus Falls, 150 miles, to which the county boards agreed. These counties, Mr. Babcock reports, are figuring on a heavier tax in order to get a larger share of the federal road aid.

Commissioners of Anoka and Wilkins counties agreed to raise their county road levy from three to five mills for general highway improvement, under the new state law. This means an increased revenue in those counties for the purpose of $118,000 next year. Some county commissioners thought that three mills still was the limit and when their attention was called to the changed state law they gladly made the increase.

The town of Reynolds in Todd county has been bonded to build a town road system under assistant engineers of the State Highway department, according to word received by Commissioner Babcock. The town roads will be brought up to the standard of state highways.

* * *

100 Banks Ask Charters.

That Minnesota is on the crest of a wave of prosperity may be indicated by the number of new banks being organized in the state.

F. E. Pearson, state superintendent of banks, said that of 1,098 state banks now active, 61 have been chartered since January 1, and applications are pending for charters for 40 additional state banks, the majority of which are in the process of organization. No figures were available at the Capitol relating to any increase in the number of national banks in Minnesota.

* * *

State Official Dies.

John McCabe, 67 years old, for the last 10 years assistant state dairy and food commissioner, died at his home in Minneapolis, after an illness of more than three years. He was born in Reading, Fairchild county, Conn., and came to St. Peter, Minn., in April, 1867. He married Margaret A. Moriarity of Minneapolis November 15, 1877. McCabe was appointed inspector in the food and dairy department by Governor Johnson in 1905. Two years later he was appointed assistant commissioner, a position he held until his death. A widow and several children survive.

* * *

"Mobilizing Minnesota."

"Mobilizing Minnesota" is the title of a manual of the Public Safety Commission, which recently came from the press.

The paper-bound booklet contains names of the commission members, aides, county directors and employes and also a sketch of its activities. It will be distributed throughout the state.

Numerous requests for copies of the commission publication, "Minnesota in the War," are being received, it was said at the offices at the Capitol.

* * *

Internal Revenue Collections Tripled.

The Minnesota internal revenue collections in September were $1,109,893, an increase of $718,709.62 over the collections in September, 1916. The increase is due to taxes on capital stock which were not collectible last year.

There was a decrease of $42,798 in receipts from the beer tax last month as compared to September, 1916. The total beer tax last month was $152,157.

* * *

New Men on State Law Board.

The state supreme court has appointed S. H. Somsen, Winona, and Charles Loring, Crookston, members of the state board of law examiners.

* * *

Coal Supply Inquiry Ordered.

The State Public Safety commission referred the request of Minneapolis aldermen for funds to found a $150,000 municipal piggery to one of its members; approved the report of the state board of conciliation in the recent strike of milk wagon drivers in St. Paul, and urged the opposing factions to adopt the settlement proposed; denied the plea for modification of a saloon regulation that liquor might be shipped by railroad from Trosky, and authorized J. F. McGee to continue his coal supply inquiry.

What He Learned.

Gerald was much depressed on bringing his monthly report card home from school at being scolded severely by his parents because it showed his deportment had only been 80 per cent out of a possible 100, and thinking she had punished him enough the mother, to cheer him, asked:

"Well, what did you learn this month in school, Gerald? Something nice, I'm sure."

"Didn't learn nothin'," he pouted.

"Oh, you surely must have learned something," the mother insisted.

"Well, nothin', only just how to be good," he conceded.—Indianapolis News.

Dull Times on 'Change.

The junior partner of the State street firm was indisposed and the senior partner was calling him up every two or three minutes.

"Why do you telephone Bob so often inquired a friend, "Is he seriously ill?"

"Oh, no," was the reply, "but his temperature fluctuates considerably and some of our customers are speculating on the fluctuations."—Boston Transcript.

How's This?

We offer $100.00 for any case of catarrh that cannot be cured by HALL'S CATARRH MEDICINE. HALL'S CATARRH MEDICINE is taken internally and acts through the Blood on the Mucous Surfaces of the System.

Sold by druggists for over forty years. Price 75c. Testimonials free.

F. J. Cheney & Co., Toledo, Ohio.

Another Case of Exemption.

One of the registrars in a Virginia country district tells a story of a negro man, obviously within the prescribed ages and of powerful physique, who turned up on registration day. The registrar had a good deal of difficulty in making the applicant understand the questions.

"Do you claim exemptian?" he asked.

"What's dat, suh?"

"Is there any reason why you should not render military service—why you should not fight your country's battles?"

"Oh, yes, suh," replied the applicant, much enlightened. "Ise gunshy."

CLEARS AWAY PIMPLES

Does Cuticura Ointment—Assisted by Cuticura Soap—Trial Free.

On rising and retiring smear the affected surfaces gently with Cuticura Ointment. Wash off in five minutes with Cuticura Soap and hot water. When the skin is clear keep it so by using Cuticura for every-day toilet and nursery purposes.

Free sample each by mail with Book. Address postcard, Cuticura, Dept. L, Boston. Sold everywhere.—Adv.

Not a Lame One.

"They've got all sorts of modern improvements down to the place where Jim works. One's an excavator that people stand on and don't have to walk upstairs."

"Why, down at our Tom's place they've got a rheumatic tube."

His Own.

"The crown prince does not seem to have accomplished anything."

"Oh, yes he has. The crown prince has kept it from being cracked."

A Feat in Itself.

"Edith, I love you."

"Is—is that all you have to say, Reggie?"

"Great Scott, Edith, it has taken me eighteen months to say that."

Big Deal in Butter.

Boston recently bought 50,000 pounds of butter for its consumptives' hospital.

Gives Library as Memorial.

Medfield, Mass., has dedicated a new library, gift of a private citizen, as a memorial to his wife.

Connect Georgia Cities.

Atlanta and Anderson, Ga., are to be connected by a new interurban electric railway.

If common sense will not teach a young man etiquette, a book on the subject is of little use.

Canada's Liberal Offer of Wheat Land to Settlers

160 ACRE FARMS IN WESTERN CANADA FREE

is open to you—to every farmer or farmer's son who is anxious to establish for himself a happy home and prosperity. Canada's hearty invitation this year is more attractive than ever. Wheat is much higher but her fertile farm land just as cheap, and in the provinces of Manitoba, Saskatchewan and Alberta

160 Acre Homesteads Are Actually Free to Settlers and Other Land Sold at from $15 to $20 per Acre

The great demand for Canadian Wheat will keep up the price. Where a farmer can get near $2 for wheat and raise 20 to 45 bushels to the acre he is bound to make money—that's what you can expect in Western Canada. Wonderful yields also of Oats, Barley and Flax. Mixed Farming in Western Canada is fully as profitable an industry as grain raising.

The excellent grasses, full of nutrition, are the only food required either for beef or dairy purposes. Good schools, churches, markets convenient, climate excellent. There is an unusual demand for farm labor to replace the many young men who have volunteered for the war. Write for literature and particulars as to reduced railway rates to Supt. of Immigration, Ottawa, Can., or to

Pleasant Thought.

"I love to hold the ten of diamonds."

"The ace is a much better card."

"I like the ten. Think of a cluster of diamonds that size!"

Good habits of some men are as expensive as the bad habits of others.

Women trust men, but there's no reason why they should.

Very Likely.

"I had an experience yesterday which made me lose my nerve."

"Dear me! What was it?"

"A seance with my dentist."

When a man is really in love he thinks there is but one woman in the world.

To the ordinary man his club is both meat and drink.

A Letter From Washington

The Food Administrator Writes Us:

"The use of baking powder breads made of corn and other coarse flours instead of patent wheat flour is recommended by the Conservation Division of the Food Administration. The wheat needed for export is thus conserved, and at the same time healthful food for our own people is provided. The circulation of recipes providing for these uses would be of assistance in carrying out our plans."

The following recipes for Corn Bread and Rye Rolls save wheat flour and make attractive and wholesome food for every day when made with

ROYAL BAKING POWDER

CORN BREAD

1¾ cups corn meal
¼ cup flour
4 level teaspoons Royal Baking Powder
1 tablespoon sugar
1 teaspoon salt
1½ cups milk
2 tablespoons shortening

Mix thoroughly dry ingredients; add milk and melted shortening; beat well; pour into well greased pan and bake in hot oven about 25 minutes.

RYE ROLLS

2 cups rye flour
½ teaspoon salt
3 level teaspoons Royal Baking Powder
¾ cup milk
½ tablespoon shortening

Sift dry ingredients together, add milk and melted shortening. Knead on floured board; shape into rolls. Put into greased pans and allow to stand in warm place 20 to 25 minutes. Bake in moderate oven 25 to 30 minutes.

Our red, white and blue booklet "Best War Time Recipes" containing additional similar recipes sent free on request. Address Royal Baking Powder Company, Dept. W, 135 William Street, New York.

The DAIRY

INCREASE IN DAIRY PROFITS

Breeders Find It More Profitable to Have Cows Freshen in Fall—More Milk Produced.

Because more milk would be produced in the year and calves would be raised cheaper, farmers find it most profitable to have their cows freshen in the fall months. Cows bred now will drop calves by early fall.

The cow gives a large flow of milk at the beginning of the period of lactation. In the spring the milk yield, which gradually falls off, is suddenly increased when the cow is turned on fresh pasture.

Calves born in the fall need mainly milk and eat little grain during the period of winter feeding. When spring comes they are ready to be turned on pasture. Spring calves consume milk and grain during the cheap pasture season and require the same high-priced feeds during the following winter, when they are older and thus eat more. The fall-born calf at the same age needs only pasture.

At the Ohio experiment station some calves born in the fall were raised for about $5 less than others born in the spring. Under average farm conditions this difference would be fed to fall-born calves on pasture, while those at the station were given grain because of a shortage of pasture.

WRITTEN BEFORE THE WAR

Impressive Fact in Nature Is Stillness and Quiet on Earth, Says Observatory Director E. L. Larkin.

One of the most impressive facts in nature is the stillness and quiet here on earth, writes Edgar Lucien Larkin, director of Mount Lowe observatory. Ancient roarings, thunderings of pent-up potential of electricity, the terrific energy of heat, the exploding surfaces of millions of suns so many times larger and energetic than our sun, itself 1,310,000 times larger than the earth, had to be hushed down into a stillness, quietude and silence to make ready for that amazing event, the creation of life on worlds, revolving around genial suns, giving out life-sustaining light and tempered heat.

None can imagine this perfect balance of titanic forces, for, with slight increase or decrease of the sun's radiant energy, all life on earth would vanish. How accurate the adjustment of mighty powers, that living things, where imminent death always lurks, could even appear and then survive. The mere item of the careful adjustment of the heat energy output of the sun for reception and use of the most delicate organisms on land and in the sea, this even balance is beyond imagination, and one of the marvels of the careers of the earth and man.

With the creation of life on earth, Mind Supreme appears, so far as man is able to see, rested and retired. There is no trace of the action of the Original Mind now on earth. The 603 laws of nature, their force, is all that can be detected in action now.

OLD-STYLE BLOSSOMS PASSE

Were Valuable for Home Remedies in Days of Our Grandmothers and Herb Doctors.

With the exception of some of the daintier spring blossoms, our wild flowers are passed by without comment. Violets, hepaticas, bluebells, trilliums are still sought after and picked, the fall asters are gathered by some and the goldenrod is admired, but passing into disrepute on account of its hay-fever aggravations. There was a time, however, when grandmother was young, relates the Ohio State Journal, when most of our common field and wayside flowers were of prime importance in the household in the shape of family bitters, physics and curealls.

Yarrow, a pest to the farmer and of doubtful beauty even to the wild flower lover, was at one time a most useful herb from which a tea was made that cured all sorts of ailments, from toothache to typhoid fever. From the boneset plant, so common along our streams now, a tea was also made which was a prime favorite in the curing of that common malady, "break-bone fever"—do not laugh—probably what we know today as grippe. Camomile, we call it dog fennel, was brewed into a tea as well, and was used as a tonic and blood purifier. Jimsonweed, a corruption of Jamestown weed, was valued by the settlers of that early village as a narcotic, and is still so used, for that matter. Selfheal, the little close-growing purple-flowered pest of our lawns, was used to relieve sufferers with quinsy and other throat afflictions. This plant belongs to the mint family, and most of the mints were of use medicinally. Pennyroyal, spearmint, Oswego tea, bergamot, catnip and mother-wort were all of value to the simpler of a century or more ago.

Honor Shown Boys Who Will Leave Soon.

A patriotic meeting was held in the school house Friday evening, in honor of the boys from this locality, who expect to leave for the training camps to prepare for army life, in the near future.

The meeting was presided over by Mayor H. A. Halvorson, and short and interesting addresses were made by Rev. O. C. Schultz and D. P. O'Niell. After the addresses the gathering adjourned to the basement where a fine lunch was served,

Those awaiting the call are:

Owen Olson, Alfred Tvedt, Arthur and Hilmer Helgeson, Frank Rase and Christian Wold.

First Number Good.

The first number of the lyceum course took place Tuesday evening in the school house. A packed house greeted the Metropolitan Trio, the entertainers of the evening. Their program was good from start to finish, the singing and instrumental selections were excellent and was enjoyed by all.

The remaining two numbers promises to be just as good and will be well worth the time and money spent in attending.

The next entertainment will be held Monday evening November 12th, when the Flora Prentiss Company, Entertainers, will furnish the program for the evening.

Prohibition Lecture.

C. J. Hall of California, the prohibition orator gave a lecture to a large audience in the Goodridge hall Saturday evening. Mr. Hall is out lecturing on the amendment to the constiution of Mineesota which will be voted on in November, 1918, and if adopted will put Minnesota among the dry states. He told in a humorous manner the evils os the liquor trafic and kept his audience inierested for an hour and a half. He urged every voter to vote for the amendment.

Farewell on Menzel Boys.

Last Thursday evening, four auto loads of young people journeyed out to Menzel's to hold a surprise and farewell party on Hugo and Herbert Menzel, who will leave with their parents in a short time for Anoka, where they will make their future home. The boys were completely surprised, as they had retired for the evening when the party arrivded there, but they were soon routed out.

An enjoyable evening was spent in playingg games and singing, after which a delicious lunch was served.

Will Install Storage Batteries.

P. P. Palmer will add a set of Edison non-acid storage batteries to his electrical equipment. It is expected that the batteries will arrive in the course of a few days. This will give the electric light patrons all day and night service. The people of Goodridge should appreciate what Mr. Palmer has done and should help to make his new investment profitable by installing lights, if you have not already done so.

Help Make Camp Life Better

City Attorney Thee. Quale, of Thief River Falls has been named by those members of the National army now in Camp Dodge to represent Pennington county in the canvass for funds for making camp life more pleasant. This information was conveyed to Mr. Quale by Chas. E. Hawkins, colonel of the 352 Infantry, which is made up of men from northern Minnesota and the eastern part of North Dakota. The letter giving this information states that while the government furnishes everything a soldier actually needs for his welfare, it does not furnish certain articles about the barracks which makes him more comfortable, nor such things as magazines, papers, phonographs, boxing gloves, basedall and football outfits and all sorts of things which gives the men clean, manly amusement. Those desirous of contributing to the welfare of the men may send such funds either large or small—to Mr. Quale who in turn will forward them to the proper officers at Camp Dodge.

Why Lutherans Celebrate The Reformation.

(Contributed by Rev. O. C. Schultz.)

On Sunday October 28, Lutherans and non-Lutherans will be offered a rare opportunity to learn more of the Church Reformation of the sixteenth century. The arrangement committee for the jubilee services, to be held in Thief River Falls, was very fortunate in procuring Prof Kretzman and Rev. Ross as principle speakers. For four hundred years the Lutheran Church has celebrated the Reformation. Why?

1. Because no event in history since the days of the apostles means so much to us and to the world as does the Reformation. First it restored to us the Bible; second, it brushed aside a huge pile of superstitions and traditions and brought again into clear light St. Paul's doctrine of salvation by faith alone. Third, it broke the chains of an ecclesiastical tyranny such as was never before known and restored liberty of conscience; fourth, it brought about a revival not only in religion, but also in morals and in government; fifth, it prepared the way for social and industrial progress, such has not been witnessed since the world began.

2. Because when we cease to celebrate the Reformation we cease to value the blessings which it bestowed. It would be a sad day for our nation if we forgot to celebrate its Declaration of Independance which marks its birthday. It would show that the people were forgetting the priceless boon of liberty which the Declaration stands for. So would it be with us, who are heirs of that vast estate of blessings which the Reformation has left us as its legacy. It would prove we had forgotten the priceless worth of our heritage.

3. Because when we cease to value the blessings which the Reformation bestowed, there is danger that they will be taken from us. God always punishes ingratitude. When true religion leaves a church or a nation it is a sure sign that it has lost its value in the eyes of the people, and where once the lamp of life was brightly burning there is an increasing darkness. When the church begins to love darkness more than light, it must not find fault if God removes the candlestick that once lighted up its altar. And so when when we cease to value the blessings of the Reformation, what else can we expect but to love them at no distant date?

In these times especially when worldliness, indiffence and laxity abound, Reformation principles and truth need be restated. Many do not honor their Bible as their parents did. To them it is no longer—The Book—but only A Book among other books. Many people today are wading through trashy newspapers and whole libraries of poisoneus literature and seldom take the bible or any other good books into their hands. Many are also growing away from the truth than the Romanists did in Luthers time; they care not for the righteousness that is by faith, nor for the Papists righteousness that is by works. They simply live for pleasure, and believe it is enough that they should be "moral" or "respectable". There is need of taking the dust off the Bible in our day, as Luther did. There is need of teaching people what sin and guilt and repentance and faith are. There is need of telling men over again what their fathers did in their day, and of recounting the blessings of their labors and sacrifices and that is why we celebrate the Reformation.

The annual meeting of the Northwestern Minnesota Educational Assn. will take place at Thief River Falls on Thursday and Friday, Nov. 15 and 16, 1917. The two days and evenings will be filled with interesting programs and entertainments. Speakers of state and national reputation will appear, and every phase of educational work will be represented in the round tables and sectional meetings. Ample provisions will be made locally for room and meals for all who attend. On Friday, the school officers of Pennington and eastern Marshall county will hold their annual meeting in conjunction with the teachers.

Farther particulars will be announced in later issues of this paper and programs may be secured from the officers.

Jubilee Services Oct. 28

The Quadricentennial of the Lutheran Church Reformation will be celebrated in the

Auditorium at Thief River Falls Sunday October 28th.

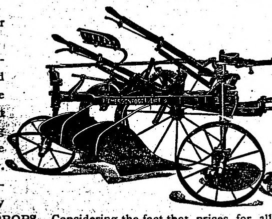
Principle Speakers: Rev. P. E. Ross of Fairmont, Minn. and Dr. P. E. Kretzman Ph. D. of St. Paul.

Large choir will sing

Dinner and refeshments will be served in the basement.

The Electric Car will leave Goodridge at 9 A.M. and return after services.

Everybody Welcome.



Attention Farmers
There never was a time when it paid the farmer to do good plowing more than today, but good plowing cannot be done with a poor plow. POOR PLOWING invariably means POOR CROPS. Considering the fact that prices for all kinds of farm produce are bound to be high for a long time to come you cannot afford to use anything 2hort of the best plow to be had. In the Emerson Line, whether Walking Plows, Sulkies, or Gangs, we maintain we have the lightest draft, the easiest to handle and most durable plow line on the marmarket. Come in and let us tell you why.

LOST—It the Village of Goodridge on September 19th, a pocket book containing some currency, some cancelled notes, and one uncancelled note. Finder leave same at Goodridge State Bank for reward.

Honor Shown Boys Who Will Leave Soon.

A patriotic meeting was held in the school house Friday evening, in honor of the boys from this locality, who expect to leave for the training camps to prepare for army life, in the near future.

The meeting was presided over by Mayor H. A. Halvorson, and short and interesting addresses were made by Rev. O. C. Schultz and D. P. O'Niell. After the addresses the gathering adjourned to the basement where a fine lunch was served,

Those awaiting the call are:

Owen Olson, Alfred Tvedt, Arthur and Hilmer Helgeson, Frank Race and Christian Wold.

First Number Good.

The first number of the lyceum course took place Tuesday evening in the school house. A packed house greeted the Metropolitan Trio, the entertainers of the evening. Their program was good from start to finish, the singing and instrumental selections were excellent and was enjoyed by all.

The remaining two numbers promises to be just as good and will be well worth the time and money spent in attending,

The next entertainment will be held Monday evening November 12th, when the Flora Prentiss Company, Entertainers, will furnish the program for the evening.

Prohibition Lecture.

C. J. Hall of California, the prohibition orator gave a lecture to a large audience in the Goodridge hall Saturday evening. Mr. Hall is out lecturing on the amendment to the constiuution of Mineesota which will be voted on in November, 1918, and if adopted will put Minnesota among the dry states. He told in a humorous manner the evils os the liquor trafic and kept his audience inierested for an hour and a half. He urged every voter to vote for the amendment.

Farewell on Menzel Boys.

Last Thursday evening, four auto loads of young people journeyed out to Menzel's to hold a surprise and fare well party on Hugo and Herbert Menzel, who will leave with their parents in a short time for Anoka, where they will make their future home. The boys were completely surprised, as they had retired for the evening when the party arrivded there, but they were soon routed out.

An enjoyable evening was spent in playingg games and singing, after which a delicious lunch was served.

Will Install Storage Batteries.

P. P. Palmer will add a set of Edison non-acid storage batteries to his electrical equipment. It is expected that the batteries will arrive in the course of a few days. This will give the electric light patrons all day and night service. The people of Goodridge should appreciate what Mr. Palmer has done and should help to make his new investment profitable by installing lights, if you have not already done so.

Help Make Camp Life Better

City Attorney Theo. Quale of Thief River Falls has been named by those members of the National army now in Camp Dodge to represent Penningten county in the canvass for funds for making camp life more pleasant. This information was conveyed to Mr. Quale by Chas. E. Hawkins, colonel of the 352 Infantry, which is made up of men from northern Minnesota and the eastern part of North Dakota. The letter giving this information states that while the government furnishes everything a soldier actually needs for his welfare, it does not furnish certain articles about the barracks which makes him more comfortable, nor such things as magazines, papers, phonographs, boxing gloves, basedall and football outfits and all sorts of things which gives the men clean, manly amusement. Those desirous of contributing to the welfare of the men may send such funds either large or small—to Mr. Quale who in turn will forward them to the proper officers at Camp Dodge.

Why Lutherans Celebrate The Reformation.

(Contributed by Rev. O. C. Schultz.)

On Sunday October 28, Lutherans and non-Lutherans will be offered a rare opportunity to learn more of the Church Reformation of the sixteenth century. The arrangement committee for the judilee services, to be held in Thief River Falls, was very fortunate in procuring Prof Kretzman and Rev. Ross as principle speakers. For four hundred years the Lutheran Church has celebrated the Reformation. Why?

1. Because no event in history since the days of the apostles means so much to us and to the world as does the Reformation. First it restored to us the Bible; second, it brushed aside a huge pile of superstitions and traditions and brought again into clear light St. Paul's doctrine of salvation by faith alone. Third, it broke the chains of an ecclesiastical tyranny such as was never before known and restored liberty of conscience; fourth, it brought about a revival not only in religion, but also in morals and in government; fifth, it prepared the way for social and industrial progress, such has not been witnessed since the world began.

2. Because when we cease to celebrate the Reformation we cease to value the blessings which it bestowed. It would be a sad day for our nation if we forgot to celebrate its Declaration of Independance which marks its birthday. It would show that the people were forgetting the priceless boon of liberty which the Declaration stands for. So would it be with us, who are heirs of that vast estate of blessings which the Reformation has left us as its legacy. It would prove we had forgotten the priceless worth of our heritage.

3. Because when we cease to value the blessings which the Reformation bestowed, there is danger that they will be taken from us. God always punishes ingratitude. When true religion leaves a church or a nation it is a sure sign that it has lost its value in the eyes of the people, and where once the lamp of life was brightly burning there is an increasing darkness. When the church begins to love darkness more than light, it must not find fault if God removes the candlestick that once lighted up its altar. And so when when we cease to value the blessings of the Reformation, what else can we expect but to love them at no distant date?

In these times especially when worldliness, indiffence and laxity abound, Reformation principles and truth need be restated. Many do not honor their Bible as their parents did. To them it is no longer—The Book—but only A Book among other books. Many people today are wading through trashy newspapers and whole libraries of poisoneus literature and seldom take the bible or any other good books into their hands. Many are also growing away from the truth than the Romanists did in Luthers time; they care not for the righteousness that is by faith, nor for the Papists righteousness that is by works. They simply live for pleasure, and believe it is enough that they should be "moral" or "respectable". There is need of taking the dust off the Bible in our day, as Luther did. There is need of teaching people what sin and guilt and repentance and faith are. There is need of telling men over again what their fathers did in their day, and of recounting the blessings of their labors and sacrifices and that is why we celebrate the Reformation.

The annual meeting of the Northwestern Minnesota Educational Assn. will take place at Thief River Falls on Thursday and Friday, Nov. 15 and 16, 1917. The two days and evenings will be filled with interesting programs and entertainments. Speakers of state and national reputation will appear, and every phase of educational work will be represented in the round tables and sectional meetings. Ample provisions will be made locally for room and meals for all who attend. On Friday, the school officers of Pennington and eastern Marshall county will hold their annual meeting in conjunction with the teachers.

Further particulars will be announced in later issues of this paper and programs may be secured from the officers.

INTENTIONAL DUPLICATE EXPOSURE

NEW FOE TRADE ACT PUT INTO EFFECT

LAW GIVES GOVERNMENT ABSOLUTE CONTROL OVER ALL DEALINGS WITH ENEMY.

WILSON MAKES REGULATIONS

Measure Is Designed to Build Economic Wall About Germany, Forcing Her to Submit.

Washington, Oct. 16.—Regulations for the trading with the enemy act have been issued by President Wilson. They constitute the most far reaching control of every phase of intercourse between the United States and the world.

They give legal force to every move of the United States in casting about Germany an economic barrier which will compel her into submission.

Not only the new regulations for cutting off trade between the United States and Germany, but they do the following:

Cut off trade with Germany's allies.

Cut off trade with those who do trade with either Germany or her allies.

Provide custodians for all enemy property in the United States.

Require special licenses for trade or intercourse with any enemy or ally of an enemy within the United States.

Authorize the Secretary of the Treasury to investigate and supervise all foreign exchange and prevent its working to the advantage of the enemy.

Empower the Secretary of the Treasury to stop the taking from or into the United States of any communication other than by mail, telegraph, cable or wireless.

Creates Censorship Board.

Officially creates a censorship board consisting of representatives of the Secretaries of War and the Navy, Postmaster General, War Trade board and committee on public information to censor mail, cable, radio and other means of communication.

Authorize the Federal Trade commission to keep secret all patents that may be developed for the interest of the United States and to provide for working in the United States under patents held by enemies or allies of the enemy.

Vest in the Postmaster General the authority to censor foreign language publications.

Charge the Secretary of State with control over the entry and egress from the United States of enemies or allies of the enemy.

Authorize the Secretary of Commerce to hear appeals of refusals of customs officers to grant clearance papers to vessels.

Charge the Attorney General with the enforcement of the criminal sections of the trading with the enemy act.

Empower the President to regulate imports as well as exports.

Of Importance to Every Citizen.

The new regulations will be of importance to every citizen of the United States. In an official statement accompanying the regulations this is said of the definitions:

"It is highly important that every citizen of the United States should promptly familiarize himself with these definitions for his own protection and for the loyal support of the government in its efforts to wage the war to a successful conclusion."

The Definitions.

These are the definitions:

Any person, of no matter what nationality, who resides in the territory of the German empire or the territory of any of its allies, or the territory occupied by any of their military forces is expressly made an "enemy" or an "ally of the enemy." Thus those American citizens who have remained in these territories are nevertheless the enemies for the purpose of these regulations.

Any person, no matter where residing or of what nationality, who is doing business within these territories is made an enemy or any ally of the enemies. This, of course, applies with special force to the border neutrals, and it is this definition that will give great force to the embargo.

German Concerns Enemies.

Any corporation created by Germany or its allies is an enemy or ally of the enemy, no matter where located.

Not only is it made unlawful to trade with persons and firms defined above, but it is unlawful to trade with:

"Any person who there is reasonable cause to believe is acting for, or on account of, or for the benefit of an enemy or any ally of the enemy, whoever and wherever they may be. It is pointed out in the President's order that in dealing with subjects of Germany who are residents of the United States it must be remembered that their nationality does not prevent ordinary commercial intercourse with them.

Law Provides Interment.

The test of their enmity in this law is whether or not they are trading with or for the benefit of the fatherland. It is pointed out that they may be interned under other provisions of law.

"Trading," is defined minutely as:

(a)—To pay, satisfy, compromise, or give security for the payment or satisfaction of any debt or obligation.

(b)—To draw, accept, pay, present for acceptance or payment, or indorse any negotiable instrument or chose in action.

(c)—To enter into or carry on, complete or perform any contract, agreement or obligation.

(d)—To buy, sell, loan or extend credit, trade in, deal with, exchange, transmit, transfer, assign or otherwise dispose of or receive any form of property.

(e)—To have any form of business or commercial communication or intercourse with.

Creates War Trade Board.

To enforce and administer all of these provisions the President creates the War Trade board. This board for good and sufficient reasons may license the trading prohibited generally. It thus will have absolute control of practically every phase of world trading which Germany or her agents enter or may try to enter.

One of the far-reaching effects of this power will be to enable the United States legally to cut off from South America and other neutral countries supplies for German corporations and induce neutral trade to cease doing business with German agents if the same trade expects to do business with the United States.

Same As Exports Board.

The trade board is the same in personnel as the exports administrative board heretofore operating. Vance McCormick is chairman, and represents the Secretary of State. The Secretary of the Treasury has not appointed his representative. Dr. Alonzo E. Taylor represents the Department of Agriculture; Thomas D. Jones represents the Secretary of Commerce; Beaver White the food administration and Frank C. Munson the Shipping board.

Has Power to License.

This board also will have the power to permit enemy companies to do business in the United States on license and to permit persons and firms who have been of enemy nature to change their names.

The Secretary of the Treasury, however, will have charge of the licensing of enemy insurance companies, as heretofore.

The Secretary of the Treasury is also charged with the control of foreign commerce in money, securities and bullion. He is empowered to require statements under oath and the production of books by all persons engaging in such traffic.

Treasury to Lead Spy Hunts.

The power given the Secretary of the Treasury to control communications, except those by mail and wire, is taken to indicate that the treasury secret service will from now on have a dominant part in the spy hunts.

The language in which this power is conferred by the President gives Mr. McAdoo's department control over (—).

"The taking out or bringing in to the United States any letter writing or tangible form of communication except in the regular course of the mail; and of sending, taking or transmitting or attempting to send, take or transmit out of the United States any letter or other writing, book, map, plan or other paper, picture or any telegram, cablegram or wireless message or other form of communication intended for or to be delivered directly or indirectly to an enemy or ally of an enemy. The Censorship board on the other hand has jurisdiction over communications, passing of the communication from time to time specified by the President. This board for the first time has the right to censor all outgoing mails and to search departing ships for such communications.

It is not necessary for German subjects and subjects of Germany's allies to apply for licenses to do business within the United States. This provision applies only to the branches of firms and the agents of persons who are in Germany or her allied countries.

"LIBERTY OXYGEN" A SUCCESS

Airmen Can Do Terrific Execution From Great Height.

Washington, Oct. 16.—Aircraft flying the Stars and Stripes may bombard Berlin from a height of six miles through the latest invention of American scientific genius. At this height German defending planes and guns would be useless.

This unheard of height can easily be attained by the "Liberty motor," according to all experts. The only difficulty has been that in such a rarified atmosphere the aviators themselves could do nothing; the terrific demands on their lungs are too great to permit other action. Airplanes have attained heights of 25,000 feet but the difficulty of breathing all but made the aviators powerless.

Now American science steps in with the twin of the Liberty motor. "Liberty oxygen" is its name and it is a respiratory device which automatically supplies to the flier the oxygen which is lacking in the natural air at high altitudes.

BLAST ROCKS PHILDELPHIA

Powder Plant Explodes at Gibbstown, N. J.—Two Lose Lives.

Philadelphia, Oct. 16.—An explosion in the nitro starch dry house at Dupont Powder Works at Gibbstown, N. J., resulted in the death of two workmen. A third man is missing and another seriously injured. The destroyed building was a small structure, isolated from the rest of the plant, and the force consisted of the four men mentioned. There was no other damage. The company say there is nothing suspicious about the explosion. Because of its terrific force alarming reports were circulated. Almost everybody in Philadelphia, 20 miles distant, felt it, and skyscrapers were rocked.

DARES COSSACKS TO KILL HIM

Kerensky Plays Fearlessly With Death at Moscow Conference.

Stockholm (By Mail).—Premier Kerensky played fearlessly with death at the Moscow democratic conference and won by his sheer, unflinching nerve.

He stood on a platform, unarmed facing three drunken Cossack officers, red with anger and twice flung the taunt "cowards" in their faces, while the vast audience, breathless, fearfully waited for their revolver shots to stretch Russia's man of the hour bleeding on the platform.

That they did not fire meant he had passed the supreme test of courage and nerve.

Must Pay Wages in Cash.

Washington, Oct. 16.—A Lousiana statute to compel corporations to pay their employes' wages in cash, has been held valid by the supreme court.

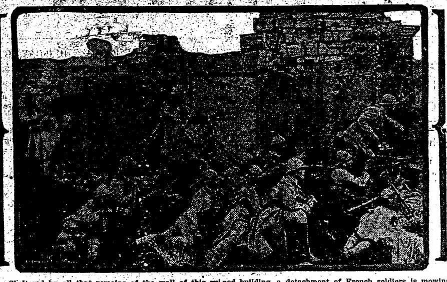
American Ship Sunk; 9 Missing.

New York, Oct. 16.—The American steamship Lewis Luckenbach has been sunk by a German submarine off the coast of France, according to a cable received here by the firm of George Luckenbach, incorporated, owners. cable stated that nine men of the crew of 56 are missing. The other 47 men escaped in the boats, presumably having reached Havre, the port to which the ship was bound. The Lewis Luckenbach was of 3,906 tons.

Russia May Sell Peninsula.

Petrograd, Oct. 16. — The Russkia Volia says that a strange rumor is being circulated that the Russian government intends to sell the peninsula of Kamtchatka, on the northeastern coast of Siberia, to Americans. The report said that Americans were offering several billions of rubles for the territory. The project is prompted by the financial difficulties of the treasury and the desire of the government not to increase the national debt.

SHELTERED WITHIN A RUINED BUILDING, FRENCH MOW DOWN GERMANS WITH MACHINE GUN FIRE



Sheltered by all that remains of the wall of this ruined building, a detachment of French soldiers is mowing down the Germans with machine gun fire "somewhere in France." A sharpshooter is adding his bit to the destructive fire of the machine guns by picking off boches from over the edge of the wall.

LIBERTY DAY OCT. 24

Date Set Aside for Loyalty Expressions.

President's Proclamation Contains Inspiring Appeal for Oversubscription of Second American Liberty Loan.

Washington, Oct. 16.—In a proclamation designating Oct. 24 as Liberty day, on which patriotic meetings shall be held and the savings of the people poured forth for their support of their country, President Wilson uttered an inspiring appeal for the tremendous oversubscription of the second Liberty Loan.

The proclamation is as follows:

"By the President of the United States of America, a proclamation:

"The Second Liberty Loan gives the people of the United States another opportunity to lend their funds to their government to sustain their country at war. The might of the United States is being mobilized and organized to strike a mortal blow at autocracy in defense of outraged American rights and of the cause of liberty.

"Billions of dollars are required to arm, feed and clothe the brave men who are going forth to fight our country's battles and to assist the nations with whom we are making common cause against a common foe. To subscribe to the Liberty Loan is to perform a service of patriotism.

"Now, therefore, I, Woodrow Wilson, President of the United States of America, do appoint Wednesday, the twenty-fourth of October, as Liberty Day, and urge and advise the people to assemble in their respective communities and pledge to one another and to the government that represents them the fullest measure of financial support.

"On the afternoon of that day I request that patriotic meetings be held in every city, town and hamlet throughout the land, under the general direction of the Secretary of the Treasury and the immediate direction of the Liberty Loan committees which have been organized by the Federal reserve banks.

"The people responded nobly to the call of the first Liberty Loan with an oversubscription of more than 50 per cent. Let the response to the second loan be even greater and let the amount be so large that it will serve as an assurance of unequaled support to hearten the men who are to face the fire of battle for us.

"Let the result be so impressive and emphatic that it will echo throughout the empire of our enemy as an index of what America intends to do to bring this war to a victorious conclusion.

"For the purpose of participating in Liberty Day celebrations all employes of the Federal government throughout the country whose services can be spared, may be excused at 12 o'clock Wednesday, the 24th of October.

"In witness whereof, I have hereunto set my hand and caused the seal of the United States to be affixed.

"(Signed) WOODROW WILSON."

"Pacifist" Leader Gets 20 Years.

Davenport, Ia., Oct. 13.—Daniel H. Wallace, Chicago organizer of the League of Humanity, a so-called pacifist organization, was sentenced to 20 years in federal prison by Federal Judge Martin Wade here. Wallace immediately gave notice of appeal, under $25,000 bonds. Wallace was found guilty of violation of the espionage law.

Gopher Troops Ready for France.

Camp Mills, Ill., Oct. 16. — Minnesota's contingent in the "Rainbow division" is ready for the front. A visit to the Minnesota streets today showed that the men are fit and that their morale is high. All who were interviewed said they are eager to start for the trenches. The increase in mail being sent back home in the last day or two indicates that they anticipate an early departure. The whole division of 27,000 men can, if necessary, be moved from Camp Mills in five hours after the order comes.

GERMANY CALLS OUT OLDER MEN

All Within Age Limit of Forty-seven Years Are Called to Colors.

UNFITS ALSO CALLED

Activity in Flanders Confined to Heavy Artillery Action—Teutons Take Capital of Russian Island.

Copenhagen, Oct. 17.—Military service in Germany has been extended to include men 47 years of age, and a call has been issued to those who have heretofore escaped service on account of military unfitness.

The army already included a large number above the legal limit of 45 years, on the ground that although nobody above that age could be mobilized, yet no requirement existed for the discharge of a soldier reaching that age.

The new regulation calls to the colors all exempts born after September 8, 1870.

Teutons Seize Arenburg.

London, Oct. 16.—German forces which landed on the island of Oesel at the head of the Gulf of Riga have captured Arenburg, capital of the island and are still pursuing the Russians at various places. Aiding the operations as far as possible are German cruisers and torpedo boats, which have shelled coast batteries and towns. Attempts by the German fleet to enter the Gulf of Riga or to operate in the waters between Oesel and Dago islands, however, are meeting with resistance from Russian land batteries and naval units. In the latter region the Germans retired in the face of Russian warships.

British Raids Successful.

In Flanders no military operations on a large scale have been attempted, but the big guns are carrying out reciprocal bombardments of great violence like those which precede the starting of an infantry offensive. British troops have carried out successful raids, in which several casualties were inflicted on the Germans and prisoners and machine guns were taken.

After the lapse of two days heavy artillery duels have been resumed between the French and the Germans on the Verdun front. On the Aisne front there is also considerable artillery activity.

Italians Plan for Offensive.

Preparations apparently are being made along the Julian front of the Austro-Italian theater for another big battle. In the Brestovizza valley a strong attack by the Austrians was broken up by the Italian machine gun fire, as likewise were attempted offensives from the west of Flondar to the head of the Adriatic sea.

STATE OF IOWA VOTES DRY

Constitutional Amendment Carries by Big Majority.

Des Moines, Iowa, Oct. 16.—With an estimated majority of 30,000 to 35,000, Iowa voters have decided to prohibit the manufacture and sale of liquor in this state by constitutional amendment. The state has been dry by statutory provision for two years. The amendment becomes effective immediately.

Watch New Tobacco Fields.

Athens, Oct. 16.—The large American tobacco concerns are keeping their representatives over here, watching the development of new tobacco fields in Macedonia. These have come suddenly into importance because of some quality of the soil of Macedonia, like that of Cuba, favorable to the production of tobacco. It blends with other grades. The American demand for it has become such that there is now more Macedonian tobacco sent to the United States than any other article shipped from Greece.

ESTIMATE IS REDUCED

Little Wheat For Allies Unless U. S. Curtails Consumption.

Only One-Ninth of 1917 Crop Can Be Spared for Allies, According to Figures.

Washington, Oct. 16.—Unless Americans heed the call of the food administration and curtail consumption of this year's wheat crop, only 77,696,000 bushels, or 11.8 per cent, will be left for export to the Allies and neutrals after the requirements of the United States are filled.

Experts of the bureau of crop estimates in calculating this year's theoretical wheat surplus have placed the consumption at 10 per cent less than the normal of 5.3 bushels as this year's conditions resemble those of 1916, when the apparent per capita consumption was about 4.75 bushels.

For the estimated population of the country—103,635,000 people—the requirement on that basis is 494,830,000 bushels.

Seed requirements they estimate at 87,271,000 bushels.

This year's wheat crop, from the preliminary estimates, is 659,707,000 bushels and the total requirements of the United States are placed at 582,101,000 bushels, leaving 77,606,000 bushels surplus.

WHITE SOX WORLD CHAMPS

Chicago Defeats New York in Sixth Game of Series.

Polo Grounds, New York, Oct. 16.—The Chicago White Sox won the world's championship in baseball here Monday, defeating the Giants for the fourth time.

The batteries were: New York, Benton, Perritt and Rariden; Chicago, Faber and Schalk.

Benton and Faber hurled tight ball on even terms until Benton's support wobbled in the fourth. Herzog's triple gave the Giants two runs in the fifth.

The weather was the best that had been produced for any game of the series. A warm sun was shining, so warm that overcoats were doffed and the crowd could look on in comfort.

It appeared the crowd would be smaller than that which witnessed the fourth game here and which was but slightly more than 27,000. The playing field was in excellent condition.

TEUTONS LAND IN RUSSIA

Report Says Gunners Are Now on Mainland.

Amsterdam, Oct. 16.—Unconfirmed dispatches from Swedish sources say that the important town of Hapsal, on the Esthonian mainland, terminus of the direct rail to Reval and Petrograd, has fallen to the German naval forces that captured the two islands dominating the Gulf of Riga. Hapsal lies 275 miles south of Petrograd, but with its occupation German control of the Riga Bay would be complete and the menace to the Gulf of Finland extreme.

Ship Strikes Rock; Ten Lives Lost.

London, Oct. 16—Ten lives, including that of the captain, were lost in the sinking of the French steamer, Hirondelle, by striking a rock in the English channel. First news of the vessel's destruction was brought by seven survivors, who landed in a small boat.

McGarrity Denounces England.

Philadelphia, Oct. 15.—Expressions of loyalty to the United States were coupled with denunciations of England as "the greatest suppressor of liberty and small nations in the world," in a statement issued by Joseph McGarrity, president of the Irish Volunteers of America. McGarrity declared that "if it is a crime to sympathize with Germany as against England," he would "plead guilty of the crime and glory in the fact." McGarrity was out of the city when the exposure was published, and has just returned.

WAS ALL RUN DOWN
Faulty Kidneys Caused Acute Suffering. Completely Recovered Since Using Doan's.

Mrs. Harry A. Lyon, 5 St. William St., S. Boston, Mass., says: "*Doan's Kidney Pills* have surely done me wonderful good. About two months prior to the birth of my baby, I had two convulsions and was taken to a hospital. Doctors said the convulsions were due to my kidneys not working properly.

"I had swelling of the feet and ankles so that I had to wear large-sized slippers. My back ached intensely, I was nervous and unable to sleep. I also suffered from awful headaches and felt weak, tired, languid, and run down.

MRS. LYON.

"After I came home a friend suggested that I try *Doan's Kidney Pills*, and I got some. I soon noticed improvement; my back became stronger and I felt better in every way. I kept on taking *Doan's* and was cured. They are surely reliable."

Mrs. Lyon gave the above statement in May, 1915, and on March 12, 1917, she said:

"My cure has lasted. I take *Doan's* occasionally, however, as a strengthener for my kidneys."

USES TOMATOES AS WEAPONS

Woman Vendor Also Effectively Bombards Kimonoed Customer With the Scale Weights.

The high cost of things generally—including tomatoes—was directly responsible for the loudest case heard in the Yorkville court, a case reflecting the difference in shopping tactics to be observed in various segments of a large city, says the New York Herald.

Mrs. Anna Saconne was present in a cerise kimono and bandages to complain of the commercial tactics of Mrs. Concetta Fasano, a traveling saleswoman for tomatoes. According to the evidence, Mrs. Saconne was complaining of the price and condition of the tomatoes sold by Mrs. Fasano, when she suddenly received a one-pound weight in the direct center of the forehead, and was subsequently bombarded with other weights ranging from a quarter of a pound to three pounds, after which a deluge of tomatoes wrecked another azure blue kimono which Mrs. Saconne wears when tomato shopping.

"Why this?" asked the magistrate of Mrs. Fasano.

"She buy notheeng and talka too mooch," explained Mrs. Fasano. "If she joost buya somctheeng an' walk away, all right, shut up, but she no buys somettheeng and says averytheeng ees no good. I slappa da face; she talks. I trow da weight; she talks. I trow da fruit; she talks. She talk, she talk, she talk. She no buy soomtheeng; she talk, she talk, she talk. How mooch?"

"Five dollars," answered the magistrate, and the fine was paid.

Unfair Question.

"I'll never ask Jibway to lend me another cent!"

"Did he hurt your feelings?"

"I should say so! I asked him to lend me a dollar until Monday and he asked me, 'What Monday?'"

Character.

"Is she a good nurse?"

"She must be; she's awfully homely."—The Lamb.

A War Sea Story Abounding in Adventure and High Romance

Copyright A. C. McClurg & Co.

HOLLIS CONSENTS TO TAKE CHARGE OF SHIP AND CONTINUE VOYAGE—BASCOM AND M'CANN ARE DEADLY ENEMIES—DISSATISFACTION DEVELOPS.

Synopsis—Robert Hollis, who tells the story, is a guest on Girard Carrington's yacht, Esmeralda. It is supposed to be a "stag" party, and Hollis is surprised on discovering a woman, who evidently wishes to remain unknown aboard. She merely tells him her name is Vera. Carrington tells his guests of the coming war, and that he is engineering a copper pool. The yacht is sunk in a collision and Hollis saves McCann, millionaire, and one of the party. Hollis and McCann rescue Vera and leave the ship in a small boat. McCann refuses to submit to the authority of Hollis, and the latter enforces obedience. The castaways are sighted by a ship, the Indian Chief, which takes them aboard. The vessel is badly storm damaged. All officers are dead. Bascom, the owner, says he is taking a cargo of ammunition to Germany.

CHAPTER X.

—7—

We Accept Adventure.

As I emerged from behind the butt of the mizzenmast, the only person visible was a long-legged cabin boy industriously rubbing away at a grease spot on the deck. He was not aware of my presence until I spoke, when he gazed up at me across his shoulder, with seeming little intelligence in his dull eyes.

"Do you know which of these staterooms the lady was given?"

"Oh, yes, sir; over there; I just took her in a needle an' some thread."

"All right—what is your name?"

"Joe—Joe Moon, sir."

I crossed over and rapped at the stateroom door, which had a figure "5" stenciled on the upper panel.

"Who is there?" she asked.

"This is Hollis; could you spare me a few moments?"

"Certainly; I will come out directly," she laughed, "I have been doing some emergency mending."

I picked out a chair and sat down. A moment later the door of No. 5 opened, and the girl greeted me pleasantly, crossing the cabin swiftly, and extending her hand, as I arose to my feet.

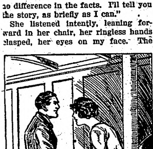
"I feel actually born anew, Mr. Hollis," she exclaimed. "I am almost afraid I was losing my nerve in that little boat. Where is this steamer bound?"

"That is what I called upon you to discuss. Sit down here, and I will give you the whole story. The captain and both mates are dead; the fellow on deck in charge when we came on board was the chief engineer. The owner of boat and cargo, however, is here; I have just been talking with him in the cabin yonder. He is in poor health and crippled in one limb."

"What is his name?"

"Foolishly I forgot to ask, and Masters—that is the name of the engineer—neglected to mention it when he introduced us. However, that makes no difference in the facts. I'll tell you the story, as briefly as I can."

She listened intently, leaning forward in her chair, her ringless hands clasped, her eyes on my face. The simple story seemed to thrill her, breathing as it did the mystery and romance of the sea.



Her Eyes Were Shining, and Her Hand Reached Forth, Unconsciously, and Rested in Mine.

"And that, Miss Vera," I said at last, "is the present situation. It is for you to furnish the final solution."

"For me! You tell me all this merely to leave the decision with me?"

"Yes; I shall do nothing against your expressed wish."

"Why—but what would you do, if you were here alone?"

"That would be entirely different. I have no family, no near relatives living; not even any special friends to mourn greatly over my demise. I might willingly risk my life in such an adventure, and think little of it. I know the sea and its perils, and such a game as this is likely to have its attractions."

"You—you consider the attempt very dangerous?"

"Of capture, and possible imprisonment—yes. Probably our lives will not be in any special peril. We have no arms with which to resist. If once overhauled, a prize crew would be put on board, and we would be taken to the nearest British or French port, as prisoners of war. Our cargo, destined for the German government, would be amply sufficient to condemn us. Under the circumstances, our own country would make no effort to protect us. I should not mind, but I cannot expose you to hardship and possible imprisonment."

Her eyes were shining, and her hand reached forth, unconsciously, and rested on mine.

"How long would it require?"

"Weeks, probably; I should choose the more northern route, around Scotland, and then skirt the Norway coast through the North sea."

"To place me on some other vessel at sea would spoil your plan, Mr. Hollis?"

"It would render our chances of success much less. The only possibility would be the meeting of some American ship, homeward bound, whose captain would promise to make no report. Such a one might be hard to find, especially if he suspected we were endeavoring to carry munitions of war to Germany."

"Do you believe the Germans are right in this war—that you ought to aid them?"

"I cannot answer that," I answered honestly enough, "for I do not fully understand the conditions. To be perfectly frank, however, my sympathies are with England and France. In this case I am not considering either side, but the poor devil who owns this ship and cargo. What we carry on board here will not be a drop in the bucket, but its loss will spell ruin to him, and that is the thought which influences me."

"And I could not even dispatch a message—wireless?"

"The Indian Chief has no equipment. No, Miss Vera, we shall be absolutely lost to the world until we are either captured, or safe in some German port. I would not deceive you—the project is both a desperate and a dangerous one."

The girl remained silent, her eyes lowered to the deck. I had said all possible, determined as I was not to influence her decision. As she did not speak, or change her attitude, I arose and walked across the cabin to where I could look out forward.

"Mr. Hollis."

"Yes." I turned.

"I must decide this? You mean to leave it all to me?"

"There is no other way."

"But I do not know what to say. I thought at first I could answer yes, gladly. I am not afraid, not the least bit afraid; and if I could only get some word back to my people in New York that I am safe, I would almost welcome the adventure. I am only a girl, you know, and I—I like such things. But they will worry horribly, for they have no knowledge of where I am. No one knows. I—I have simply disappeared, and papa will have detectives hunting for me, and will have to tell mother. They will imagine all sorts of horrid things. And you say it may be weeks, or even months, before I could get a message to America?"

"I am afraid so, Miss Vera; I wished you to understand the exact truth."

"Oh! I do not think that would be right—do you?"

"I thought you might feel that way, and so made no pledge before telling you the story. Of course, I knew nothing of how you were situated; or under what circumstances you had left home."

"I stole away unknown to anyone; it was just a lark, a foolish joke. No one knows where I am. If I could only send them word!"

I touched the bent head gently with my hand.

"Do not worry," I said kindly. "We will give the scheme up entirely, and head toward the nearest American port. Perhaps luck may favor us, and if we meet an American ship, we can transship you and then take a chance, knowing that you are safely homeward bound."

"But I understood you to say that that would only increase your peril."

"It might, and it might not. At least I will not consent to have you implicated in the affair any further than you are now. I will not sacrifice you to help our friend yonder save his fortune. I'll give him my answer now."

I took a step aft, but paused suddenly, for the door of the owner's cabin opened, and he came limping forth, resting heavily on a cane, his white face clearly revealed in the glare of the skylight. I stepped back beside the girl, who, aroused by my sudden movement, glanced up and saw him. Almost instantly she was upon her feet, hesitated an instant as though perplexed at the man's appearance; then advanced and met him.

"Mr. Bascom," she exclaimed, "can this indeed be you?"

"You speak my name, certainly," he replied, but gazing into her face seemingly without recognition. "Yet I do not recall—"

"Oh, yes, you do; surely you must," she interrupted. "Why, you have changed more than I. Do you not remember the moonlight nights at Palm Beach? The fishing parties along the coast?"

"Vera!" he cried, a note of delight in his voice. "Of course I remember; but you have become a woman, the very last person in the world I expected to see. And so you are the lady we were fortunate enough to rescue. Mr. Hollis never even mentioned your name."

"There was no reason why I should," I said, "having no thought of your previous acquaintance. The young lady and I have just been discussing the situation—"

"Wait just a moment, Mr. Hollis," she interrupted, her eyes still on Bascom's face. "This discovery changes everything. Mr. Bascom is an old friend."

"So I judge; but I do not intend to let that influence your decision."

"But it will, and does!" a certain impetuous appeal in her voice. "I did not understand before, as I do now. You are the owner, Mr. Bascom? This is your boat and cargo?"

"Yes, Vera; things have not gone well with me of late, and my entire fortune is here," he answered rather bitterly.

"I am sorry; I had not heard. You have been terribly ill, from your looks, and are lame. It—it was that affair in New York, from which you never recovered?"

"I was in the hospital for months, and scarcely hoped to live. That was when my business went to smash."

"Father never told me; and your mother?"

"Is living in Philadelphia, but in rather straitened circumstances, and ill; my younger brother has been compelled to leave school and seek employment." He smiled weakly. "I had hoped this voyage would set us all on our feet again."

She released her hand from his grasp, and sank down once more into the chair, her glance leaving his face, and seeking mine.

"Mr. Hollis," she said, almost defiantly. "It is my wish that the Indian Chief continue its voyage."

"But I cannot consent—"

"You left this decision to me. Well, I make that decision. My comfort, even the momentary fear which my family may feel over my strange disappearance, could never justify my refusal. I know this gentleman, and have met his mother; we were good friends. He shall not be ruined through any whim of a girl. I urge you to go ahead, not considering me in the least."

"I cannot quite understand so sudden a change."

"Perhaps you do not understand women," she said, and smiled. "Surely you recall who Mr. Bascom is?"

"Not in the remotest degree."

"But we spoke of him in the boat—Philip Bascom."

My eyes widened, and I caught my breath.

"Good heavens! yes; now I recall the affair. He is the man Fergus McCann shot in the hotel restaurant. That was the accident he speaks of. Why, this is strange enough to be fiction."

Bascom stood, leaning on his cane, looking at us, as though failing to comprehend what it was we were talking about. Possibly he did not catch our words clearly, for his white face appeared puzzled.

"You speak of me?" he asked, "of my difficulty with McCann?"

She looked up at him earnestly.

"Yes; it is very strange. You should know the truth. There were three of us who escaped together when the yacht sank; Mr. Hollis, myself and—Fergus McCann."

Bascom straightened, his lips pressed tight.

"He is here now; a guest on board my ship?"

"Yes; I do not know where—sleeping in one of the staterooms, probably. I have not seen him since I came over the side."

Bascom's expression was one of struggle, as he stared into our faces. It was difficult for him to find words, to even control his mind.

"This—this is a misfortune," he said finally. "I do not know how it will end. I have sought to avoid the man. Miss Vera, do you know the truth of that affair? not the newspaper story, but the facts?"

She shook her head.

"I only heard that the trouble occurred over Myra Bradley. McCann found you together, and shot you in a fit of jealous rage."

"So far the story was true; but I was not at the restaurant with Miss Bradley. I had never, but once before, even spoken to her. She called me to her table that evening, where she was dining alone, to question me regarding some mutual friends in Philadelphia. Our brief conversation was most commonplace. McCann shot me without warning; I did not even know he was near until the woman screamed."

"But," I said, as he paused, "was there no trial? That was not the newspaper story."

"I know it," bitterly, "and I have only my word to give you. I could not defend myself, and no one else made any effort to do so. McCann had money and influence; I was lying unconscious in a hospital. The girl was shipped off to Europe; a waiter swore that I drew a revolver, which he afterwards picked up on the floor; the police exonerated McCann on the ground of self-defense, and the case never came to trial."

I held out my hand.

"Having had some experience lately with McCann," I said heartily, "I am perfectly ready to accept your version. His being on board is awkward and unpleasant, but we must put up with it as best we can. Is this your thought, Mr. Bascom?"

He did not answer at once; not until she looked up questioningly.

"There is nothing else possible," he said at last, but as though the admission hurt. "My nature is not revengeful, although I certainly have no feeling of kindness toward this man. However, this is my ship, and he is my guest; as long as he remains on board, I shall treat him as I would any other under like circumstances."

"I knew you would say that," the girl exclaimed. "Now everything is all right, Mr. Hollis?"

"As nearly so as we can make it," I answered, assuming an ease I was far from feeling. "Your decision is that we continue the voyage—to Germany?"

"To wherever Mr. Bascom desires to go."

"Very well. And you appoint me captain, delegating to me full authority?"

"I do, with pleasure."

I held out my hand, surprised to note the strong grip of the slender, white fingers responding to my clasp.

"The matter is settled then, let the result prove what it may. It is already growing dusk; I will go on deck and assume command."

CHAPTER XI.

I Select My Officers.

The die was cast. However the strange adventure might eventually end, whatever peril lurked ahead of us, it was now too late for regret. The full responsibility I had assumed almost overwhelmed me as I first emerged upon deck, but there came to me also a spirit of recklessness, which brought a laugh to my lips and a shrug to my shoulders. Why should I care? It was her choice, not mine. A moment I lingered at the port rail, staring out into the smother of the coming dusk; wondering how it would all end, before I climbed the ladder to the poop deck.

The negro was at the wheel, while Masters stood aft gazing astern. He was not aware of my presence until I spoke sharply.

"Mr. Masters."

"Aye, aye, sir."

"I have agreed to take command of the vessel for the remainder of the voyage," I said quietly, "and would have a word with the crew."

"The remainder of the voyage, sir?"

"Yes; the vessel has suffered no serious damage, and there are surely seamen on board to serve as watch officers."

"The bosun is a good man, sir."

"What is his name?"

"Leayord."

"Very well; have the men piped aft."

"All hands, sir?"

"Certainly, Mr. Masters. They have had rest enough, I imagine, the past few days. Now they are in for a spell of work."

I was not altogether pleased with the engineer's manner, a vague suspicion coming into my mind that he also rather preferred a return to Baltimore, and that the crew might desire the same decision. As I went forward to the rail I noticed that both Vera and Bascom had come up as far as the head of the companion, and now stood there in the shadow, where they could both see and hear. McCann, however, did not appear, and was probably asleep below, or still doctoring his discolored optic. I had just a moment to observe these things before the men began to appear aft the mainmast, and form in a straggly line across the deck. They were indeed a rough-looking lot, even for a freighter's crew, plainly showing the effects of prolonged debauches ashore, with several among them still manifestly under the influence of liquor. The re-establishment of sea discipline on board was evidently to be my first task, and my teeth clenched tightly as my eyes swept their faces.

"Come farther aft, men," I ordered sternly. "Bosun, bring them closer in, where they can hear what I say—ay! that's more like it."

I stared down into the upturned faces, noting, it seemed to me, characteristics of every race on earth, and realizing that here before me was grouped the scum of the seven seas.

"Men," I began, gripping the rail and speaking swiftly, "my name is Hollis, and I held command in the old Atlas line. The owner of this vessel and cargo—Mr. Philip Bascom—has just done me the honor of appointing me as captain for the remainder of the voyage."

The fellows remained silent, except for the restless shuffling of their feet on the deck.

"And what is the vige to be, mister?" suddenly asked a hoarse voice back in the group.

"The same one you signed on for, of course."

"Ter Hamburg?"

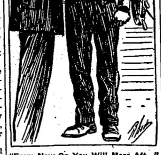
"That's where we lay her head."

"But ter perdition wid it; we've a wrecked ship, an' they tell us there's a war on."

"Who tells you that?"

"The guy that come aboard along with yer; he told the cook."

"Well, war or no war, this ship cleared before there was any declaration, and you fellows shipped with her for the voyage."



"From Now On You Will Mess Aft—"

"That's a d—— lie," sang out another voice shrilly. "The most of us wus signed on by crimps."

I straightened up, determined to end the matter then and there.

"We have had enough of this, lads," I said sternly, staring straight down into their faces. "I don't know who among you are doing all of this talking, but I'll answer you this: I am captain of the Indian Chief, and if any of you want to try out whether I can handle my crew or not, go to it. Bosun, come here."

The man named separated himself from the others, and slowly climbed the ladder. He was a big, muscular fellow, with red hair, clipped close to his head, and intelligent blue eyes.

"Your name is Leayord?"

"Aye, aye, sir."

"This is your first voyage on the Indian Chief?"

"No, sir; my third."

"Very good, Mr. Leayord; from now on you will mess aft, and rank as first mate, serving watch and watch with me. Is there a man forward capable of filling the second mate's berth?"

He ran his eyes over the group below rather doubtfully.

"Olson might, sir," he answered finally. "He is sober, and a good seaman."

"Step forward, Olson."

The mass of men parted slightly, and a man was pushed to the front. He possessed a strongly marked Swedish face, smooth shaven and almost boyish.

"How old are you, Olson?"

"Twenty-eight, sir."

"You know the sea?"

"Twelve years in the fo'castle, sir."

"All right; I'm going to give you a chance to make good as second officer, Mr. Olson. Now, lads, that's all for the present. I take it you are sailormen, and know what that sky means. The chances are ten to one we'll have a storm before midnight, and we'll meet it better with clear decks. Get forward, all hands, and clear away that riffle—lively now."

They were a bit slow about it, grumbling among themselves. Olson spoke once or twice, although I could not hear exactly what was said, and the power of sea discipline finally conquered. Within ten minutes they were working cheerfully enough, and Leayord had ceased his gruff ordering, and stood silent beside the lee rail. It pleased me to observe that Olson took hold along with the others, and did his full share of the work. I leaned farther over to gain view of the cabin entrance, but Bascom had disappeared. The girl, however, held her place, and glanced up, her eyes meeting mine.

"Could I come up there, Mr. Hollis?" she questioned.

"Certainly; as a passenger this deck is free for your use. Take the starboard ladder."

I gave her my hand, and helped her to grasp the rail. She glanced about into the mist.

"How gray and somber it is," she said soberly. "The fog is almost like a hand clutching at you."

McCann complicates the already serious situation by stirring up mutiny. Things begin to look bad for Hollis and Vera—as told in next installment.

(TO BE CONTINUED)

THE KITCHEN CABINET

Let me tonight look back across the span
'Twixt dawn and dark, and to my conscience say—
Because of some good act to beast or man—
The world is better that I lived today.

—Ella Wheeler Wilcox.

OCCASIONAL DISHES.

For the family which has toast daily and often have the slices trimmed and crumbs that are left from preparing sandwiches as well as crusts, the problem of wasting none needs careful thought. The crumbs should be well dried, ground through the meat chopper, then made into bread. Take four cupfuls of hot water, a half cupful of molasses, one yeast cake, two cupfuls of graham flour, and three cupfuls of bread crumbs, mix and add enough white flour to make a stiff dough, let rise, work down, place at once in tins, let rise again, and bake.

Four Quarts of Grapefruit Sherbet.—Sometimes when entertaining it may be convenient to use the following: Two and a half cupfuls of water, five cupfuls each of sugar and grape juice, three teaspoonfuls of gelatin, one and a fourth cupfuls of lemon juice. Soften the gelatin in an additional fourth of a cupful of water, boil the sugar and water 15 minutes, cool, add fruit juice and freeze as usual.

Chilli Con Carne.—Take two pods of fresh or dried chilli peppers, two pounds of round steak, one-fourth of a cupful of pork fat or drippings, one clove of garlic, a teaspoonful of salt, a cupful of dried beans, four tablespoonfuls of flour. Soak the beans over night and let simmer in fresh water until tender. Discard the seeds in the peppers or if the dried ones are used soak them until soft in warm water, then scrape the pulp into the water and discard the skin. Cut the steak in small pieces and cook in fat until well browned, add the flour to the fat in the pan and stir until well browned; add the chilli peppers and water and stir until boiling. Cut two gashes in a clove of garlic and add it with the other things to the meat. Cover and let simmer two hours, adding water as needed, add salt. Meanwhile the beans should have become tender, season with salt and pepper, and mix all together.

Deviled Ham.—Cut cold boiled or baked ham in uniform slices. Mix together two tablespoonfuls of flour, one tablespoonful of mustard, half a teaspoonful each of salt and paprika, then add Worcestershire sauce to stir to a paste. Spread a little of this on both sides of the ham and broil about two minutes on each side. Serve hot as a luncheon dish.

This is the truth as I hear it
The clouds are rolling away,
And Spirit will talk with spirit
In the swift-approaching day.
War from the world shall be driven
From evil shall come forth good,
And men shall make ready for heaven
Through living in brotherhood.

—E. W. Wilcox.

GOOD THINGS FOR THE TABLE.

Prepare strips of stale bread about an inch and a half wide and four inches long, spread with butter on both sides and set into the oven until delicately browned on both sides. When ready to use, spread with mayonnaise dressing, press chopped white of egg in a narrow row all around the pieces of bread, then a row of the yolk of egg, in the center place a tip of tender cooked asparagus and sprinkle with finely chopped parsley. Serve a single canape as one service.

Hamburg Roast en Surprise.—Remove all the skin from a pound and a half of round steak, put the meat through a food chopper; add one egg, beaten light, one tablespoonful of fine chopped parsley, a teaspoonful of onion juice, a teaspoonful of salt, one fourth of a teaspoonful of paprika, and a third of a cupful of soft bread crumbs. Mix and shape into a loaf longer than wide and set into a baking dish; take out some of the mixture in the center to leave an open space equally distant from each end; into this break two eggs, cover with the meat and sprinkle the top with crumbs mixed with melted butter. Bake a half hour, basting five or six times with pork or bacon fat. Parboil a pint of potato balls, cut with a French cutter, fifteen minutes and place them around the meat when it goes into the oven. Baste the potatoes as the meat is basted. Serve around the meat. Make a sauce after the meat is removed from the gravy in the pan, adding flour, catsup, worcestershire sauce, salt and pepper for seasoning. If water is needed to add to the gravy save the water the potato balls were cooked in as it is rich in mineral salts.

Rice With Raisins.—Drop a cupful of rice into a kettle of salted water and keep it at a fast boil so that the grains do not stick together. When tender, drain and add a cupful of seeded raisins and pack into a buttered mold. Steam for 10 minutes, turn out and serve with plenty of butter and scraped maple sugar.

Nellie Maxwell

NEW FOE TRADE ACT PUT INTO EFFECT

LAW GIVES GOVERNMENT ABSOLUTE CONTROL OVER ALL DEALINGS WITH ENEMY.

WILSON MAKES REGULATIONS

Measure Is Designed to Build Economic Wall About Germany, Forcing Her to Submit.

Washington, Oct. 16.—Regulations for the trading with the enemy act have been issued by President Wilson. They constitute the most far reaching control of every phase of intercourse between the United States, and the world.

They give legal force to every move of the United States in casting about Germany an economic barrier which will compel her into submission.

Not only the new regulations for cutting off trade between the United States and Germany, but they do the following:

Cut off trade with Germany's allies.

Cut off trade with those who do trade with either Germany or her allies.

Provide custodians for all enemy property in the United States.

Require special licenses for trade or intercourse with any enemy or ally of an enemy within the United States.

Authorize the Secretary of the Treasury to investigate and supervise all foreign exchange and prevent its working to the advantage of the enemy.

Empower the Secretary of the Treasury to stop the taking from or into the United States of any communication other than by mail, telegraph, cable or wireless.

Creates Censorship Board.

Officially creates a censorship board consisting of representatives of the Secretaries of War and the Navy, Postmaster General, War Trade board and committee on public information to censor mail, cable, radio and other means of communication.

Authorize the Federal Trade commission to keep secret all patents that may be developed for the interest of the United States and to provide for working in the United States under patents held by enemies or allies of the enemy.

Vest in the Postmaster General the authority to censor foreign language publications.

Charge the Secretary of State with control over the entry and egress from the United States of enemies or allies of the enemy.

Authorize the Secretary of Commerce to hear appeals of refusals of customs officers to grant clearance papers to vessels.

Charge the Attorney General with the enforcement of the criminal sections of the trading with the enemy act.

Empower the President to regulate imports as well as exports.

Of Importance to Every Citizen.

The new regulations will be of importance to every citizen of the United States. In an official statement accompanying the regulations this is said of the definitions:

"It is highly important that every citizen of the United States should promptly familiarize himself with these definitions for his own protection and for the loyal support of the government in its efforts to wage the war to a successful conclusion."

The Definitions.

These are the definitions:

Any person, of no matter what nationality, who resides in the territory of the German empire or the territory of any of its allies, or the territory occupied by any of their military forces is expressly made an "enemy" or an "ally of the enemy." Thus those American citizens who have remained in these territories are nevertheless the enemies for the purpose of these regulations.

Any person, no matter where residing or of what nationality, who is doing business within these territories is made an enemy or any ally of the enemies. This, of course, applies with special force to the border neutrals, and it is this definition that will give great force to the embargo.

German Concerns Enemies.

Any corporation created by Germany or its allies is an enemy or ally of the enemy, no matter where located.

Not only is it made unlawful to trade with persons and firms defined above, but it is unlawful to trade with:

"Any person who there is reasonable cause to believe is acting for, or on account of, or for the benefit of an enemy or any ally of the enemy, whoever and wherever they may be. It is pointed out in the President's order that in dealing with subjects of Germany who are residents of the United States it must be remembered that their nationality does not prevent ordinary commercial intercourse with them.

Law Provides Interment.

The test of their enmity in this law is whether or not they are trading with or for the benefit of the fatherland. It is pointed out that they may be interned under other provisions of law.

"Trading," is defined minutely as:

(a)—To pay, satisfy, compromise, or give security for the payment or satisfaction of any debt or obligation.

(b)—To draw, accept, pay, present for acceptance or payment, or indorse any negotiable instrument or chose in action.

(c)—To enter into or carry on, complete or perform any contract, agreement or obligation.

(d)—To buy, sell, loan or extend credit, trade in, deal with, exchange, transmit, transfer, assign or otherwise dispose of or receive any form of property.

(e)—To have any form of business or commercial communication or intercourse with.

Creates War Trade Board.

To enforce and administer all of these provisions the President creates the War Trade board. This board for good and sufficient reasons may license the trading prohibited generally. It thus will have absolute control of practically every phase of world trading which Germany or her agents enter or may try to enter.

One of the far-reaching effects of this power will be to enable the United States legally to cut off from South America and other neutral countries supplies for German corporations and induce neutral trade to cease doing business with German agents if the same trade expects to do business with the United States.

Same As Exports Board.

The trade board is the same in personnel as the exports administrative board heretofore operating. Vance McCormick is chairman, and represents the Secretary of State. The Secretary of the Treasury has not appointed his representative. Dr. Alonso E. Taylor represents the Department of Agriculture; Thomas D. Jones represents the Secretary of Commerce; Beaver White the food administration and Frank C. Munson the Shipping board.

Has Power to License.

This board also will have the power to permit enemy companies to do business in the United States on license and to permit persons and firms who have been of enemy nature to change their names.

The Secretary of the Treasury, however, will have charge of the licensing of enemy insurance companies, as heretofore.

The Secretary of the Treasury is also charged with the control of foreign commerce in money, securities and bullion. He is empowered to require statements under oath and the production of books by all persons engaging in such traffic.

Treasury to Lead Spy Hunts.

The power given the Secretary of the Treasury to control communications, except those by mail and wire, is taken to indicate that the treasury secret service will from now on have a dominant part in the spy hunts.

The language in which this power is conferred by the President gives Mr. McAdoo's department control over (—).

"The taking out or bringing in to the United States any letter writing or tangible form of communication except in the regular course of the mail; and of sending, taking or transmitting or attempting to send, take or transmit out of the United States any letter or other writing, book, map, plan or other paper, picture or any telegram, cablegram or wireless message or other form of communication intended for or to be delivered directly or indirectly to an enemy or ally of an enemy. The Censorship board on the other hand has jurisdiction over communications, passing of the communication from time to time specified by the President. This board for the first time has the right to censor all outgoing mails and to search departing ships for such communications.

It is not necessary for German subjects and subjects of Germany's allies to apply for licenses to do business within the United States. This provision applies only to the branches of firms and the agents of persons who are in Germany or her allied countries.

"LIBERTY OXYGEN" A SUCCESS

Airmen Can Do Terrific Execution From Great Height.

Washington, Oct. 16.—Aircraft flying the Stars and Stripes may bombard Berlin from a height of six miles through the latest invention of American scientific genius. At this height German defending planes and guns would be useless.

This unheard of height can easily be attained by the "Liberty motor," according to all experts. The only difficulty has been that in such a rarified atmosphere the aviators themselves could do nothing; the terrific demands on their lungs are too great to permit other action. Airplanes have attained heights of 25,000 feet but the difficulty of breathing all but made the aviators powerless.

Now American science steps in with the twin of the Liberty motor. "Liberty oxygen" is its name and it is a respiratory device which automatically supplies to the flier the oxygen which is lacking in the natural air at high altitudes.

BLAST ROCKS PHILDELPHIA

Powder Plant Explodes at Gibbstown, N. J.—Two Lose Lives.

Philadelphia, Oct. 16.—An explosion in the nitro starch dry house at Dupont Powder Works at Gibbstown, N. J., resulted in the death of two workmen. A third man is missing and another seriously injured. The destroyed building was a small structure, isolated from the rest of the plant, and the force consisted of the four men mentioned. There was no other damage. The company say there is nothing suspicious about the explosion. Because of its terrific force alarming reports were circulated. Almost everybody in Philadelphia, 20 miles distant, felt it, and skyscrapers were rocked.

DARES COSSACKS TO KILL HIM

Kerensky Plays Fearlessly With Death at Moscow Conference.

Stockholm (By Mail).—Premier Kerensky played fearlessly with death at the Moscow democratic conference and won by his sheer, unflinching nerve.

He stood on a platform, unarmed facing three drunken Cossack officers, red with anger and twice flung the taunt "cowards" in their faces, while the vast audience, breathless, fearfully waited for their revolver shots to stretch Russia's man of the hour bleeding on the platform.

That they did not fire meant he had passed the supreme test of courage and nerve.

Must Pay Wages in Cash.

Washington, Oct. 16.—A Louisiana statute to compel corporations to pay their employes' wages in cash, has been held valid by the supreme court.

American Ship Sunk; 9 Missing.

New York, Oct. 16.—The American steamship Lewis Luckenbach has been sunk by a German submarine off the coast of France, according to a cable received here by the firm of George Luckenbach, incorporated, owners. cable stated that nine men of the crew of 56 are missing. The other 47 men escaped in the boats, presumably having reached Havre, the port to which the ship was bound. The Lewis Luckenbach was of 3,906 tons.

Russia May Sell Peninsula.

Petrograd, Oct. 16. — The Russkia Volia says that a strange rumor is being circulated that the Russian government intends to sell the peninsula of Kamtchatka, on the northeastern coast of Siberia, to Americans. The report said that Americans were offering several billions of rubles for the territory. The project is prompted by the financial difficulties of the treasury and the desire of the government not to increase the national debt.

SHELTERED WITHIN A RUINED BUILDING, FRENCH MOW DOWN GERMANS WITH MACHINE GUN FIRE

Sheltered by all that remains of the wall of this ruined building, a detachment of French soldiers is mowing down the Germans with machine gun fire "somewhere in France." A sharpshooter is adding his bit to the destructive fire of the machine guns by picking off boches from over the edge of the wall.

LIBERTY DAY OCT. 24

Date Set Aside for Loyalty Expressions.

President's Proclamation Contains Inspiring Appeal for Oversubscription of Second American Liberty Loan.

Washington, Oct. 16.—In a proclamation designating Oct. 24 as Liberty day, on which patriotic meetings shall be held and the savings of the people poured forth for their support of their country, President Wilson uttered an inspiring appeal for the tremendous oversubscription of the second Liberty Loan.

The proclamation is as follows:

"By the President of the United States of America, a proclamation:

"The Second Liberty Loan gives the people of the United States another opportunity to lend their funds to their government to sustain their country at war. The might of the United States is being mobilized and organized to strike a mortal blow at autocracy in defense of outraged American rights and of the cause of liberty.

"Billions of dollars are required to arm, feed and clothe the brave men who are going forth to fight our country's battles and to assist the nations with whom we are making common cause against a common foe. To subscribe to the Liberty Loan is to perform a service of patriotism.

"Now, therefore, I, Woodrow Wilson, President of the United States of America, do appoint Wednesday, the twenty-fourth of October, as Liberty Day, and urge and advise the people to assemble in their respective communities and pledge to one another and to the government that represents them the fullest measure of financial support.

"On the afternoon of that day I request that patriotic meetings be held in every city, town and hamlet throughout the land, under the general direction of the Secretary of the Treasury and the immediate direction of the Liberty Loan committees which have been organized by the Federal reserve banks.

"The people responded nobly to the call of the first Liberty Loan with an oversubscription of more than 50 per cent. Let the response to the second loan be even greater and let the amount be so large that it will serve as an assurance of unequaled support to hearten the men who are to face the fire of battle for us.

"Let the result be so impressive and emphatic that it will echo throughout the empire of our enemy as an index of what America intends to do to bring this war to a victorious conclusion.

"For the purpose of participating in Liberty Day celebrations all employes of the Federal government throughout the country whose services can be spared, may be excused at 12 o'clock Wednesday, the 24th of October.

"In witness whereof, I have hereunto set my hand and caused the seal of the United States to be affixed.

"(Signed) WOODROW WILSON."

"Pacifist" Leader Gets 20 Years.

Davenport, Ia., Oct. 13.—Daniel H. Wallace, Chicago organizer of the League of Humanity, a so-called pacifist organization, was sentenced to 20 years in federal prison by Federal Judge Martin Wade here. Wallace immediately gave notice of appeal, under $25,000 bonds. Wallace was found guilty of violation of the espionage law.

Gopher Troops Ready for France.

Camp Mills, Ill., Oct. 16. — Minnesota's contingent in the "Rainbow division" is ready for the front. A visit to the Minnesota streets today showed that the men are fit and that their morale is high. All who were interviewed said they are eager to start for the trenches. The increase in mail being sent back home in the last day or two indicates that they anticipate an early departure. The whole division of 27,000 men can, if necessary, be moved from Camp Mills in five hours after the order comes.

GERMANY CALLS OUT OLDER MEN

All Within Age Limit of Forty-seven Years Are Called to Colors.

UNFITS ALSO CALLED

Activity in Flanders Confined to Heavy Artillery Action—Teutons Take Capital of Russian Island.

Copenhagen, Oct. 17.—Military service in Germany has been extended to include men 47 years of age, and a call has been issued to those who have heretofore escaped service on account of military unfitness.

The army already included a large number above the legal limit of 45 years, on the ground that although nobody above that age could be mobilized, yet no requirement existed for the discharge of a soldier reaching that age.

The new regulation calls to the colors all exempts born after September 8, 1870.

Teutons Seize Arenburg.

London, Oct. 16.—German forces which landed on the island of Oesel at the head of the Gulf of Riga have captured Arenburg, capital of the island and are still pursuing the Russians at various places. Aiding the operations as far as possible are German cruisers and torpedo boats, which have shelled coast batteries and towns. Attempts by the German fleet to enter the Gulf of Riga or to operate in the waters between Oesel and Dago islands, however, are meeting with resistance from Russian land batteries and naval units. In the latter region the Germans retired in the face of Russian warships.

British Raids Successful.

In Flanders no military operations on a large scale have been attempted, but the big guns are carrying out reciprocal bombardments of great violence like those which precede the starting of an infantry offensive. British troops have carried out successful raids, in which several casualties were inflicted on the Germans and prisoners and machine guns were taken.

After the lapse of two days heavy artillery duels have been resumed between the French and the Germans on the Verdun front. On the Aisne front there is also considerable artillery activity.

Italians Plan for Offensive.

Preparations apparently are being made along the Julian front of the Austro-Italian theater for another big battle. In the Brestovizza valley a strong attack by the Austrians was broken up by the Italian machine gun fire, as likewise were attempted offensives from the west of Flondar to the head of the Adriatic sea.

STATE OF IOWA VOTES DRY

Constitutional Amendment Carries by Big Majority.

Des Moines, Iowa, Oct. 16.—With an estimated majority of 30,000 to 35,000, Iowa voters have decided to prohibit the manufacture and sale of liquor in this state by constitutional amendment. The state has been dry by statutory provision for two years. The amendment becomes effective immediately.

Watch New Tobacco Fields.

Athens, Oct. 16.—The large American tobacco concerns are keeping their representatives over here, watching the development of new tobacco fields in Macedonia. These have come suddenly into importance because of some quality of the soil of Macedonia, like that of Cuba, favorable to the production of tobacco. It blends with other grades. The American demand for it has become such that there is now more Macedonian tobacco sent to the United States than any other article shipped from Greece.

ESTIMATE IS REDUCED

Little Wheat For Allies Unless U. S. Curtails Consumption.

Only One-Ninth of 1917 Crop Can Be Spared for Allies, According to Figures.

Washington, Oct. 16.—Unless Americans heed the call of the food administration and curtail consumption of this year's wheat crop, only 77,696,000 bushels, or 11.8 per cent, will be left for export to the Allies and neutrals after the requirements of the United States are filled.

Experts of the bureau of crop estimates in calculating this year's theoretical wheat surplus have placed the consumption at 10 per cent less than the normal of 5.3 bushels as this year's conditions resemble those of 1916, when the apparent per capita consumption was about 4.75 bushels.

For the estimated population of the country—103,635,000 people—the requirement on that basis is 494,830,000 bushels.

Seed requirements they estimate at 87,271,000 bushels.

This year's wheat crop, from the preliminary estimates, is 659,707,000 bushels and the total requirements of the United States are placed at 582,101,000 bushels, leaving 77,606,000 bushels surplus.

WHITE SOX WORLD CHAMPS

Chicago Defeats New York in Sixth Game of Series.

Polo Grounds, New York, Oct. 16.—The Chicago White Sox won the world's championship in baseball here Monday, defeating the Giants for the fourth time.

The batteries were: New York, Benton, Perritt and Rariden; Chicago, Faber and Schalk.

Benton and Faber hurled tight ball on even terms until Benton's support wobbled in the fourth. Herzog's triple gave the Giants two runs in the fifth.

The weather was the best that had been produced for any game of the series. A warm sun was shining, so warm that overcoats were doffed and the crowd could look on in comfort.

It appeared the crowd would be smaller than that which witnessed the fourth game here and which was but slightly more than 27,000. The playing field was in excellent condition.

Innings—	1	2	3	4	5	6	7	8	9	R.	H.	E.

TEUTONS LAND IN RUSSIA

Report Says Gunners Are Now on Mainland.

Amsterdam, Oct. 16.—Unconfirmed dispatches from Swedish sources say that the important town of Hapsal, on the Esthonian mainland, terminus of the direct rail to Reval and Petrograd, has fallen to the German naval forces that captured the two islands dominating the Gulf of Riga. Hapsal lies 275 miles south of Petrograd, but with its occupation German control of the Riga Bay would be complete and the menace to the Gulf of Finland extreme.

Ship Strikes Rock; Ten Lives Lost.

London, Oct. 16—Ten lives, including that of the captain, were lost in the sinking of the French steamer, Hirondelle, by striking a rock in the English channel. First news of the vessel's destruction was brought by seven survivors, who landed in a small boat.

McGarrity Denounces England.

Philadelphia, Oct. 15.—Expressions of loyalty to the United States were coupled with denunciations of England as "the greatest suppressor of liberty and small nations in the world," in a statement issued by Joseph McGarrity, president of the Irish Volunteers of America. McGarrity declared that "if it is a crime to sympathize with Germany as against England," he would "plead guilty of the crime and glory in the fact." McGarrity was out of the city when the exposure was published, and has just returned.

WAS ALL RUN DOWN
Faulty Kidneys Caused Acute Suffering. Completely Recovered Since Using Doan's.

Mrs. Harry A. Lyon, 5 St. William St., S. Boston, Mass., says: "*Doan's Kidney Pills* have surely done me wonderful good. About two months prior to the birth of my baby, I had two convulsions and was taken to a hospital. Doctors said the convulsions were due to my kidneys not working properly.

"I had swelling of the feet and ankles so that I had to wear large-sized slippers. My back ached intensely, I was nervous and unable to sleep. I also suffered from awful headaches and felt weak, tired, languid, and run down.

MRS. LYON.

"After I came home a friend suggested that I try *Doan's Kidney Pills*, and I got some. I soon noticed improvement; my back became stronger and I felt better in every way. I kept on taking *Doan's* and was cured. They are surely reliable."

Mrs. Lyon gave the above statement in May, 1915, and on March 12, 1917, she said:

"My cure has lasted. I take *Doan's* occasionally, however, as a strengthener for my kidneys."

USES TOMATOES AS WEAPONS

Woman Vendor Also Effectively Bombards Kimonoed Customer With the Scale Weights.

The high cost of things generally—including tomatoes—was directly responsible for the loudest case heard in the Yorkville court, a case reflecting the difference in shopping tactics to be observed in various segments of a large city, says the New York Herald.

Mrs. Anna Saconne was present in a cerise kimono and bandages to complain of the commercial tactics of Mrs. Concetta Fasano, a traveling saleswoman for tomatoes. According to the evidence, Mrs. Saconne was complaining of the price and condition of the tomatoes sold by Mrs. Fasano, when she suddenly received a one-pound weight in the direct center of the forehead, and was subsequently bombarded with other weights ranging from a quarter of a pound to three pounds, after which a deluge of tomatoes wrecked another azure blue kimono which Mrs. Saconne wears when tomato shopping.

"Why this?" asked the magistrate of Mrs. Fasano.

"She buy notheeng and talka too mooch," explained Mrs. Fasano. "If she joost buya somethceng an' walk away, all right, shut up, but she no buys somethceng and says everytheeng ees no good. I slappa da face; she talks. I trow da weight; she talks. I trow da fruit; she talks. She talk, she talk, she talk. She no buy soomtheeng; she talk, she talk, she talk. How mooch?"

"Five dollars," answered the magistrate, and the fine was paid.

Unfair Question.

"I'll never ask Jibway to lend me another cent!"

"Did he hurt your feelings?"

"I should say so! I asked him to lend me a dollar until Monday and he asked me, 'What Monday?'"

Character.

"Is she a good nurse?"

"She must be; she's awfully homely."—The Lamb.

Some men can be eternally on the job and still not accomplish much.

A War Sea Story Abounding in Adventure and High Romance

Copyright A. C. McClurg & Co.

HOLLIS CONSENTS TO TAKE CHARGE OF SHIP AND CONTINUE VOYAGE—BASCOM AND M'CANN ARE DEADLY ENEMIES—DISSATISFACTION DEVELOPS.

Synopsis—Robert Hollis, who tells the story, is a guest on Girard Carrington's yacht, Esmeralda. It is supposed to be a "stag" party, and Hollis is surprised on discovering a woman, who evidently wishes to remain unknown aboard. She merely tells him her name is Vera. Carrington tells his guests of the coming war, and that he is engineering a copper pool. The yacht is sunk in a collision and Hollis saves McCann, millionaire, and one of the party. Hollis and McCann rescue Vera and leave the ship in a small boat. McCann refuses to submit to the authority of Hollis, and the latter enforces obedience. The castaways are sighted by a ship, the Indian Chief, which takes them aboard. The vessel is badly storm damaged. All officers are dead. Bascom, the owner, says he is taking a cargo of ammunition to Germany.

CHAPTER X.

—7—

We Accept Adventure.

As I emerged from behind the butt of the mizzenmast, the only person visible was a long-legged cabin boy industriously rubbing away at a grease spot on the deck. He was not aware of my presence until I spoke, when he gazed up at me across his shoulder, with seeming little intelligence in his dull eyes.

"Do you know which of these staterooms the lady was given?"

"Oh, yes, sir; over there; I just took her in a needle an' some thread."

"All right—what is your name?"

"Joe—Joe Moon, sir."

I crossed over and rapped at the stateroom door, which had a figure "5" stenciled on the upper panel.

"Who is there?" she asked.

"This is Hollis; could you spare me a few moments?"

"Certainly; I will come out directly," she laughed, "I have been doing some emergency mending."

I picked out a chair and sat down. A moment later the door of No. 5 opened, and the girl greeted me pleasantly, crossing the cabin swiftly, and extending her hand, as I arose to my feet.

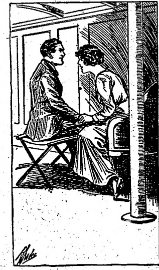
"I feel actually born anew, Mr. Hollis," she exclaimed. "I am almost afraid I was losing my nerve in that little boat. Where is this steamer bound?"

"That is what I called upon you to discuss. Sit down here, and I will give you the whole story. The captain and both mates are dead; the fellow on deck in charge when we came on board was the chief engineer. The owner of boat and cargo, however, is here; I have just been talking with him in the cabin yonder. He is in poor health and crippled in one limb."

"What is his name?"

"Foolishly I forgot to ask, and Masters—that is the name of the engineer—neglected to mention it when he introduced us. However, that makes no difference in the facts. I'll tell you the story, as briefly as I can."

She listened intently, leaning forward in her chair, her ringless hands clasped, her eyes on my face. The simple story seemed to thrill her, breathing as it did the mystery and romance of the sea.



Her Eyes Were Shining, and Her Hand Reached Forth, Unconsciously, and Rested in Mine.

"And that, Miss Vera," I said at last, "is the present situation. It is for you to furnish the final solution."

"For me! You tell me all this merely to leave the decision with me?"

"Yes; I shall do nothing against your expressed wish."

"Why—but what would you do, if you were here alone?"

"That would be entirely different. I have no family, no near relatives living; not even any special friends to mourn greatly over my demise. I might willingly risk my life in such an adventure, and think little of it. I know the sea and its perils, and such a game as this is likely to have its attractions."

"You—you consider the attempt very dangerous?"

"Of capture, and possible imprisonment—yes. Probably our lives will not be in any special peril. We have no arms with which to resist. If once overhauled, a prize crew would be put on board, and we would be taken to the nearest British or French port, as prisoners of war. Our cargo, destined for the German government, would be amply sufficient to condemn us. Under the circumstances, our own country would make no effort to protect us. I should not mind, but I cannot expose you to hardship and possible imprisonment."

Her eyes were shining, and her hand reached forth, unconsciously, and rested on mine.

"How long would it require?"

"Weeks, probably; I should choose the more northern route, around Scotland, and then skirt the Norway coast through the North sea."

"To place me on some other vessel at sea would spoil your plan, Mr. Hollis?"

"It would render our chances of success much less. The only possibility would be the meeting of some American ship, homeward bound, whose captain would promise to make no report. Such a one might be hard to find, especially if he suspected we were endeavoring to carry munitions of war to Germany."

"Do you believe the Germans are right in this war—that you ought to aid them?"

"I cannot answer that," I answered honestly enough, "for I do not fully understand the conditions. To be perfectly frank, however, my sympathies are with England and France. In this case I am not considering either side, but the poor devil who owns this ship and cargo. What we carry on board here will not be a drop in the bucket, but its loss will spell ruin to him, and that is the thought which influences me."

"And I could not even dispatch a message—wireless?"

"The Indian Chief has no equipment, No, Miss Vera, we shall be absolutely lost to the world until we are either captured, or safe in some German port. I would not deceive you—the project is both a desperate and a dangerous one."

The girl remained silent, her eyes lowered to the deck. I had said all possible, determined as I was not to influence her decision. As she did not speak, or change her attitude, I arose and walked across the cabin to where I could look out forward.

"Mr. Hollis."

"Yes." I turned.

"I must decide this? You mean to leave it all to me?"

"There is no other way."

"But I do not know what to say. I thought at first I could answer yes, gladly. I am not afraid, not the least bit afraid; and if I could only get some word back to my people in New York that I am safe, I would almost welcome the adventure. I am only a girl, you know, and I—I like such things. But they will worry horribly, for they have no knowledge of where I am. No one knows. I—I have simply disappeared, and papa will have defectives hunting for me, and will have to tell mother. They will imagine all sorts of horrid things. And you say it may be weeks, or even months, before I could get a message to America?"

"I am afraid so, Miss Vera; I wished you to understand the exact truth."

"Oh! I do not think that would be right—do you?"

"I thought you might feel that way, and so made no pledge before telling you the story. Of course, I knew nothing of how you were situated; or under what circumstances you had left home."

"I stole away unknown to anyone; it was just a lark, a foolish joke. No one knows where I am. If I could only send them word!"

I touched the bent head gently with my hand.

"Do not worry," I said kindly. "We will give the scheme up entirely, and head toward the nearest American port. Perhaps luck may favor us, and if we meet an American ship, we can transship you and then take a chance, knowing that you are safely homeward bound."

"But I understood you to say that that would only increase your peril."

"It might, and it might not. At least I will not consent to have you implicated in the affair any further than you are now. I will not sacrifice you to help our friend yonder save his fortune. I'll give him my answer now."

I took a step aft, but paused suddenly, for the door of the owner's cabin opened, and he came limping forth, resting heavily on a cane, his white face clearly revealed in the glare of the skylight. I stepped back beside the girl, who, aroused by my sudden movement, glanced up and saw him. Almost instantly she was upon her feet, hesitated an instant as though perplexed at the man's appearance; then advanced and met him.

"Mr. Bascom," she exclaimed, "can this indeed be you?"

"You speak my name, certainly," he replied, but gazing into her face seemingly without recognition. "Yet I do not recall—"

"Oh, yes, you do; surely you must," she interrupted. "Why, you have changed more than I. Do you not remember the moonlight nights at Palm Beach? The fishing parties along the coast?"

"Vera!" he cried, a note of delight in his voice. "Of course I remember; but you have become a woman, the very last person in the world I expected to see. And so you are the lady we were fortunate enough to rescue. Mr. Hollis never even mentioned your name."

"There was no reason why I should," I said, "having no thought of your previous acquaintance. The young lady and I have just been discussing the situation—"

"Wait just a moment, Mr. Hollis," she interrupted, her eyes still on Bascom's face. "This discovery changes everything. Mr. Bascom is an old friend."

"So I judge; but I do not intend to let that influence your decision."

"But it will, and does!" a certain impetuous appeal in her voice. "I did not understand before, as I do now. You are the owner, Mr. Bascom? This is your boat and cargo?"

"Yes, Vera; things have not gone well with me of late, and my entire fortune is here," he answered rather bitterly.

"I am sorry; I had not heard. You have been terribly ill, from your looks, and are lame. It—it was that affair in New York, from which you never recovered?"

"I was in the hospital for months, and scarcely hoped to live. That was when my business went to smash."

"Father never told me; and your mother?"

"Is living in Philadelphia, but in rather straitened circumstances, and ill; my younger brother has been compelled to leave school and seek employment." He smiled weakly. "I had hoped this voyage would set us all on our feet again."

She released her hand from his grasp, and sank down once more into the chair, her glance leaving his face, and seeking mine.

"Mr. Hollis," she said, almost defiantly. "It is my wish that the Indian Chief continue its voyage."

"But I cannot consent—"

"You left this decision to me. Well, I make that decision. My comfort, even the momentary fear which my family may feel over my strange disappearance, could never justify my refusal. I know this gentleman, and have met his mother; we were good friends. He shall not be ruined through any whim of a girl. I urge you to go ahead, not considering me in the least."

"I cannot quite understand so sudden a change."

"Perhaps you do not understand women," she said, and smiled. "Surely you recall who Mr. Bascom is?"

"Not in the remotest degree."

"But we spoke of him in the boat—Philip Bascom."

My eyes widened, and I caught my breath.

"Good heavens! yes; now I recall the affair. He is the man Fergus McCann shot in the hotel restaurant. That was the accident he speaks of. Why, this is strange enough to be fiction."

Bascom stood, leaning on his cane, looking at us, as though failing to comprehend what it was we were talking about. Possibly he did not catch our words clearly, for his white face appeared puzzled.

"You speak of me?" he asked, "of my difficulty with McCann?"

She looked up at him earnestly.

"Yes; it is very strange. You should know the truth. There were three of us who escaped together when the yacht sank; Mr. Hollis, myself and—Fergus McCann."

Bascom straightened, his lips pressed tight.

"He is here now; a guest on board my ship?"

"Yes; I do not know where—sleeping in one of the staterooms, probably. I have not seen him since I came over the side."

Bascom's expression was one of struggle, as he stared into our faces. It was difficult for him to find words; to even control his mind.

"This—this is a misfortune," he said finally. "I do not know how it will end. I have sought to avoid the man. Miss Vera, do you know the truth of that affair? not the newspaper story, but the facts?"

She shook her head.

"I only heard that the trouble occurred over Myra Bradley. McCann found you together, and shot you in a fit of jealous rage."

"So far the story was true; but I was not at the restaurant with Miss Bradley. I had never, but once before, even spoken to her. She called me to her table that evening, where she was dining alone, to question me regarding some mutual friends in Philadelphia. Our brief conversation was most commonplace. McCann shot me without warning; I did not even know he was near until the woman screamed."

"But," I said, as he paused, "was there no trial? That was not the newspaper story."

"I know it," bitterly, "and I have only my word to give you. I could not defend myself, and no one else made any effort to do so. McCann had money and influence; I was lying unconscious in a hospital. The girl was shipped off to Europe; a waiter swore that I drew a revolver, which he afterwards picked up on the floor; the police exonerated McCann on the ground of self-defense, and the case never came to trial."

I held out my hand.

"Having had some experience lately with McCann," I said heartily, "I am perfectly ready to accept your version. His being on board is awkward and unpleasant, but we must put up with it as best we can. Is this your thought, Mr. Bascom?"

He did not answer at once; not until she looked up questioningly.

"There is nothing else possible," he said at last, but as though the admission hurt. "My nature is not revengeful, although I certainly have no feeling of kindness toward this man. However, this is my ship, and he is my guest; as long as he remains on board, I shall treat him as I would any other under like circumstances."

"I knew you would say that," the girl exclaimed. "Now everything is all right, Mr. Hollis?"

"As nearly so as we can make it," I answered, assuming an ease I was far from feeling. "Your decision is that we continue the voyage—to Germany?"

"To wherever Mr. Bascom desires to go."

"Very well. And you appoint me captain, delegating to me full authority?"

"I do, with pleasure."

I held out my hand, surprised to note the strong grip of the slender, white fingers responding to my clasp.

"The matter is settled then, let the result prove what it may. It is already growing dusk; I will go on deck and assume command."

CHAPTER XI.

—

I Select My Officers.

The die was cast. However the strange adventure might eventually end, whatever peril lurked ahead of us, it was now too late for regret. The full responsibility I had assumed almost overwhelmed me as I first emerged upon deck, but there came to me also a spirit of recklessness, which brought a laugh to my lips and a shrug to my shoulders. Why should I care? It was her choice, not mine. A moment I lingered at the port rail, staring out into the smother of the coming dusk, wondering how it would all end, before I climbed the ladder to the poop deck.

The negro was at the wheel, while Masters stood aft gazing astern. He was not aware of my presence until I spoke sharply.

"Mr. Masters."

"Aye, aye, sir."

"I have agreed to take command of the vessel for the remainder of the voyage," I said quietly, "and would have a word with the crew."

"The remainder of the voyage, sir?"

"Yes; the vessel has suffered no serious damage, and there are surely seamen on board to serve as watch officers."

"The bosun is a good man, sir."

"What is his name?"

"Leayord."

"Very well; have the men piped aft."

"All hands, sir?"

"Certainly, Mr. Masters. They have had rest enough, I imagine, the past few days. Now they are in for a spell of work."

I was not altogether pleased with the engineer's manner, a vague suspicion coming into my mind that he also rather preferred a return to Baltimore, and that the crew might desire the same decision. As I went forward to the rail I noticed that both Vera and Bascom had come up as far as the head of the companion, and now stood there in the shadow, where they could both see and hear. McCann, however, did not appear, and was probably asleep below, or still doctoring his discolored optic. I had just a moment to observe these things before the men began to appear aft the mainmast, and form in a straggly line across the deck. They were indeed a rough-looking lot, even for a freighter's crew, plainly showing the effects of prolonged debauches ashore, with several among them still manifestly under the influence of liquor. The re-establishment of sea discipline on board was evidently to be my first task, and my teeth clenched tightly as my eyes swept their faces.

"Come farther aft, men," I ordered sternly. "Bosun, bring them closer in, where they can hear what I say—ay! that's more like it."

I stared down into the upturned faces, noting, it seemed to me, characteristics of every race on earth, and realizing that here before me was grouped the scum of the seven seas.

"Men," I began, gripping the rail and speaking swiftly, "my name is Hollis, and I held command in the old Atlas line. The owner of this vessel and cargo—Mr. Philip Bascom—has just done me the honor of appointing me as captain for the remainder of the voyage."

The fellows remained silent, except for the restless shuffling of their feet on the deck.

"And what is the vige to be, mister?" suddenly asked a hoarse voice back in the group.

"The same one you signed on for, of course."

"Ter Hamburg?"

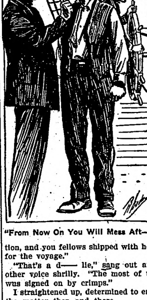
"That's where we lay her head."

"But ter perdition wid it; we've a wrecked ship, an' they tell us there's a war on."

"Who tells you that?"

"The guy that come aboard along with yer; he told the cook."

"Well, war or no war, this ship cleared before there was any declaration, and you fellows shipped with her for the voyage."



"From Now On You Will Mess Aft—"

"That's a d—— lie," sang out another voice shrilly. "The most of us wus signed on by crimps."

I straightened up, determined to end the matter then and there.

"We have had enough of this, lads," I said sternly, staring straight down into their faces. "I don't know who among you are doing all of this talking, but I'll answer you this: I am captain of the Indian Chief, and if any of you want to try out whether I can handle my crew or not, go to it. Bosun, come here."

The man named separated himself from the others, and slowly climbed the ladder. He was a big, muscular fellow, with red hair, clipped close to his head, and intelligent blue eyes.

"Your name is Leayord?"

"Aye, aye, sir."

"This is your first voyage on the Indian Chief?"

"No, sir; my third."

"Very good, Mr. Leayord; from now on you will mess aft, and rank as first mate, serving watch and watch with me. Is there a man forward capable of filling the second mate's berth?"

He ran his eyes over the group below rather doubtfully.

"Olson might, sir," he answered finally. "He is sober, and a good seaman."

"Step forward, Olson."

The mass of men parted slightly, and a man was pushed to the front. He possessed a strongly marked Swedish face, smooth shaven and almost boyish.

"How old are you, Olson?"

"Twenty-eight, sir."

"You know the sea?"

"Twelve years in the fo'castle, sir."

"All right; I'm going to give you a chance to make good as second officer, Mr. Olson. Now, lads, that's all for the present. I take it you are sailormen, and know what that sky means. The chances are ten to one we'll have a storm before midnight, and we'll meet it better with clear decks. Get forward, all hands, and clear away that riffle—lively now."

They were a bit slow about it, grumbling among themselves. Olson spoke once or twice, although I could not hear exactly what was said, and the power of sea discipline finally conquered. Within ten minutes they were working cheerfully enough, and Leayord had ceased his gruff ordering, and stood silent beside the lee rail. It pleased me to observe that Olson took hold along with the others, and did his full share of the work. I leaned farther over to gain view of the cabin entrance, but Bascom had disappeared. The girl, however, held her place, and glanced up, her eyes meeting mine.

"Could I come up there, Mr. Hollis?" she questioned.

"Certainly; as a passenger this deck is free for your use. Take the starboard ladder."

I gave her my hand, and helped her to grasp the rail. She glanced about into the mist.

"How gray and somber it is," she said soberly. "The fog is almost like a hand clutching at you."

McCann complicates the already serious situation by stirring up mutiny. Things begin to look bad for Hollis and Vera—as told in next installment.

(TO BE CONTINUED.)

THE KITCHEN CABINET

Let me tonight look back across the span
'Twixt dawn and dark, and to my conscience say—
Because of some good act to beast or man—
"The world is better that I lived today."
—Ella Wheeler Wilcox.

OCCASIONAL DISHES.

For the family which has toast daily and often have the slices trimmed and crumbs that are left from preparing sandwiches as well as crusts, the problem of wasting none needs careful thought. The crumbs should be well dried, ground through the meat chopper, then made into bread. Take four cupfuls of hot water, a half cupful of molasses, one yeast cake, two cupfuls of graham flour, and three cupfuls of bread crumbs, mix and add enough white flour to make a stiff dough, let rise, work down, place at once in tins, let rise again, and bake.

Four Quarts of Grapefruit Sherbet.—Sometimes when entertaining it may be convenient to use the following: Two and a half cupfuls of water, five cupfuls each of sugar and grape juice, three teaspoonfuls of gelatin, one and a fourth cupfuls of lemon juice. Soften the gelatin in an additional fourth of a cupful of water, boil the sugar and water 15 minutes, cool, add fruit juice and freeze as usual.

Chilli Con Carne.—Take two pods of fresh or dried chilli peppers, two pounds of round steak, one-fourth of a cupful of pork fat or drippings, one clove of garlic, a teaspoonful of salt, a cupful of dried beans, four tablespoonfuls of flour. Soak the beans over night and let simmer in fresh water until tender. Discard the seeds in the peppers or if the dried ones are used soak them until soft in warm water, then scrape the pulp into the water and discard the skin. Cut the steak in small pieces and cook in fat until well browned, add the flour to the fat in the pan and stir until well browned; add the chilli peppers and water and stir until boiling. Cut two gashes in a clove of garlic and add it with the other things to the meat. Cover and let simmer two hours, adding water as needed, add salt. Meanwhile the beans should have become tender, season with salt and pepper, and mix all together.

Deviled Ham.—Cut cold boiled or baked ham in uniform slices. Mix together two tablespoonfuls of flour, one tablespoonful of mustard, half a teaspoonful each of salt and paprika, then add Worcestershire sauce to stir to a paste. Spread a little of this on both sides of the ham and broil about two minutes on each side. Serve hot as a luncheon dish.

This is the truth as I hear it
The clouds are rolling away,
And Spirit will talk with spirit
In the swift-approaching day.
War from the world shall be driven
From evil shall come forth good,
And men shall make ready for heaven
Through living in brotherhood.
—E. W. Wilcox.

GOOD THINGS FOR THE TABLE.

Prepare strips of stale bread about an inch and a half wide and four inches long, spread with butter on both sides and set into the oven until delicately browned on both sides. When ready to use, spread with mayonnaise dressing, press chopped white of egg in a narrow row all around the pieces of bread, then a row of the yolk of egg, in the center place a tip of tender cooked asparagus and sprinkle with finely chopped parsley. Serve a single canape as one service.

Hamburg Roast en Surprise.—Remove all the skin from a pound and a half of round steak, put the meat through a food chopper; add one egg, beaten light, one tablespoonful of fine chopped parsley, a teaspoonful of onion juice, a teaspoonful of salt, one fourth of a teaspoonful of paprika, and a third of a cupful of soft bread crumbs. Mix and shape into a loaf longer than wide and set into a baking dish; take out some of the mixture in the center to leave an open space equally distant from each end; into this break two eggs, cover with the meat and sprinkle the top with crumbs mixed with melted butter. Bake a half hour, basting five or six times with pork or bacon fat. Parboil a pint of potato balls, cut with a French cutter, fifteen minutes and place them around the meat when it goes into the oven. Baste the potatoes as the meat is basted. Serve around the meat. Make a sauce after the meat is removed from the gravy in the pan, adding flour, catsup, worcestershire sauce, salt and pepper for seasoning. If water is needed to add to the gravy save the water the potato balls were cooked in as it is rich in mineral salts.

Rice With Raisins.—Drop a cupful of rice into a kettle of salted water and keep it at a fast boil so that the grains do not stick together. When tender, drain and add a cupful of seeded raisins and pack into a buttered mold. Steam for 10 minutes, turn out and serve with plenty of butter and scraped maple sugar.

Nellie Maxwell

RATHER DIFFICULT POSITION TO MAINTAIN

When it comes to maintaining difficult positions, the armies at the front must take off their hats to this British munition worker. He is the well-known juggler, 40-H-P Zarma, who at present is confining his efforts principally to making munitions for the Germans, though to the great regret of the Boches they won't receive the munitions except through the muzzles of British guns. However, between times Zarma finds opportunity to exhibit his skill for the amusement of his fellow workers. The photograph shows him at one of his clever tricks, standing on his head on a bottle and juggling several balls at the same time.

BULLSNAKE IS MASCOT OF PORTLAND TROOPS

Portland, Ore.—Company G, Second Washington state infantry, of Aberdeen, if allowed to do so will take a mascot to France that will raise the hair on the heads of the allied troops as well as those of the Teutons. The mascot is a bullsnake.

The snake has been a pet with the company outposts in the Cascade mountains. One soldier discovered the snake in deadly battle with a large rattler. It killed the rattler and a few minutes later when attacked killed a second rattler. The soldiers thought its fighting ability should be recognized and captured it.

NURSING SERVICE TO BE VERY BEST

Sick and Wounded Soldiers to Get as Good Care as in Any Hospital.

RED CROSS MOST EFFICIENT

Best Surgeons and Best Nurses in United States Sent With Army to France—Only Graduate Nurses May Serve.

Washington.—The greatest advance made by the American Red Cross in the science of looking after an army's welfare is in its nursing service. The United States is the only nation which entered the present war with a fully enrolled and organized service of trained nurses. The most rigid rule of the Red Cross is that none but graduate nurses shall be permitted to serve as nurses in American war hospitals.

For the first time in history the United States has sent to the front with its forces a modern hospital equipment. The sick and wounded will receive as good care as they could get in any hospital in the United States. Fine buildings do not make a fine hospital—it is the surgical and nursing attention which the patient receives, and this attention can be given in a tent as well as in a million-dollar hospital building. The American Red Cross is sending with the army the best surgeons and the best nurses in the United States—the best in the world.

Only Trained Nurses Serve.

When the new Red Cross was organized in 1905 the principle was adopted at once that not only trained nurses but nurses of character and experience vouched for by recognized hospitals could be enrolled in the nursing service. Also it was recognized that unless such a service were gradually built up in time of peace, unsatisfactory nurses would be bound to get into it in time of war. And so, although it seemed then that our country could never again be drawn into war, the work of organizing a war-nursing service was started, with the result that today the Red Cross has enrolled nearly 12,000 nurses—the pick of the trained nurses of the United States. It is the one branch in which the United States is thoroughly prepared for war—better prepared, in fact, than any nation which ever went to war.

These are the qualifications of a Red Cross nurse: She must have had at least a two years' course of training in a general hospital with a daily average of at least 50 patients; she must be registered in states where registration is required; she must be at least twenty-five and not over forty years of age; she must be approved in a personal interview with a member of the local Red Cross committee; she must show her intelligence by writing an essay on some subject of nursing; she must be indorsed by the executive committee of an approved nurses' organization, by the superintendent of the training school from which she graduated, and by two members of the local committee on Red Cross nursing service; and finally she must pass a physical examination.

Such requirements mean that only the best nurses can be enrolled in the Red Cross service.

Takes Soldier's Oath.

When the enrolled Red Cross nurse is called upon to go to the war she takes an oath to support the Constitution of the United States against all enemies foreign and domestic—the oath of the soldier. She receives an appointment card and badge bearing the same number. Congress has placed a penalty upon the unauthorized wearing of the Red Cross nurses' badge.

Her uniform was white, but has been changed to gray on account of the limited laundry facilities in Europe, with a white cap and an arm brassard bearing the Red Cross insignia. She is also furnished a blue cape marked with a red cross. This uniform is more carefully protected against unauthorized use than that of a soldier in the army. In Europe, the Red Cross societies were not so strict in the protection of uniforms at first, and they had cause to regret it. The Red Cross uniform there was used by spies, by women of bad reputation, and by grafters collecting money. No such abuse of the American Red Cross nurses' uniform is possible.

The woman who has organized this great service and trained it to a morale every bit as perfect as that of the army or navy is Jane A. Delano, herself a trained nurse. Miss Delano was formerly a superintendent of the nurses training schools at Bellevue hospital, New York, and the hospital of the University of Pennsylvania, Philadelphia, and is now chairman of the national committee on Red Cross nursing service.

BLISTER BEETLE'S LIFE DUAL

Both Blessing and Pest, Is Classification of Indiana State Entomologist.

Indianapolis.—A "pest and a blessing all in one," is the classification of the blister beetle by Frank N. Wallace, state entomologist. The beetle is now numerous in the fields of Indiana and is becoming a pest to a certain degree. It is an aid to the farmer because of its appetite for grasshoppers, however. Discussing the insect Mr. Wallace said:

"During the season of 1916 the comparative scarcity of blister beetles was often commented on in this office, and as grasshoppers were quite numerous, a pest of the grasshoppers was predicted for the season of 1917. This prediction came true and more damage has been done this season than for many seasons past.

"However, the blister beetles are found in such numbers over the state that they are becoming a pest in many fields, but also a blessing as they are the greatest means of controlling grasshoppers."

USE FOR HORSE CHESTNUTS

British School Children Gather Them to Supplant Grain for Munitions.

London.—School children all over England will devote their leisure time during the next six weeks in gathering horse chestnuts, which the government is able to use in unlimited quantities in the manufacture of munitions. Researches last year by the Royal society led to the discovery that horse chestnuts provide a satisfactory substitute for the grain used in certain processes of munition making. Every ton of horse chestnuts harvested will save half a ton of grain for human consumption. Plans made by the school authorities indicate that more than 300,000 tons of these chestnuts will be turned over to the government by school children this fall.

NEED MILLIONS OF FEET OF LUMBER

Military Camps in Course of Construction Will Use Up Vast Quantities.

SAWMILLS TO BE KEPT BUSY

Camp Hospitals and Reconstruction Hospitals Will Use About 300,000,000 Feet—More Millions for Camps in France.

Wilmington, N. C.—With government construction of 19 "reconstruction" hospitals in all parts of the United States, and 32 local hospitals at each of the army cantonments and National Guard camps, nine officers' training camps in this part of the country, and as many more aviation camps down on the boards for immediate construction; it is given out in unmistakable language that the sawmills of this country will have all they can do to take care of government contracts during the balance of the year and for a good portion of the time during the first half of next year.

Makes Big Lumber Demand.

Reviewing the situation at short range, the Southern Lumber Journal of this city says:

"The announcement from Washington of the decision of the war department to build at once 32 hospitals, one at each of the army cantonments and National Guard camps, spells many additional lumber contracts, running into the millions of feet, that will have to come from the South, as the great majority of these training camps are located in the South and southern mills are therefore the logical sources of supply for this material. In addition to all this comes the further announcement that the government has decided upon building immediately 10 'reconstruction' hospitals in as many different cities, to wit: Boston, New York, Philadelphia, Baltimore, Washington, Buffalo, Cincinnati, Chicago, St. Paul, Seattle, San Francisco, Los Angeles, Denver, Kansas City, St. Louis, Memphis, Richmond, Va., Atlanta and New Orleans.

"By some it is contended that it will require 4,000,000 feet of lumber for each of the training camp hospitals, while another report fixes the amount at 7,500,000 feet. For the 'reconstruction' hospitals 6,000,000 feet of lumber will be required in each case and possibly more.

Lumber for Camps in France.

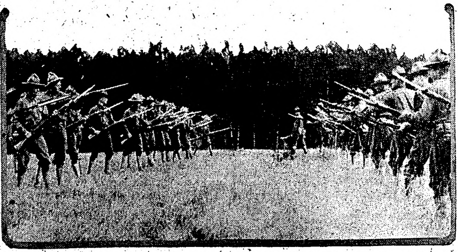
"On this basis it is easy to see that the lumber companies will be called on for at least 150,000,000 feet of lumber for the training camp hospitals and 120,000,000 feet for the 'reconstruction' hospitals, or a grand total of 270,000,000 feet for these combined purposes. Should these orders overrun as much as the training camp orders did, the amount of lumber and timbers for these hospitals will be nearer 300,000,000 feet than less. In the meantime lumber for the American troop camps in France will call for many more millions of feet of lumber in the near future.

"There are besides all this work of future construction several officers' training camps yet to be built in different parts of the country, for which the contracts will soon be let, aviation camps of different kinds that the government will have to build, the exact type of which has not as yet been fully agreed upon, all of which are under consideration by the proper heads, however."

FLEEING RUSSIANS TAKEN FROM A MOTOR LORRY

Remarkable photograph taken during the Russian retreat showing loyal soldiers holding up army motor lorry to take off two men. At the right with drawn revolver is Captain Gerrard of the Russian army, attached to the British armored car section as an interpreter.

BAYONET PRACTICE OF AMERICANS IN FRANCE



Exclusive photograph, just received from France, showing some of the men of the American expeditionary force engaged in bayonet practice.

HEROIC AMBULANCE MAN

Not all the heroism at the front belongs to the fighters. The men of the ambulance services do work that is as risky and sometimes more heroic in the ordinary course of the day. This photograph shows one example of the ambulance men's bravery. The French attendant is carrying a wounded soldier through the wood destroyed by German machine gun fire during the recent French offensive at Verdun. Every step he takes through the fire-swept area is at the risk of his life, but he keeps on bearing his human burden to safety.

ON GUARD IN SENTRY BOX

A Canadian sentry in his box built of ammunition cases, wreckage from houses and other articles. The bell is rung when the Germans begin sending gas shells over the trenches.

Plain Speaking.

"Young woman," said the irascible family man to the haughtily saleslady, "you needn't treat me with such lofty disdain."

"Well, sir?"

"I didn't come here for the purpose of making love to you. I want to match this ribbon, and I don't care a hang whether it's the color of your eyes or not."

MORE SHELLS TO POUND GERMANS WITH

OFFICIAL BRITISH
WAR PHOTOGRAPH

Two men of the Royal Garrison artillery unloading big shells for the British guns on the western front.

Wills Ashes to Japan.

"It is my wish that when I die my body shall be burnt to ashes, and the ashes sent to my beloved Japan. Let some member of my family take these ashes and go off into the orchards where the sweet cherry blossoms perfume the air, and scatter these ashes to the four winds, that I may spend all eternity among the hills of the land I love."

This is the message addressed to the officials of the Japanese association, that was found after the death of Kochu Iba, valet to several prominent club men of New York. Iba was born in Japan about thirty years ago and came to this country to become an importer. His family is well known in politics in Japan, and several of his uncles are in the Japanese navy. He was a member of the Japanese association. His body was cremated and the ashes will be sent to Japan.

Independence in Dying.

"Dying without a doctor's aid" is one of the latest evidences of the spirit of revolt abroad. Luther started a successful revolt against religious autocracy; the French nation revolted against the political hierarchy; our own age has seen great uprisings against economic tyrants. But now we have the first indication of rebellion against these despots of our bodies. One may remark that dying is not the best way of spiting the doctor; nor is it to the material minded, any more than harakiri. But shuffling off without a doctor's aid, perhaps in a manner not approved of by the faculty, is not only to make a martyr of one self; it strikes the profession at the root, demonstrating that death can take place without the assistance of a man with a black bag. Slowly mankind works up to freedom in all directions.—New York Post.

What She Broke.

Reginald had become a stretcher bearer in the army pay corps, and before going away to take up his duties he asked Angelina to marry him. Angelina loved him, but as she had promised to marry a millionaire the day before, she was too noble to go back on her word, and to Reginald she had perforce to say "No."

"I'm sorry, sorry," she sobbed. "K-kiss me once before we part, my love." and she flung herself into his arms.

"My own," she wailed, "have I broken your heart?"

Reginald disentangled himself with difficulty.

"No, Angelina," he said, "only my fountain pen."—London Answers.

GOOD ROADS

PIKE'S PEAK HIGHWAY OPEN

Alignment Definitely Completed From Atlantic to Pacific—Last Link Has Been Forged.

The Pike's peak ocean to ocean highway has definitely completed an independent alignment from the Atlantic to the Pacific coast, says the New York Tribune. The last link in the chain was forged at San Francisco on July 30, when the national officers, in conference with representatives of various California routes, selected the Feather-River Sacramento Causeway routes and established the Pacific coast terminus at Oakland and San Francisco.

With terminal on the Atlantic seaboard both at New York city and Philadelphia, the first prong passes through Newark and Morristown, N. J.; Easton and Allentown, Pa., joining with the Philadelphia prong at Reading, Pa., thence continuing westward along the William Penn highway through Harrisburg, Tyrone, Altoona, to Pittsburgh; crossing Ohio through Steubenville, Coshocton, Newark, Columbus, Springfield and Dayton; Indiana through Richmond, Indianapolis, Rockville; Illinois through Decatur, Springfield, Jacksonville, Griggsville; Missouri through Hannibal, Macon, Chillicothe, St. Joseph; Kansas through Hiawatha, Belleville, Norton, Colby, Goodland; Colorado through Burlington, Limon, Colorado Springs, Manitou, Hartsel, Buena Vista, Leadville, Glenwood Springs, Rifle, Meeker; Utah through Vernal, Duchesne, Heber City, Park City, Salt Lake City, Ogden, Brigham, Lucin; Nevada via the Overland trail through Elko, Winnemucca, Lovelock, Deno, and California through Portola, Quincy, Oroville, Marysville, Sacramento, Davis, Benicia, Martinez, Berkeley, Oakland and San Francisco.

The completion of the western extension of the highway followed an official inspection of the trip made by President C. F. Adams, in accordance with the decision of the midsummer meeting held on top of Pike's peak, July 10-11, following a sociability tour from Chillicothe and St. Joseph. The reports made on the inspection trip indicate that less than 10 per cent of the 1,600 miles between Colorado Springs and San Francisco is in poor condition. The road follows streams, is through inhabited territory with less desert or desolate country to cross than any other transcontinental route, and traverses some of the most wonderful scenic sections of the United States. Visits were made at each town en route, to create new enthusiasm for the route, confer regarding highway development and arrange for a more complete marking system. The average running time was 19 miles per hour.

Road Through Williams Canon, Near Manitou, Colo.

An emphatic campaign is now being conducted to complete the marking of the Pike's Peak trail from coast to coast. The national specifications require red and white bands, each 10 inches in width, at cross-roads, forks, and frequent intervals between, these to be painted on telephone poles, fence posts, trees or rocks. In addition, a striking marker design in red and white has been adopted, and 1,500 enameled steel signs, 14 by 20 inches in size, are to be placed on individual posts at intervals of not more than five miles between New York and San Francisco.

Highways in Connecticut.

The construction of concrete highways is going on in 22 cities and towns in Connecticut, and when these contracts have been completed there will be about 70 miles of concrete surfaced payment in that state. The highways are 18 feet wide and cost $15,000 a mile.

Good Roads Indispensable.

The time has come when we must consider the roads an asset, indispensable to the well-being of the farmer and his family. This being true, is it not every man's duty to do all he can to keep the roads in good condition?

Good Roads.

More than $300,000,000 was spent on highway construction and maintenance in the United States in 1916. Of this amount 10 Southern states spent approximately $52,000,000.

AGRICULTURAL DEPARTMENT

This department of THE ELEVEN TOWNS is devoted to the interests of the agriculturists of Pennington and Marshall Counties. All the articles are by foremost authorities, including U. S. Government experts.

CARE OF SEED CORN

Begin Immediately After Gathering and Continue Until the Grain Is Planted.

DRY PLACE IS RECOMMENDED

No Locality Where Crop Will Not Be Bettered by Thorough Drying Treatment—Poor Storage Will Impair Vitality.

(From the United States Department of Agriculture.)

The same day that seed corn is gathered from standing stalks as they grow in the field the husked ears should be put in a dry place where there is a free circulation of air, and so placed that the ears do not touch one another.

This is the only safe way, according to the United States department of agriculture, which says that much good seed has been ruined because it was thought to be dry enough when gathered. Many farmers think that their autumns are so dry that these precautions are not necessary, yet there is no locality where the corn will not be bettered by a thorough drying treatment. If corn is left in the husk it may sprout or mildew during warm wet weather, and it is more likely to become infested with weevils.

Poor Storage Impairs Vitality.

The vitality of seed may be reduced by leaving it in a sack or in a pile for even a day after it has been gathered. During warm fall days, with some moisture in the cobs and kernels, the ears heat or mildew in a remarkably short time.

The best and cheapest treatment immediately after the ears are gathered and husked is to tie the ears singly on binder twine at about eight-inch intervals, the twine being looped about the middle of the ears so that they hang balanced and horizontal. Ordinary binder twine is strong enough to support from 15 to 20 ears.

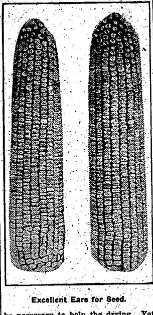
Wire racks are cheaper in the long run and more convenient. A good form is made from welded or woven wire fencing, the upright wires being used as the hangers, and the lateral wires cut off and bent upward being used as supports for the individual ears. The lateral wires, about three inches long on either side of the main upright, are thrust into the butt end of the cobb. These racks will last many years and are easily stored when not in use. In use, with the corn upon them, they have somewhat the appearance of giant fern fronds. The central wire is the midrib of the leaf, and the ears of corn stand out on each side like the fern leaflets, or like leaflets on a locust tree.

Eureka Yellow Dent Corn.

Wooden Racks Convenient.

Wooden seed racks, in which the ears are stored in rows on separate shelves, are convenient dryers, and have no drawbacks in a dry, breezy place, although the air cannot circulate freely on all sides and dampness may be held where the row of kernels rests on the wood.

Only during unusually damp weather at seed-gathering time will a fire be necessary to help the drying. Yet if heat is applied in a poorly ventilated place, it will do more harm than good. If used, the fire should be slow and long-continued. It should be below the ears with plenty of good ventilation above them.



Excellent Ears for Seed.

INCREASE YIELD BY PLOWING

Work Done in Early Fall Is Most Satisfactory—Weeds Are Destroyed and Soil Pulverized.

Repeated trials have shown that early fall plowing gives much better conditions for a crop of green the following year than late plowing gives. While August is a dry, hot month and other farm work presses it is advisable to do as much plowing as possible. On clean land no further treatment is needed. On weedy land the August plowing should be followed by occasional disking or harrowing, or by replowing in October.

Such treatment destroys many of the weeds and pulverizes the soil, so that good supplies of plant food are available during the next season. In addition, it gives a longer plowing season and a chance to do better work. Early plowing and good plowing are important steps in getting better than the average yield.

CUTTING CORN FOR THE SILO

Best Time Is When Grains Are Well Dented—Pays Farmer to Own His Silage Cutter.

Cut corn for silo when the grains are well dented. This is generally when the lower leaves and husks are beginning to dry up, and the corn is nearly ready to cut for shocking.

It pays to have your own silage cutter, so as to fill the silo when the crop is in the right condition.

Records Sell Cows.

Records alone will sell cows when no other quality will. Grade cows with records can be sold for 25 to 50 per cent more than those without records.

NEGLECT OF GOOD ROUGHAGE

Meat Production Must Be Put on More Economical Basis—Value of Straw Overlooked.

The importance of roughage as a feed is coming to be recognized. As long as grain was not high in price, it was rather indiscriminately shoveled into live stock and much coarse feed was allowed to go to waste. Such a practice now, however, would destroy all possibility of profit in feeding. While we are learning through grim necessity to make full use of roughage, it might be well to learn the lesson so thoroughly that we shall never forget it. Meat production in this country must be put on a more economical basis.

Millions of tons of straw are burned every fall. Probably a third of the corn stalks grown are wasted. Straw and stover with a little grain will carry cattle through the winter. Alfalfa hay can be the large part of the brood sow's winter feed with only a [illegible]. Why stuff her with corn? Roughage is money.

SILAGE TO CHEAPEN RATION

More Silos Being Constructed Every Year Because of Convenience and Economy in Feeding.

Because of the economy and convenience in feeding silage, more silos are being built every season. This year will likely see a larger number erected to "can" the corn crop.

Seventeen per cent more milk and 28 per cent more butterfat was produced by dairy cows fed largely silage than by others fed mainly a grain ration in a feeding test conducted at the Ohio experiment station. The silage ration produced butterfat at 13 cents a pound, and the grain ration at 22 cents. Two pounds of dry matter can be produced in the form of silage at less cost than one pound in sugar beets, other tests have shown.

Keep Down Weeds.

Keep down weeds in the garden. Weekly cultivations keep the soil loose, friable and aerated and conserve moisture.

The DAIRY

INGREDIENTS OF DRY RATION

Should Not Be Different From Those Fed to Cow at Other Times—Give Some Roughage.

The ingredients of the ration for the dry cow should not be so very different from that fed at other times. In order to cut down on the fat-producing elements, hominy is frequently used in place of corn. Bran and oats are both rich in mineral matter which goes to give bone to the unborn calf.

Traveling Feed Box in Use.

If she has been fed with high protein feeds a change of ration will rest and cool the digestive system.

As calving time draws near, a laxative feed, such as oilmeal in small quantities, loosens the bowels and lessens the danger of caked udder or milk fever at time of calving. Along with these concentrates eight to ten pounds of clean hay or corn stover will give sufficient roughage to keep the grain from massing in the stomach, and make digestion easy.

SEPARATING CALF FROM COW

Allow Young Animal to Remain With Dam for Day or So That It May Receive the First Milk.

It is well to allow the calf to remain with the dam for a day or two in order that it may receive the colostrum, or first milk. Colostrum milk has a purgative effect which aids in clearing out the calf's digestive system. If the mother's milk is very rich, it may be necessary to feed milk with a lower percentage of butterfat.

It is somewhat easier to teach young calves to drink than it is to teach older ones, but in either case it is necessary for the calf to become hungry by the omission of one or more feeds before it will drink milk from a pail.

One method of teaching the calf to drink is to get it to suck the attendant's finger as its mouth comes in contact with the milk in the pail. The finger can be withdrawn gradually, and the calf will usually continue to take in the milk. Patience, rather than force, is a prerequisite on the part of the feeder.

SPRAY MIXTURES FOR COWS

Ohio Experiment Station Recommends Fish Oil, Oil of Tar and Crude Carbolic Acid.

Spray mixtures may add to the comfort of a cow by keeping off numerous flies. Several of these compounds may be mixed at home.

A mixture recommended for this purpose is given in Bulletin 267 of the Ohio experiment station as 100 parts of fish oil, 50 parts of oil of tar, and one part of crude carbolic acid. Another formula is one-half gallon of oil of tar, one-half gallon of cottonseed oil, and one-half pint of crude carbolic acid. Such mixtures sprayed on cattle keep off flies for a time.

COWS NOT MILKED PROPERLY

Not Much Gained by Feeding Unless Farmer Gets All the Milk and Butterfat Feed Makes.

There is not much to be gained by feeding a cow unless you are determined to get all the milk and butterfat the feed makes. You cannot get all the milk and butterfat the feed makes unless you milk the cow right. A large percentage of cows are not milked right; so a large loss of milk and a larger loss of butterfat result. It is as important that cows be well milked as it is that they be well fed.

BUILDING UP A DAIRY HERD

Use of Purebred Bull Is Cheapest Way—Too Much Stress Cannot Be Laid to Ancestry.

The use of a purebred bull is the cheapest way of building up a herd. In selecting a bull too much stress cannot be laid to his ancestry. The greater the number of good producers in his pedigree, the better the chances for stamping desirable dairy characteristics upon his offspring.

Goodridge Hotel and Restaurant

Board by the day or week. Meals or lunches served at all hours. Good Rooms. Confectionery, Soft Drinks, Cigars, Pipes and Tobaccos

JOB PRINTING We can do the finest class of printing, and we can do that class just a little cheaper than the other fellow. Wedding invitations, letter heads, bill heads, sale bills, statements, dodgers, cards, etc., all receive the same careful treatment—just a little better than seems necessary. Prompt delivery always.

Let Us Be Your Waiter

We never tire of helping others when they ask for good job printing. We can tickle the most exacting typographic appetite. People who have partaken of our excellent service come back for a second serving. Our prices are the most reasonable, too, and you can always depend on us giving your orders the most prompt and careful attention. Call at this office and look over our samples.

IMMENSE LOT OF WORK DONE BY CONGRESS

Session Remarkable, of Course, for Its Action on War Measures.

LITTLE FRICTION NOTICED

Members, as a General Thing, Were Harmonious—Administration Successful in Most Legislation It Wanted Adopted.

Washington.—"The most remarkable session in the parliamentary history of the world," was the way Democratic and Republican leaders characterized the first war session of the Sixty-fifth congress, which came to a close at three o'clock in the afternoon of October 6, exactly six months after the declaration of war against Germany.

The record of legislation enacted and money appropriated has no parallel anywhere in the annals of all time.

Beginning with the declaration of war against Germany in April, congress has passed bill after bill of the most revolutionary character, including such measures as the draft bill and the food control bill. Appropriations and contract authorizations for the present fiscal year, totalling $21,890,000,000, including $7,000,000,000 in loans to the allies, were voted without a single dissenting voice, a record equalled nowhere, not even in the kaiser-dominated German reichstag.

How Money Is Expended.

The following table shows how the money is to be spent:

Army	$8,911,000,000
Navy	1,875,000,000
Merchant shipping fleet	1,889,000,000
Loans to the allies	7,000,000,000
Defense fund for—	
President	100,000,000
Food and fuel control	173,000,000
Soldiers' and sailors' insurance	176,000,000
Interest on bonds and certificates	200,000,000
Civil establishment of government	958,000,000
All other expenses	102,000,000

As a part of the scheme of meeting these enormous expenditures congress passed the $2,535,000,000 war revenue bill, the largest taxation bill in American history, levying directly or indirectly upon every man, women and child in the United States. Something more than a billion dollars of this amount will be taken from war profits. All incomes more than $1,000 for single men and more than $2,000 for married men are made subject to taxation.

Where New Taxes Fall.

Here are some things upon which the average citizen will pay taxes under the new war tax bill:

Approximately 2 per cent increase on incomes of $5,000 or less.

Letter postage, except local letters, increased to 3 cents and postcards to 2 cents, beginning November 3.

One cent for each 10 cents paid for admissions to amusements.

Five-cent shows and 10-cent outdoor amusement parks exempted.

Ten per cent on all club dues of $12 a year or more.

One cent for each 25 cents paid for parcel post.

One cent on each 25 cents express package charge.

Three per cent of all freight charges.

Eight per cent of passenger fares by rail or water, except trips of less than 30 miles.

Ten per cent of charges for seats, berth and staterooms on parlor cars or vessels.

Five cents on each telegraph, telephone or radio message costing 15 cents or more.

Three per cent on jewelry.

Eight cents on each $100 of life insurance. The tax on whisky is increased from $1.10 a gallon to $3.20. The tax on beer is increased from $1 a barrel to $2.75.

Increased tax on cigars, cigarettes and manufactured tobacco and snuff.

Little Dissension During Session.

Despite pacifist activities, the session was marked with comparatively little dissension, the fighting centering about questions mainly affecting policy. The most stubborn contests were staged over the revenue bill, the draft bill and the food control bill. In every case, except censorship of the newspapers and speech, the administration has received everything it asked of congress for the conduct of the war.

Congress was in session 188 days. During that time more than 10,000 army, navy and marine corps nominations sent to the senate were confirmed, among them the advancement of Major General Pershing, commander in chief of the armies in France, and Major General Bliss, chief of staff, to the rank of full general, held only four times previously in American history. The only important appointment held up was that of Col. Carl Reichmann, to be a brigadier general. Action was blocked until the December session because it was charged he uttered pro-German sentiments.

An unprecedented feature of the session was the reception of the special missions sent to the United States by the allied governments, and the special representatives of Great Britain, France, Belgium, Italy, Russia and Japan addressed both houses. Invitations of the British and French governments to have the United States send a congressional mission across the Atlantic to see war conditions and co-operate with the interparliamentary congress were rejected.

Important Measures Passed.

Following is a list of the most important measures passed by congress:

Resolution declaring a state of war exists between the imperial German government and the government and the people of the United States and making provision to prosecute the same.

On April 2 the resolution for war against Germany was introduced in the house and on April 6, or four days after the assembling of congress, the president attached his signature to the measure. No delay was involved in the passage of this resolution, perhaps the most important ever offered either in this or any other congress.

General deficiency appropriation act, appropriating $163,841,400.52, of which $100,000,000 was for the national security and defense and for each and every purpose connected with the war.

Act authorizing an issue of bonds to meet expenditures for the national security and defense and for the purpost of assisting in the prosecution of the war and to extend credit to foreign governments and for other purposes. This act appropriated $3,907,063,945.46 for establishing credits in the United States for foreign governments by purchase of bonds of our allies and expenses incident to preparation and issue of bonds and certificates; authorizes the issue of bonds amounting to $5,063,945,460, of which $3,000,000,000 is for meeting the loans authorized to foreign governments, $2,000,000,000 to meet domestic expenditures, and $63,945,460 to redeem the three per cent loan and also authorizes $2,000,000,000 of one year certificates of an indebtedness temporarily to provide revenue.

Huge Military Expansion.

Act authorizing one additional midshipman for each senator, representative and delegate in congress.

Act appropriating $273,046,332.50 for the support of the army for the fiscal year 1918.

Act authorizing the president to increase temporarily the military establishment of the United States. This act authorized a selective draft of 1,00,000,000 men and contains other important legislative features pertaining to the army.

Resolution authorizing the president to take over for the United States any vessel owned in whole or in part by any corporation, citizen or subject of any nation with which the United States may be at war.

Act to increase temporarily the commissioned and warrant and enlisted strength of the navy and Marine corps from 87,000 to 150,000 men, in the first instance, and from 17,400 to 30,000, in the second.

Act appropriating $1,344,896.18 for the support of the military academy for the fiscal year 1918 and for other purposes.

Largest Single Grant in History.

Act to amend an act entitled "An Act to Regulate Commerce," as amended, in respect of car service, and for other purposes.

Act amending the war risk insurance act and appropriating $45,150,000 to insure vessels and their cargoes and expenses connected therewith.

Act appropriating $147,363,928.77 for the sundry civil expenses of the government for the fiscal year 1918.

Act authorizing the issue to states and territories and the District of Columbia of rifles and other property for the equipment of organization of home guards.

Act appropriating $3,281,094,541.60 for the military and naval establishments on account of the war expenses. Up to time this was the largest appropriation act known to this or any other country. Among other things it appropriated $405,000,000 for an emergency shipping fund with which to begin construction of the greatest merchant fleet the world has ever known.

Act to punish acts of interference with foreign relations, the neutrality and the foreign commerce of the United States, to punish espionage and better enforce the criminal laws of the United States.

Conservation Bills Passed.

Act authorizing condemnation proceedings of lands for military purposes.

Act appropriating $640,000,000 to increase temporarily the signal corps of the army and to purchase, manufacture, maintain, repair and operate airships.

Act authorizing the United States to take possession of a site for use for permanent aviation stations of the army and navy for school purposes.

Acts enlarging the membership of the interstate commerce commission and amending the act to regulate commerce by authorizing priority shipments by any common carrier, ect.

Act appropriating $11,346,000 to provide further for the national security and defence by stimulating agriculture and facilitating the distribution of agricultural products.

Act appropriating $162,500,000 to provide further for the national security and defence by encouraging the production, conserving the supply and controlling the distribution of food products and fuel.

Act to authorize an additional issue of bonds to meet expenditures for the national security and defense and, for the purpose of authorizing in the prosecution of the war, to extend additional credit to foreign governments, and for other purposes. This act makes an additional appropriation of $4,021,377,890.92 to extend credit in the United States for foreign governments by purchase of bonds of our allies and expenses incident to preparation of an issue of bonds and certificates; authorizes an additional issue of $4,000,000,000 of bonds to meet loans to foreign governments; authorizes an additional issue of one year certificates of indebtedness amounting to $2,000,000,000 and an issue of five year war saving certificates amounting to $2,000,000,000.

New Mark Again Set.

Act appropriating $5,356,666,016.93 to supply deficiencies in appropriations for the fiscal year 1918 and prior years on account of war expenses and for other purposes, and authorizes contract obligations to be met by future congresses amounting to $2,401,458,393.50. This is the largest appropriation act passed by this or any other country. This act makes further appropriations of $635,000,000 for the emergency shipping fund and raises the limit of cost to carry out the purposes of the shipping act to $1,734,000,000.

Act to define, regulate and punish trading with the enemy and for other purposes, and appropriates $450,000 to enforce the provisions thereof.

Act to provide revenue to defray war expenses. This measure provides approximately $2,500,000,000 of revenue with which to pay the expenses of the government.

Act to provide a military and naval family allowance, compensation and insurance fund for the benefit of soldiers and sailors and their families, and, makes an appropriation therefor of $176,250,000.

MOST IMPORTANT MEASURES PASSED.

Here are the most important measures passed by congress at the special war session:

Declaration of war against Germany on April 6.

War bond issues aggregating $15,538,000,000.

War appropriations and contract authorizations totalling $14,390,000,000.

War loans aggregating $7,000,000,000 to the allies.

The selective draft bill, making 10,000,000 men liable to military service.

The espionage bill, including the embargo provision.

The $2,235,000,000 war revenue bill.

The food control bill.

The trading with the enemy act.

The soldiers' and sailors' insurance bill.

50,000 BELGIAN HOUSES GONE

Germans' Record of Destruction Is Shown by New Gray Book Issued by Government.

Havre, Oct. 8.—The Belgium government has issued a gray book to refute allegations against Belgium civilians contained in the German white book of May, 1915, in which it was said Belgian civilians savagely attacked German troops in the early days of the war and that the measures adopted by the Germans were necessary in the interest of preservation of the German army. According to the gray book, between 40,000 and 50,000 houses were destroyed by the Germans.

JACKIE KILLS FRIEND; IS HELD

Queenstown Magistrate Says Fatal Blow Constitutes Manslaughter—To Get Bail.

London, Oct. 8.—Machinists Mate Perente of an American naval vessel will be liberated on bail on a charge of manslaughter in connection with the death of a dock yard laborer named Plummer, who died from the effect of a blow on the jaw inflicted by the sailor on September 8. He was held by a Queenstown magistrate. Perente pleaded not guilty and added: "I did not mean to injure my friend."

MOVE TO AID WAR CAPTIVES

Governments of Great Britain and Germany by Agreement Will Seek to Ameliorate Conditions.

Washington.—Details of an agreement between the British and German governments concerning combatant and civilian prisoners of war, which it kept by the Teuton officials delegated to carry it out will greatly ameliorate the condition of the wretched captives held in Germany, are made public in a white paper issued by Great Britain. The paper is of interest to Americans, inasmuch as it almost certainly will form the basis of a similar agreement between the United States and Germany. The conference at which the agreement was reached was held at The Hague.

An arrangement was made whereby the Netherlands government undertook to care for 16,000 British and German combatant or civilian prisoners of war, the respective governments of these nationals to refund all costs of internment and to furnish materials necessary for the construction and upkeep of the camps, for medical attention, and for the victualing and clothing of the interned.

Among the provisions of the agreement is one whereby the British government will permit the German medical personnel originally belonging to the German garrison at Tsing-tao, China, and now in the United States, to return to Germany by sea if they are permitted by the American government to do so.

News of the State

Condensed for Busy Folks

Crow Wing county is anxious to have operators take out a lease on its mineral deposits at the county farm property. Bids are asked.

Mr. and Mrs. L. J. Peck of Anoka were married just fifty years, and last week their children and grandchildren all came home to help them celebrate.

John Cummings, one of the patriarchs of Redwood county, died very suddenly at his home near Delhi. Death was due to apoplexy. He was 92 years old.

Nels Hanson, 50 years old, was killed by a cave-in while digging a trench for a water main at Farmington. Two sisters, living in North Dakota, survive him.

Rush of farm work and not prevailing prices is the cause of the light potato receipts in Minnesota, according to the opinion of Director A. D. Wilson of the state extension department.

Personal effects at an estimated value of $1,000 have been stolen from barracks of student companies at Fort Snelling in a series of thefts during the past few weeks. The Fourth and Fifth companies have been especially hard hit.

Friday evening, Nov. 17, will be a big night for members of the U. C. T. council, No. 88, of Crookston, when the carriers of the grip will convene here from all over North Dakota and Minnesota to install C. W. Final of that city as sentinel in the Grand council body.

Two hundred clergymen witnessed the installation of the Right Rev. Frank Arthur McElwain as bishop of the Episcopal diocese of Minnesota. The services were held in the Cathedral of Our Merciful Savior, and the sermon was preached by Bishop J. D. Morrison of the diocese of Duluth. The certificate of election was read by Rev. Andrew D. Stowe of Minneapolis.

After roll call one evening recently, before Company G, M. N. G., of Austin was dismissed, Capt. Page gave the command, "At ease," and a crisp new $1 bill was given to each member of the company from Capt. J. N. Nicholsen of Company C of the Home Guards. It was a personal gift from Mr. Nicholsen, and the entire company gave three cheers and a tiger.

The H. C. Ervin company of St. Cloud has purchased the Schroeder flour mill at St. Joseph. The consideration in the transaction was $14,000.

Ten hunters, arrested in Anoka county by State Game Warden G. H. Cline were fined $12.50 each in the Anoka municipal court yesterday for shooting in open water and without a license.

An attempt to hold a meeting of the Non-partisan League of North Dakota at Mankato was frustrated by owners of halls and buildings in this city, who refused to rent them to the organization.

E. F. Warner, recently arrested at St. Cloud, in connection with the robbery and shooting at the Great northern depot at Moorhead, in which George Sheffield, operator at the station, was killed, has confessed to a robbery at Reynolds, according to a statement given out by the Moorhead police.

In a fog so thick that view three feet ahead was cut off, Northern Pacific freight trains collided at Lerch, eight miles from Brainerd. Peter Mayres, of Duluth, engineer, was badly injured. He was taken to a Brainerd hospital. The engine, caboose and several cars of Mayres' train were derailed, delaying traffic several hours.

Last week was Fire Prevention week in Minnesota, in accordance with a recent proclamation by Governor Burnquist. Although in the past only one day has been set aside annually for fire prevention propaganda, the period was increased this year because of the war and its resultant need for conservation of property. Fire drills were conducted in all of the schools every day. Pupils also were given talks on fire prevention. Many industries took similar measures with respect to their employes.

Instructions were issued at the 48th annual assembly of the Grand Council Royal and Select Masters, Nobles of the Mystic Shrine of Minnesota, which met in St. Paul, by the grand council to the grand treasurer to invest $300 in Liberty Bonds for the order. At the election of officers, Dr. Norman B. Patten, potentate of Zuhrah temple, Minneapolis, was made grand master. Other officers elected were: Samuel T. Irvine, Red Wing, deputy grand master; Charles H. Green, St. Paul, grand councillor of the work; George E. Wanner, Minneapolis, treasurer; John Fishel, St. Paul, recorder; Alex E. Clarendon, Minneapolis, grand captain of the guard; Charles P. Montgomery, St. Paul, commander of the council; Syward A. Rhode, Duluth, grand chaplain; Harold L. Lamb, Sauk Centre, marshal; O. L. Schutz, Minneapolis, steward, and John L. Lundwig, St. Paul, sentinel.

Every man, woman and child in Minnesota, outside the three most populous counties, may enter the race and help his or her county outdistance others in the big Liberty Loan campaign and win one or both of the trophies offered by the State Public Safety commission. The trophies, referred to as "battle flags," are suitably inscribed silk banners, and will be awarded: One to the county taking the largest amount of Liberty Bonds in proportion to its official allotment. The other to the county securing the largest number of subscribers in proportion to its population.

MINNESOTA AGAIN WINS BUTTER TITLE

STATE CARRIES OFF NATIONAL BANNER FOR THIRTEENTH SUCCESSIVE YEAR.

STATE WHEAT CROP A BUMPER

Government Report Shows Vast Increase Over Last Year in October Forecast.

St. Paul.

Defending the world's championship, which it has held for twelve successive years, Minnesota again carried off the banner awarded by the National Creamery Buttermakers' association in convention at Milwaukee.

News of the victory was received by Secretary H. D. Meyer of the state dairy and food department from Commissioner James Sorensen, who was at the meeting.

"The banner is awarded every year to the state having the highest average score," Secretary Meyer explained, "and was won by an average of 96.57 out of a possible 100 points by the Minnesota contestants. It means that Minnesota as a state produces the finest butter in the world."

More than 600 buttermakers competed for prizes.

* * *

Bumper Wheat Crop.

Summaries of the October crop reports for the state of Minnesota as compiled by the Bureau of Crop Estimates, United States Department of Agriculture, follow:

Corn—October 1 forecast 72,200,000 bushels; production last year (December estimate), 84,420,000 bushels.

All Wheat—Preliminary estimate, 66,500,000 bushels, production last year (December estimate), 27,555,000 bushels.

Oats—Preliminary estimate, 123,000,000 bushels; production last year (December estimate), 88,112,000 bushels.

Barley—Preliminary estimate, 38,200,000 bushels; production last year (December estimate), 26,125,000 bushels.

Rye—Preliminary estimate, 6,438,000 bushels; production last year (December estimate), 5,025,000 bushels.

Flaxseed—October 1 forecast, 2,750,000 bushels; production last year (December estimate), 2,338,000 bushels.

Potatoes—October 1 forecast, 33,400,000 bushels; production last year (December estimate), 16,800,000 bushels.

All Hay — Preliminary estimate, 5,197,000 tons; production last year (December estimate), 6,384,000 tons.

Apples (Agricultural Crop)—October 1 forecast, 495,040 barrels of three bushels; production last year (December estimate), 422,000 barrels.

Prices—The first price given below is the average on October 1 this year, and the second, the average on October 1 last year.

Wheat, 203 and 142 cents per bushel; corn, 171 and 74; oats, 54 and 39; potatoes, 87 and 96; hay, $10.30 and $6.80 per ton; eggs, 35 and 26 cents per dozen.

Governor Warns Nonpartisan League.

Governor J. A. A. Burnquist, in advance of a conference with representatives of the Nonpartisan league from different parts of Minnesota, repeated the attitude of the Minnesota Public Safety commission toward meetings of that organization.

"Like all other meetings at this time, the question whether they will instill loyalty is the one first to be determined," said the governor. "That most interests the Public Safety commission and is left entirely with the local authorities, who are in close touch with the conditions obtaining."

* * *

Cars for State Shippers.

Chairman Ira B. Mills of the State Railroad and Warehouse commission, announces that the commission has been successful in a move to retain 300 box cars of the Great Northern and Northern Pacific roads which had been ordered to Eastern lines and that potato growers and other shippers in Minnesota will profit accordingly, but must load the cars to a maximum capacity in every instance.

While no explicit instructions are given for the use of the cars left on the Northwestern lines, it is planned to use the majority of them for the movement of the semi-perishable crops.

* * *

New Rifles for Home Guard.

Minnesota Home Guard companies and the new Fourth regiment may be uniformly equipped with Krag-Jorgenson rifles, as the result of withdrawal by the War department of the Springfield rifles issued to some units for use in the regular and national armies, Adjutant General W. F. Rhinow said.

State Road Named for Nelson.

United States Senator Knute Nelson has had a state road named for him. Following a call by a committee from Glenwood, Highway Commissioner C. M. Babcock registered the Nelson trail. The road runs from the Iowa line south of Worthington, Minn. through Nobles, Murray, Lyon, Yellow Medicine, Chippewa, Swift, Pope, Douglas, Otter Tail, Watonwan and Hubbard counties to Lake Itasca. The road will be marked with a black circle enclosing a yellow background with the letter "N" in [illegible]

DADDY'S EVENING FAIRY TALE

By MARY GRAHAM BONNER

TWO PIGEONS.

The day was very windy, and high in the air two pigeons were flying. One was a lovely blue one and the other was blue and gray.

"Hello, coo-coo," said Mr. Blue Pigeon.

"Hello, coo-coo," said Miss Gray Pigeon. Although she was both blue and gray she was always known as Miss Gray Pigeon.

"Don't go so fast, coo-coo," said Mr. Blue Pigeon. "Let me join you. The wind almost carries us along. We don't need to hurry so."

Now Miss Gray Pigeon didn't really want to hurry. She was only pretending she was in a great hurry. She wanted Mr. Blue Pigeon to follow her, for she had long admired his blue feathers and his collar of blue and green which shone in the bright sunlight.

"Let's sit on the eaves under yonder window," said Mr. Blue Pigeon, as he caught up with Miss Gray Pigeon. "I have something I want to tell you."

Miss Gray Pigeon was all of a-flutter. What could Mr. Blue Pigeon want to say to her? She hoped—and yet she hardly dared hope so much.

He was such a very handsome pigeon and though she was lovely herself, still she didn't think she was nearly so fine as Mr. Blue Pigeon.

They settled down on the eaves under the window, and Mr. Blue Pigeon began to coo lovely little songs to her. They were quite the sweetest songs Miss Gray Pigeon had ever heard though they were the same songs which pigeons have sung to each other for years and years—as many years as there have been pigeons—and that means a great many years.

The names of the songs are called the "Pigeon Coo Songs" and Mr. Blue Pigeon had a beautiful soft voice.

"I love you so much," he said, and Miss Gray Pigeon said:

"Coo, coo, I love you too!"

"Then," said Mr. Blue Pigeon. "I want you to make your home with me. I shall hunt for goodies for us to eat, and we'll be so happy. We will coo all day long—that is when we're not eating and bathing and flying. And sometimes we will coo even then."

"Hello, Coo, Coo," Said Mr. Blue Pigeon.

Miss Gray Pigeon was very happy. She was very much flattered and honored too. For a long time they sat on the eaves under the window and after awhile Mr. Blue Pigeon said: "We must get our wedding breakfast now. Come! Coo, coo, coo, I'll look for it."

They flew down to the ground together. And what should they see before them but a regular feast!

Some children had left crumbs and other delicious things that pigeons love, on the ground. They had seen the pigeons and thought perhaps they might be hungry.

"Look!" said Miss Gray Pigeon. "You have a surprise for me! Here is our wedding feast all ready!"

"I didn't do this," said Mr. Blue Pigeon very truthfully. "I think some lovely children did this for us. I have seen some children around here lately, and they have seemed so friendly. I have been a little afraid of them but I am sure I will never feel afraid again."

From all around other pigeons joined the wedding feast. "This is our wedding day," said Mr. Blue Pigeon. "That's why we are having a feast."

And the pigeons all ate and nibbled at the crumbs as if they had never had such a feast before in all their lives.

Now when the children came back they saw all the crumbs had gone, and all the pigeons had flown away, except Mr. Blue Pigeon and Miss Gray Pigeon.

"Coo, coo, thank you, thank you," said Mr. Blue Pigeon and Miss Gray Pigeon.

"Nice pigeons, good pigeons," said the children.

They were afraid that the pigeons would fly off. But not at all! They had grown quite tame. And such friends as they all became!

Every morning the children gave the pigeons food, and for some wonderful reason, they couldn't understand—two pigeons were especially tame, and would let the children stroke their soft heads while they said, "Coo, coo."

But the real reason was that Mr. Blue Pigeon and Miss Gray Pigeon had been given a wedding feast by the children and they showed their thanks by being tame and by acting like real pets for their devoted children friends.

Wanted to Know.

Charles, aged five, having been told that baby sister had just arrived from heaven, marched into the room and said: "Now, Miss Baby, tell us all about heaven 'fore you forget it."

How the Airmen Fight.

The pitfalls and dangers which an aviator must avoid at the front are becoming more numerous every day. Anti-aircraft guns mounted on fast motor cars, chase around the country behind the lines and prevent the enemy airplanes and Zeppelins from remaining over our territory. This type of battery was responsible for the Zeppelins brought down at Compeigne in April, 1917, and Revigny, in April, 1916. In fact, this invention was one of the immediate causes of the Germans giving up their "strafing" with Zeppelins. The record for distance and height in hitting an airplane with this type of cannon is 15,000 feet in the air at 9,000 yards' distance across country. A very large crew is required to man one of these cannon. Besides the cannon a telephonist gets the report of the position over which the German machine is flying.—Carroll Dana Winslow, in Scribner's Magazine.

Different Methods.

The prison visitor on his usual rounds noticed that a new man occupied a cell that had been empty for some time.

"My friend," he began, "may I ask what brought you here?"

"The same thing that brought you here," replied the convict; "a desire to poke my nose into other people's business, only I generally used to go in by the basement window."

Rolling Rapidly.

Tom Moore called on Campbell one evening, and in the course of conversation Campbell mentioned a poem he had just composed and the manuscript of which he showed to Moore. It was entitled "The Battle of Hohenlinden," the last line of the first verse of which read:

"Of Iser rolling rapidly."

When Moore was departing he slipped on the stairs, which caused Campbell to ask:

"What's that? What's that?"

"I, sir, rolling rapidly!" instantly replied Moore.

Women frequently jump at conclusions that are anything but alarming.

A Medicine for Women

For Forty Years Lydia E. Pinkham's Vegetable Compound has Relieved the Sufferings of Women.

It hardly seems possible that there is a woman in this country who continues to suffer without giving Lydia E. Pinkham's Vegetable Compound a trial after all the evidence that is continually being published, proving beyond contradiction that this grand old medicine has relieved more suffering among women than any other medicine in the world.

Mrs. Kieso Cured After Seven Month's Illness.

Aurora, Ill.—"For seven long months I suffered from a female trouble, with severe pains in my back and sides until I became so weak I could hardly walk from chair to chair, and got so nervous I would jump at the slightest noise. I was entirely unfit to do my house work, I was giving up hope of ever being well, when my sister asked me to try Lydia E. Pinkham's Vegetable Compound. I took six bottles and today I am a healthy woman able to do my own housework. I wish every suffering woman would try Lydia E. Pinkham's Vegetable Compound, and find out for herself how good it is."—Mrs. Karl A. Kieso, 596 North Ave., Aurora, Ill.

Could Hardly Get Off Her Bed.

Cincinnati, Ohio.—"I want you to know the good Lydia E. Pinkham's Vegetable Compound has done for me. I was in such bad health from female troubles that I could hardly get off my bed. I had been doctoring for a long time and my mother said, 'I want you to try Lydia E. Pinkham's Vegetable Compound.' So I did, and it has certainly made me a well woman. I am able to do my house work and am so happy as I never expected to go around the way I do again, and I want others to know what Lydia E. Pinkham's Vegetable Compound has done for me."—Mrs. Josie Copner, 1668 Harrison Ave., Fairmount, Cincinnati, Ohio.

If you want special advice write to Lydia E. Pinkham Medicine Co. (confidential) Lynn, Mass. Your letter will be opened, read and answered by a woman and held in strict confidence.

WILSON ISSUES CALL TO BANKS

Sounds Toscin for All Financial Institutions of Country to Join Federal Reserve.

TO CONTROL RESOURCES

Trust and State Institutions Asked to Come Under Big System to Control Nation's Finances.

Washington, Oct. 17. — A call has been sounded by President Wilson for the mobilization of all the nation's gold reserve under the supervision of the Federal Reserve board.

In a statement the President called upon all eligible non-member state banks and trust companies to join the federal reserve system without further delay that they may contribute their share to the consolidated gold reserves of the country and aid more effectively in a vigorous prosecution and successful termination of the war.

Banks Flocking to System.

Scores of such institutions have flocked to the system within the past three weeks, among them some of the largest trust companies of Philadelphia, New York and other cities. Within less than three weeks, resources of such institutions in the system have risen from $1,200,000,000 to more than $2,600,000,000.

Liberty Loan financing, the resultant activity in the money markets, the effect of the government's huge financial transactions upon the bond markets and the stock exchanges of the country have made it imperative for the Federal Reserve board to control the country's gold reserve.

Extent of Control Far-Reaching.

With the board in daily control of the country's huge store of gold—at present more than $3,000,000,000—watching every avenue through which it may be lessened and vigilant in its supervision of the country's banking activities, officials believe that the financial position of the country may be made practically impregnable.

At present the board controls the activities of institutions representing only one-half of the country's total banking resources. The latest report of the comptroller of the currency places at several millions above $16,000,000,000 the resources of the banks within the system.

Since that report was issued, however, nearly $1,700,000,000 in resources have been added through the acquisition of new members. There are, however, between 8,000 and 9,000 eligible banks and trust companies, with resources estimated at from $12,000,000,000 to $16,000,000,000, entirely beyond the control of the federal government, because they are governed only by state laws.

PASSES $800,000,000 MARK

Second Liberty Loan Proceeds Nearer Goal.

Washington, Oct. 17.—The Treasury department estimates that subscriptions to the second Liberty Loan have passed the $800,000,000 mark, or 16 per cent of the $5,000,000,000 hoped for.

Unofficial and incomplete returns from eight of the 12 reserve banks, added to official figures from three of the other four banks, which are known to be less than actual subscription, show a grand total of approximately $705,000,000. The $800,000,000 estimate, which is thought to be liberal, it was said, included probably sales in the Minneapolis district from which no reports have been received and increases in the other three districts for which no fresh figures are available.

WAR FACTORY WANTS WOMEN

Eastern Munitions Plant Sends Out Call for 300 Laborers.

New York, Oct. 16.—A munition factory near here has sounded an urgent call for 300 women laborers.

"This is the first opportunity which American women have had to serve their country so directly," said Mrs. Strakosch, secretary of the employment section of the mayor's committee of women of national defense.

"We will be glad to do it."

56 LOST WHEN CRUISER SINKS

British Boat Goes to Bottom and Sloop Is Overdue.

London, Oct. 16.—The British armed mercantile cruiser Champagne has been sunk with the loss of five officers and 51 men, and the mine-sweeping sloop Begonia is overdue and regarded as lost with all hands, says an official statement.

Dancer and Spy Executed.

Paris, Oct. 16.—Mata-Hari, the Dutch dancer and adventuress, who two months ago was found guilty by a court martial on the charge of espionage, was shot at dawn. Mme. Mata-Hari, long known in Europe as a woman of great attractiveness and with a romantic history, was, according to unofficial press dispatches, accused of conveying to the Germans the secret of the construction of the British "tanks," this resulting in the enemy rushing work on a special gas to combat their operations.

SAVE FOOD AND LEND YOUR COIN

Hoover's Men Will Make Big Drive Throughout Nation for Sale of New Bonds.

YOU CAN HELP WHIP KAISER

Great Program Is Outlined for Food Pledge Week Campaign, October 21 to 28—Those Who Fight Must Be Fed.

Washington.—Ten million food conservation pledges! Twenty-two million homes visited! A national campaign projected so large in its scope that the work to be accomplished is as great as though a census of the country were to be taken in a week!

Such is the program outlined for the food pledge week campaign, October 21 to 28.

What is it all about?

Why so much fuss?

What are the motives back of such a tremendous drive?

In every state thousands of people are asking these questions while thousands of others are preparing themselves to furnish a complete answer to the query.

The reasons why the food pledge campaign has been projected upon such broad lines are simple enough; plain enough.

So simple and so plain that they have been stated in the compass of a card—a card that it is proposed to hang in every home of the land—a card that is the "war creed of the kitchen," because, so closely are the people in this country linked to the world war, that one of the phases of the struggle must be fought out in the American kitchen.

If soldiers are to fight they must be fed. For the past three years, one by one, our allies across the sea have been taking the men from the farm and from the factory and sending them to the firing line. Each man sent to the firing line meant one less who could be relied upon to help produce the food that "will win the war."

There are stores of wheat in Australia. There is food in South America, but ships are scarce. Time is a vital factor. The voyage to Australia and to South America takes too long. If the needs of those who fight for us across the sea are to be met, the food that sustains those fighters must come from this country.

If the laborer is worthy of his hire, surely the fighter is worthy of his food. That is a principle universally accepted by the American public! However, it is not every product that can be sent across the sea. Corn will not serve the need; our allies have never used it as a food; they have no mills to grind it; turn it into meal in this country and it would spoil before it could reach an European port. There are just four classes of products, the experts say, that we must send to our allies if our duty to them is to be discharged; they need meat, wheat, sugar and dairy products. We can conserve our wheat by increasing our consumption of other grains. We can conserve our meat by making a greater demand upon the resources of the fish market.

If the United States were an autocratic country there would be no popular appeal for the conservation of food. There would be an autocratic food control. The mailed fist would rule in the kitchen. Imperial food decrees would be enforced at the point of the bayonet. But ours is not an autocratic country. Food control is in the hands of the people themselves, and it is to the people that the food administration has appealed in the food pledge card campaign.

Herbert Hoover has termed this appeal an "unprecedented adventure in democracy"—an adventure that will determine whether or not a democratic form of government is, after all, fitted to engage in a death grapple with an autocracy.

The food pledge work campaign resolves itself into an effort to secure as a result of voluntary agreement pledges insuring the general support for a well defined program of food conservation. The food pledge week campaign represents an effort to induce as many of the American homes as possible to unite in a common policy. Our wheat reserves can be conserved if everybody helps.

The American people are asked to join together in a common conservation policy. As evidence that they are supporting this policy they are asked to hang a card denoting membership in the United States food administration in their window. In order that the conservation policy may be understood, the reasons for it made plain, and the manner of observing it rendered certain, Instruction cards—"The War Creed of the Kitchen"—are to be hung in the home.

And that is what the national food pledge week campaign is all about.

To Make a Cheap Filter.

In order to make a cheap filter, take a large flower pot and stop the hole in the bottom of it by placing a piece of sponge in it. Cover with a few inches of powdered charcoal, fill with water, and let it stand over a pail or tub supported by two or three sticks laid across. The water filtering through the charcoal will be freed from all impurities and will be fit for family use. The charcoal should be changed every three months and the sponge several times a year.

It's an outstanding feature of the war—"All the British Army is chewing it."

Wanted It Cut Down.

Mrs. Stickitt, a lady notorious for her saving habits, one morning entered the doctor's office, leading by the hand a stoutly-built boy nine years of age and of exceedingly healthy appearance.

"Well, Mrs. Stickitt," said the doctor, "who's my patient? I don't seem to recognize his face. Not a village boy, is he?"

"No, doctor; my nevvy from town."

"Not much wrong with him, I should say," laughed the doctor, pinching his red cheeks.

"It's about his appetite, doctor," said the boy's aunt in a low tone.

"What?" exclaimed the doctor, staring at the well-fed young patient. "Surely he doesn't need an appetizer?"

"Good gracious, no, doctor!" replied the lady, in horrified accents. "I want you to give me something to make his appetite less. He'll eat me out of house afore his month's holiday is up if his appetite ain't cut down!"

Too Late.

He was a great pedestrian, but one day his physical energy seemed to give out. Weary and worn and sad, he was beeginning to despair of finding rest and refreshment when a small wayside house came into view. The good lady of the house executed her commission to supply her visitor with eggs, toast and tea.

"May I open the eggs for you?" she asked, smilingly.

The young man nodded assent, but, although the shell looked well enough; appearances are often deceptive, and that egg would not have done credit to any self-respecting hen.

He drew back his chair with a sigh.

"Hasn't it been boiled long enough, sir?" queried the lady.

"Yes," he replied, wearily, "but it was not boiled soon enough."

Luck.

"Are you superstitious?"

"I believe some men are luckier than others. But I never in my life met one who would own up that he was lucky. So what's the difference?"

Friend, Indeed.

"Did you send flowers to his funeral?"

"No, I sent a fire extinguisher."

Uneasy lies the head that is full of schemes to get even with somebody.

"Of course not, ma'am. This is a flat."

Don't Neglect Kidneys

Swamp-Root, Dr. Kilmer's Prescription, Overcomes Kidney Trouble

It is now conceded by physicians that the kidneys should have more attention as they control the other organs to a remarkable degree and do a tremendous amount of work in removing the poisons and waste matter from the system by filtering the blood.

The kidneys should receive some assistance when needed. We take less exercise, drink less water and often eat more rich, heavy food, thereby forcing the kidneys to do more work than nature intended. Evidence of kidney trouble, such as lame back, annoying bladder troubles, smarting or burning, brick-dust or sediment, sallow complexion, rheumatism, maybe weak or irregular heart action, warns you that your kidneys require help immediately to avoid more serious trouble.

An ideal herbal compound that has had most remarkable success as a kidney and bladder remedy is Dr. Kilmer's Swamp-Root. There is nothing else like it. It is Dr. Kilmer's prescription used in private practice and it is sure to benefit you. Get a bottle from your druggist.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper. Adv.

The Alternative.

Prisoner—What are my chances?

Lawyer—If I can't hang the jury, you will.

Very Generous.

"Do you always let your wife have her own way?"

"Yes, and mine, too."

WHEN WOMEN GO TO WAR.

Plans for the registration of women for service in connection with the war are but giving official recognition to what the world has known from the beginning. Woman's part in war has always been of such importance that it is doubtful if any great campaign ever was carried on without her assistance, says Omaha Bee. Since civilization came to soften ways of living, the woman has not been called upon to do some things she was put at under savagery, but she has found new occupations whose pursuit is quite as essential. Such tasks as nursing the wounded, caring for the helpless and ministering in many ways to the wreckage of war come to her as a matter of course, as do the homelier but unavoidable duties of keeping things moving while the man goes forth to battle. What is now proposed is that these duties be co-ordinated as far as possible, and that the efforts of woman be systematized and made more effective by reason of orderly direction. That the women of America will respond to the effort of the government may be accepted as foregone conclusion, and that they will lag at any time may be put aside as out of the question.

A very foolish article in a newspaper on the subject of courting does express one fine idea, which is this: "To be a man among women you must be a man among men." There may be exceptions to this, for there are silly girls, but in the main it is true. Women do like a manly man, even in preference to a learned or interesting man. They love courage and strength of character, says Ohio State Journal. Whenever a man approaches them with a silly remark or a widespread anecdote, they don't think very much of him; if they did, people would not think very much of them. Manliness and womanliness are quite the same. They are made up of qualities that are a part of the foundations of virtue. Because a woman is beautiful and graceful is no reason why a man should forget his good sense and judgment while in her society. But really there are many men who don't look at it that way. Now watch the next occasion and see if this is not so.

The campaign to increase the nation's meat production, headed by a volunteer committee of 100 live stock men working in conjunction with the department of agriculture and Food Administrator Hoover, should lend an important stimulus to what will prove a profitable undertaking for producers as well as for consumers. Among other things, those interested in the work plan the transfer of thousands of head of cattle, sheep and hogs from the big western producing districts to small farms in central and southern states, where a great amount of feed goes to waste.

It is reported that the most popular book this summer is not fiction. It is the department of agriculture's pamphlet on canning, 1,850,000 copies of which have been distributed since the first of June. The second most popular work of the season is the department's pamphlet on home methods of drying fruits and vegetables, of which 1,200,000 copies have been called for. Third place has been won by the department's booklet on home gardening. There are a good many serious-minded people in the United States.

The Berlin Tages Zeitung argues that the evacuation of Belgium by Germany is impossible, for the reason that Belgium would be an irreconcilable enemy of Germany. In other words, this Berlin newspaper realizes that Germany has treated Belgium with an injustice that is unforgivable and dares not let the little nation get upon its feet, for fear of vengeance. It's a very damaging admission.

The day of the Zeppelin is over. But it will be long before its name ceases to be associated with raids on defenseless towns and the murder of helpless women and children. It has failed as the great military factor it was expected to be. It has succeeded in nothing but in fixing lasting ignominy upon itself and its inventor and sponsors.

The announcement that three Princeton professors have discovered a source of luminous pigment that produces a cold light with a remarkable penetrating power under water, which promises to be useful in submarine warfare, is made at the right time of the year.

A Frenchman says he has invented an airplane that cannot capsize, but still admits that it might come down in a hurry.

The least that the enemy within our borders could do would be to keep still, but that apparently, is the one thing he can't do.

Passenger cars that will not telescope have been invented. Now it remains to be seen what they will do.

The country's greatest problem is not to get courageous men to fight but the lazy scoundrels to work.

Who is minding the babies in England? Who is sewing on the buttons, making the beds, hanging out the wash and dusting off the piano top? We ask because 438,000 women have gone into manufacturing plants since the war came, says Philadelphia Telegram. And 308,000 have been absorbed by stores, offices and the like. Steam and electric railways have taken another 64,000. Apart from those in domestic service, 5,000,000 women are now helping to make the wheels of industry hum in Great Britain. More than a 1,250,000 men have been directly replaced by women since 1914. "Woman's place is in the home" used to be considered quite an argument. It now ranks with "the earth is flat."

So acute is the world shortage of platinum that the price has more than doubled since the beginning of the war. It was $45 an ounce. Now it is $105. War uses of platinum include the making of sulphuric acids and the completion of contact points of the ignition system of airplanes, automobiles and telephone and telegraph instruments. Substitutes have been found for it in the making of sulphuric acids, but for other uses it is almost indispensable. No wonder, therefore, that there is keen interest in the reports of the discovery of platinum in Alaska.

A San Francisco woman reported her son as a slacker, told the officers that the young man would not work, that he was a burden to her and begged them to compel him to enlist. Regardless of whether or not the woman was actuated by patriotic motives in the step she took, it is to be hoped that her son will be made worth while to Uncle Sam since he refuses to make himself useful to anybody else.

The outcome of the policy of exempting married men is likely to be the ultimate drafting of youths above nineteen years of age. Young men between the ages of nineteen and twenty-one were a formidable part of the forces that fought the Civil war.

It is said by next year the war will take so many doctors from this country that the shortage will be tremendous. That may benefit two ways—it will help to save the soldiers in France and at the same time enable a good many people at home to get well.

Honey is going up. This is not because the bees find it harder to pilfer sweets from flowers. It is because their owners are not averse to taking advantage of the advanced price of butter.

The germ of infantile paralysis has been located and identified again by the bug experts, but the cause and treatment of poliomyelitis remain a mystery.

The chances are that women are never as cool as they look to be in the summertime, nor as warm as they look to be in the winter time.

Don't let false pride betray you into misfortune. If the hash is homemade and properly constructed, go to it.

ROYALTY'S LAST CHANCE.

According to Premier Venizelos, Greece is giving royalty its last chance. If it gets drunk again with German militarism or tends to fall off the wagon of democratic constitutionalism it loses its job for all times in that little kingdom. Or, as he more diplomatically phrased it, "it is certainly the last experiment we are asking." Of course, this applies to the present and not to the king who has abdicated. As is well known, his case is beyond recall. He is apparently a hopeless militaristic inebriate. And though he will no doubt greatly improve from the forced rest cure he is at present taking, no one could think of again trusting him with the important and delicate machinery of government. Kings these days need a steady, democratic hand and a clear, constitutional head to hold their places successfully. The young Greek king will no doubt note carefully his conditions of employment, says Chicago Herald. And he should find nothing unreasonable in the popular demand that he sign a pledge to eschew as long as he lives the deleterious Teutonic potions that wrecked the old gentleman's prospects.

It remained for an American ship's cook to find a brand new method of attack on U-boats, says Rochester Democrat and Chronicle. An enemy submarine of the largest type on coming to the surface found itself almost rubbing sides with an American steamer. The unexpected encounter at such close quarters caused a sensation on board the ship and, presumably, also in the submarine. The cook on the steamer seized a kettle of soup and poured it over one of the U-boat's periscopes, no doubt hoping to becloud the lenses. The submarine hastily submerged, and it made no attempt to molest the ship. The grotesqueness of the incident does not conceal the spontaneous courage which is characteristic of American seamen in all circumstances.

Washington's Two Birthdays.

In 1582 Pope Gregory XIII ordered that all the Catholic countries should adopt a new calendar. This calendar was correct and is at the present time in general use throughout the world. In the year that the calendar was adopted ten days were dropped. Thus the day after October 4 of the Julian calendar became October 15 in the Gregorian. This calendar was not adopted by England until 1752. Washington being born in 1732, he was twenty years old at the time the new calendar was adopted. Thus his first 20 birthdays fell on the 11th of February and the others fell on the 22nd.

Among other economy ideas that might be energetically pushed with public approval is a reduction in gasoline consumption and wear and tear on automobile parts by the obedience to the speed laws.

Any persons who may have enlisted in the hospital units to escape the danger naturally incidental to war are, from recent reports, likely to be badly disappointed.

Star Notes

Frank Race was a business caller at Thief River Falls Thursday.

Tharald Tharaldsen was in Goodridge Friday.

Miss Louise Fursetnan who formerly taught in district No. 5, Star twp., is teaching the school near Torgerson this year.

Miss Diana Wold is again at her post in school No. 1 after taking in the teachers' meeting, held at Thief River Falls the past week.

Peter Meyer chaperoned Miss Rude, teacher in district 56, to Goodridge Friday of last week, from whence Miss Rude departed for Thief River Falls to attend the teachers' conventiont

A lively runaway took place on the "Brown" grade Sunday afternoon. Someone was hauling lumber with the lines trailing under the front axle. The horses went in full gallop up grade while the driver was perched on the back end of the load and did not dare to move.

Iver P. Morstad and Julius J. Wold came over by auto from Grand Forks last Sunday for a brief visit with their cousins' Mrs, H, A. Dahlen and H. C, Iverson. The latter accompanied on their return to the "Forks" the same evening.

Ellev Aakre and son were in Goodridge with three head of cattle Friday.

Peter Meyer was a pleasant caller at "Camp Sub Urban Sunday.

H. C. Iverson returned from Grand Forks Friday evening having enjoyed a visit with his cousins and consulted the eye specialist during the week, while there.

Oliver Tommerdahl transacted business in Goodridge Friday.

Christ Odegaard motered to the county seat to attend to business Friday of last week.

People are now waiting to know whether black diamonds will be classed as necessities or luxuries.

What can be done to the vegetarian in place of meatless days?

WHEN WOMEN GO TO WAR.

Plans for the registration of women for service in connection with the war are but giving official recognition to what the world has known from the beginning. Woman's part in war has always been of such importance that it is doubtful if any great campaign ever was carried on without her assistance, says Omaha Bee. Since civilization came to soften ways of living, the woman has not been called upon to do some things she was put at under savagery, but she has found new occupations whose pursuit is quite as essential. Such tasks as nursing the wounded, caring for the helpless and ministering in many ways to the wreckage of war come to her as a matter of course, as do the homelier but unavoidable duties of keeping things moving while the man goes forth to battle. What is now proposed is that these duties be co-ordinated as far as possible, and that the efforts of woman be systematized and made more effective by reason of orderly direction. That the women of America will respond to the effort of the government may be accepted as foregone conclusion, and that they will lag at any time may be put aside as out of the question.

A very foolish article in a newspaper on the subject of courting does express one fine idea, which is this: "To be a man among women you must be a man among men." There may be exceptions to this, for there are silly girls, but in the main it is true. Women do like a manly man, even in preference to a learned or interesting man. They love courage and strength of character, says Ohio State Journal. Whenever a man approaches them with a silly remark or a widespread anecdote, they don't think very much of him; if they did, people would not think very much of them. Manliness and womanliness are quite the same. They are made up of qualities that are a part of the foundations of virtue. Because a woman is beautiful and graceful is no reason why a man should forget his good sense and judgment while in her society. But really there are many men who don't look at it that way. Now watch the next occasion and see if this is not so.

The campaign to increase the nation's meat production, headed by a volunteer committee of 100 live stock men working in conjunction with the department of agriculture and Food Administrator Hoover, should lend an important stimulus to what will prove a profitable undertaking for producers as well as for consumers. Among other things, those interested in the work plan the transfer of thousands of head of cattle, sheep and hogs from the big western producing districts to small farms in central and southern states, where a great amount of feed goes to waste.

It is reported that the most popular book this summer is not fiction. It is the department of agriculture's pamphlet on canning, 1,850,000 copies of which have been distributed since the first of June. The second most popular work of the season is the department's pamphlet on home methods of drying fruits and vegetables, of which 1,200,000 copies have been called for. Third place has been won by the department's booklet on home gardening. There are a good many serious-minded people in the United States.

The Berlin Tages Zeitung argues that the evacuation of Belgium by Germany is impossible, for the reason that Belgium would be an irreconcilable enemy of Germany. In other words, this Berlin newspaper realizes that Germany has treated Belgium with an injustice that is unforgivable and dares not let the little nation get upon its feet, for fear of vengeance. It's a very damaging admission.

The day of the Zeppelin is over. But it will be long before its name ceases to be associated with raids on defenseless towns and the murder of helpless women and children. It has failed as the great military factor it was expected to be. It has succeeded in nothing but in fixing lasting ignominy upon itself and its inventor and sponsors.

The announcement that three Princeton professors have discovered a source of luminous pigment that produces a cold light with a remarkable penetrating power under water, which promises to be useful in submarine warfare, is made at the right time of the year.

A Frenchman says he has invented an airplane that cannot capsize, but still admits that it might come down in a hurry.

The annual meeting of the Northwestern Minnesota Educational Assn. will take place at Thief River Falls on Thursday and Friday, Nov. 15 and 16, 1917. The two days and evenings will be filled with interesting programs and entertainments. Speakers of state and national reputation will appear, and every phase of educational work will be represented in the round tables and sectional meetings. Ample provisions will be made locally for room and meals for all who attend. On Friday, the school officers of Pennington and eastern Marshall county will hold their annual meeting in conjunction with the teachers.

Further particulars will be announced in later issues of this paper and programs may be secured from the officers.

Stenvick-Hefta.

On Wednesday October 17th at 11 o'clock a. m. at the Torgerson church, occurred the marriage of Miss Alma Syverina Stenvick to Mr. Albert G. Hefta of Portland, N. D., Rev. Bjorn- performing the ceremony.

The bride is the daughter of Mr. and Mrs. John Stenvick of Reiner township and is well and favorably known here. She was attired for the ocasion in a beautiful gown of chiffon taffeta.

The groom is not so well known here but he should consider himself lucky in securing one of Pennington county's charming young ladies for his companion thru life.

Miss Julia Stenvick and Miss Clara Hefta were bride's maids and were prettily attired in dresses of silk Marquisette.

Alfred and Oscar Stenvick fulfilled the duties of best men.

After the ceremony was over a seven course dinner was served at the home of the bride, only a few of their intim- friends being present.

The young couple left Saturday for Portland, N. D., where they will make their home. Congratulations.

Literary Program.

For the meeting next Thussday eve., November 1st.

Four Buildings Destroyed by Fire At Grygla.

Four business buildings were completely destroyed by fire Monday afternoon. The fire, which originated in the Willard cafe, wiped out that building, the pool hall, the Olson Implemen Co's building and a livery barn. All the contents of the buildings were saved, with tne exception of some of the furniture in the up stairs of the cafe. The loss is partly covered by insurance.

Opens Up Watch and Jewely Repairing Shop.

Rosaire Morin opened up his watch and jewelry repair shop Wednesday in the M. J. Stephenson building and is now in shape to do all kinds of repair work. Mr. Morin has put in a first class outfit here and can handle any kind of a job, whether large or small. He is a man with several years experience, having worked at the business in Crookston and Grand Forks. When in need of repair work don't take it out of town but give Mr. Morin your work.

Star Notes

Some snow storm, and what will the "Injun Summer" be.

Geo. S. Baird and Theo. Hyland transacted business in Goodridge Friday.

H. C. Iverson called at the Theo. Hyland home Friday afternoon.

No mail reached Erie Friday of last week on account of the snow deluge. Mr. Strande, carrier, could make only six miles and was obliged to return.

G. A. Iverson, who has been at work near Michigan, N. D. during fall months, returned home the latter part last week.

Zakarias Hole is busy cutting a tunnel through the snow.

Miss Dena Wold spent the week end at her home east of Kratka.

Theodore Hyland has recently purchased the Ole Roe farm in N. E. Star. Consideration twelve hundred dollars.

Attention Farmers

There never was a time when it paid the farmer to do good plowing more than today but good plowing cannot be done with a poor plow. POOR PLOWING invariably means POOR CROPS. Considering the fact that prices for all kinds of farm produce are bound to be high for a long time to come you cannot afford to use anything 2hort of the best plow to be had. In the Emerson Line, whether Walking Plows, Sulkies, or Gangs, we maintain we have the lightest draft, the easiest to handle and most durable plow line on the market. Come in and let us tell you why.

The annual meeting of the Northwestern Minnesota Educational Ass'n will take place at Thief River Falls on Thursday and Friday, Nov. 1 and 2, 1917. The two days and evenings will be filled with interesting programs and entertainments. Speakers of state and national reputation will appear, and every phase of educational work will be represented in the round tables and sectional meetings. Ample provisions will be made locally for rooms and meals for all who attend. On Friday, the school officers of Pennington and eastern Marshall county will hold their annual meeting in connection with the teachers.

Further particulars will be announced in later issues of this paper, and programs may be secured from the officers.

Stenvick-Hefta.

On Wednesday October 17th at 11 o'clock a. m. at the Torgerson church, occurred the marriage of Miss Alma Syverina Stenvick to Mr. Albert G. Hefta of Portland, N. D., Rev. Bjornson performing the ceremony.

The bride is the daughter of Mr. and Mrs. John Stenvick of Reiner township and is well and favorably known here. She was attired for the ocasion in a beautiful gown of chiffon taffeta.

The groom is not so well known here but he should consider himself lucky in securing one of Pennington county's charming young ladies for his companion thru life.

Miss Julia Stenvick and Miss Clara Hefta were bride's maids and were prettily attired in dresses of silk Marquisette.

Alfred and Oscar Stenviek fulfilled the duties of best men.

After the ceremony was over a seven course dinner was served at the home of the bride, only a few of their intimate friends being present.

The young couple left Saturday for Portland, N. D., where they will make their home. Congratulations.

Literary Program.

Four Buildings Destroyed by Fire At Grygla.

Four business buildings were completely destroyed by fire Monday afternoon. The fire, which originated in the Willard cafe, wiped out that building, the pool hall, the Olson Implemen Co's building and a livery barn. All the contents of the buildings were saved, with tne exception of some of the furniture in the up stairs of the cafe. The loss is partly covered by insurance.

Opens Up Watch and Jewely Repairing Shop.

Rosaire Morin opened up his watch and jewelry repair shop Wednesday in the M. J. Stephenson building and is now in shape to do all kinds of repair work. Mr. Morin has put in a first class outfit here, and can handle any kind of a job, whether large or small. He is a man with several years experience, having worked at the business in Crookston and Grand Forks. When in need of repair work don't take it out of town but give Mr. Morin your work.

INTENTIONAL DUPLICATE EXPOSURE

U. S. TRANSPORT LOST WITH 70 AMERICANS

The Antilles, Homeward Bound, From France, Torpedoed --Diver Not Sighted.

167 MEN ARE RESCUED

Single Torpedo Hits Ship in Middle, Cutting It in Two—Sixteen Returning Soldiers Among Those Lost.

Washington, Oct. 22.—The Antilles, an American army transport, homeward bound under convoy, was torpedoed and sunk by a German submarine in the War zone Wednesday.

About 70 men are missing and probably lost.

All the army and navy officers aboard and the ship's master were among the 167 survivors. The missing are members of the crew, three civilian engineers, some enlisted men of the navy and 16 out of 33 soldiers returning home for various reasons. Neither the submarine nor the torpedo was seen and the transport, hit squarely amidships, sank in five minutes.

Largest U. S. Casualty List of War.

This tragedy of the sea, the first in which an American ship engaged in war duty has been lost, is the first of its magnitude to bring home to the people of the United States the rigors of the war in which they have engaged against Germany. It carries the largest casualty list of the war of American lives and marks the first success of German submarine attacks on American transports. That the loss of life was not greater was due to the safeguards with which the navy has surrounded the transport service and the quick rescue work of the convoying warships.

Secretary Daniels announced the disaster in a statement based on a brief dispatch from Vice Admiral Sims, which gave few details and did not say whether it was a day or night attack. An accurate list of the missing cannot be issued until General Pershing reports the names of the army men on the vessel and the list of the merchant crew.

Families of Lost Men Notified.

Upon receipt of the cablegram from Admiral Sims the government kept its promise not to withhold bad news from the public. The issuance of the statement was delayed only until the navy could telegraph to the families of the men known to have been lost.

Secretary Daniels carried word of the loss of the Antilles to the White House when he went there with Admiral Mayo, who made his report to the President on his visit to England on the direction of the President. The news added to the gravity of the hour that the Secretary and Admiral Mayo spent in conference with the President.

Few Soldiers Aboard.

Quick upon the wave of sorrow at the loss of the transport came a feeling of distinct relief because she had met her fate homeward bound and not on the way over with the troops. The only soldiers on board were returning to the hospital or on special assignment. Had the full complement of the transport been aboard, the loss undoubtedly would have been written in hundreds, as she was struck in the most vulnerable spot and went under so swiftly that few could have escaped.

Officials are confident that those who survived owe their lives to the careful attention given by the Navy department to the equipping of transports with life boats and life rafts. It is a fixed rule that enough boats and rafts shall be carried to afford a place for every man aboard, even though the ship keels over and put half her boats out of commission.

Missile Hit Engine Room.

The loss of the ship's engineer officers indicates the probability that no one of the engine and fireroom forces on duty escaped. Probably most of them died in the blast of the explosion of the torpedo which tore its way into the engine room compartments.

The heavy loss among the army enlisted men indicated cannot be accounted for until further details come in. Probably they and the navy men were in their quarters below and could not make their way on deck before the ship took her final plunge. The army, navy and ship's officers and the others rescued were probably on deck, or in cabins, from which a step took them to the decks and a chance for their lives.

Think U-Boat Lay In Wait.

Lacking details of the attack, beyond the fact that the submarine was unseen and that the first warning to those aboard the Antilles came with the shock of the explosion of the torpedo, many theories were current as to how the U-boat crept through the destroyer screen, did its work and escaped unchallenged.

A majority of the officers who would comment thought the transport and her convoying patrols had ran directly over a lurking submarine, which saw them coming, calculated the distance and launched her deadly torpedo without ever showing more than her periscope. They regard it as probable that the U-boat commander picked his place, lay in wait below the surface until his microphones told him the patrols had passed and the transport was upon him, then shot his periscope above water only long enough to sight and fire before he ducked back to safety.

Rescue Work Prevents Pursuit.

Any attempt to locate the submarine probably was made impossible by the necessity of rescuing the survivors. The vessel must have been virtually torn in half by the explosion to have gone down in the time she did.

Probably the attack was made well out at sea. It took two days for the news to reach Washington and the dispatch shows the time that must have elapsed before definite word could reach Admiral Sims. The survivors are believed to be already safe ashore somewhere in France or England.

So far as known, no high officers of the army or navy were due to return on the Antilles. There is no definite information on that point, however, as only General Pershing knows who was sent home on the ship. The reports so far show that a number of army officers and 33 enlisted army men were aboard. Evidently Admiral Sims rushed his tidings off before he communicated with General Pershing.

Is First Transport Hit.

The loss of the Antilles marks the first reduction of the transport fleet that has been operating. A very considerable number of American troops, workmen and others involved in the prosecution of the war have been carried safely to France and England and the unsuccessful attack on the first contingent is the only recorded previous instance where the U-boats have succeeded even in catching sight of the vessels.

First American Casualty List

Washington, Oct. 21.—Secretary of the Navy Daniels has authorized the following statement with regard to the loss of the army transport Antilles:

"The department is in receipt of a dispatch from Vice Admiral Sims which states that the steamship Antilles, an army transport, was torpedoed on October 1 while returning to this country from foreign service. This vessel was under convoy of American patrol vessels at the time.

"All the naval officers and officers of the army who were on board the ship at the time were saved as were the officers of the ship with the exception of the following:

"Walker, third engineer officer.

"Boyle, junior engineer officer.

"O'Rourke, junior engineer officer.

"The following enlisted naval personnel were lost:

"E. L. Kinzey, seaman, second class; next to kin Thomas M. Kinzey, father, Walter Valley, Miss.

"J. W. Hunt, seaman, second class; next of kin, Isaac Hunt, father, Mountain Grove, Mo., R. F. D. No. 2, Box 44.

"C. L. Ausburn, radio electrician, first class; next of kin, R. Ausburn, mother, 2800 Louisiana avenue, New Orleans.

"H. F. Watson, radio electrician, third class; next of kin Mrs. W. L. Seger, mother, Rutland, Mass.

"There were about 33 of the army enlisted personnel on board, of whom 17 were saved. The names of the missing army enlisted personnel and of the merchant crew of the ship cannot be given until the muster roll in France of those on board has been consulted. As soon as the department is in receipt of further details concerning the casualties, they will be made public immediately."

Coal Situation In N. Y. Serious.

Albany, N. Y., Oct. 20.—The coal and labor situation in New York state is serious, C. H. Betts, secretary of the state food commission, announces. The commission will demand quick federal action for the relief of the situation in the belief that if something is not done immediately production will be curtailed greatly next year.

Antilles Was Crack Liner.

New York, Oct. 21.—The Antilles, a freight and passenger steamship of 6,876 tons gross, owned by the Southern Pacific Steamship company (Morgan line), was one of the crack American coast liners. She plied between New Orleans and New York and had carried thousands of persons to the Mardi Gras celebration. The vessel was taken over by the government as a transport early in the war. Captain H. F. Boyde, master of the Antilles, retained his command.

Was First In Town To Enlist.

Rutland, Mass., Oct. 21.—Herbert F. Watson, who was lost on the transport Antilles, was the first Rutland boy to enlist after war was declared, having joined the navy April 8. His mother, Mrs. Wallace L. Segar, was prostrated by the news. Young Watson was 23 years old. He was born in Norwich, Conn. He had been employed in the office of a large Worcester concern and learned radio operating during his spare time.

SUPPLY OF POTATOES ARRIVES AT AMERICAN CAMP IN FRANCE AND BOYS GET BUSY AT PEELING

Although Uncle Sam's boys in France enjoy eating potatoes, very few of them enjoy peeling the "spuds." When this supply of potatoes arrived in camp, a jolly crew of troopers were appointed to greet the "spuds" and relieve them of their coats, which task they are going to with vim. This official French photograph just arrived in this country and is the latest showing our boys in France.

APPEAL TO U. S. FOR AID

Hundreds Starving In Poland and Lithuania, Is Report.

Children Dying on Streets of Warsaw Declares Commission Investigating Conditions.

New York, Oct. 24. — Hundreds of persons are literally starving to death in the streets of Warsaw and other cities in Poland Lithuania, according to cablegram reaching here from the American legation at Cophenhagen through the state department.

The provisional executive committee for general Zionist affairs, which received the message, announced it would place the situation before the president.

The cablegram informs the Zionists that a commission from the municipality of Warsaw arrived at Copenhagen for the purpose of requesting the president to issue a special appeal to the American people for help. The cablegram reads, in part:

Children Die on Streets.

"The Warsaw commission reports that the situation in Poland and Lithuania is desperate. Mortality from diseases and epidemics progressing horribly. There are frequent instances of old men and women and young children dying on the streets from starvation. Entente armies suffer great misery.

"The only thing that can save the population is the creation of a relief action similar to that taken in behalf of Belgium. The humane feelings of the noble American people and of their great president is the last hope of this helpless, starving people, whom it implores shall treat them as they treat Belgians.

Relief Action Sought.

"The commission hopes to obtain from the Entente the necessary guarantees which will enable the American people to send relief and states it has prospects of obtaining the necessary tonnage to bring salvation to them."

ANOTHER HEARING FOR ROADS

Request for 15 Per Cent Raise in Rates to Be Heard.

Washington, Oct. 23.—Railroads of the Eastern district will have another opportunity on November 5 in Washington to convince the Interstate Commerce commission they should have a 15 per cent increase in freight rates. The 15 per cent case has not been closed, the commission last night advised the railroads, through their attorney, George Stuart Patterson of Philadelphia.

War conditions must be met, the commission held, and if the railroads need more money to meet them, they are least entitled to a hearing.

NO EXEMPTION FOR FARMERS

Suggestion Is Scorned by the Food Board.

Washington, Oct. 22. — Resolutions adopted recently by the California fruit exchange setting forth that farmers, handicapped by shortage of labor, proposing a national movement to convince President Wilson of the necessity of exempting farmers as a class from the army draft, have drawn a sharp reply from the food administration.

To Raise $500,000 for War Work.

Chicago, Oct. 20.—The special session of the house of bishops of the Protestant Episcopal church had before it the election of a successor to Bishop Griswold, former head of the missionary district of Salina, Kan., and the selection of a suffragan bishop of South Dakota. The question of calling a special meeting for "spiritual counsel and conference" also was to be considered. A fund of $500,000 will be raised by the church for war work, it has been decided by the convention.

RUSSIAN FLEET ESCAPES ENEMY

Successful Dash Is Made From German Trap in Moon Sound.

OSTEND IS ATTACKED

German Submarine Base There Is Heavily Bombarded—Allied Artillery Continues to Pound Teutons.

Petrograd, Oct. 23.—According to an official communication issued by the Marine department, the Russians have succeeded in getting all their ships, except observation elements, out of Moon Sound without losses and in perfect order.

The communication says that Oesel and Moon Island have definitely passed into the hands of the Germans.

Ostend Bombarded.

London, Oct. 23.—British naval craft have heavily bombarded the port of Ostend, Belgium, which is being used by the Germans as a submarine base. The Berlin official communication says numerous houses in the town were damaged by the shells from the naval guns.

Germans Take Dago Island.

The Germans have captured the entire island of Dago, at the entrance to the Gulf of Finland, and also the island of Schildau, situated in the Gulf of Finland. Several hundred prisoners were taken on Dago island to be added to the large number captured during the last week on Oesel island.

Wanted for Special Service.

New York, Oct. 23.—An appeal for volunteers for the "Gas and Flame Service" regiment of the United States army was issued here by Major Earl J. Atkinson, who will command a battalion. Chemists and machinists are specially needed.

* * *

BRIEF OUTLINE OF NEW PLAN FOR ARMY DRAFT

Those registrants not already certified or exempted will be sent what the government calls a "questionnaire."

Each will be required to give information on which the government will determine the relative liability of the registrant to service.

Those replying will be divided into five classes, the first of which will embrace unmarried men not needed in the industrial conduct of the war.

Other classes will be determined on the basis of dependency claims and fitness for military service. In the last class will be those physically unfit and heads of families.

Calls for active service will be on the basis of these returns but every facility for appeals will be provided, the government furnishing a lawyer to aid the registrant.

When the next call may be made is not revealed.

* * *

New Army Units Authorized.

Washington, Oct. 22.—Army orders authorize organization of a remount service, a veterinary corps for the national army, 100 additional machine shop truck units for the quartermaster's corps and three additional units of the Graves registration service. Thirty-three auxiliary remount depots are authorized for national guard army cantonments. One animal embarkation depot for duty at an embarkation port is authorized and one field remount depot of the same character is planned for duty in France.

VICTIMS OF AIR RAIDS

Mother and Seven in Family Killed By Teuton Bomb.

Another Mother Burned to Crisp Though Children Sleeping With Her Are Rescued.

London, Oct. 23.—It is just revealed how, in the last German air raid over London, bombs dropped by Zeppelins killed a mother and seven children in one family and brought death to another mother sleeping with her two babies.

Asleep in Home.

The mother and her family of seven were asleep in their home in the London downtown district. A bomb struck the house, destroying it. A lodger was killed at the same time. None of the bodies has been recovered.

Eight bombs were dropped in a small town outside of London. One went through the roof of a workman's home and entered a home where the wife and her two babies were asleep. The mother was burned to a crisp. The children were rescued after they had been severely burned.

Workmen's Homes Razed.

In a populous London district one of the explosive bombs demolished a row of workmen's cottages.

It is reported from an eastern county that seven Zeppelins remained overhead there for several hours last night and dropped fifty bombs, including a number of incendiary nature.

THREATEN TO SERVE POISON

I. W. W. Promise That or Dynamite at Banquet.

San Francisco, Oct. 23.—Threats to turn the banquet in honor of Congressman Julius Kahn into a "poison feast," such as Jean Crone plotted in Chicago a few years ago, have been received by prominent San Franciscans in charge of the affair, it is learned.

United States Circuit Judge W. W. Morrow, who is to be toastmaster at the banquet, turned over to the federal secret service men a letter received by him, which read:

"We will get you by poison or dynamite if you attend the banquet."

The letter was written in red ink. At the top were the letters "I. W. W." and at the bottom a skull and crossbones, crudely drawn.

Similar letters are reported to have been received by United States Senator Phelan, Major General MacMurray, Benjamin Ide Wheeler and others.

GERMANS PLAN AIR DRIVE

Prisoners Tell of Preparations—New Bomb Carrier Devised.

Paris, Oct. 23.—Germany is preparing a great air offensive to forestall America's entrance into the war, the Paris Temps declares. Prisoners declare the July production of airplanes in German factories totaled 2,000. A new four engine biplane, capable of carrying 660 pound bombs, has been devised.

Kaiser Dines With Sultan.

Constantinople, Oct. 23.—Emperor William attended a banquet at the Palace of Dolmabagtche. The guests included Sultan Mohammed V, all the Turkish princes and members of the cabinet, and Dr. Richard von Kuehlamann, German foreign secretary.

Ask to Join Federal Reserve System.

Washington, Oct. 23.—Seventy state banks and trust companies, among them some of the largest in the country, have joined the federal reserve system, or made application for membership, since October 1. Applications continue to come into the board at the rate of three to five a day and a decided increase in this number is expected within a short time. Thirteen of the seventy institutions have bee admitted. No applications were announced from the Minneapolis, Kansas City or Dallas districts.

BUTCHER WOMEN ON NORSE SHIPS

Raiders Fire Ruthlessly on Attacked Merchantmen and Life Boats.

DEATH REPLY TO PLEA

Germans Fire Volley at Women Who Wave White Cloth—No Effort Made to Spare Lives in North Sea.

Stockholm, Oct. 24. — Two German cruisers and three torpedo boats fired ruthlessly on Scandinavian merchantmen and subsequently on their lifeboats, according to newspaper accounts of the attack by German raiders on convoys in the North sea. No effort was made to spare the lives of the seamen.

Fought Single Handed.

London, Oct. 23.—The British destroyer Mary Rose fought single handed against the German cruisers in the convoy section in the North sea according to a story ascribed to a British officer rescued off Bergen and transmitted by the Christiania correspondent of The Times. The other destroyer, which should have been present, never appeared, and it is thought likely that it was destroyed at the beginning of the action.

Butchery Undescribable.

After fighting heroically for half an hour during which she was subjected to the most terrific concentric fire, the Mary Rose sank. Ten members of the crew were rescued.

The correspondent says that the reports of the butchery of those aboard the merchantmen pass description. Two women on one ship waved a piece of white cloth which was perfectly visible. They were silenced by a volley from the German cruiser.

LOOK FOR BREAK WITH KAISER

Mexico Expected to Sever Relations at Early Date.

Mexico City, Oct. 23.—Mexico will sever relations with Germany within a very few days if the present plan of the vast majority of senators materializes. That it will materialize is not doubted in any quarter.

At a private meeting the senators discussed the bill introduced, urging the government to declare benevolent neutrality toward the Allies. After a number of important speeches the senators agreed to go as far as severing relations. It is believed that a resolution to this effect will be voted by the Senate very soon. Public opinion throughout Mexico has taken a sharp and decided turn in favor of the Allies and the new sentiment is growing stronger daily.

WANT CHANGE IN AIR MINISTRY

British Want Immediate Action Against Teuton Raids.

London, Oct. 23.—British pride, stung by the German coup in the Baltic sea, during which two destroyers were sunk, and by the last Zeppelin raid in which 27 persons lost their lives, clamored for governmental changes that will insure immediate reprisals on Germany and a sharp stiffening of British naval aggressiveness.

Long articles in the Times and Observer demand no further delay on the part of the government in announcing the formation of a new air ministry.

Italian Aviator Makes Record Flight.

Mineola, N. Y., Oct. 23.—Carrying eight passengers, Lieutenant Silva Resnat arrived at the government aviation field in his Caproni biplane at 4:21 o'clock, completing a flight of about 325 miles from Hampton, Va., in 4 hours 11 minutes. According to officials of the Aero Club of America, the flight breaks all records in the United States for machines carrying two or more passengers.

To Close Russian Military Schools.

Petrograd, Oct. 23.—The war minister has ordered that new pupils be not admitted to the military schools. These will all be closed as the pupils complete their studies.

12,000 Deserters in Switzerland.

Washington, Oct. 23.—More than 12,000 German deserters have found refuge in Switzerland, according to the Swiss paper Bunduj, official Rome cables assert.

* * *

BOB FITZSIMMONS DIES

Chicago, Oct. 23.—Robert Fitzsimmons, former champion heavyweight pugilist of the world, died at a hospital here of pneumonia.

* * *

Trying to Adjust Scale.

San Francisco, Oct. 23.—Members of the Federal Shipbuilding Labor Adjustment board are in San Francisco to draw up a permanent wage and work scale for the 30,000 metal trades workers here who recently called off a strike, pending adjudication of their demands. The board last week induced 17,000 striking shipyard employes in Seattle to consent to return to work, and an effort will be made to frame an agreement acceptable to employers and employes of all Pacific coast shipping yards.

"CONTRABAND"

A Romance of the North Atlantic

by RANDALL PARRISH
AUTHOR of "MY LADY of the NORTH," MAID of the FOREST," ETC.

COPYRIGHT A.C. McCLURG & CO.

M'CANN TRIES TO BRIBE THE CREW TO RETURN TO NEW YORK—HOLLIS IS FORCED TO MAKE HIM PRISONER.

Synopsis—Robert Hollis, who tells the story, is a guest on Girard Carrington's yacht, Esmeralda. It is supposed to be a "stag" party, and Hollis is surprised on discovering a woman, who evidently wishes to remain unknown, aboard. She merely tells him her name is Vera. Carrington tells his guests of the coming war, and that he is engineering a copper pool. The yacht is sunk in a collision and Hollis saves McCann, millionaire, and one of the party. Hollis and McCann rescue Vera and leave the ship in a small boat. McCann refuses to submit to the authority of Hollis, and the latter enforces obedience. The castaways are sighted by a ship, the Indian Chief, which takes them aboard. The vessel is badly storm damaged. All officers are dead. Bascom, the owner, says he is taking a cargo of ammunition to Germany. Hollis consents to take charge of the ship and continue the voyage.

CHAPTER XI—(Continued.)

—8—

"The glass is falling rapidly," I answered, "and I suspect a storm is brooding behind that curtain; that is why I am so anxious to make all clear. What do you think of the crew?"

She glanced aside toward the motionless negro at the wheel, and then at the men shuffling about their work.

"I—I hardly know; they—they look awfully rough and—and disreputable. Weren't some of them drunk?"

"No doubt, yes. Don't worry, Miss Vera. Those things are frequent enough on shipboard. We will have these lads thoroughly tamed within another twenty-four hours. There is never a mutiny without some leader and a better cause. I am working under your orders, you know."

She glanced up quickly into my face.

"Under my orders? No, not that, Mr. Hollis. You told me it would be your choice; I merely granted permission."

"Your permission was equivalent to an order. I so accepted it."

"But that is hardly fair. Not that I regret the choice, for I could never have forgiven myself if my selfishness had ruined Philip Bascom. He is really an old friend."

"So I supposed; a very interesting man in spite of his misfortune."

"He was, indeed, before that bullet wrecked him. It is sad; and to think that the one who shot him is actually on board—his guest."

"Not altogether a pleasant thought to me," I said soberly. "For McCann is the kind to breed more trouble if he can find an excuse."

"You do not consider the man dangerous?"

"Not in the sense you mean. He will never attack openly, or permit himself to be known in any conspiracy. But he will have to be watched, nevertheless. He is the sort to harbor revenge, and as he feels hatred and distrust toward both Bascom and myself, we cannot be too careful. I shall have to tell Leayord the whole story."

"Leayord?"

"The man I named for first officer; he is standing abaft the foremast yonder."

"The second officer is a Swede?"

"Yes; rather young, but I like his face, and he seems to have the respect of the men." I turned and gazed into the face of the compass, already lighted.

"What is your name?" I asked of the black at the wheel.

"Watson, sah; Charles Watson."

"Well, Watson, let her head fall off a couple of points—that's it, my man. Is this the signal cord to the engine room?"

He nodded, the whites of his eyes showing oddly, and I rang for an increase of speed. Watson, bracing the wheel with one knee, wiped his lips on his sleeve.

"Am yo' shorely aimin' fer ter sail dis yere ship long ter Hamburg, sah?" he asked cautiously.

"You heard what I said to the men?"

"Yas, sah, I done heerd dat. But I thought maybe I best tell yer, sah, that thar's sure a bad lot forward, an' they's plum set against goin' no farther."

"A bad lot, hey? And who seems to be the leader, Watson?"

He scratched his head.

"Wal, sah, there's two or three who has a lot ter say, but I sorter reckon as de real boss is a white pusson call' Liverpool Red—he dun started ter knife me night afore last, and if I hadn't done got outer that right lively, I reckon I'd bin a dead nigger sure."

"What objection does this fellow and the others with him have to finishing this voyage?"

"Wal, mostly at first it was just ord'nary cussidness, sah; but now they got the war ter harp about, dat Liverpool is a-playin' it up ter beat all, sah. He says this ship is loaded with war stuff, and bound ter be sunk or captured; am dat so, sah?"

"We have a miscellaneous cargo," I answered, "and some of it might be contraband. But it was shipped before war was declared, and we have ample time to reach port before the establishment of a blockade. There will be no trouble, Watson, if the men only do their duty. You let them know that I said so when you go forward."

"Yas, sah."

I left him, and walked over to the rail, realizing keenly the position of peril into which I had drifted. With a loyal crew my task would prove no easy one, but with a crippled ship, and the men already on the verge of mutiny, the situation was almost desperate.

CHAPTER XII.

The Crew Grow Ugly.

For a moment I remained forgetful of the presence of the girl on deck. There was but one course to pursue—at the very first evidence of disobedience I must assert full authority. There must be no hesitation, no sign of weakness. Even as this crystallized in my own mind, the girl's hand touched the sleeve of my jacket.

"Supper is ready, Mr. Hollis," she said. "Are you not coming down?"

"Very shortly. I will have the men knock off work, and leave the mate in charge of the deck."

"What were you thinking about so earnestly? You actually forgot me."

I glanced aside into her eyes.

"Not guilty, Miss Vera; I was thinking of you, and of how I could get you safely out of this scrape. I do not say this to frighten you, Miss Vera, only, perhaps it is best for you to know the situation. The first thing necessary on this voyage is to show those fellows forward who is master aboard. But we've talked about it long enough now. I do not anticipate any locking of horns tonight for those lads will need to discuss plans among themselves first. Bascom will be waiting for you in the cabin, and I will join you presently."

I walked with her as far as the ladder, and watched until she disappeared. Forward I could perceive little outside the glow of the lanterns in the radius of which black, grotesque figures constantly passed and repassed. Occasionally a voice sang out some command, the words scarcely distinguishable.

"Mr. Leayord!" I sang out.

"Aye, aye, sir."

"Let the men knock off work for the present, and send the second mate's watch down for supper. You will take the deck, and it will be better to have another hand aft here at the wheel."

"Very well, sir."

I waited until he clambered heavily up the ladder and joined me, his huge figure outlined against the gleam of the binnacle light.

"I was pleased to see the way in which the crew took hold, Mr. Leayord," I said quietly, "and that Olson set them so good an example."

He crossed over to the rail and came back wiping his lips on his sleeve.

"Olson is a good man, Mr. Hollis; you made no mistake when you chose him for second officer, but I never saw a worse bunch of sea scum in any fo'castle than we've got aboard here, sir."

"They took hold, all right."

"Aye, for the once; they're a bit dazed yet, an' have had no time to talk it over among themselves."

"We'll hear from them later, you think?"

"Tomorrow, sir, or, perhaps to-night, as soon as they learn for sure the course we're steering. They are dead set against Hamburg."

"Why Hamburg, Mr. Leayord?"

"Well, sir, I don't just know myself, for I was the bosun, and the lads never talked to me very freely. From all I've heard, however, it's largely caused by what that fat bloke yer brought aboard with yer had to say about this dirty war breakin' out. I don't know the duffer's name, sir; but I hear he claims to be a millionaire, an' is willin' ter spend a lot o' coin, just to be took back ter New York. Cookie told me that he and the guy that goes by the name of Liverpool had quite a talk."

"Liverpool Red—yes, I've heard of him; he's the men's leader forward."

"Likely so; but there's others of the same kidney. If I was you, sir, I'd have a talk with Olson when he come on deck again. He'll tell you more'n I can."

I stood silent a moment, staring out into the black void.

"I presume, Mr. Leayord, I can confidently rely on your loyalty in case trouble develops?"

"You sure can, sir."

"And Olson?"

"He'll face it like a man; and although Masters is a bit of a fool, I'm guessing he can be counted on in a pinch."

"Are there any others?"

"That's hard to say, sir, offhand. I haven't been shipmates with them, or with any o' this crew long enough yet to size 'em up; but there are a few men forward who don't chum none with Liverpool's crowd. Olson would know 'em better than I."

"Well, the sooner we learn exactly how we stand in this matter the better. I'll relieve you as soon as I have a bite to eat."

In spite of its general dinginess of paint and furnishings, the main cabin had a look of coziness and comfort as I entered from the black gloom of the decks. Bascom and Miss Vera occupied seats on one side, while Olson, washed and brushed into a state of rare discomfort, sat alone opposite. A slim, narrow-chested man, his weak mouth partially concealed by a straggling mustache, and who answered to the name of Dade, acted as steward, but the boy, Moon, was doing most of the work. I drew out the single vacant chair and sat down.

"Well," I said pleasantly, breaking the rather awkward silence, "I do not exactly know where we are going, but we are on our way."

"The sea is rising, I judge," remarked Bascom.

"There is every promise of a rough night, but nothing to worry over. Dade, why did you set the table only for four? There is another passenger aboard."

"He has refused to mess aft, sir."

"Oh, he has! Well, possibly, I may have something to say as to that. Did he give any reason?"

Dade endeavored to hide a grin. "Not exactly, a reason, sir," he answered softly, "but I took it from what he said that he was not overly proud o' the way he wus marked up, sir."

I devoted a few minutes to the meal, but when Dade departed on an errand forward, decided I might just as well discuss the situation frankly.

"I am beginning to fear," I said quietly, "that Mr. Fergus McCann intends to make us all the trouble possible, and is even now behind most of the dissatisfaction on board. Do you know anything definite, Mr. Olson?"

The mate paused in his eating, with knife and fork uplifted.

"I had not heard, sir. May I ask if he is rich?"

"Quite so; he was a guest on the yacht Esmeralda. Now that I have answered these questions, Mr. Olson," and I stared into his rather emotionless face intently, "perhaps you will be kind enough to answer mine."

"I would know what I talk," he returned stubbornly. "He, this Mr. McCann, he offers ten thousand dollars to be put back in New York."

"So that's his game! Who brought the word forward?"

"Cookie, I think, sir. I overheard Jim White say that Mr. McCann had a belt on him with more money in it than they'd ever seen before in all their lives. The d—— fool—I beg your pardon, miss—didn't know no more than to show it to 'em. Why, the sight of it fairly drove them two wharf-rats crazy."

"There's half a dozen men forward," he went on slowly, "who would murder their grandfathers, sir, to get hold o' all that coin. The rest o' the crew are decent enough fellows as sailormen go, but there's liquor aboard yet, and all this 'ere war talk has scared 'em against continuing the voyage."

"McCann told them?"

"He told Cookie an' Liverpool, an' they circulated the news. 'Tis said we're chuck up with contraband, sir, an' that if we're took, every man jack of us will be chucked into an English or French prison."

"You expect a mutiny, then, Mr. Olson?"

"I don't know what'll stop it, sir," he answered solemnly. "The men went aft ter sorter take your measure, sir, and hear what it was you proposed doing. They ain't had no chance to git tergether an' talk since, but it's my notion they're ripe enough for the job."

I looked him squarely in the eyes.

"And how about you, Mr. Olson?"

"Me, sir?" his lips grinned. "If I hadn't intended for to stay with yer, sir, I never would 'a' took the job."

I reached out my hand, and our fingers locked.

"Good; with both my officers loyal, we'll find a way out of this mess. Come with me into the captain's stateroom, until we see what we can find there useful."

I disturbed things as little as possible, leaving any necessary research into Captain Hadley's private affairs to a later date, but sought with some anxiety through a roll of maps shoved behind the chest, Olson holding a lantern aloft, until I finally brought forth an old chart of the North Atlantic. We bent over this, outspread on the deck between us, and Olson's stubby forefinger traced the prickings of two voyages around the Orkneys into the North sea. The chart revealed, also, although in somewhat less detail, the German coastline. I was far from satisfied with this discovery, but nothing better could be hoped for. The total destruction of the charthouse forward made this find a godsend indeed, and we were fortunate in the fact that Captain Hadley preserved his old maps. Bidding Olson relieve the first officer, I remained there alone for some minutes familiarizing myself with the two charts, and outlining in my mind the safest course to pursue. As I sat there the rising wind began to hurl rain against the closed glass of the port, and I could hear the splash of the drops on the deck overhead. An oiled coat, belonging to the skipper, hung dangling from a hook, and I slipped it on, extinguishing the light before closing and locking the door. Leayord was alone at the table in the cabin, which had already been cleared of its dirtied dishes.

I had advanced to the companion steps when his voice stopped me.

"Captain," he said in hoarse whisper, "was you planning to go forward alone?"

"Certainly."

Leayord glanced about uneasily.

"Well, I wouldn't, sir, if I was you—not tonight anyhow. The men are that ugly there's no knowin' what might happen. Do you carry a gun, sir?"

"Why, no; I saw one there in a drawer of Captain Hadley's desk. You think the situation is as bad as that?"

"I'd go back and get it, sir," he said soberly, "an' then keep to the afterdeck till daylight."

An instant I stood staring at the rain beating fiercely against the glass of the companion, then turned back to the stateroom I had just left, slipped the revolver out of the desk drawer into my pocket, and re-entered the cabin.

I buttoned the oilskin closely about my throat and stepped out on deck, the wind driving the rain full into my face, and, for the moment, blinding me.

CHAPTER XIII.

I Make McCann Prisoner.

It was evident enough in my mind that there were two elements of evil aboard—liquor and McCann's wealth. Either alone would have been bad enough, but thus combined, they rendered our situation more than perilous—and I was facing this peril comparatively alone. Masters would doubtless perform his duty, but his work would keep him below, and he would prove of slight value on deck. My impression of Leayord and Olson was favorable enough; they were, undoubtedly, the very best material on board; yet, from long association with the forecastle, it was only natural that their sympathies should be with their mates forward. An efficient sea officer is not made overnight, and either man might fail me at a pinch. As to Bascom, he could never be counted on; while as regards Vera—but at thought of her, the cold perspiration beaded my temples with a horror of what might yet occur on board. No, the burden was mine, mine practically alone. It was up to me to strike first, to assert my authority, and then maintain it. This was the one thing which would impress the mind of the sailor—a quick decision, a swift blow. This very night we must win the ship, if ever, and the first man for me to gain control over must be Fergus McCann.

I reached this decision coolly and deliberately, yet with no clear plan of action in my mind. At that moment Olson sang out some order from the rail overhead, and I could hear the bustle of the watch along the black deck.

My eyes distinguished no figures, but suddenly a blaze of lightning seemed to rip the sky asunder, and, in the swift, ghastly glare, I perceived two human figures against the starboard rail, safe from observation beneath a boat swung in davits. The man directly facing me, his countenance illumined for a single instant by the flame, was Liverpool Red. The very postures of the two men, the position chosen amidships, and in the shadow, led me to identify Liverpool's companion and guess their purpose. Very well, there was no better time than now to start my task. Yet I had scarcely taken a step forward when I became aware that their secret conference was over, and that the two were separating. I could not positively determine the movement in the intense darkness, but I felt assured that one of the two men had moved forward, crouching along the rail, leaving the second man standing alone. Unquestionably the one thus left would be McCann.

I waited motionless until the fellow stealing away was well beyond earshot, and then advanced straight across the pitching deck. The fellow, taken quite by surprise, stared at my indistinct figure, unable to determine my identity until I spoke. There was that about his figure, black as the night was, which convinced me he was the man sought.

"Well, McCann," I said shortly, "you seem to prefer associating with the crew, rather than with your own class aft. What is the game?"

"I was not aware there were any of my own class on board," he answered sneeringly.

"Perhaps you have not yet discovered who are on board. Do you chance to know who owns this vessel and cargo?"

"Who owns them!" he laughed coarsely. "What difference does that make?"

"It depends entirely on whether or not you have any decent manhood left in you," I said coldly, "and, frankly, I do not believe you have. However, the truth can do no harm, and we'll understand each other better. This ship and cargo are owned by Philip Bascom of Philadelphia."

"Bascom! By God! You don't mean it?"

"But I do; and more than that, all his fortune is invested in this one enterprise; that is why I consented to assume command, and sail the Indian Chief across to Germany."

There was a moment's silence.

"Bascom," he repeated at last. "You learned this from the ship's papers?"

"I learned it from his own lips—the man himself is on board."

He breathed heavily from surprise; then laughed.

"Lord, this is some news, Hollis," he managed to ejaculate, "but surely you hardly expect me to be sympathetic, do you?"

"No, I hardly expect it," unable to disguise my intense disgust at his tone. "However, Philip Bascom is here, ruined by your persecution, crippled for life by the cowardly bullet—"

"Now, look here, Hollis," he broke in, "if you think I am going to stand for your bullying any longer, you're mistaken. It's my turn to talk."

"Yours! What will you talk with—money?"

"Perhaps," he sneered, "and with men also. In the first place, I might as well tell you, I don't give a d—— who owns this ship. Of course, you gave me a jolt by saying that this man Bascom was on board, but, after all, that's nothing to me. We had our fight, and he learned the same lesson others have, that Fergus McCann is perfectly able to take care of himself. Now I'm ready to teach the same thing to Mr. Robert Hollis of Chicago. This is no small boat in mid-Atlantic, where you can bully me because of your physical strength. You made a mistake, Hollis, playing me for a fool. I've got your number already."

"You are quite sure of that?"

"You bet I am, but I'm not going to say any more about it tonight. Tomorrow I'll talk with you again."

He turned away, the shrug of his shoulders picturing contempt, and a studied insolence which set my blood boiling. With the grip of one hand I flung him back against the rail, and held him there.

"No, we'll discuss it right now," I said sternly, "but I'll do the talking in your place. You haven't anything to tell me. I know what your plans are already. I know what you are attempting to accomplish, and I know your purpose. You have found a few ruffians forward who will take your dirty gold. To gain control of the others, you have played up the war scare. You think now that the time has come when you can act—is that so?"

He wriggled in an effort to break free of my grip, and I let go of him in utter contempt.

"You would find out," he snarled angrily, "if I called for help."

"But you are not going to call for help, for if you even open your lips for that purpose, you are going to die right where you stand. Take that seriously, McCann. You are endeavoring to incite mutiny on board, and under the law of the sea, I can kill you for it. Now, I confess my feeling toward you is not a tender one, but there is going to be no bloodshed if I can avoid it. Where have you bunked?"

Developments of a startling nature follow quickly. They are related in the next installment.

(TO BE CONTINUED.)

Suitable Attire.

"What sort of voting costume would you suggest for a suffragette of mature years?"

"If the lady can swing a great many votes, I would suggest a tailored suit in loud checks, a red necktie and a gray derby hat, in order to make her look as much as possible like a political boss, omitting, of course, the big black cigar and the profane language."

The KITCHEN CABINET

And this is the Truth as I see it;
  Whoever cries out for peace,
Must think it and live it and be it,
  And the wars of the world will cease.

MORE GOOD THINGS.

Peanut butter is an invaluable food, all ready to use, and new ways to combine it are springing up every day.

Peanut Butter Soup.—Take three tablespoonfuls of peanut butter, add a tablespoonful of flour, and stir over the heat until well blended, then add a little cold milk until smooth, and then a pint of scalded milk which has been seasoned with a slice of onion, salt and paprika to taste. When hot serve with toasted crackers or croutons.

Peanut Butter Biscuits.—Roll out rather thin a nice biscuit dough, spread with peanut butter, roll up, cut in pinwheel rolls and put to bake in a well greased dripping pan. Sprinkle the biscuits with a little brown sugar if desired or bake plain. For an emergency sandwich when on a trip, two slabs of sweet chocolate put together with peanut butter makes a most satisfying meal.

Luncheon Salad.—A slice of tomato on headlettuce, a few tips of asparagus, and over all a sprinkling of cream cheese put through a sieve or ricer. Serve with mayonnaise dressing.

Oatmeal Muffins.—Melt four tablespoonfuls of butter in a cupful of warm, cooked oatmeal, sift together a fourth of a cupful of sugar, a cupful of flour, four teaspoonfuls of baking powder and a teaspoonful of salt, add the oatmeal, one egg beaten light, and a half cupful of milk. Mix thoroughly and bake in hot well-buttered iron gem pans for 25 minutes.

Orange Jelly.—Cut two oranges and one lemon in quarters, then cut each quarter into thin slices, there will be a pint of fruit, over this pour three pints of water and let stand over night. The next day let it cook until the peel is very tender, then drip through a jelly bag, pressing out all the juice. Add two and a half cupfuls of hot sugar and cook until a jelly is formed. This will make three glasses. Add the peeling to one and a half cupfuls of sugar and a fourth of a cupful of water, simmer until all the sugar is absorbed. This may be used for various puddings and as a garnish as well as a flavor for cake.

It is easy to sit in the sunshine and
  talk to the man in the shade,
It is easy to float in the well trimmed
  boat and point out the places to
  wade,
But once we pass into the shadow—
  we worry and fret and frown
And our length from the bank we
  shout for a plank or throw up our
  hands and go down.

HELPFUL AND ECONOMICAL HINTS.

When clothing becomes shiny rub well with a piece of emery paper. Spots on suede shoes may be removed with emery paper. When machine needles become dull, sharpen them by stitching once or twice through a piece of sandpaper or coarse emery paper. A hook and eye sewed at the bottom of a placket, then clamped with a tackhammer will not come unhooked and will bear the strain without tearing the placket. A piece of gum camphor put away with the silver will keep it from tarnishing. An electric fan placed in front of a radiator will by its motion set the air circulating through the coils very quickly.

The lower cellar stair as well as the attic stair may be made with a hinge and will make a fine receptacle for various necessary things. Do not put oil mops or polishing rags in such a tight place, as spontaneous combustion may cause a serious fire.

A clothespin is a handy thing to hold a hot dish while stirring on the stove.

A clothespin bag with a clothes hanger for a top may be pushed along on the line and is always ready to use.

A nutcracker may be used as a wrench on small cans and bottles as well as the nuts on sewing machines and wringers.

When using a patch on wall paper tear the patch instead of cutting it; it will be less noticeable.

An eggshell with a pricked hole in it makes a very good funnel in an emergency. A piece of letter paper rolled in the shape of a funnel will also serve nicely. Heavy wallpaper of a light color may be covered with calsomine of any special tint at very little expense.

A paper or wooden tub or bowl is best to use for washing dishes, as they are less apt to be nicked by striking the sides.

A coat of white paint on the outside of a screen door will keep those on the outside from looking in.

Nellie Maxwell

They Liked It.

"Jeff says he bought some powders to kill bugs on cabbage plants."

"Was it a success?"

"Yes, but not in the way Jeff expected. He says after the first application those blamed bugs followed him into the house for more."

BEST OUTFIT FOR SPRAYING

Hand Sprayer Is Sufficient for Two or Three Acres—Keep Chemicals Well Stirred.

Size of orchard, nearness to water, and size of trees are big factors in determining the size of a sprayer to buy. Generally the following suggestions hold good. A hand sprayer is sufficient for two or three acres; for three to ten acres of full bearing trees a small power outfit equipped with one lead of hose will do the work. A duplex outfit is needed for an orchard of from 10 to 20 acres and a triplex outfit for 20 to 30 acres. Keep the chemicals in your solution well stirred. A curved-bottom cypress tank is the best. A belt connection from the engine to the pump is better than a chain. A 25-foot hose is the most convenient length.

Foot-Rot.

Look out for foot-rot. Wet ground will produce it

SELECT EGGS FOR HATCHING

Never Use Those From Entire Flock Indiscriminately—Keep Breeders in Separate Pen.

Never set eggs from an entire flock indiscriminately, but select the best birds and give them a separate place, or pen up the flock and let this pen run at liberty during the hatching season. The latter is the better plan because the eggs will be more fertile and hatch better.

CULL OUT WEAKLING CHICKS

Never Breed From Fowl That Is Not Just "Full" of Vitality—Avoid "Crow" Head.

One decided aid to better vitality in the flocks is to never let a chick live that shows low vitality; "kill every weakling" should be the wide-awake poultryman's watchword; and never breed from a bird that is not just "full" of vigor and vitality—that is not in the most robust health. The indications of weakness and low vitality were considered, the conditions of the eye being one of the safest guides; a dull, lusterless eye is a certain sign of weak vitality. A long thin shank and thin body is another indication of weakness, and we should avoid a "crow" head—a long, thin head—that is a sure sign of lack of vitality and vigor.

Doesn't Enlarge Profits.

Enlarging the flock does not always enlarge the profits.

PATROL WORK IS FULL OF THRILLS FOR MEN OF NAVY

Blindfold Campaign of Submarine Chasing Is Replete With Surprises.

"TORPEDO FISH" IS FOOLER

Interesting Sidelight on Work of Navy in Fighting U-Boat Peril—Many an Encounter With a Table Leg or a Swab Handle.

New York.—Leaves from the diary of the commander of a destroyer and sidelights on the thrills that come to the men aboard the vessels of the United States navy in the war zone were made public in a statement issued by the navy publicity bureau of 818 West Thirty-ninth street.

"It is stimulating from the maze of convoy and submarine search work to untangle vivid threads of adventure," the statement said. "For the first half of a certain month a few points stand out for emphasis or visualization."

They are these:

"Enemy operations have been largely in the southern part of our area. Calm weather and the moon have favored them. Merchant ships have assembled thickly at the rendezvous, and the sight has been frequent of one destroyer—often of the older type—with four or five great vessels on her hands before others assigned have joined the escort.

"Many rescues of crews have been successfully made.

"In 'behind the net,' however, it is less easy to borrow the lookout's eyes, set for the pin thrust of the distant periscope through the blue frets of the quiet, treacherous ocean. Or to hear in the dark small hours the throbbing general quarters alarm, the blowers hum in a racing crescendo, and the gun crews—like Tweedledums and Tweedledees in their slate-hued life preservers—tear the covers from the ammunition boxes. It is a tension to bear down at 25 knots upon the lean tramp that makes no response to the flap-flap of your searchlight 'blinker, spelling out the challenge; to distinguish whether the phosphorescent streak that at night flashes across your bow is made by a Hun torpedo or the animal skippers have named the 'torpedo fish' a blackfish or porpoise. Survivors come mutely up the side, often Lascars and Cingalese, muttering of Allah and America indistinguishably. Given cigarette 'makes,' they 'roll a pill,' calmly stick it behind the ear, and as the surgeon uncorks his iodoform in the washroom for gashes made by wreckage, some old gunner of the reserve takes pneumonia from his hours of exposure, and is put ashore at X say, on a stretcher, and with his hours of life numbered.

Two Ships in the Thick of It.

The Y and the Z have been in the thick of such incidents. At 18 minutes past 1 o'clock on the morning of the 11th, the X was steaming singly at 15 knots, with a quiet sea and good visibility for that hour. The captain was smoking a cigar on the bridge, wondering, he told me, whether Mrs. G. would ever have the pleasure of putting roses on her old man's tomb up the Hudson. A heavy explosion, without flash, shook the darkness about three miles over the port bow. A whistle bleated three times, and the radio shack called up the tube that the steamer Kioto was torpedoed 20 miles southwest by west of Fastnet Light.

"The X switched on her general alarm for battle, changed her course to 228 degrees true and plunged thither at full speed. In two minutes she made out the staccato sparks of a blinker, repeating over and over. 'Torpedoes!—Torpedoes!' In five, she changed her course 19 degrees faster east, and at half-past one the flush decks of a single stacker of about 4,000 tons loomed over the cocoa matting and thrust men about a gun.

"She was now nearing the freighter, bow on, a bit to port. Suddenly out of the darkness to the right a livid beam rushed straight and shimmering at her under the sea. We put over full right rudder. The torpedo passed close aboard across his bows, to the left, just ahead of the Kioto, and as the luminous wake receded like a muffled searchlight it seemed to break spent upon the near horizon. 'Anyhow,' said the captain afterward, 'it was worth crossing the ocean to see and feel that instant. It made those roses seem a lot nearer.

"The destroyer began to circle the Kioto at high speeds, with alternate right and left rudder. Her blinker stammered on, that she had been hit in the port quarter abaft the engine room. Then the lights ceased. Ten minutes after two loaded lifeboats emerged out of the starboard darkness. They held 39 men, including the second officer and a tall engineer, wounded in the leg. Soon after two o'clock all were safe aboard the X. She continued to circle the steamer, which was slowly sinking by the stern. Alarm of the disaster had been flashed to adjacent patrols. The Y nosed into sight and stood by, likewise H. M. S. ——, who signaled that she had taken aboard 16 more survivors and the Kioto's impetuous captain—he that returned to the wreck. At 20 minutes past 3 the freighter sank, leaving only floating wreckage and a Coston light, which flickered up from time to time until daybreak like a lantern in a lifeboat.

"Neither submarine nor destroyer had used gunfire. The German was not even sighted. Only two torpedoes were known to have been fired—the one which crossed the X's bow, and the one which settled the Kioto.

"Only two days before the X had had a better brush with a 'sub,' and may have got her; skippers put in the claim on evidence as good. She was steaming in the same area, under like conditions, when at ten minutes past eight in the evening she sighted a pronounced wake. One could even estimate the speed at which the submarine had been submerged—about eight knots.

"The X worked up to full speed, turned with left rudder, and ran down on the right hand side of the slick. In six minutes she had reached its 'head,' ready to drop a depth charge; four minutes to run to the end of the wake, two more to allow for the 'sub's' run beyond—and she tripped the pump. With the charge, which was set for 80 feet, was dropped a calcium torch pot to mark the place. The explosion audibly jarred the blowers, and within three minutes bubbles swirled to the surface. But in the 20 minutes that the X circled the vicinity, hoping the injured enemy would rise to the surface, no further sign of damage was revealed.

Four days later the —— turned her convoy over to the —— at two hours before daylight, and returned to her regular patrol. About five o'clock in the morning she took under her wing the steamer Pentwy, bound for Manchester. At a quarter to eight Captain Lyons sent a quartermaster aloft to the main track to clear a fouled commission pennant. Scarcely had the quartermaster reached it when he called down to the watch on the after deckhouse, 'Periscope, two points abaft the port beam!' The thing was 1,500 to 3,000 yards from the ——, who was 400 yards ahead of the ——, one point on her port bow. The whole body of the submarine was distinct to the quartermaster though, oddly, invisible both to the bridge and the fore top lookout. The periscope seemed headed westward, and she at once started to submerge. Within 20 seconds, as the destroyer came to general quarters, first one torpedo, instantly followed by a second, radiated from the point where she had vanished. Both were making surface runs, for the sub's conning tower hatch still must have been near the surface. They threw spray up fully 20 feet, clearly visible against the choppy sea. All hands on the bridge and decks saw them—as did the ——, astern; for she swung sharply to starboard, presenting her tail to them. At the same moment the —— sounded six blasts on her whistle, followed by two, to mean that the attack was being made to port.

Miss by Small Margin.

"Both torpedoes missed the ——, but by the smallest margin. The ——, making high speed, swung with full left rudder toward the submarine. At five minutes past nine o'clock a third torpedo was fired at the convoy, apparently from another submarine, about 200 yards ahead of the first. It approached from the broad on the ——'s beam, also making a surface run at about the same range as the first two, and missed.

"But now the —— was in sight, some four miles distant, ready to relieve the —— of her convoy. She, too, made full headway on signal, 'Make all speed to us; submarine in sight;' and searched in the vicinity of the ——, while the —— followed the 'sub's' slicks. The first wake tended east, but in ten minutes lost itself among the whitecaps. The second and plainer one led westward, irregularly, as if the 'sub' had been zigzagging. A depth charge was dropped at its end, but a half hour's search found proof of nothing. The —— really had saved herself by quick and efficient handling.

"The ——'s adventure with the steamship Tarquah cannot be told until that flivver comes into port. The ——, —— and —— had a hand in it; and the first's account of the sinking of the Obuasi—where she arrived long after the deed—shows the defective functioning and poor marksmanship of German torpedoes. The —— reports to the same effect. At half-past ten o'clock on the morning of the 13th she picked up in her sea area two boats and 23 survivors of the Greek steamship Charilaos Tricoupis. Two hours before, two torpedoes had been fired at her, at an interval of 25 minutes. The first struck the starboard quarter, between rudder and propeller, and, failing to detonate, did little damage; but the crew abandoned ship. The second hit the starboard side amidship, blowing up the Greek so that she sank in five minutes. Between the two shots the submarine came to the surface, but instantly submerged. Not a man appeared on deck. This submarine, like all others reported for the fortnight, are declared to have been of the U-50 to 60 types.

"So, as yet, no blood has been spilled on any of our gun mattings. The mean, blindfold campaign continues with small apparent losses either in 'subs' or shipping. We follow oil slicks with the thrill of a woodsman striking a strange cross-trail in the forest; we mass guns over a 'periscope' that turns into a swabhandle or table leg; vide the ——'s and ——'s famous battle with a ventilator off the French coast. And the —— and ——, I hear, have celebrated the chagrin and thrills of it all in ballads which I shall try to send you."

German People Are Starving

Teuton Wife of American Soldier Tells of Conditions There.

HARD FIGHT TO GET AWAY

Woman Has Harrowing Experiences in Trying to Leave Country—Says People Are Fleeing When They Can.

San Francisco.—The real conditions in the fatherland were described here by Mrs. George B. Szadelski, the German wife of an American soldier. Mrs. Szadelski arrived here after a plucky fight of over five months to get herself and three children out of Germany and over here, where she could join her husband, who is with the quartermaster's corps, United States army, at Honolulu.

"Germany is starving. Her people do not want war, and are fleeing the country when they can. Not so much the war, but food, and where it is to come from, is what the German people are thinking of," said Mrs. Szadelski.

"When the people crowd up too eagerly in the street, waiting to get their small bit of food, men come out with whips, or pour hot water on them to make them orderly. That is in the town of Mecklenburg; there we stand waiting two hours or more in rain or snow. But in Berlin it is worse, and men and women wait in line all night.

Buy With Cards.

"All things are bought by cards, even clothing and shoes. If I need a new suit or my little boy needs new underwear, I must go to the officials and explain the need and show them the worn things.

"A grown man or woman gets half a pound of meat a week, a tenth of a pound of butter and three pounds of bread. This bread is made of potatoes and a kind of green turnip, and is so soggy that only a little can be eaten at a time. There is no coffee, except a kind made from the turnip, and there is no rice. One gets a fourth of a pound of sugar, and there is no soap at all.

"Famine? There's a famine now. The rich—yes, the rich can buy a goose, but they must pay for it 175 marks (about $44). I have seen wild ravens sold in Berlin for three and one-half marks. Everything is much worse than America thinks.

"Yet there will be no revolution. That is because there are no men at home to make a revolution. The women look at one another and shake their heads. 'When the men come back,' is the word they pass around. We have men of fifty and seventy for home defense, and as doctors and officials. And we have boys of fourteen. All other men are in the army."

Mrs. Szadelski said she never received $500 which her husband sent her last February. A woman friend of hers who went to the authorities for money sent from America was told that no more money from the source would be given to any private person.

Do Not Want War.
